AN ACT Entitled the “Disaster Relief Act Amendments of 1974”.

*Be it enacted by the Senate and House of Representatives of the  
United States of America in Congress assembled,*

**SECTION 1. SHORT TITLE.**

This Act may be cited as the “Robert T. Stafford Disaster Relief and Emergency Assistance Act”.

【42 U.S.C. 5121 note】

**TITLE I—FINDINGS, DECLARATIONS, AND DEFINITIONS**

**FINDINGS AND DECLARATIONS**

SEC. 101. (a) The Congress hereby finds and declares that—

(1) because disasters often cause loss of life, human suffering, loss of income, and property loss and damage; and

(2) because disasters often disrupt the normal functioning of governments and communities, and adversely affect individuals and families with great severity;

special measures, designed to assist the efforts of the affected States in expediting the rendering of aid, assistance, and emergency services, and the reconstruction and rehabilitation of devastated areas, are necessary.

(b) It is the intent of the Congress, by this Act, to provide an orderly and continuing means of assistance by the Federal Government to State and local governments in carrying out their responsibilities to alleviate the suffering and damage which result from such disasters by—

(1) revising and broadening the scope of existing disaster relief programs;

(2) encouraging the development of comprehensive disaster preparedness and assistance plans, programs, capabilities, and organizations by the States and by local governments;

(3) achieving greater coordination and responsiveness of disaster preparedness and relief programs;

(4) encouraging individuals, States, and local governments to protect themselves by obtaining insurance coverage to supplement or replace governmental assistance;

(5) encouraging hazard mitigation measures to reduce losses from disasters, including development of land use and construction regulations;

(6) providing Federal assistance programs for both public and private losses sustained in disasters; and

(7) identifying and improving the climate and natural hazard resilience of vulnerable communities.

[42 U.S.C. 5121]

#### DEFINITIONS

SEC. 102. As used in this Act—

(1) **EMERGENCY.**—“Emergency” means any occasion or instance for which, in the determination of the President, Federal assistance is needed to supplement State and local efforts and capabilities to save lives and to protect property and public health and safety, or to lessen or avert the threat of a catastrophe in any part of the United States.

(2) **MAJOR DISASTER.**—“Major disaster” means any natural catastrophe (including any hurricane, tornado, storm, high water, winddriven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, or drought), or, regardless of cause, any fire, flood, or explosion, in any part of the United States, which in the determination of the President causes damage of sufficient severity and magnitude to warrant major disaster assistance under this Act to supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage, loss, hardship, or suffering caused thereby.

(3) “United States” means the fifty States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

(4) “State” means any State of the United States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

(5) “Governor” means the chief executive of any State.

(6) **INDIAN TRIBAL GOVERNMENT.**—The term “Indian tribal government” means the governing body of any Indian or Alaska Native tribe, band, nation, pueblo, village, or community that the Secretary of the Interior acknowledges to exist as an Indian tribe under the Federally Recognized Indian Tribe List Act of 1994 (25 U.S.C. 479a et seq.).

(7) **INDIVIDUAL WITH A DISABILITY.**—The term “individual with a disability” means an individual with a disability as de-

defined in section 3(2) of the Americans with Disabilities Act of 1990 (42 U.S.C. 12102(2)).

(8) LOCAL GOVERNMENT.—The term “local government” means—

(A) a county, municipality, city, town, township, local public authority, school district, special district, intrastate district, council of governments (regardless of whether the council of governments is incorporated as a nonprofit corporation under State law), regional or interstate government entity, or agency or instrumentality of a local government;

(B) an Indian tribe or authorized tribal organization, or Alaska Native village or organization, that is not an Indian tribal government as defined in paragraph (6); and

(C) a rural community, unincorporated town or village, or other public entity, for which an application for assistance is made by a State or political subdivision of a State.

(9) “Federal agency” means any department, independent establishment, Government corporation, or other agency of the executive branch of the Federal Government, including the United States Postal Service, but shall not include the American National Red Cross.

(10) PUBLIC FACILITY.—“Public facility” means the following facilities owned by a State or local government:

(A) Any flood control, navigation, irrigation, reclamation, public power, sewage treatment and collection, water supply and distribution, watershed development, or airport facility.

(B) Any non-Federal-aid street, road, or highway.

(C) Any other public building, structure, or system, including those used for educational, recreational, or cultural purposes.

(D) Any park.

(11) PRIVATE NONPROFIT FACILITY.—

(A) IN GENERAL.—The term “private nonprofit facility” means private nonprofit educational (without regard to the religious character of the facility), center-based childcare, utility, irrigation, emergency, medical, rehabilitational, and temporary or permanent custodial care facilities (including those for the aged and disabled) and facilities on Indian reservations, as defined by the President.

(B) ADDITIONAL FACILITIES.—In addition to the facilities described in subparagraph (A), the term “private nonprofit facility” includes any private nonprofit facility that provides essential social services to the general public (including museums, zoos, performing arts facilities, community arts centers, community centers, libraries, homeless shelters, senior citizen centers, rehabilitation facilities, shelter workshops, food banks, broadcasting facilities, houses of worship, and facilities that provide health and safety services of a governmental nature), as defined by the President. No house of worship may be excluded from this definition because leadership or membership in the or-

ganization operating the house of worship is limited to persons who share a religious faith or practice.

(12) CHIEF EXECUTIVE.—The term “Chief Executive” means the person who is the Chief, Chairman, Governor, President, or similar executive official of an Indian tribal government.

[42 U.S.C. 5122]

**SEC. 103. REFERENCES.**

Except as otherwise specifically provided, any reference in this Act to “State and local”, “State or local”, “State, and local”, “State, or local”, or “State, local” (including plurals) with respect to governments or officials and any reference to a “local government” in sections 406(d)(3) and 417 is deemed to refer also to Indian tribal governments and officials, as appropriate.

[42 U.S.C. 5123]

## **TITLE II—DISASTER PREPAREDNESS AND MITIGATION ASSISTANCE**

### **FEDERAL AND STATE DISASTER PREPAREDNESS PROGRAMS**

SEC. 201. (a) The President is authorized to establish a program of disaster preparedness that utilizes services of all appropriate agencies and includes—

- (1) preparation of disaster preparedness plans for mitigation, warning, emergency operations, rehabilitation, and recovery;
- (2) training and exercises;
- (3) postdisaster critiques and evaluations;
- (4) annual review of programs;
- (5) coordination of Federal, State, and local preparedness programs;
- (6) application of science and technology;
- (7) research.

(b) The President shall provide technical assistance to the States in developing comprehensive plans and practicable programs for preparation against disasters, including hazard reduction, avoidance, and mitigation; for assistance to individuals, businesses, and State and local governments following such disasters; and for recovery of damaged or destroyed public and private facilities.

(c) Upon application by a State, the President is authorized to make grants, not to exceed in the aggregate to such State \$250,000, for the development of plans, programs, and capabilities for disaster preparedness and prevention. Such grants shall be applied for within one year from the date of enactment of this Act. Any State desiring financial assistance under this section shall designate or create an agency to plan and administer such a disaster preparedness program, and shall, through such agency, submit a State plan to the President, which shall—

- (1) set forth a comprehensive and detailed State program for preparation against and assistance following, emergencies and major disasters, including provisions for assistance to individuals, businesses, and local governments; and

(2) include provisions for appointment and training of appropriate staffs, formulation of necessary regulations and procedures and conduct of required exercises.

(d) The President is authorized to make grants not to exceed 50 per centum of the cost of improving, maintaining and updating State disaster assistance plans, including evaluations of natural hazards and development of the programs and actions required to mitigate such hazards, except that no such grant shall exceed \$50,000 per annum to any State.

[42 U.S.C. 5131]

#### DISASTER WARNINGS

SEC. 202. (a) The President shall insure that all appropriate Federal agencies are prepared to issue warnings of disasters to State and local officials.

(b) The President shall direct appropriate Federal agencies to provide technical assistance to State and local governments to insure that timely and effective disaster warning is provided.

(c) The President is authorized to utilize or to make available to Federal, State, and local agencies the facilities of the civil defense communications system established and maintained pursuant to section 611(c) of this Act or any other Federal communications system for the purpose of providing warning to governmental authorities and the civilian population in areas endangered by disasters.

(d) The President is authorized to enter into agreements with the officers or agents of any private or commercial communications systems who volunteer the use of their systems on a reimbursable or nonreimbursable basis for the purpose of providing warning to governmental authorities and the civilian population endangered by disasters.

[42 U.S.C. 5132]

#### SEC. 203. PREDISASTER HAZARD MITIGATION.

(a) DEFINITION OF SMALL IMPOVERISHED COMMUNITY.—In this section, the term “small impoverished community” means a community of 3,000 or fewer individuals that is economically disadvantaged, as determined by the State in which the community is located and based on criteria established by the President.

(b) ESTABLISHMENT OF PROGRAM.—The President may establish a program to provide technical and financial assistance to States and local governments to assist in the implementation of predisaster hazard mitigation measures that are cost-effective and are designed to reduce injuries, loss of life, and damage and destruction of property, including damage to critical services and facilities under the jurisdiction of the States or local governments.

(c) APPROVAL BY PRESIDENT.—If the President determines that a State or local government has identified natural disaster hazards in areas under its jurisdiction and has demonstrated the ability to form effective public-private natural disaster hazard mitigation partnerships, the President, using amounts in the National Public Infrastructure Predisaster Mitigation Fund established under subsection (i) (referred to in this section as the “Fund”), may provide

technical and financial assistance to the State or local government to be used in accordance with subsection (e).

(d) STATE RECOMMENDATIONS.—

(1) IN GENERAL.—

(A) RECOMMENDATIONS.—The Governor of each State may recommend to the President not fewer than five local governments to receive assistance under this section.

(B) DEADLINE FOR SUBMISSION.—The recommendations under subparagraph (A) shall be submitted to the President not later than October 1, 2001, and each October 1st thereafter or such later date in the year as the President may establish.

(C) CRITERIA.—In making recommendations under subparagraph (A), a Governor shall consider the criteria specified in subsection (g).

(2) USE.—

(A) IN GENERAL.—Except as provided in subparagraph (B), in providing assistance to local governments under this section, the President shall select from local governments recommended by the Governors under this subsection.

(B) EXTRAORDINARY CIRCUMSTANCES.—In providing assistance to local governments under this section, the President may select a local government that has not been recommended by a Governor under this subsection if the President determines that extraordinary circumstances justify the selection and that making the selection will further the purpose of this section.

(3) EFFECT OF FAILURE TO NOMINATE.—If a Governor of a State fails to submit recommendations under this subsection in a timely manner, the President may select, subject to the criteria specified in subsection (g), any local governments of the State to receive assistance under this section.

(e) USES OF TECHNICAL AND FINANCIAL ASSISTANCE.—

(1) IN GENERAL.—Technical and financial assistance provided under this section—

(A) shall be used by States and local governments principally to implement predisaster hazard mitigation measures that are cost-effective and are described in proposals approved by the President under this section; and

(B) may be used—

(i) to support effective public-private natural disaster hazard mitigation partnerships;

(ii) to improve the assessment of a community's vulnerability to natural hazards;

(iii) to establish hazard mitigation priorities, and an appropriate hazard mitigation plan, for a community; or

(iv) to establish and carry out enforcement activities and implement the latest published editions of relevant consensus-based codes, specifications, and standards that incorporate the latest hazard-resistant designs and establish minimum acceptable criteria for the design, construction, and maintenance of residen-

tial structures and facilities that may be eligible for assistance under this Act for the purpose of protecting the health, safety, and general welfare of the buildings' users against disasters.

(2) DISSEMINATION.—A State or local government may use not more than 10 percent of the financial assistance received by the State or local government under this section for a fiscal year to fund activities to disseminate information regarding cost-effective mitigation technologies.

(f) ALLOCATION OF FUNDS.—

(1) IN GENERAL.—The President shall award financial assistance under this section on a competitive basis for mitigation activities that are cost effective and in accordance with the criteria in subsection (g).

(2) MINIMUM AND MAXIMUM AMOUNTS.—In providing financial assistance under this section, the President shall ensure that the amount of financial assistance made available to a State (including amounts made available to local governments of the State) for a fiscal year—

(A) is not less than the lesser of—

(i) \$575,000; or

(ii) the amount that is equal to 1 percent of the total funds appropriated to carry out this section for the fiscal year; and

(B) does not exceed the amount that is equal to 15 percent of the total funds appropriated to carry out this section for the fiscal year.

(3) REDISTRIBUTION OF UNOBLIGATED AMOUNTS.—The President may—

(A) withdraw amounts of financial assistance made available to a State (including amounts made available to local governments of a State) under this subsection that remain unobligated by the end of the third fiscal year after the fiscal year for which the amounts were allocated; and

(B) in the fiscal year following a fiscal year in which amounts were withdrawn under subparagraph (A), add the amounts to any other amounts available to be awarded on a competitive basis pursuant to paragraph (1).

(g) CRITERIA FOR ASSISTANCE AWARDS.—In determining whether to provide technical and financial assistance to a State or local government under this section, the President shall provide financial assistance only in States that have received a major disaster declaration in the previous 7 years, or to any Indian tribal government located partially or entirely within the boundaries of such States, and take into account—

(1) the extent and nature of the hazards to be mitigated;

(2) the degree of commitment of the State or local government to reduce damages from future natural disasters;

(3) the degree of commitment by the State or local government to support ongoing non-Federal support for the hazard mitigation measures to be carried out using the technical and financial assistance;

(4) the extent to which the hazard mitigation measures to be carried out using the technical and financial assistance con-

tribute to the mitigation goals and priorities established by the State;

(5) the extent to which the technical and financial assistance is consistent with other assistance provided under this Act;

(6) the extent to which prioritized, cost-effective mitigation activities that produce meaningful and definable outcomes are clearly identified;

(7) if the State or local government has submitted a mitigation plan under section 322, the extent to which the activities identified under paragraph (6) are consistent with the mitigation plan;

(8) the opportunity to fund activities that maximize net benefits to society;

(9) the extent to which assistance will fund mitigation activities in small impoverished communities;

(10) the extent to which the State, local, Indian tribal, or territorial government has facilitated the adoption and enforcement of the latest published editions of relevant consensus-based codes, specifications, and standards, including amendments made by State, local, Indian tribal, or territorial governments during the adoption process that incorporate the latest hazard-resistant designs and establish criteria for the design, construction, and maintenance of residential structures and facilities that may be eligible for assistance under this Act for the purpose of protecting the health, safety, and general welfare of the buildings' users against disasters;

(11) the extent to which the assistance will fund activities that increase the level of resiliency; and

(12) such other criteria as the President establishes in consultation with State and local governments.

(h) FEDERAL SHARE.—

(1) IN GENERAL.—Financial assistance provided under this section may contribute up to 75 percent of the total cost of mitigation activities approved by the President.

(2) SMALL IMPOVERISHED COMMUNITIES.—Notwithstanding paragraph (1), the President may contribute up to 90 percent of the total cost of a mitigation activity carried out in a small impoverished community.

(i) NATIONAL PUBLIC INFRASTRUCTURE PREDISASTER MITIGATION ASSISTANCE.—

(1) IN GENERAL.—The President may set aside from the Disaster Relief Fund, with respect to each major disaster, an amount equal to 6 percent of the estimated aggregate amount of the grants to be made pursuant to sections 403, 406, 407, 408, 410, 416, and 428 for the major disaster in order to provide technical and financial assistance under this section and such set aside shall be deemed to be related to activities carried out pursuant to major disasters under this Act.

(2) ESTIMATED AGGREGATE AMOUNT.—Not later than 180 days after each major disaster declaration pursuant to this Act, the estimated aggregate amount of grants for purposes of paragraph (1) shall be determined by the President and such esti-

mated amount need not be reduced, increased, or changed due to variations in estimates.

(3) NO REDUCTION IN AMOUNTS.—The amount set aside pursuant to paragraph (1) shall not reduce the amounts otherwise made available for sections 403, 404, 406, 407, 408, 410, 416, and 428 under this Act.

(j) MULTHAZARD ADVISORY MAPS.—

(1) DEFINITION OF MULTHAZARD ADVISORY MAP.—In this subsection, the term “multihazard advisory map” means a map on which hazard data concerning each type of natural disaster is identified simultaneously for the purpose of showing areas of hazard overlap.

(2) DEVELOPMENT OF MAPS.—In consultation with States, local governments, and appropriate Federal agencies, the President shall develop multihazard advisory maps for areas, in not fewer than five States, that are subject to commonly recurring natural hazards (including flooding, hurricanes and severe winds, and seismic events).

(3) USE OF TECHNOLOGY.—In developing multihazard advisory maps under this subsection, the President shall use, to the maximum extent practicable, the most cost-effective and efficient technology available.

(4) USE OF MAPS.—

(A) ADVISORY NATURE.—The multihazard advisory maps shall be considered to be advisory and shall not require the development of any new policy by, or impose any new policy on, any government or private entity.

(B) AVAILABILITY OF MAPS.—The multihazard advisory maps shall be made available to the appropriate State and local governments for the purposes of—

- (i) informing the general public about the risks of natural hazards in the areas described in paragraph (2);
- (ii) supporting the activities described in subsection (e); and
- (iii) other public uses.

(k) REPORT ON FEDERAL AND STATE ADMINISTRATION.—Not later than 18 months after the date of the enactment of this section, the President, in consultation with State and local governments, shall submit to Congress a report evaluating efforts to implement this section and recommending a process for transferring greater authority and responsibility for administering the assistance program established under this section to capable States.

(l) PROHIBITION ON EARMARKS.—

(1) DEFINITION.—In this subsection, the term “congressionally directed spending” means a statutory provision or report language included primarily at the request of a Senator or a Member, Delegate or Resident Commissioner of the House of Representatives providing, authorizing, or recommending a specific amount of discretionary budget authority, credit authority, or other spending authority for a contract, loan, loan guarantee, grant, loan authority, or other expenditure with or to an entity, or targeted to a specific State, locality, or Con-

gressional district, other than through a statutory or administrative formula-driven or competitive award process.

(2) PROHIBITION.—None of the funds appropriated or otherwise made available to carry out this section may be used for congressionally directed spending.

(3) CERTIFICATION TO CONGRESS.—The Administrator of the Federal Emergency Management Agency shall submit to Congress a certification regarding whether all financial assistance under this section was awarded in accordance with this section.

[42 U.S.C. 5133]

**SEC. 204. INTERAGENCY TASK FORCE.**

(a) IN GENERAL.—The President shall establish a Federal interagency task force for the purpose of coordinating the implementation of predisaster hazard mitigation programs administered by the Federal Government.

(b) CHAIRPERSON.—The Administrator of the Federal Emergency Management Agency shall serve as the chairperson of the task force.

(c) MEMBERSHIP.—The membership of the task force shall include representatives of—

- (1) relevant Federal agencies;
- (2) State and local government organizations (including Indian tribes); and
- (3) the American Red Cross.

[42 U.S.C. 5134]

**SEC. 205. GRANTS TO ENTITIES FOR ESTABLISHMENT OF HAZARD MITIGATION REVOLVING LOAN FUNDS.**

(a) GENERAL AUTHORITY.—

(1) IN GENERAL.—The Administrator may enter into agreements with eligible entities to make capitalization grants to such entities for the establishment of hazard mitigation revolving loan funds (referred to in this section as “entity loan funds”) for providing funding assistance to local governments to carry out eligible projects under this section to reduce disaster risks for homeowners, businesses, nonprofit organizations, and communities in order to decrease—

- (A) the loss of life and property;
- (B) the cost of insurance; and
- (C) Federal disaster payments.

(2) AGREEMENTS.—Any agreement entered into under this section shall require the participating entity to—

- (A) comply with the requirements of this section; and
- (B) use accounting, audit, and fiscal procedures conforming to generally accepted accounting standards.

(b) APPLICATION.—

(1) IN GENERAL.—To be eligible to receive a capitalization grant under this section, an eligible entity shall submit to the Administrator an application that includes the following:

- (A) Project proposals comprised of local government hazard mitigation projects, on the condition that the entity

provides public notice not less than 6 weeks prior to the submission of an application.

(B) An assessment of recurring major disaster vulnerabilities impacting the entity that demonstrates a risk to life and property.

(C) A description of how the hazard mitigation plan of the entity has or has not taken the vulnerabilities described in subparagraph (B) into account.

(D) A description about how the projects described in subparagraph (A) could conform with the hazard mitigation plan of the entity and of the unit of local government.

(E) A proposal of the systematic and regional approach to achieve resilience in a vulnerable area, including impacts to river basins, river corridors, watersheds, estuaries, bays, coastal regions, micro-basins, micro-watersheds, ecosystems, and areas at risk of earthquakes, tsunamis, droughts, severe storms, and wildfires, including the wildland-urban interface.

(2) TECHNICAL ASSISTANCE.—The Administrator shall provide technical assistance to eligible entities for applications under this section.

(c) ENTITY LOAN FUND.—

(1) ESTABLISHMENT OF FUND.—An entity that receives a capitalization grant under this section shall establish an entity loan fund that complies with the requirements of this subsection.

(2) FUND MANAGEMENT.—Except as provided in paragraph (3), entity loan funds shall—

(A) be administered by the agency responsible for emergency management; and

(B) include only—

(i) funds provided by a capitalization grant under this section;

(ii) repayments of loans under this section to the entity loan fund; and

(iii) interest earned on amounts in the entity loan fund.

(3) ADMINISTRATION.—A participating entity may combine the financial administration of the entity loan fund of such entity with the financial administration of any other revolving fund established by such entity if the Administrator determines that—

(A) the capitalization grant, entity share, repayments of loans, and interest earned on amounts in the entity loan fund are accounted for separately from other amounts in the revolving fund; and

(B) the authority to establish assistance priorities and carry out oversight activities remains in the control of the entity agency responsible for emergency management.

(4) ENTITY SHARE OF FUNDS.—

(A) IN GENERAL.—On or before the date on which a participating entity receives a capitalization grant under this section, the entity shall deposit into the entity loan

fund of such entity, an amount equal to not less than 10 percent of the amount of the capitalization grant.

(B) REDUCED GRANT.—If, with respect to a capitalization grant under this section, a participating entity deposits in the entity loan fund of the entity an amount that is less than 10 percent of the total amount of the capitalization grant that the participating entity would otherwise receive, the Administrator shall reduce the amount of the capitalization grant received by the entity to the amount that is 10 times the amount so deposited.

(d) APPORTIONMENT.—

(1) IN GENERAL.—Except as otherwise provided by this subsection, the Administrator shall apportion funds made available to carry out this section to entities that have entered into an agreement under subsection (a)(2) in amounts as determined by the Administrator.

(2) RESERVATION OF FUNDS.—The Administrator shall reserve not more than 2.5 percent of the amount made available to carry out this section for the Federal Emergency Management Agency for—

(A) administrative costs incurred in carrying out this section; and

(B) providing technical assistance to participating entities under subsection (b)(2).

(3) PRIORITY.—In the apportionment of capitalization grants under this subsection, the Administrator shall give priority to entity applications under subsection (b) that—

(A) propose projects increasing resilience and reducing risk of harm to natural and built infrastructure;

(B) involve a partnership between two or more eligible entities to carry out a project or similar projects;

(C) take into account regional impacts of hazards on river basins, river corridors, micro-watersheds, macro-watersheds, estuaries, lakes, bays, and coastal regions and areas at risk of earthquakes, tsunamis, droughts, severe storms, and wildfires, including the wildland-urban interface; or

(D) propose projects for the resilience of major economic sectors or critical national infrastructure, including ports, global commodity supply chain assets (located within an entity or within the jurisdiction of local governments and Tribal governments), power and water production and distribution centers, and bridges and waterways essential to interstate commerce.

(e) ENVIRONMENTAL REVIEW OF REVOLVING LOAN FUND PROJECTS.—The Administrator may delegate to a participating entity all of the responsibilities for environmental review, decision making, and action pursuant to the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), and other applicable Federal environmental laws including the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.) and the National Historic Preservation Act of 1966 (54 U.S.C. 300101 et seq.) that would apply to the Administrator were the Administrator to undertake projects under this section as Federal projects so long as the participating entity carries

out such responsibilities in the same manner and subject to the same requirements as if the Administrator carried out such responsibilities.

(f) USE OF FUNDS.—

(1) TYPES OF ASSISTANCE.—Amounts deposited in an entity loan fund, including loan repayments and interest earned on such amounts, may be used—

(A) to make loans, on the condition that—

(i) such loans are made at an interest rate of not more than 1 percent;

(ii) annual principal and interest payments will commence not later than 1 year after completion of any project and all loans made under this subparagraph will be fully amortized—

(I) not later than 20 years after the date on which the project is completed; or

(II) for projects in a low-income geographic area, not later than 30 years after the date on which the project is completed and not longer than the expected design life of the project;

(iii) the loan recipient of a loan under this subparagraph establishes a dedicated source of revenue for repayment of the loan;

(iv) the loan recipient of a loan under this subparagraph has a hazard mitigation plan that has been approved by the Administrator; and

(v) the entity loan fund will be credited with all payments of principal and interest on all loans made under this subparagraph;

(B) for mitigation efforts, in addition to mitigation planning under section 322 not to exceed 10 percent of the capitalization grants made to the participating entity in a fiscal year;

(C) for the reasonable costs of administering the fund and conducting activities under this section, except that such amounts shall not exceed \$100,000 per year, 2 percent of the capitalization grants made to the participating entity in a fiscal year, or 1 percent of the value of the entity loan fund, whichever amount is greatest, plus the amount of any fees collected by the entity for such purpose regardless of the source; and

(D) to earn interest on the entity loan fund.

(2) PROHIBITION ON DETERMINATION THAT LOAN IS A DUPLICATION.—In carrying out this section, the Administrator may not determine that a loan is a duplication of assistance or programs under this Act.

(3) PROJECTS AND ACTIVITIES ELIGIBLE FOR ASSISTANCE.—Except as provided in this subsection, a participating entity may use funds in the entity loan fund to provide financial assistance for projects or activities that mitigate the impacts of natural hazards including—

(A) drought and prolonged episodes of intense heat;

(B) severe storms, including hurricanes, tornados, wind storms, cyclones, and severe winter storms;

- (C) wildfires;
- (D) earthquakes;
- (E) flooding, including the construction, repair, or replacement of a non-Federal levee or other flood control structure, provided that the Administrator, in consultation with the Army Corps of Engineers (if appropriate), requires an eligible entity to determine that such levee or structure is designed, constructed, and maintained in accordance with sound engineering practices and standards equivalent to the purpose for which such levee or structure is intended;
- (F) shoreline erosion;
- (G) high water levels; and
- (H) storm surges.

(4) ZONING AND LAND USE PLANNING CHANGES.—A participating entity may use not more than 10 percent of a capitalization grant under this section to enable units of local government to implement zoning and land use planning changes focused on—

(A) the development and improvement of zoning and land use codes that incentivize and encourage low-impact development, resilient wildland-urban interface land management and development, natural infrastructure, green stormwater management, conservation areas adjacent to floodplains, implementation of watershed or greenway master plans, and reconnection of floodplains;

(B) the study and creation of agricultural risk compensation districts where there is a desire to remove or set-back levees protecting highly developed agricultural land to mitigate for flooding, allowing agricultural producers to receive compensation for assuming greater flood risk that would alleviate flood exposure to population centers and areas with critical national infrastructure;

(C) the study and creation of land use incentives that reward developers for greater reliance on low impact development stormwater best management practices, exchange density increases for increased open space and improvement of neighborhood catch basins to mitigate urban flooding, reward developers for including and augmenting natural infrastructure adjacent to and around building projects without reliance on increased sprawl, and reward developers for addressing wildfire ignition; and

(D) the study and creation of an erosion response plan that accommodates river, lake, forest, plains, and ocean shoreline retreating or bluff stabilization due to increased flooding and disaster impacts.

(5) ESTABLISHING AND CARRYING OUT BUILDING CODE ENFORCEMENT.—A participating entity may use capitalization grants under this section to enable units of local government to establish and carry out the latest published editions of relevant building codes, specifications, and standards for the purpose of protecting the health, safety, and general welfare of the building's users against disasters and natural hazards.

(6) ADMINISTRATIVE AND TECHNICAL COSTS.—For each fiscal year, a participating entity may use the amount described in paragraph (1)(C) to—

(A) pay the reasonable costs of administering the programs under this section, including the cost of establishing an entity loan fund; and

(B) provide technical assistance to recipients of financial assistance from the entity loan fund, on the condition that such technical assistance does not exceed 5 percent of the capitalization grant made to such entity.

(7) LIMITATION FOR SINGLE PROJECTS.—A participating entity may not provide an amount equal to or more than \$5,000,000 to a single hazard mitigation project.

(8) REQUIREMENTS.—For fiscal year 2022 and each fiscal year thereafter, the requirements of subchapter IV of chapter 31 of title 40, United States Code, shall apply to the construction of projects carried out in whole or in part with assistance made available by an entity loan fund authorized by this section.

(g) INTENDED USE PLANS.—

(1) IN GENERAL.—After providing for public comment and review, and consultation with appropriate government agencies of the State or Indian tribal government, Federal agencies, and interest groups, each participating entity shall annually prepare and submit to the Administrator a plan identifying the intended uses of the entity loan fund.

(2) CONTENTS OF PLAN.—An entity intended use plan prepared under paragraph (1) shall include—

(A) the integration of entity planning efforts, including entity hazard mitigation plans and other programs and initiatives relating to mitigation of major disasters carried out by such entity;

(B) an explanation of the mitigation and resiliency benefits the entity intends to achieve by—

(i) reducing future damage and loss associated with hazards;

(ii) reducing the number of severe repetitive loss structures and repetitive loss structures in the entity;

(iii) decreasing the number of insurance claims in the entity from injuries resulting from major disasters or other natural hazards; and

(iv) increasing the rating under the community rating system under section 1315(b) of the National Flood Insurance Act of 1968 (42 U.S.C. 4022(b)) for communities in the entity;

(C) information on the availability of, and application process for, financial assistance from the entity loan fund of such entity;

(D) the criteria and methods established for the distribution of funds;

(E) the amount of financial assistance that the entity anticipates apportioning;

(F) the expected terms of the assistance provided from the entity loan fund; and

- (G) a description of the financial status of the entity loan fund, including short-term and long-term goals for the fund.
- (h) AUDITS, REPORTS, PUBLICATIONS, AND OVERSIGHT.—
- (1) BIENNIAL ENTITY AUDIT AND REPORT.—Beginning not later than the last day of the second fiscal year after the receipt of payments under this section, and biennially thereafter, any participating entity shall—
- (A) conduct an audit of the entity loan fund established under subsection (c); and
- (B) provide to the Administrator a report including—
- (i) the result of any such audit; and
- (ii) a review of the effectiveness of the entity loan fund of the entity with respect to meeting the goals and intended benefits described in the intended use plan submitted by the entity under subsection (g).
- (2) PUBLICATION.—A participating entity shall publish and periodically update information about all projects receiving funding from the entity loan fund of such entity, including—
- (A) the location of the project;
- (B) the type and amount of assistance provided from the entity loan fund;
- (C) the expected funding schedule; and
- (D) the anticipated date of completion of the project.
- (3) OVERSIGHT.—
- (A) IN GENERAL.—The Administrator shall, at least every 4 years, conduct reviews and audits as may be determined necessary or appropriate by the Administrator to carry out the objectives of this section and determine the effectiveness of the fund in reducing natural hazard risk.
- (B) GAO REQUIREMENTS.—A participating entity shall conduct audits under paragraph (1) in accordance with the auditing procedures of the Government Accountability Office, including generally accepted government auditing standards.
- (C) RECOMMENDATIONS BY ADMINISTRATOR.—The Administrator may at any time make recommendations for or require specific changes to an entity loan fund in order to improve the effectiveness of the fund.
- (i) REGULATIONS OR GUIDANCE.—The Administrator shall issue such regulations or guidance as are necessary to—
- (1) ensure that each participating entity uses funds as efficiently as possible;
- (2) reduce waste, fraud, and abuse to the maximum extent possible; and
- (3) require any party that receives funds directly or indirectly under this section, including a participating entity and a recipient of amounts from an entity loan fund, to use procedures with respect to the management of the funds that conform to generally accepted accounting standards.
- (j) WAIVER AUTHORITY.—Until such time as the Administrator issues final regulations to implement this section, the Administrator may—

(1) waive notice and comment rulemaking, if the Administrator determines the waiver is necessary to expeditiously implement this section; and

(2) provide capitalization grants under this section as a pilot program.

(k) **LIABILITY PROTECTIONS.**—The Agency shall not be liable for any claim based on the exercise or performance of, or the failure to exercise or perform, a discretionary function or duty by the Agency, or an employee of the Agency in carrying out this section.

(l) **GAO REPORT.**—Not later than 1 year after the date on which the first entity loan fund is established under subsection (c), the Comptroller General of the United States shall submit to the Committee on Homeland Security and Governmental Affairs of the Senate and the Committee on Transportation and Infrastructure of the House of Representatives a report that examines—

(1) the appropriateness of regulations and guidance issued by the Administrator for the program, including any oversight of the program;

(2) a description of the number of the entity loan funds established, the projects funded from such entity loan funds, and the extent to which projects funded by the loan funds adhere to any applicable hazard mitigation plans;

(3) the effectiveness of the entity loan funds to lower disaster related costs; and

(4) recommendations for improving the administration of entity loan funds.

(m) **DEFINITIONS.**—In this section, the following definitions apply:

(1) **ADMINISTRATOR.**—The term “Administrator” means the Administrator of the Federal Emergency Management Agency.

(2) **AGENCY.**—The term “Agency” means the Federal Emergency Management Agency.

(3) **ELIGIBLE ENTITY.**—The term “eligible entity” means a State or an Indian tribal government that has received a major disaster declaration pursuant to section 401.

(4) **HAZARD MITIGATION PLAN.**—The term “hazard mitigation plan” means a mitigation plan submitted under section 322.

(5) **LOW-INCOME GEOGRAPHIC AREA.**—The term “low-income geographic area” means an area described in paragraph (1) or (2) of section 301(a) of the Public Works and Economic Development Act of 1965 (42 U.S.C. 3161(a)).

(6) **PARTICIPATING ENTITY.**—The term “participating entity” means an eligible entity that has entered into an agreement under this section.

(7) **REPETITIVE LOSS STRUCTURE.**—The term “repetitive loss structure” has the meaning given the term in section 1370 of the National Flood Insurance Act of 1968 (42 U.S.C. 4121).

(8) **SEVERE REPETITIVE LOSS STRUCTURE.**—The term “severe repetitive loss structure” has the meaning given the term in section 1366(h) of the National Flood Insurance Act of 1968 (42 U.S.C. 4104c(h)).

(9) **WILDLAND-URBAN INTERFACE.**—The term “wildland-urban interface” has the meaning given the term in section 101

of the Healthy Forests Restoration Act of 2003 (16 U.S.C. 6511).

(n) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated \$100,000,000 for each of fiscal years 2022 through 2023 to carry out this section.

[42 U.S.C. 5135]

**SEC. 206. NATURAL HAZARD RISK ASSESSMENT.**

(a) DEFINITIONS.—In this section:

(1) COMMUNITY DISASTER RESILIENCE ZONE.—The term “community disaster resilience zone” means a census tract designated by the President under subsection (d)(1).

(2) ELIGIBLE ENTITY.—The term “eligible entity” means—  
 (A) a State;  
 (B) an Indian tribal government; or  
 (C) a local government.

(b) PRODUCTS.—The President shall continue to maintain a natural hazard assessment program that develops and maintains products that—

(1) are available to the public; and  
 (2) define natural hazard risk across the United States.

(c) FEATURES.—The products maintained under subsection (b) shall, for lands within States and areas under the jurisdiction of Indian tribal governments—

(1) show the risk of natural hazards; and  
 (2) include ratings and data for—  
 (A) loss exposure, including population equivalence, buildings, and agriculture;  
 (B) social vulnerability;  
 (C) community resilience; and  
 (D) any other element determined by the President.

(d) COMMUNITY DISASTER RESILIENCE ZONES DESIGNATION.—

(1) IN GENERAL.—Not later than 30 days after the date on which the President makes the update and enhancement required under subsection (e)(4), and not less frequently than every 5 years thereafter, the President shall identify and designate community disaster resilience zones, which shall be—

(A) the 50 census tracts assigned the highest individual hazard risk ratings; and  
 (B) subject to paragraph (3), in each State, not less than 1 percent of census tracts that are assigned high individual risk ratings.

(2) RISK RATINGS.—In carrying out paragraph (1), the President shall use census tract risk ratings derived from a product maintained under subsection (b) that—

(A) reflect—  
 (i) high levels of individual hazard risk ratings based on an assessment of the intersection of—  
 (I) loss to population equivalence;  
 (II) building value; and  
 (III) agriculture value;  
 (ii) high social vulnerability ratings and low community resilience ratings; and

- (iii) any other elements determined by the President; and
  - (B) reflect the principal natural hazard risks identified for the respective census tracts.
- (3) GEOGRAPHIC BALANCE.—In identifying and designating the community disaster resilience zones described in paragraph (1)(B)—
- (A) for the purpose of achieving geographic balance, when applicable, the President shall consider making designations in coastal, inland, urban, suburban, and rural areas; and
  - (B) the President shall include census tracts on Tribal lands located within a State.
- (4) DURATION.—The designation of a community disaster resilience zone under paragraph (1) shall be effective for a period of not less than 5 years.
- (e) REVIEW AND UPDATE.—Not later than 180 days after the date of enactment of the Community Disaster Resilience Zones Act of 2022, and not less frequently than every 5 years thereafter, the President shall—
- (1) with respect to any product that is a natural hazard risk assessment—
    - (A) review the underlying methodology of the product; and
    - (B) receive public input on the methodology and data used for the product;
  - (2) consider including additional data in any product that is a natural hazard risk assessment, such as—
    - (A) the most recent census tract data;
    - (B) data from the American Community Survey of the Bureau of the Census, a successor survey, a similar survey, or another data source, including data by census tract on housing characteristics and income;
    - (C) information relating to development, improvements, and hazard mitigation measures;
    - (D) data that assesses past and future loss exposure, including analysis on the effects of a changing climate on future loss exposure;
    - (E) data from the Resilience Analysis and Planning Tool of the Federal Emergency Management Agency; and
    - (F) other information relevant to prioritizing areas that have—
      - (i) high risk levels of—
        - (I) natural hazard loss exposure, including population equivalence, buildings, infrastructure, and agriculture; and
        - (II) social vulnerability; and
      - (ii) low levels of community resilience;
  - (3) make publicly available any changes in methodology or data used to inform an update to a product maintained under subsection (b); and
  - (4) update and enhance the products maintained under subsection (b), as necessary.

(f) **NATURAL HAZARD RISK ASSESSMENT INSIGHTS.**—In determining additional data to include in products that are natural hazard risk assessments under subsection (e)(2), the President shall consult with, at a minimum—

(1) the Administrator of the Federal Emergency Management Agency;

(2) the Secretary of Agriculture and the Chief of the Forest Service;

(3) the Secretary of Commerce, the Administrator of the National Oceanic and Atmospheric Administration, the Director of the Bureau of the Census, and the Director of the National Institute of Standards and Technology;

(4) the Secretary of Defense and the Commanding Officer of the United States Army Corps of Engineers;

(5) the Administrator of the Environmental Protection Agency;

(6) the Secretary of the Interior and the Director of the United States Geological Survey;

(7) the Secretary of Housing and Urban Development; and

(8) the Director of the Federal Housing Finance Agency.

(g) **COMMUNITY DISASTER RESILIENCE ZONE.**—With respect to financial assistance provided under section 203(i) to perform a resilience or mitigation project within, or that primarily benefits, a community disaster resilience zone, the President may increase the amount of the Federal share described under section 203(h) to not more than 90 percent of the total cost of the resilience or mitigation project.

(h) **RESILIENCE OR MITIGATION PROJECT PLANNING ASSISTANCE.**—

(1) **IN GENERAL.**—The President may provide financial, technical, or other assistance under this title to an eligible entity that plans to perform a resilience or mitigation project within, or that primarily benefits, a community disaster resilience zone.

(2) **PURPOSE.**—The purpose of assistance provided under paragraph (1) shall be to carry out activities in preparation for a resilience or mitigation project or seek an evaluation and certification under subsection (i)(2) for a resilience or mitigation project before the date on which permanent work of the resilience or mitigation project begins.

(3) **APPLICATION.**—If required by the President, an eligible entity seeking assistance under paragraph (1) shall submit an application in accordance with subsection (i)(1).

(4) **FUNDING.**—In providing assistance under paragraph (1), the President may use amounts set aside under section 203(i).

(i) **COMMUNITY DISASTER RESILIENCE ZONE PROJECT APPLICATIONS.**—

(1) **IN GENERAL.**—If required by the President or other Federal law, an eligible entity shall submit to the President an application at such time, in such manner, and containing or accompanied by such information as the President may reasonably require.

(2) **EVALUATION AND CERTIFICATION.**—

(A) IN GENERAL.—Not later than 120 days after the date on which an eligible entity submits an application under paragraph (1), the President shall evaluate the application to determine whether the resilience or mitigation project that the entity plans to perform within, or that primarily benefits, a community disaster resilience zone—

(i) is designed to reduce injuries, loss of life, and damage and destruction of property, such as damage to critical services and facilities; and

(ii) substantially reduces the risk of, or increases resilience to, future damage, hardship, loss, or suffering.

(B) CERTIFICATION.—If the President determines that an application submitted under paragraph (1) meets the criteria described in subparagraph (A), the President shall certify the proposed resilience or mitigation project.

(C) EFFECT OF CERTIFICATION.—The certification of a proposed resilience or mitigation project under subparagraph (B) shall not be construed to exempt the resilience or mitigation project from the requirements of any other law.

(3) PROJECTS CAUSING DISPLACEMENT.—With respect to a resilience or mitigation project certified under paragraph (2)(B) that involves the displacement of a resident from any occupied housing unit, the entity performing the resilience or mitigation project shall—

(A) provide, at the option of the resident, a suitable and habitable housing unit that is, with respect to the housing unit from which the resident is displaced—

(i) of a comparable size;

(ii) located in the same local community or a community with reduced hazard risk; and

(iii) offered under similar costs, conditions, and terms;

(B) ensure that property acquisitions resulting from the displacement and made in connection with the resilience or mitigation project—

(i) are deed restricted in perpetuity to preclude future property uses not relating to mitigation or resilience; and

(ii) are the result of a voluntary decision by the resident; and

(C) plan for robust public participation in the resilience or mitigation project.

[42 U.S.C. 5136]

## TITLE III—MAJOR DISASTER AND EMERGENCY ASSISTANCE ADMINISTRATION

### SEC. 301. WAIVER OF ADMINISTRATIVE CONDITIONS.

Any Federal agency charged with the administration of a Federal assistance program may, if so requested by the applicant State or local authorities, modify or waive, for a major disaster, such administrative conditions for assistance as would otherwise prevent the giving of assistance under such programs if the inability to meet such conditions is a result of the major disaster.

[42 U.S.C. 5141]

### COORDINATING OFFICERS

SEC. 302. (a) Immediately upon his declaration of a major disaster or emergency, the President shall appoint a Federal coordinating officer to operate in the affected area.

(b) In order to effectuate the purposes of this Act, the Federal coordinating officer, within the affected area, shall—

(1) make an initial appraisal of the types of relief most urgently needed;

(2) establish such field offices as he deems necessary and as are authorized by the President;

(3) coordinate the administration of relief, including activities of the State and local governments, the American National Red Cross, the Salvation Army, the Mennonite Disaster Service, and other relief or disaster assistance organizations, which agree to operate under his advise or direction, except that nothing contained in this Act shall limit or in any way affect the responsibilities of the American National Red Cross under the Act of January 5, 1905, as amended (33 Stat. 599); and

(4) take such other action, consistent with authority delegated to him by the President, and consistent with the provisions of this Act, as he may deem necessary to assist local citizens and public officials in promptly obtaining assistance to which they are entitled.

(c) When the President determines assistance under this Act is necessary, he shall request that the Governor of the affected State designate a State coordinating officer for the purpose of coordinating State and local disaster assistance efforts with those of the Federal Government.

(d) Where the area affected by a major disaster or emergency includes parts of more than 1 State, the President, at the discretion of the President, may appoint a single Federal coordinating officer for the entire affected area, and may appoint such deputy Federal coordinating officers to assist the Federal coordinating officer as the President determines appropriate.

[42 U.S.C. 5143]

**SEC. 303. EMERGENCY SUPPORT AND RESPONSE TEAMS.<sup>2</sup>**

(a) **EMERGENCY SUPPORT TEAMS.**—The President shall form emergency support teams of Federal personnel to be deployed in an area affected by a major disaster or emergency. Such emergency support teams shall assist the Federal coordinating officer in carrying out his responsibilities pursuant to this Act. Upon request of the President, the head of any Federal agency is directed to detail to temporary duty with the emergency support teams on either a reimbursable or nonreimbursable basis, as is determined necessary by the President, such personnel within the administrative jurisdiction of the head of the Federal agency as the President may need or believe to be useful for carrying out the functions of the emergency support teams, each such detail to be without loss of seniority, pay, or other employee status.

(b) **EMERGENCY RESPONSE TEAMS.**—

(1) **ESTABLISHMENT.**—In carrying out subsection (a), the President, acting through the Administrator of the Federal Emergency Management Agency, shall establish—

(A) at a minimum 3 national response teams; and

(B) sufficient regional response teams, including Regional Office strike teams under section 507 of the Homeland Security Act of 2002; and

(C) other response teams as may be necessary to meet the incident management responsibilities of the Federal Government.

(2) **TARGET CAPABILITY LEVEL.**—The Administrator shall ensure that specific target capability levels, as defined pursuant to the guidelines established under section 646(a) of the Post-Katrina Emergency Management Reform Act of 2006, are established for Federal emergency response teams.

(3) **PERSONNEL.**—The President, acting through the Administrator, shall ensure that the Federal emergency response teams consist of adequate numbers of properly planned, organized, equipped, trained, and exercised personnel to achieve the established target capability levels. Each emergency response team shall work in coordination with State and local officials and onsite personnel associated with a particular incident.

(4) **READINESS REPORTING.**—The Administrator shall evaluate team readiness on a regular basis and report team readiness levels in the report required under section 652(a) of the Post-Katrina Emergency Management Reform Act of 2006.

<sup>2</sup> Paragraph (1) of section 633 of Public Law 109–295 provides as follows:

**SEC. 633. EMERGENCY RESPONSE TEAMS.**

Section 303 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5144) is amended—

(1) by striking “sec. 303.” and all that follows through “The President shall” and inserting the following:

**“SEC. 303. EMERGENCY SUPPORT AND RESPONSE TEAMS.**

“(a) **EMERGENCY SUPPORT TEAMS.**—The President shall”; and

Such amendment should have struck the centered section heading which precedes “SEC. 303.” and reads “EMERGENCY SUPPORT TEAM” and all that follows through “The President shall”. The amendment was executed to reflect the probable intent of Congress.

**Sec. 304 ROBERT T. STAFFORD DISASTER RELIEF AND EMERGENCY... 24**

【42 U.S.C. 5144】

REIMBURSEMENT

SEC. 304. Federal agencies may be reimbursed for expenditures under this Act from funds appropriated for the purposes of this Act. Any funds received by Federal agencies as reimbursement for services or supplies furnished under the authority of this Act shall be deposited to the credit of the appropriation or appropriations currently available for such services or supplies.

【42 U.S.C. 5147】

NONLIABILITY

SEC. 305. The Federal Government shall not be liable for any claim based upon the exercise or performance of or the failure to exercise or perform a discretionary function or duty on the part of a Federal agency or an employee of the Federal Government in carrying out the provisions of this Act.

【42 U.S.C. 5148】

PERFORMANCE OF SERVICES

SEC. 306. (a) In carrying out the purposes of this Act, any Federal agency is authorized to accept and utilize the services or facilities of any State or local government, or of any agency, office, or employee thereof, with the consent of such government.

(b) In performing any services under this Act, any Federal agency is authorized—

(1) to appoint and fix the compensation of such temporary personnel as may be necessary, without regard to the provisions of title 5, United States Code, governing appointments in competitive service;

(2) to employ experts and consultants in accordance with the provisions of section 3109 of such title, without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates; and

(3) to incur obligations on behalf of the United States by contract or otherwise for the acquisition, rental, or hire of equipment, services, materials, and supplies for shipping, drayage, travel, and communications, and for the supervision and administration of such activities. Such obligations, including obligations arising out of the temporary employment of additional personnel, may be incurred by an agency in such amount as may be made available to it by the President.

(c) The Administrator of the Federal Emergency Management Agency is authorized to appoint temporary personnel, after serving continuously for 3 years, to positions in the Federal Emergency Management Agency in the same manner that competitive service employees with competitive status are considered for transfer, reassignment, or promotion to such positions. An individual appointed under this subsection shall become a career-conditional employee, unless the employee has already completed the service requirements for career tenure.

(d) PERSONNEL PERFORMING SERVICE RESPONDING TO DISASTERS AND EMERGENCIES.—

(1) USERRA EMPLOYMENT AND REEMPLOYMENT RIGHTS.—

The protections, rights, benefits, and obligations provided under chapter 43 of title 38, United States Code, shall apply to intermittent personnel appointed pursuant to subsection (b)(1) to perform service to the Federal Emergency Management Agency under sections 401 and 501 or to train for such service.

(2) NOTICE OF ABSENCE FROM POSITION OF EMPLOYMENT.—

Preclusion of giving notice of service by necessity of service under subsection (b)(1) to perform service to the Federal Emergency Management Agency under sections 401 and 501 or to train for such service shall be considered preclusion by “military necessity” for purposes of section 4312(b) of title 38, United States Code, pertaining to giving notice of absence from a position of employment. A determination of such necessity shall be made by the Administrator and shall not be subject to review in any judicial or administrative proceeding.

[42 U.S.C. 5149]

#### SEC. 307. USE OF LOCAL FIRMS AND INDIVIDUALS.

(a) CONTRACTS OR AGREEMENTS WITH PRIVATE ENTITIES.—

(1) IN GENERAL.—In the expenditure of Federal funds for debris clearance, distribution of supplies, reconstruction, and other major disaster or emergency assistance activities which may be carried out by contract or agreement with private organizations, firms, or individuals, preference shall be given, to the extent feasible and practicable, to those organizations, firms, and individuals residing or doing business primarily in the area affected by such major disaster or emergency.

(2) CONSTRUCTION.—This subsection shall not be considered to restrict the use of Department of Defense resources under this Act in the provision of assistance in a major disaster.

(3) SPECIFIC GEOGRAPHIC AREA.—In carrying out this section, a contract or agreement may be set aside for award based on a specific geographic area.

(b) IMPLEMENTATION.—

(1) CONTRACTS NOT TO ENTITIES IN AREA.—Any expenditure of Federal funds for debris clearance, distribution of supplies, reconstruction, and other major disaster or emergency assistance activities which may be carried out by contract or agreement with private organizations, firms, or individuals, not awarded to an organization, firm, or individual residing or doing business primarily in the area affected by such major disaster shall be justified in writing in the contract file.

(2) TRANSITION.—Following the declaration of an emergency or major disaster, an agency performing response, relief, and reconstruction activities shall transition work performed under contracts in effect on the date on which the President declares the emergency or major disaster to organizations, firms, and individuals residing or doing business primarily in any area affected by the major disaster or emergency, unless

**Sec. 308 ROBERT T. STAFFORD DISASTER RELIEF AND EMERGENCY... 26**

the head of such agency determines that it is not feasible or practicable to do so.

(3) FORMULATION OF REQUIREMENTS.—The head of a Federal agency, as feasible and practicable, shall formulate appropriate requirements to facilitate compliance with this section.

(c) PRIOR CONTRACTS.—Nothing in this section shall be construed to require any Federal agency to breach or renegotiate any contract in effect before the occurrence of a major disaster or emergency.

[42 U.S.C. 5150]

**NONDISCRIMINATION IN DISASTER ASSISTANCE**

SEC. 308. (a) The President shall issue, and may alter and amend, such regulations as may be necessary for the guidance of personnel carrying out Federal assistance functions at the site of a major disaster or emergency. Such regulations shall include provisions for insuring that the distribution of supplies, the processing of applications, and other relief and assistance activities shall be accomplished in an equitable and impartial manner, without discrimination on the grounds of race, color, religion, nationality, sex, age, disability, English proficiency, or economic status.

(b) As a condition of participation in the distribution of assistance or supplies under this Act or of receiving assistance under this Act, governmental bodies and other organizations shall be required to comply with regulations relating to nondiscrimination promulgated by the President, and such other regulations applicable to activities within an area affected by a major disaster or emergency as he deems necessary for the effective coordination of relief efforts.

[42 U.S.C. 5151]

**USE AND COORDINATION OF RELIEF ORGANIZATIONS**

SEC. 309. (a) In providing relief and assistance under this Act, the President may utilize, with their consent, the personnel and facilities of the American National Red Cross, the Salvation Army, the Mennonite Disaster Service, long-term recovery groups, domestic hunger relief, and other relief, or disaster assistance organizations, in the distribution of medicine, food, supplies, or other items, and in the restoration, rehabilitation, or reconstruction of community services housing and essential facilities, whenever the President finds that such utilization is necessary.

(b) The President is authorized to enter into agreements with the American National Red Cross, the Salvation Army, the Mennonite Disaster Service, long-term recovery groups, domestic hunger relief, and other relief, or disaster assistance organizations under which the disaster relief activities of such organizations may be coordinated by the Federal coordinating officer whenever such organizations are engaged in providing relief during and after a major disaster or emergency. Any such agreement shall include provisions assuring that use of Federal facilities, supplies, and services will be in compliance with regulations prohibiting duplication of benefits and guaranteeing nondiscrimination promulgated

by the President under this Act, and such other regulation as the President may require.

[42 U.S.C. 5152]

**SEC. 310. PRIORITY TO CERTAIN APPLICATIONS FOR PUBLIC FACILITY AND PUBLIC HOUSING ASSISTANCE.**

(a) **PRIORITY.**—In the processing of applications for assistance, priority and immediate consideration shall be given by the head of the appropriate Federal agency, during such period as the President shall prescribe, to applications from public bodies situated in areas affected by major disasters under the following Acts:

(1) The United States Housing Act of 1937 for the provision of low-income housing.

(2) Section 702 of the Housing Act of 1954 for assistance in public works planning.

(3) The Community Development Block Grant Program under title I of the Housing and Community Development Act of 1974.

(4) Section 306 of the Consolidated Farm and Rural Development Act.

(5) The Public Works and Economic Development Act of 1965.

(6) The Appalachian Regional Development Act of 1965.

(7) The Federal Water Pollution Control Act.

(b) **OBLIGATION OF CERTAIN DISCRETIONARY FUNDS.**—In the obligation of discretionary funds or funds which are not allocated among the States or political subdivisions of a State, the Secretary of Housing and Urban Development and the Secretary of Commerce shall give priority to applications for projects for major disaster areas.

[42 U.S.C. 5153]

**SEC. 311. INSURANCE.**

(a) **APPLICANTS FOR REPLACEMENT OF DAMAGED FACILITIES.**—

(1) **COMPLIANCE WITH CERTAIN REGULATIONS.**—An applicant for assistance under section 406 of this Act (relating to repair, restoration, and replacement of damaged facilities), section 422 of this Act (relating to simplified procedure) or section 209(c)(2) of the Public Works and Economic Development Act of 1965 (42 U.S.C. 3149(c)(2)) shall comply with regulations prescribed by the President to assure that, with respect to any property to be replaced, restored, repaired, or constructed with such assistance, such types and extent of insurance will be obtained and maintained as may be reasonably available, adequate, and necessary, to protect against future loss to such property.

(2) **DETERMINATION.**—In making a determination with respect to availability, adequacy, and necessity under paragraph (1), the President shall not require greater types and extent of insurance than are certified to him as reasonable by the appropriate State insurance commissioner responsible for regulation of such insurance.

(b) **MAINTENANCE OF INSURANCE.**—No applicant for assistance under section 406 of this Act (relating to repair, restoration, and

replacement of damaged facilities), section 422 of this Act (relating to simplified procedure), or section 209(c)(2) of the Public Works and Economic Development Act of 1965 (42 U.S.C. 3149(c)(2)) may receive such assistance for any property or part thereof for which the applicant has previously received assistance under this Act unless all insurance required pursuant to this section has been obtained and maintained with respect to such property. The requirements of this subsection may not be waived under section 301.

(c) STATE ACTING AS SELF-INSURER.—A State may elect to act as a self-insurer with respect to any or all of the facilities owned by the State. Such an election, if declared in writing at the time of acceptance of assistance under section 406 or 422 of this Act or section 209(c)(2) of the Public Works and Economic Development Act of 1965 (42 U.S.C. 3149(c)(2)) or subsequently and accompanied by a plan for self-insurance which is satisfactory to the President, shall be deemed compliance with subsection (a). No such self-insurer may receive assistance under section 406 or 422 of this Act for any property or part thereof for which it has previously received assistance under this Act, to the extent that insurance for such property or part thereof would have been reasonably available.

[42 U.S.C. 5154]

**SEC. 312. DUPLICATION OF BENEFITS.**

(a) GENERAL PROHIBITION.—The President, in consultation with the head of each Federal agency administering any program providing financial assistance to persons, business concerns, or other entities suffering losses as a result of a major disaster or emergency, shall assure that no such person, business concern, or other entity will receive such assistance with respect to any part of such loss as to which he has received financial assistance under any other program or from insurance or any other source.

(b) SPECIAL RULES.—

(1) LIMITATION.—This section shall not prohibit the provision of Federal assistance to a person who is or may be entitled to receive benefits for the same purposes from another source if such person has not received such other benefits by the time of application for Federal assistance and if such person agrees to repay all duplicative assistance to the agency providing the Federal assistance.

(2) PROCEDURES.—The President shall establish such procedures as the President considers necessary to ensure uniformity in preventing duplication of benefits.

(3) EFFECT OF PARTIAL BENEFITS.—Receipt of partial benefits for a major disaster or emergency shall not preclude provision of additional Federal assistance for any part of a loss or need for which benefits have not been provided.

(4)<sup>3</sup> WAIVER OF GENERAL PROHIBITION.—

(A) IN GENERAL.—The President may waive the general prohibition provided in subsection (a) upon request of a Governor on behalf of the State or on behalf of a person,

<sup>3</sup>Section 1210(a)(4) of division D of Public Law 115–254 states “On the date that is 5 years after the date of enactment of this Act [effective on October 5, 2023], section 312(b) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5155(b)) is amended by striking paragraph (4), as added by subsection (a)(1) of this section.”.

business concern, or any other entity suffering losses as a result of a major disaster or emergency, if the President finds such waiver is in the public interest and will not result in waste, fraud, or abuse. In making this decision, the President may consider the following:

(i) The recommendations of the Administrator of the Federal Emergency Management Agency made in consultation with the Federal agency or agencies administering the duplicative program.

(ii) If a waiver is granted, the assistance to be funded is cost effective.

(iii) Equity and good conscience.

(iv) Other matters of public policy considered appropriate by the President.

(B) GRANT OR DENIAL OF WAIVER.—A request under subparagraph (A) shall be granted or denied not later than 45 days after submission of such request.

(C) PROHIBITION ON DETERMINATION THAT LOAN IS A DUPLICATION.—Notwithstanding subsection (c), in carrying out subparagraph (A), the President may not determine that a loan is a duplication of assistance, provided that all Federal assistance is used toward a loss suffered as a result of the major disaster or emergency.

(c) RECOVERY OF DUPLICATIVE BENEFITS.—A person receiving Federal assistance for a major disaster or emergency shall be liable to the United States to the extent that such assistance duplicates benefits available to the person for the same purpose from another source. The agency which provided the duplicative assistance shall collect such duplicative assistance from the recipient in accordance with chapter 37 of title 31, United States Code, relating to debt collection, when the head of such agency considers it to be in the best interest of the Federal Government.

(d) ASSISTANCE NOT INCOME.—Federal major disaster and emergency assistance provided to individuals and families under this Act, and comparable disaster assistance provided by States, local governments, and disaster assistance organizations, shall not be considered as income or a resource when determining eligibility for or benefit levels under federally funded income assistance or resource-tested benefit programs.

[42 U.S.C. 5155]

#### SEC. 313. STANDARDS AND REVIEWS.

The President shall establish comprehensive standards which shall be used to assess the efficiency and effectiveness of Federal major disaster and emergency assistance programs administered under this Act. The President shall conduct annual reviews of the activities of Federal agencies and State and local governments in major disaster and emergency preparedness and in providing major disaster and emergency assistance in order to assure maximum coordination and effectiveness of such programs and consistency in policies for reimbursement of States under this Act.

[42 U.S.C. 5156]

**SEC. 314. PENALTIES.**

(a) MISUSE OF FUNDS.—Any person who knowingly misapplies the proceeds of a loan or other cash benefit obtained under this Act shall be fined an amount equal to one and one-half times the misapplied amount of the proceeds or cash benefit.

(b) CIVIL ENFORCEMENT.—Whenever it appears that any person has violated or is about to violate any provision of this Act, including any civil penalty imposed under this Act, the Attorney General may bring a civil action for such relief as may be appropriate. Such action may be brought in an appropriate United States district court.

(c) REFERRAL TO ATTORNEY GENERAL.—The President shall expeditiously refer to the Attorney General for appropriate action any evidence developed in the performance of functions under this Act that may warrant consideration for criminal prosecution.

(d) CIVIL PENALTY.—Any individual who knowingly violates any order or regulation issued under this Act shall be subject to a civil penalty of not more than \$5,000 for each violation.

【42 U.S.C. 5157】

## AVAILABILITY OF MATERIALS

SEC. 315. The President is authorized, at the request of the Governor of an affected State, to provide for a survey of construction materials needed in the area affected by a major disaster on an emergency basis for housing repairs, replacement housing, public facilities repairs and replacement, farming operations, and business enterprises and to take appropriate action to assure the availability and fair distribution of needed materials, including, where possible, the allocation of such materials for a period of not more than one hundred and eighty days after such major disaster. Any allocation program shall be implemented by the President to the extent possible, by working with and through those companies which traditionally supply construction materials in the affected area. For the purposes of this section “construction materials” shall include building materials and materials required for repairing housing, replacement housing, public facilities repairs and replacement, and for normal farm and business operations.

【42 U.S.C. 5158】

**SEC. 316. PROTECTION OF ENVIRONMENT.**

An action which is taken or assistance which is provided pursuant to section 402, 403, 406, 407, or 502, including such assistance provided pursuant to the procedures provided for in section 422, which has the effect of restoring a facility substantially to its condition prior to the disaster or emergency, shall not be deemed a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (83 Stat. 852). Nothing in this section shall alter or affect the applicability of the National Environmental Policy Act of 1969 to other Federal actions taken under this Act or under any other provisions of law.

【42 U.S.C. 5159】

**SEC. 317. RECOVERY OF ASSISTANCE.**

(a) **PARTY LIABLE.**—Any person who intentionally causes a condition for which Federal assistance is provided under this Act or under any other Federal law as a result of a declaration of a major disaster or emergency under this Act shall be liable to the United States for the reasonable costs incurred by the United States in responding to such disaster or emergency to the extent that such costs are attributable to the intentional act or omission of such person which caused such condition. Such action for reasonable costs shall be brought in an appropriate United States district court.

(b) **RENDERING OF CARE.**—A person shall not be liable under this section for costs incurred by the United States as a result of actions taken or omitted by such person in the course of rendering care or assistance in response to a major disaster or emergency.

[42 U.S.C. 5160]

**SEC. 318. AUDITS AND INVESTIGATIONS.**

(a) **IN GENERAL.**—Subject to the provisions of chapter 75 of title 31, United States Code, relating to requirements for single audits, the President shall conduct audits and investigations as necessary to assure compliance with this Act, and in connection therewith may question such persons as may be necessary to carry out such audits and investigations.

(b) **ACCESS TO RECORDS.**—For purposes of audits and investigations under this section, the President and Comptroller General may inspect any books, documents, papers, and records of any person relating to any activity undertaken or funded under this Act.

(c) **STATE AND LOCAL AUDITS.**—The President may require audits by State and local governments in connection with assistance under this Act when necessary to assure compliance with this Act or related regulations.

[42 U.S.C. 5161]

**SEC. 319. ADVANCE OF NON-FEDERAL SHARE.**

(a) **IN GENERAL.**—The President may lend or advance to an eligible applicant or a State the portion of assistance for which the State is responsible under the cost-sharing provisions of this Act in any case in which—

(1) the State is unable to assume its financial responsibility under such cost-sharing provisions—

(A) with respect to concurrent, multiple major disasters in a jurisdiction, or

(B) after incurring extraordinary costs as a result of a particular disaster; and

(2) the damages caused by such disasters or disaster are so overwhelming and severe that it is not possible for the applicant or the State to assume immediately their financial responsibility under this Act.

(b) **TERMS OF LOANS AND ADVANCES.**—

(1) **IN GENERAL.**—Any loan or advance under this section shall be repaid to the United States.

(2) **INTEREST.**—Loans and advances under this section shall bear interest at a rate determined by the Secretary of the Treasury, taking into consideration the current market yields

**Sec. 320 ROBERT T. STAFFORD DISASTER RELIEF AND EMERGENCY... 32**

on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the reimbursement period of the loan or advance.

(c) REGULATIONS.—The President shall issue regulations describing the terms and conditions under which any loan or advance authorized by this section may be made.

【42 U.S.C. 5162】

**SEC. 320. LIMITATION ON USE OF SLIDING SCALES.**

No geographic area shall be precluded from receiving assistance under this Act solely by virtue of an arithmetic formula or sliding scale based on income or population.

【42 U.S.C. 5163】

**SEC. 321. RULES AND REGULATIONS.**

The President may prescribe such rules and regulations as may be necessary and proper to carry out the provisions of this Act, and may exercise, either directly or through such Federal agency as the President may designate, any power or authority conferred to the President by this Act.

【42 U.S.C. 5164】

**SEC. 322. MITIGATION PLANNING.**

(a) REQUIREMENT OF MITIGATION PLAN.—As a condition of receipt of an increased Federal share for hazard mitigation measures under subsection (e), a State, local, or tribal government shall develop and submit for approval to the President a mitigation plan that outlines processes for identifying the natural hazards, risks, and vulnerabilities of the area under the jurisdiction of the government.

(b) LOCAL AND TRIBAL PLANS.—Each mitigation plan developed by a local or tribal government shall—

- (1) describe actions to mitigate hazards, risks, and vulnerabilities identified under the plan; and
- (2) establish a strategy to implement those actions.

(c) STATE PLANS.—The State process of development of a mitigation plan under this section shall—

- (1) identify the natural hazards, risks, and vulnerabilities of areas in the State;
- (2) support development of local mitigation plans;
- (3) provide for technical assistance to local and tribal governments for mitigation planning; and
- (4) identify and prioritize mitigation actions that the State will support, as resources become available.

(d) FUNDING.—

(1) IN GENERAL.—Federal contributions under section 404 may be used to fund the development and updating of mitigation plans under this section.

(2) MAXIMUM FEDERAL CONTRIBUTION.—With respect to any mitigation plan, a State, local, or tribal government may use an amount of Federal contributions under section 404 not to exceed 7 percent of the amount of such contributions available to the government as of a date determined by the government.

(e) INCREASED FEDERAL SHARE FOR HAZARD MITIGATION MEASURES.—

(1) IN GENERAL.—If, at the time of the declaration of a major disaster or event under section 420, a State has in effect an approved mitigation plan under this section, the President may increase to 20 percent, with respect to the major disaster or event under section 420, the maximum percentage specified in the last sentence of section 404(a).

(2) FACTORS FOR CONSIDERATION.—In determining whether to increase the maximum percentage under paragraph (1), the President shall consider whether the State has established—

(A) eligibility criteria for property acquisition and other types of mitigation measures;

(B) requirements for cost effectiveness that are related to the eligibility criteria;

(C) a system of priorities that is related to the eligibility criteria; and

(D) a process by which an assessment of the effectiveness of a mitigation action may be carried out after the mitigation action is complete.

[42 U.S.C. 5165]

**SEC. 323. MINIMUM STANDARDS FOR PUBLIC AND PRIVATE STRUCTURES.**

(a) IN GENERAL.—As a condition of receipt of a disaster loan or grant under this Act—

(1) the recipient shall carry out any repair or construction to be financed with the loan or grant in accordance with applicable standards of safety, decency, and sanitation and in conformity with applicable codes, specifications, and standards; and

(2) the President may require safe land use and construction practices, after adequate consultation with appropriate State and local government officials.

(b) EVIDENCE OF COMPLIANCE.—A recipient of a disaster loan or grant under this Act shall provide such evidence of compliance with this section as the President may require by regulation.

[42 U.S.C. 5165a]

**SEC. 324. MANAGEMENT COSTS.**

(a) DEFINITION OF MANAGEMENT COST.—In this section, the term “management cost” includes any indirect cost, any direct administrative cost, and any other administrative expense associated with a specific project under a major disaster, emergency, or disaster preparedness or mitigation activity or measure.

(b) ESTABLISHMENT OF MANAGEMENT COST RATES.—

(1) IN GENERAL.—Notwithstanding any other provision of law (including any administrative rule or guidance), the President shall by regulation implement management cost rates, for grantees and subgrantees, that shall be used to determine contributions under this Act for management costs.

(2) SPECIFIC MANAGEMENT COSTS.—The Administrator of the Federal Emergency Management Agency shall provide the following percentage rates, in addition to the eligible project

costs, to cover direct and indirect costs of administering the following programs:

(A) HAZARD MITIGATION.—A grantee under section 404 may be reimbursed not more than 15 percent of the total amount of the grant award under such section of which not more than 10 percent may be used by the grantee and 5 percent by the subgrantee for such costs.

(B) PUBLIC ASSISTANCE.—A grantee under sections 403, 406, 407, and 502 may be reimbursed not more than 12 percent of the total award amount under such sections, of which not more than 7 percent may be used by the grantee and 5 percent by the subgrantee for such costs.

(c) REVIEW.—The President shall review the management cost rates established under subsection (b) not later than 3 years after the date of establishment of the rates and periodically thereafter.

【42 U.S.C. 5165b】

**SEC. 325. PUBLIC NOTICE, COMMENT, AND CONSULTATION REQUIREMENTS.**

(a) PUBLIC NOTICE AND COMMENT CONCERNING NEW OR MODIFIED POLICIES.—

(1) IN GENERAL.—The President shall provide for public notice and opportunity for comment before adopting any new or modified policy that—

(A) governs implementation of the public assistance program administered by the Federal Emergency Management Agency under this Act; and

(B) could result in a significant reduction of assistance under the program.

(2) APPLICATION.—Any policy adopted under paragraph (1) shall apply only to a major disaster or emergency declared on or after the date on which the policy is adopted.

(b) CONSULTATION CONCERNING INTERIM POLICIES.—

(1) IN GENERAL.—Before adopting any interim policy under the public assistance program to address specific conditions that relate to a major disaster or emergency that has been declared under this Act, the President, to the maximum extent practicable, shall solicit the views and recommendations of grantees and subgrantees with respect to the major disaster or emergency concerning the potential interim policy, if the interim policy is likely—

(A) to result in a significant reduction of assistance to applicants for the assistance with respect to the major disaster or emergency; or

(B) to change the terms of a written agreement to which the Federal Government is a party concerning the declaration of the major disaster or emergency.

(2) NO LEGAL RIGHT OF ACTION.—Nothing in this subsection confers a legal right of action on any party.

(c) PUBLIC ACCESS.—The President shall promote public access to policies governing the implementation of the public assistance program.

【42 U.S.C. 5165c】

**SEC. 326. DESIGNATION OF SMALL STATE AND RURAL ADVOCATE.**

(a) **IN GENERAL.**—The President shall designate in the Federal Emergency Management Agency a Small State and Rural Advocate.

(b) **RESPONSIBILITIES.**—The Small State and Rural Advocate shall be an advocate for the fair treatment of small States and rural communities in the provision of assistance under this Act.

(c) **DUTIES.**—The Small State and Rural Advocate shall—

(1) participate in the disaster declaration process under section 401 and the emergency declaration process under section 501, to ensure that the needs of rural communities are being addressed;

(2) assist small population States in the preparation of requests for major disaster or emergency declarations;

(3) assist States in the collection and presentation of material in the disaster or emergency declaration request relevant to demonstrate severe localized impacts within the State for a specific incident, including—

(A) the per capita personal income by local area, as calculated by the Bureau of Economic Analysis;

(B) the disaster impacted population profile, as reported by the Bureau of the Census, including—

(i) the percentage of the population for whom poverty status is determined;

(ii) the percentage of the population already receiving Government assistance such as Supplemental Security Income and Supplemental Nutrition Assistance Program benefits;

(iii) the pre-disaster unemployment rate;

(iv) the percentage of the population that is 65 years old and older;

(v) the percentage of the population 18 years old and younger;

(vi) the percentage of the population with a disability;

(vii) the percentage of the population who speak a language other than English and speak English less than “very well”; and

(viii) any unique considerations regarding American Indian and Alaskan Native Tribal populations raised in the State’s request for a major disaster declaration that may not be reflected in the data points referenced in this subparagraph;

(C) the impact to community infrastructure, including—

(i) disruptions to community life-saving and life-sustaining services;

(ii) disruptions or increased demand for essential community services; and

(iii) disruptions to transportation, infrastructure, and utilities; and

(D) any other information relevant to demonstrate severe local impacts; and

(4) conduct such other activities as the Administrator of the Federal Emergency Management Agency considers appropriate.

[42 U.S.C. 5165d]

**SEC. 327. NATIONAL URBAN SEARCH AND RESCUE RESPONSE SYSTEM.**

(a) **DEFINITIONS.**—In this section, the following definitions shall apply:

(1) **ADMINISTRATOR.**—The term “Administrator” means the Administrator of the Federal Emergency Management Agency.

(2) **AGENCY.**—The term “Agency” means the Federal Emergency Management Agency.

(3) **HAZARD.**—The term “hazard” has the meaning given the term in section 602.

(4) **NONEMPLOYEE SYSTEM MEMBER.**—The term “non-employee System member” means a System member not employed by a sponsoring agency or participating agency.

(5) **PARTICIPATING AGENCY.**—The term “participating agency” means a State or local government, nonprofit organization, or private organization that has executed an agreement with a sponsoring agency to participate in the System.

(6) **SPONSORING AGENCY.**—The term “sponsoring agency” means a State or local government that is the sponsor of a task force designated by the Administrator to participate in the System.

(7) **SYSTEM.**—The term “System” means the National Urban Search and Rescue Response System to be administered under this section.

(8) **SYSTEM MEMBER.**—The term “System member” means an individual who is not a full-time employee of the Federal Government and who serves on a task force or on a System management or other technical team.

(9) **TASK FORCE.**—The term “task force” means an urban search and rescue team designated by the Administrator to participate in the System.

(b) **GENERAL AUTHORITY.**—Subject to the requirements of this section, the Administrator shall continue to administer the emergency response system known as the National Urban Search and Rescue Response System.

(c) **FUNCTIONS.**—In administering the System, the Administrator shall provide for a national network of standardized search and rescue resources to assist States and local governments in responding to hazards.

(d) **TASK FORCES.**—

(1) **DESIGNATION.**—The Administrator shall designate task forces to participate in the System. The Administration shall determine the criteria for such participation.

(2) **SPONSORING AGENCIES.**—Each task force shall have a sponsoring agency. The Administrator shall enter into an agreement with the sponsoring agency with respect to the participation of each task force in the System.

(3) **COMPOSITION.**—

(A) **PARTICIPATING AGENCIES.**—A task force may include, at the discretion of the sponsoring agency, one or

more participating agencies. The sponsoring agency shall enter into an agreement with each participating agency with respect to the participation of the participating agency on the task force.

(B) OTHER INDIVIDUALS.—A task force may also include, at the discretion of the sponsoring agency, other individuals not otherwise associated with the sponsoring agency or a participating agency. The sponsoring agency of a task force may enter into a separate agreement with each such individual with respect to the participation of the individual on the task force.

(e) MANAGEMENT AND TECHNICAL TEAMS.—The Administrator shall maintain such management teams and other technical teams as the Administrator determines are necessary to administer the System.

(f) APPOINTMENT OF SYSTEM MEMBERS INTO FEDERAL SERVICE.—

(1) IN GENERAL.—The Administrator may appoint a System member into Federal service for a period of service to provide for the participation of the System member in exercises, preincident staging, major disaster and emergency response activities, and training events sponsored or sanctioned by the Administrator.

(2) NONAPPLICABILITY OF CERTAIN CIVIL SERVICE LAWS.—The Administrator may make appointments under paragraph (1) without regard to the provisions of title 5, United States Code, governing appointments in the competitive service.

(3) RELATIONSHIP TO OTHER AUTHORITIES.—The authority of the Administrator to make appointments under this subsection shall not affect any other authority of the Administrator under this Act.

(4) LIMITATION.—A System member who is appointed into Federal service under paragraph (1) shall not be considered an employee of the United States for purposes other than those specifically set forth in this section.

(g) COMPENSATION.—

(1) PAY OF SYSTEM MEMBERS.—Subject to such terms and conditions as the Administrator may impose by regulation, the Administrator shall make payments to the sponsoring agency of a task force—

(A) to reimburse each employer of a System member on the task force for compensation paid by the employer to the System member for any period during which the System member is appointed into Federal service under subsection (f)(1); and

(B) to make payments directly to a nonemployee System member on the task force for any period during which the nonemployee System member is appointed into Federal service under subsection (f)(1).

(2) REIMBURSEMENT FOR EMPLOYEES FILLING POSITIONS OF SYSTEM MEMBERS.—

(A) IN GENERAL.—Subject to such terms and conditions as the Administrator may impose by regulation, the Administrator shall make payments to the sponsoring agency

of a task force to be used to reimburse each employer of a System member on the task force for compensation paid by the employer to an employee filling a position normally filled by the System member for any period during which the System member is appointed into Federal service under subsection (f)(1).

(B) LIMITATION.—Costs incurred by an employer shall be eligible for reimbursement under subparagraph (A) only to the extent that the costs are in excess of the costs that would have been incurred by the employer had the System member not been appointed into Federal service under subsection (f)(1).

(3) METHOD OF PAYMENT.—A System member shall not be entitled to pay directly from the Agency for a period during which the System member is appointed into Federal Service under subsection (f)(1).

(h) PERSONAL INJURY, ILLNESS, DISABILITY, OR DEATH.—

(1) IN GENERAL.—A System member who is appointed into Federal service under subsection (f)(1) and who suffers personal injury, illness, disability, or death as a result of a personal injury sustained while acting in the scope of such appointment, shall, for the purposes of subchapter I of chapter 81 of title 5, United States Code, be treated as though the member were an employee (as defined by section 8101 of that title) who had sustained the injury in the performance of duty.

(2) ELECTION OF BENEFITS.—

(A) IN GENERAL.—A System member (or, in the case of the death of the System member, the System member's dependent) who is entitled under paragraph (1) to receive benefits under subchapter I of chapter 81 of title 5, United States Code, by reason of personal injury, illness, disability, or death, and to receive benefits from a State or local government by reason of the same personal injury, illness, disability or death shall elect to—

(i) receive benefits under such subchapter; or

(ii) receive benefits from the State or local government.

(B) DEADLINE.—A System member or dependent shall make an election of benefits under subparagraph (A) not later than 1 year after the date of the personal injury, illness, disability, or death that is the reason for the benefits, or until such later date as the Secretary of Labor may allow for reasonable cause shown.

(C) EFFECT OF ELECTION.—An election of benefits made under this paragraph is irrevocable unless otherwise provided by law.

(3) REIMBURSEMENT FOR STATE OR LOCAL BENEFITS.—Subject to such terms and conditions as the Administrator may impose by regulation, if a System member or dependent elects to receive benefits from a State or local government under paragraph (2)(A), the Administrator shall reimburse the State or local government for the value of the benefits.

(4) PUBLIC SAFETY OFFICER CLAIMS.—Nothing in this subsection shall be construed to bar any claim by, or with respect

to, any System member who is a public safety officer, as defined in section 1204 of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3796b), for any benefits authorized under part L of title I of that Act (42 U.S.C. 3796 et seq.).

(i) **LIABILITY.**—A System member appointed into Federal service under subsection (f)(1), while acting within the scope of the appointment, shall be considered to be an employee of the Federal Government under section 1346(b) of title 28, United States Code, and chapter 171 of that title, relating to tort claims procedure.

(j) **EMPLOYMENT AND REEMPLOYMENT RIGHTS.**—With respect to a System member who is not a regular full-time employee of a sponsoring agency or participating agency, the following terms and conditions apply:

(1) **SERVICE.**—Service as a System member shall be considered to be “service in the uniformed services” for purposes of chapter 43 of title 38, United States Code, relating to employment and reemployment rights of individuals who have performed service in the uniformed services (regardless of whether the individual receives compensation for such participation). All rights and obligations of such persons and procedures for assistance, enforcement, and investigation shall be as provided for in such chapter.

(2) **PRECLUSION.**—Preclusion of giving notice of service by necessity of appointment under this section shall be considered to be preclusion by “military necessity” for purposes of section 4312(b) of title 38, United States Code, pertaining to giving notice of absence from a position of employment. A determination of such necessity shall be made by the Administrator and shall not be subject to judicial review.

(k) **LICENSES AND PERMITS.**—If a System member holds a valid license, certificate, or other permit issued by any State or other governmental jurisdiction evidencing the member’s qualifications in any professional, mechanical, or other skill or type of assistance required by the System, the System member is deemed to be performing a Federal activity when rendering aid involving such skill or assistance during a period of appointment into Federal service under subsection (f)(1).

(l) **PREPAREDNESS COOPERATIVE AGREEMENTS.**—Subject to the availability of appropriations for such purpose, the Administrator shall enter into an annual preparedness cooperative agreement with each sponsoring agency. Amounts made available to a sponsoring agency under such a preparedness cooperative agreement shall be for the following purposes:

(1) Training and exercises, including training and exercises with other Federal, State, and local government response entities.

(2) Acquisition and maintenance of equipment, including interoperable communications and personal protective equipment.

(3) Medical monitoring required for responder safety and health in anticipation of and following a major disaster, emergency, or other hazard, as determined by the Administrator.

(m) RESPONSE COOPERATIVE AGREEMENTS.—The Administrator shall enter into a response cooperative agreement with each sponsoring agency, as appropriate, under which the Administrator agrees to reimburse the sponsoring agency for costs incurred by the sponsoring agency in responding to a major disaster or emergency.

(n) OBLIGATIONS.—The Administrator may incur all necessary obligations consistent with this section in order to ensure the effectiveness of the System.

(o) EQUIPMENT MAINTENANCE AND REPLACEMENT.—Not later than 180 days after the date of enactment of this section, the Administrator shall submit to the appropriate congressional committees (as defined in section 2 of the Homeland Security Act of 2002 (6 U.S.C. 101)) a report on the development of a plan, including implementation steps and timeframes, to finance, maintain, and replace System equipment.

(p) FEDERAL EMPLOYEES.—Nothing in this section shall be construed to mean that a task force may not include Federal employees. In the case of a Federal employee detailed to a task force, the sponsoring agency shall enter into an agreement with the relevant employing Federal agency.

[42 U.S.C. 5165f]

## TITLE IV—MAJOR DISASTER ASSISTANCE PROGRAMS

### SEC. 401. PROCEDURE FOR DECLARATION.

(a) IN GENERAL.—All requests for a declaration by the President that a major disaster exists shall be made by the Governor of the affected State. Such a request shall be based on a finding that the disaster is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local governments and that Federal assistance is necessary. As part of such request, and as a prerequisite to major disaster assistance under this Act, the Governor shall take appropriate response action under State law and direct execution of the State's emergency plan. The Governor shall furnish information on the nature and amount of State and local resources which have been or will be committed to alleviating the results of the disaster, and shall certify that, for the current disaster, State and local government obligations and expenditures (of which State commitments must be a significant proportion) will comply with all applicable cost-sharing requirements of this Act. Based on the request of a Governor under this section, the President may declare under this Act that a major disaster or emergency exists.

(b) INDIAN TRIBAL GOVERNMENT REQUESTS.—

(1) IN GENERAL.—The Chief Executive of an affected Indian tribal government may submit a request for a declaration by the President that a major disaster exists consistent with the requirements of subsection (a).

(2) REFERENCES.—In implementing assistance authorized by the President under this Act in response to a request of the Chief Executive of an affected Indian tribal government for a major disaster declaration, any reference in this title or title

III (except sections 310 and 326) to a State or the Governor of a State is deemed to refer to an affected Indian tribal government or the Chief Executive of an affected Indian tribal government, as appropriate.

(3) SAVINGS PROVISION.—Nothing in this subsection shall prohibit an Indian tribal government from receiving assistance under this title through a declaration made by the President at the request of a State under subsection (a) if the President does not make a declaration under this subsection for the same incident.

(c) COST SHARE ADJUSTMENTS FOR INDIAN TRIBAL GOVERNMENTS.—

(1) IN GENERAL.—In providing assistance to an Indian tribal government under this title, the President may waive or adjust any payment of a non-Federal contribution with respect to the assistance if—

(A) the President has the authority to waive or adjust the payment under another provision of this title; and

(B) the President determines that the waiver or adjustment is necessary and appropriate.

(2) CRITERIA FOR MAKING DETERMINATIONS.—The President shall establish criteria for making determinations under paragraph (1)(B).

[42 U.S.C. 5170]

**SEC. 402. GENERAL FEDERAL ASSISTANCE.**

In any major disaster, the President may—

(1) direct any Federal agency, with or without reimbursement, to utilize its authorities and the resources granted to it under Federal law (including personnel, equipment, supplies, facilities, and managerial, technical, and advisory services) in support of State and local assistance response or recovery efforts, including precautionary evacuations;

(2) coordinate all disaster relief assistance (including voluntary assistance) provided by Federal agencies, private organizations, and State and local governments, including precautionary evacuations and recovery;

(3) provide technical and advisory assistance to affected State and local governments for—

(A) the performance of essential community services;

(B) issuance of warnings of risks and hazards;

(C) public health and safety information, including dissemination of such information;

(D) provision of health and safety measures;

(E) management, control, and reduction of immediate threats to public health and safety; and

(F) recovery activities, including disaster impact assessments and planning;

(4) assist State and local governments in the distribution of medicine, food, and other consumable supplies, and emergency assistance;

(5) provide assistance to State and local governments for building code and floodplain management ordinance adminis-

**Sec. 403 ROBERT T. STAFFORD DISASTER RELIEF AND EMERGENCY... 42**

tration and enforcement, including inspections for substantial damage compliance; and

(6) provide accelerated Federal assistance and Federal support where necessary to save lives, prevent human suffering, or mitigate severe damage, which may be provided in the absence of a specific request and in which case the President—

(A) shall, to the fullest extent practicable, promptly notify and coordinate with officials in a State in which such assistance or support is provided; and

(B) shall not, in notifying and coordinating with a State under subparagraph (A), delay or impede the rapid deployment, use, and distribution of critical resources to victims of a major disaster.

[42 U.S.C. 5170a]

**SEC. 403. ESSENTIAL ASSISTANCE.**

(a) **IN GENERAL.**—Federal agencies may on the direction of the President, provide assistance essential to meeting immediate threats to life and property resulting from a major disaster, as follows:

(1) **FEDERAL RESOURCES, GENERALLY.**—Utilizing, lending, or donating to State and local governments Federal equipment, supplies, facilities, personnel, and other resources, other than the extension of credit, for use or distribution by such governments in accordance with the purposes of this Act.

(2) **MEDICINE, FOOD, AND OTHER CONSUMABLES.**—Distributing or rendering through State and local governments, the American National Red Cross, the Salvation Army, the Mennonite Disaster Service, and other relief and disaster assistance organizations medicine durable medical equipment,<sup>4</sup> food, and other consumable supplies, and other services and assistance to disaster victims.

(3) **WORK AND SERVICES TO SAVE LIVES AND PROTECT PROPERTY.**—Performing on public or private lands or waters any work or services essential to saving lives and protecting and preserving property or public health and safety, including—

(A) debris removal;

(B) search and rescue, emergency medical care, emergency mass care, emergency shelter, and provision of food, water, medicinedurable medical equipment,<sup>4</sup> and other essential needs, including movement of supplies or persons;

(C) clearance of roads and construction of temporary bridges necessary to the performance of emergency tasks and essential community services;

(D) provision of temporary facilities for schools and other essential community services;

(E) demolition of unsafe structures which endanger the public;

(F) warning of further risks and hazards;

(G) dissemination of public information and assistance regarding health and safety measures;

<sup>4</sup> So in law. See amendments made by section 689(b) of Public Law 109–295.

- (H) provision of technical advice to State and local governments on disaster management and control;
- (I) reduction of immediate threats to life, property, and public health and safety; and
- (J) provision of rescue, care, shelter, and essential needs—
- (i) to individuals with household pets and service animals; and
  - (ii) to such pets and animals.
- (4) CONTRIBUTIONS.—Making contributions to State or local governments or owners or operators of private nonprofit facilities for the purpose of carrying out the provisions of this subsection.
- (b) FEDERAL SHARE.—The Federal share of assistance under this section shall be not less than 75 percent of the eligible cost of such assistance.
- (c) UTILIZATION OF DOD RESOURCES.—
- (1) GENERAL RULE.—During the immediate aftermath of an incident which may ultimately qualify for assistance under this title or title V of this Act, the Governor of the State in which such incident occurred may request the President to direct the Secretary of Defense to utilize the resources of the Department of Defense for the purpose of performing on public and private lands any emergency work which is made necessary by such incident and which is essential for the preservation of life and property. If the President determines that such work is essential for the preservation of life and property, the President shall grant such request to the extent the President determines practicable. Such emergency work may only be carried out for a period not to exceed 10 days.
- (2) RULES APPLICABLE TO DEBRIS REMOVAL.—Any removal of debris and wreckage carried out under this subsection shall be subject to section 407(b), relating to unconditional authorization and indemnification for debris removal.
- (3) EXPENDITURES OUT OF DISASTER RELIEF FUNDS.—The cost of any assistance provided pursuant to this subsection shall be reimbursed out of funds made available to carry out this Act.
- (4) FEDERAL SHARE.—The Federal share of assistance under this subsection shall be not less than 75 percent.
- (5) GUIDELINES.—Not later than 180 days after the date of the enactment of the Disaster Relief and Emergency Assistance Amendments of 1988, the President shall issue guidelines for carrying out this subsection. Such guidelines shall consider any likely effect assistance under this subsection will have on the availability of other forms of assistance under this Act.
- (6) DEFINITIONS.—For purposes of this section—
- (A) DEPARTMENT OF DEFENSE.—The term “Department of Defense” has the meaning the term “department” has under section 101 of title 10, United States Code.
- (B) EMERGENCY WORK.—The term “emergency work” includes clearance and removal of debris and wreckage and temporary restoration of essential public facilities and services.

## (d) SALARIES AND BENEFITS.—

(1) IN GENERAL.—If the President declares a major disaster or emergency for an area within the jurisdiction of a State, tribal, or local government, the President may reimburse the State, tribal, or local government for costs relating to—

(A) basic pay and benefits for permanent employees of the State, tribal, or local government conducting emergency protective measures under this section, if—

(i) the work is not typically performed by the employees; and

(ii) the type of work may otherwise be carried out by contract or agreement with private organizations, firms, or individuals;<sup>5</sup> or

(B) overtime and hazardous duty compensation for permanent employees of the State, tribal, or local government conducting emergency protective measures under this section.

(2) OVERTIME.—The guidelines for reimbursement for costs under paragraph (1) shall ensure that no State, tribal, or local government is denied reimbursement for overtime payments that are required pursuant to the Fair Labor Standards Act of 1938 (29 U.S.C. 201 et seq.).

(3) NO EFFECT ON MUTUAL AID PACTS.—Nothing in this subsection shall affect the ability of the President to reimburse labor force expenses provided pursuant to an authorized mutual aid pact.

[42 U.S.C. 5170b]

**SEC. 404. HAZARD MITIGATION.**

(a) IN GENERAL.—The President may contribute up to 75 percent of the cost of hazard mitigation measures which the President has determined are cost effective and which substantially reduce the risk of, or increase resilience to, future damage, hardship, loss, or suffering in any area affected by a major disaster, or any area affected by a fire for which assistance was provided under section 420. Such measures shall be identified following the evaluation of natural hazards under section 322 and shall be subject to approval by the President. Subject to section 322, the total of contributions under this section for a major disaster or event under section 420 shall not exceed 15 percent for amounts not more than \$2,000,000,000, 10 percent for amounts of more than \$2,000,000,000 and not more than \$10,000,000,000, and 7.5 percent on amounts of more than \$10,000,000,000 and not more than \$35,333,000,000 of the estimated aggregate amount of grants to be made (less any associated administrative costs) under this Act with respect to the major disaster or event under section 420.

(b) PROPERTY ACQUISITION AND RELOCATION ASSISTANCE.—

(1) GENERAL AUTHORITY.—In providing hazard mitigation assistance under this section in connection with flooding, the Administrator of the Federal Emergency Management Agency may provide property acquisition and relocation assistance for projects that meet the requirements of paragraph (2).

<sup>5</sup>The grammar at the end of subparagraph (A)(ii) is so in law.

(2) TERMS AND CONDITIONS.—An acquisition or relocation project shall be eligible to receive assistance pursuant to paragraph (1) only if—

(A) the applicant for the assistance is otherwise eligible to receive assistance under the hazard mitigation grant program established under subsection (a); and

(B) on or after the date of enactment of this subsection, the applicant for the assistance enters into an agreement with the Administrator that provides assurances that—

(i) any property acquired, accepted, or from which a structure will be removed pursuant to the project will be dedicated and maintained in perpetuity for a use that is compatible with open space, recreational, or wetlands management practices;

(ii) no new structure will be erected on property acquired, accepted or from which a structure was removed under the acquisition or relocation program other than—

(I) a public facility that is open on all sides and functionally related to a designated open space;

(II) a rest room; or

(III) a structure that the Administrator approves in writing before the commencement of the construction of the structure; and

(iii) after receipt of the assistance, with respect to any property acquired, accepted or from which a structure was removed under the acquisition or relocation program—

(I) no subsequent application for additional disaster assistance for any purpose will be made by the recipient to any Federal entity; and

(II) no assistance referred to in subclause (I) will be provided to the applicant by any Federal source.

(3) STATUTORY CONSTRUCTION.—Nothing in this subsection is intended to alter or otherwise affect an agreement for an acquisition or relocation project carried out pursuant to this section that was in effect on the day before the date of enactment of this subsection.

(c) PROGRAM ADMINISTRATION BY STATES.—

(1) IN GENERAL.—A State desiring to administer the hazard mitigation grant program established by this section with respect to hazard mitigation assistance in the State may submit to the President an application for the delegation of the authority to administer the program.

(2) CRITERIA.—The President, in consultation and coordination with States and local governments, shall establish criteria for the approval of applications submitted under paragraph (1). Until such time as the Administrator promulgates regulations to implement this paragraph, the Administrator may waive notice and comment rulemaking, if the Administrator determines doing so is necessary to expeditiously imple-

ment this section, and may carry out this section as a pilot program. The criteria shall include, at a minimum—

- (A) the demonstrated ability of the State to manage the grant program under this section;
- (B) there being in effect an approved mitigation plan under section 322; and
- (C) a demonstrated commitment to mitigation activities.

(3) APPROVAL.—The President shall approve an application submitted under paragraph (1) that meets the criteria established under paragraph (2).

(4) WITHDRAWAL OF APPROVAL.—If, after approving an application of a State submitted under paragraph (1), the President determines that the State is not administering the hazard mitigation grant program established by this section in a manner satisfactory to the President, the President shall withdraw the approval.

(5) AUDITS.—The President shall provide for periodic audits of the hazard mitigation grant programs administered by States under this subsection.

(d) STREAMLINED PROCEDURES.—

(1) IN GENERAL.—For the purpose of providing assistance under this section, the President shall ensure that—

- (A) adequate resources are devoted to ensure that applicable environmental reviews under the National Environmental Policy Act of 1969 and historic preservation reviews under the National Historic Preservation Act are completed on an expeditious basis; and
- (B) the shortest existing applicable process under the National Environmental Policy Act of 1969 and the National Historic Preservation Act is utilized.

(2) AUTHORITY FOR OTHER EXPEDITED PROCEDURES.—The President may utilize expedited procedures in addition to those required under paragraph (1) for the purpose of providing assistance under this section, such as procedures under the Prototype Programmatic Agreement of the Federal Emergency Management Agency, for the consideration of multiple structures as a group and for an analysis of the cost-effectiveness and fulfillment of cost-share requirements for proposed hazard mitigation measures.

(e) ADVANCE ASSISTANCE.—The President may provide not more than 25 percent of the amount of the estimated cost of hazard mitigation measures to a State grantee eligible for a grant under this section before eligible costs are incurred.

(f) USE OF ASSISTANCE.—Recipients of hazard mitigation assistance provided under this section and section 203 may use the assistance to conduct activities to help reduce the risk of future damage, hardship, loss, or suffering in any area affected by a wild-fire or windstorm, such as—

- (1) reseeding ground cover with quick-growing or native species;
- (2) mulching with straw or chipped wood;
- (3) constructing straw, rock, or log dams in small tributaries to prevent flooding;

- (4) placing logs and other erosion barriers to catch sediment on hill slopes;
- (5) installing debris traps to modify road and trail drainage mechanisms;
- (6) modifying or removing culverts to allow drainage to flow freely;
- (7) adding drainage dips and constructing emergency spillways to keep roads and bridges from washing out during floods;
- (8) planting grass to prevent the spread of noxious weeds;
- (9) installing warning signs;
- (10) establishing defensible space measures;
- (11) reducing hazardous fuels;
- (12) mitigating windstorm and wildfire damage, including—

(A) replacing or installing electrical transmission or distribution utility pole structures with poles that are resilient to extreme wind, wildfire, and combined ice and wind loadings for the basic wind speeds and ice conditions associated with the relevant location; and

(B) the installation of fire-resistant wires and infrastructure and the undergrounding of wires;

(13) removing standing burned trees; and

(14) replacing water systems that have been burned and have caused contamination.

(g) USE OF ASSISTANCE FOR EARTHQUAKE HAZARDS.—Recipients of hazard mitigation assistance provided under this section and section 203 may use the assistance to conduct activities to help reduce the risk of future damage, hardship, loss, or suffering in any area affected by earthquake hazards, including—

(1) improvements to regional seismic networks in support of building a capability for earthquake early warning;

(2) improvements to geodetic networks in support of building a capability for earthquake early warning; and

(3) improvements to seismometers, Global Positioning System receivers, and associated infrastructure in support of building a capability for earthquake early warning.

[42 U.S.C. 5170c]

#### FEDERAL FACILITIES

SEC. 405. (a) The President may authorize any Federal agency to repair, reconstruct, restore, or replace any facility owned by the United States and under the jurisdiction of such agency which is damaged or destroyed by any major disaster if he determines that such repair, reconstruction, restoration, or replacement is of such importance and urgency that it cannot reasonably be deferred pending the enactment of specific authorizing legislation or the making of an appropriation for such purposes, or the obtaining of congressional committee approval.

(b) In order to carry out the provisions of this section, such repair, reconstruction, restoration, or replacement may be begun notwithstanding a lack or an insufficiency of funds appropriated for such purpose, where such lack or insufficiency can be remedied by

the transfer, in accordance with law, of funds appropriated to that agency for another purpose.

(c) In implementing this section, Federal agencies shall evaluate the natural hazards to which these facilities are exposed and shall take appropriate action to mitigate such hazards, including safe land-use and construction practices, in accordance with standards prescribed by the President.

[42 U.S.C. 5171]

**SEC. 406. REPAIR, RESTORATION, AND REPLACEMENT OF DAMAGED FACILITIES.**

(a) CONTRIBUTIONS.—

(1) IN GENERAL.—The President may make contributions—

(A) to a State or local government for the repair, restoration, reconstruction, or replacement of a public facility damaged or destroyed by a major disaster and for associated expenses incurred by the government; and

(B) subject to paragraph (3), to a person that owns or operates a private nonprofit facility damaged or destroyed by a major disaster for the repair, restoration, reconstruction, or replacement of the facility and for associated expenses incurred by the person.

(2) ASSOCIATED EXPENSES.—For the purposes of this section, associated expenses shall include—

(A) the costs of mobilizing and employing the National Guard for performance of eligible work;

(B) the costs of using prison labor to perform eligible work, including wages actually paid, transportation to a worksite, and extraordinary costs of guards, food, and lodging;

(C) base and overtime wages for the employees and extra hires of a State, local government, or person described in paragraph (1) that perform eligible work, plus fringe benefits on such wages to the extent that such benefits were being paid before the major disaster; and

(D) base and overtime wages for extra hires to facilitate the implementation and enforcement of adopted building codes for a period of not more than 180 days after the major disaster is declared.

(3) CONDITIONS FOR ASSISTANCE TO PRIVATE NONPROFIT FACILITIES.—

(A) IN GENERAL.—The President may make contributions to a private nonprofit facility under paragraph (1)(B) only if—

(i) the facility provides critical services (as defined by the President) in the event of a major disaster; or

(ii) the owner or operator of the facility—

(I) has applied for a disaster loan under section 7(b) of the Small Business Act (15 U.S.C. 636(b)); and

(II)(aa) has been determined to be ineligible for such a loan; or

(bb) has obtained such a loan in the maximum amount for which the Small Business Administration determines the facility is eligible.

(B) DEFINITION OF CRITICAL SERVICES.—In this paragraph, the term “critical services” includes power, water (including water provided by an irrigation organization or facility), sewer, wastewater treatment, communications (including broadcast and telecommunications), education, and emergency medical care.

(C) RELIGIOUS FACILITIES.—A church, synagogue, mosque, temple, or other house of worship, educational facility, or any other private nonprofit facility, shall be eligible for contributions under paragraph (1)(B), without regard to the religious character of the facility or the primary religious use of the facility. No house of worship, educational facility, or any other private nonprofit facility may be excluded from receiving contributions under paragraph (1)(B) because leadership or membership in the organization operating the house of worship is limited to persons who share a religious faith or practice.

(4) NOTIFICATION TO CONGRESS.—Before making any contribution under this section in an amount greater than \$20,000,000, the President shall notify—

(A) the Committee on Environment and Public Works of the Senate;

(B) the Committee on Transportation and Infrastructure of the House of Representatives;

(C) the Committee on Appropriations of the Senate; and

(D) the Committee on Appropriations of the House of Representatives.

(b) FEDERAL SHARE.—

(1) MINIMUM FEDERAL SHARE.—Except as provided in paragraph (2), the Federal share of assistance under this section shall be not less than 75 percent of the eligible cost of repair, restoration, reconstruction, or replacement carried out under this section.

(2) REDUCED FEDERAL SHARE.—The President shall promulgate regulations to reduce the Federal share of assistance under this section to not less than 25 percent in the case of the repair, restoration, reconstruction, or replacement of any eligible public facility or private nonprofit facility following an event associated with a major disaster—

(A) that has been damaged, on more than one occasion within the preceding 10-year period, by the same type of event; and

(B) the owner of which has failed to implement appropriate mitigation measures to address the hazard that caused the damage to the facility.

(3) INCREASED FEDERAL SHARE.—

(A) INCENTIVE MEASURES.—The President may provide incentives to a State or Tribal government to invest in measures that increase readiness for, and resilience from, a major disaster by recognizing such investments through

a sliding scale that increases the minimum Federal share to 85 percent. Such measures may include—

(i) the adoption of a mitigation plan approved under section 322;

(ii) investments in disaster relief, insurance, and emergency management programs;

(iii) encouraging the adoption and enforcement of the latest published editions of relevant consensus-based codes, specifications, and standards that incorporate the latest hazard-resistant designs and establish minimum acceptable criteria for the design, construction, and maintenance of residential structures and facilities that may be eligible for assistance under this Act for the purpose of protecting the health, safety, and general welfare of the buildings' users against disasters;

(iv) facilitating participation in the community rating system; and

(v) funding mitigation projects or granting tax incentives for projects that reduce risk.

(B) COMPREHENSIVE GUIDANCE.—Not later than 1 year after the date of enactment of this paragraph, the President, acting through the Administrator, shall issue comprehensive guidance to State and Tribal governments regarding the measures and investments, weighted appropriately based on actuarial assessments of eligible actions, that will be recognized for the purpose of increasing the Federal share under this section. Guidance shall ensure that the agency's review of eligible measures and investments does not unduly delay determining the appropriate Federal cost share.

(C) REPORT.—One year after the issuance of the guidance required by subparagraph (B), the Administrator shall submit to the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Homeland Security and Governmental Affairs of the Senate a report regarding the analysis of the Federal cost shares paid under this section.

(D) SAVINGS CLAUSE.—Nothing in this paragraph prevents the President from increasing the Federal cost share above 85 percent.

(c) LARGE IN-LIEU CONTRIBUTIONS.—

(1) FOR PUBLIC FACILITIES.—

(A) IN GENERAL.—In any case in which a State or local government determines that the public welfare would not best be served by repairing, restoring, reconstructing, or replacing any public facility owned or controlled by the State or local government, the State or local government may elect to receive, in lieu of a contribution under subsection (a)(1)(A), a contribution in an amount equal to the Federal share of the Federal estimate of the cost of repairing, restoring, reconstructing, or replacing the facility and of management expenses.

(B) USE OF FUNDS.—Funds contributed to a State or local government under this paragraph may be used—

(i) to repair, restore, or expand other selected public facilities;

(ii) to construct new facilities; or

(iii) to fund hazard mitigation measures that the State or local government determines to be necessary to meet a need for governmental services and functions in the area affected by the major disaster.

(C) LIMITATIONS.—Funds made available to a State or local government under this paragraph may not be used for—

(i) any public facility located in a regulatory floodway (as defined in section 59.1 of title 44, Code of Federal Regulations (or a successor regulation)); or

(ii) any uninsured public facility located in a special flood hazard area identified by the Administrator of the Federal Emergency Management Agency under the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.).

(2) FOR PRIVATE NONPROFIT FACILITIES.—

(A) IN GENERAL.—In any case in which a person that owns or operates a private nonprofit facility determines that the public welfare would not best be served by repairing, restoring, reconstructing, or replacing the facility, the person may elect to receive, in lieu of a contribution under subsection (a)(1)(B), a contribution in an amount equal to the Federal share of the Federal estimate of the cost of repairing, restoring, reconstructing, or replacing the facility and of management expenses.

(B) USE OF FUNDS.—Funds contributed to a person under this paragraph may be used—

(i) to repair, restore, or expand other selected private nonprofit facilities owned or operated by the person;

(ii) to construct new private nonprofit facilities to be owned or operated by the person; or

(iii) to fund hazard mitigation measures that the person determines to be necessary to meet a need for the person's services and functions in the area affected by the major disaster.

(C) LIMITATIONS.—Funds made available to a person under this paragraph may not be used for—

(i) any private nonprofit facility located in a regulatory floodway (as defined in section 59.1 of title 44, Code of Federal Regulations (or a successor regulation)); or

(ii) any uninsured private nonprofit facility located in a special flood hazard area identified by the Administrator of the Federal Emergency Management Agency under the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.).

(d) FLOOD INSURANCE.—

(1) REDUCTION OF FEDERAL ASSISTANCE.—If a public facility or private nonprofit facility located in a special flood hazard area identified for more than 1 year by the Administrator pursuant to the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.) is damaged or destroyed, after the 180th day following the date of the enactment of the Disaster Relief and Emergency Assistance Amendments of 1988, by flooding in a major disaster and such facility is not covered on the date of such flooding by flood insurance, the Federal assistance which would otherwise be available under this section with respect to repair, restoration, reconstruction, and replacement of such facility and associated expenses shall be reduced in accordance with paragraph (2). This section shall not apply to more than one building of a multi-structure educational, law enforcement, correctional, fire, or medical campus, for any major disaster or emergency declared by the President under section 401 or 501, respectively, of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170, 5191) on or after January 1, 2016, through December 31, 2018.

(2) AMOUNT OF REDUCTION.—The amount of a reduction in Federal assistance under this section with respect to a facility shall be the lesser of—

(A) the value of such facility on the date of the flood damage or destruction, or

(B) the maximum amount of insurance proceeds which would have been payable with respect to such facility if such facility had been covered by flood insurance under the National Flood Insurance Act of 1968 on such date.

(3) EXCEPTION.—Paragraphs (1) and (2) shall not apply to a private nonprofit facility which is not covered by flood insurance solely because of the local government's failure to participate in the flood insurance program established by the National Flood Insurance Act.

(4) DISSEMINATION OF INFORMATION.—The President shall disseminate information regarding the reduction in Federal assistance provided for by this subsection to State and local governments and the owners and operators of private nonprofit facilities who may be affected by such a reduction.

(e) ELIGIBLE COST.—

(1) DETERMINATION.—

(A) IN GENERAL.—For the purposes of this section, for disasters declared on or after August 1, 2017, or a disaster in which a cost estimate has not yet been finalized for a project, or for any project for which the finalized cost estimate is on appeal, the President shall estimate the eligible cost of repairing, restoring, reconstructing, or replacing a public facility or private nonprofit facility—

(i) on the basis of the design of the facility as the facility existed immediately before the major disaster;

(ii) in conformity with the latest published editions of relevant consensus-based codes, specifications, and standards that incorporate the latest hazard-resistant designs and establish minimum acceptable criteria for the design, construction, and maintenance of

residential structures and facilities that may be eligible for assistance under this Act for the purposes of protecting the health, safety, and general welfare of a facility's users against disasters (including floodplain management and hazard mitigation criteria required by the President or under the Coastal Barrier Resources Act (16 U.S.C. 3501 et seq.)); and

(iii) in a manner that allows the facility to meet the definition of resilient developed pursuant to this subsection.

(B) COST ESTIMATION PROCEDURES.—

(i) IN GENERAL.—Subject to paragraph (2), the President shall use the cost estimation procedures established under paragraph (3) to determine the eligible cost under this subsection.

(ii) APPLICABILITY.—The procedures specified in this paragraph and paragraph (2) shall apply only to projects the eligible cost of which is equal to or greater than the amount specified in section 422.

(C) CONTRIBUTIONS.—Contributions for the eligible cost made under this section may be provided on an actual cost basis or on cost-estimation procedures.

(2) MODIFICATION OF ELIGIBLE COST.—

(A) ACTUAL COST GREATER THAN CEILING PERCENTAGE OF ESTIMATED COST.—In any case in which the actual cost of repairing, restoring, reconstructing, or replacing a facility under this section is greater than the ceiling percentage established under paragraph (3) of the cost estimated under paragraph (1), the President may determine that the eligible cost includes a portion of the actual cost of the repair, restoration, reconstruction, or replacement that exceeds the cost estimated under paragraph (1).

(B) ACTUAL COST LESS THAN ESTIMATED COST.—

(i) GREATER THAN OR EQUAL TO FLOOR PERCENTAGE OF ESTIMATED COST.—In any case in which the actual cost of repairing, restoring, reconstructing, or replacing a facility under this section is less than 100 percent of the cost estimated under paragraph (1), but is greater than or equal to the floor percentage established under paragraph (3) of the cost estimated under paragraph (1), the State or local government or person receiving funds under this section shall use the excess funds to carry out cost-effective activities that reduce the risk of future damage, hardship, or suffering from a major disaster.

(ii) LESS THAN FLOOR PERCENTAGE OF ESTIMATED COST.—In any case in which the actual cost of repairing, restoring, reconstructing, or replacing a facility under this section is less than the floor percentage established under paragraph (3) of the cost estimated under paragraph (1), the State or local government or person receiving assistance under this section shall reimburse the President in the amount of the difference.

(C) NO EFFECT ON APPEALS PROCESS.—Nothing in this paragraph affects any right of appeal under section 423.

(3) EXPERT PANEL.—

(A) ESTABLISHMENT.—Not later than 18 months after the date of the enactment of this paragraph, the President, acting through the Administrator of the Federal Emergency Management Agency, shall establish an expert panel, which shall include representatives from the construction industry and State and local government.

(B) DUTIES.—The expert panel shall develop recommendations concerning—

(i) procedures for estimating the cost of repairing, restoring, reconstructing, or replacing a facility consistent with industry practices; and

(ii) the ceiling and floor percentages referred to in paragraph (2).

(C) REGULATIONS.—Taking into account the recommendations of the expert panel under subparagraph (B), the President shall promulgate regulations that establish—

(i) cost estimation procedures described in subparagraph (B)(i); and

(ii) the ceiling and floor percentages referred to in paragraph (2).

(D) REVIEW BY PRESIDENT.—Not later than 2 years after the date of promulgation of regulations under subparagraph (C) and periodically thereafter, the President shall review the cost estimation procedures and the ceiling and floor percentages established under this paragraph.

(E) REPORT TO CONGRESS.—Not later than 1 year after the date of promulgation of regulations under subparagraph (C), 3 years after that date, and at the end of each 2-year period thereafter, the expert panel shall submit to Congress a report on the appropriateness of the cost estimation procedures.

(4) SPECIAL RULE.—In any case in which the facility being repaired, restored, reconstructed, or replaced under this section was under construction on the date of the major disaster, the cost of repairing, restoring, reconstructing, or replacing the facility shall include, for the purposes of this section, only those costs that, under the contract for the construction, are the owner's responsibility and not the contractor's responsibility.

(5) NEW RULES.—

(A) IN GENERAL.—Not later than 18 months after the date of enactment of this paragraph, the President, acting through the Administrator of the Federal Emergency Management Agency, and in consultation with the heads of relevant Federal departments and agencies, shall issue a final rulemaking that defines the terms “resilient” and “resiliency” for purposes of this subsection.

(B) INTERIM GUIDANCE.—Not later than 60 days after the date of enactment of this paragraph, the Administrator shall issue interim guidance to implement this subsection. Such interim guidance shall expire 18 months after the

date of enactment of this paragraph or upon issuance of final regulations pursuant to subparagraph (A), whichever occurs first.

(C) GUIDANCE.—Not later than 90 days after the date on which the Administrator issues the final rulemaking under this paragraph, the Administrator shall issue any necessary guidance related to the rulemaking.

(D) REPORT.—Not later than 2 years after the date of enactment of this paragraph, the Administrator shall submit to Congress a report summarizing the regulations and guidance issued pursuant to this paragraph.

【42 U.S.C. 5172】

#### DEBRIS REMOVAL

SEC. 407. (a) The President, whenever he determines it to be in the public interest, is authorized—

(1) through the use of Federal departments, agencies, and instrumentalities, to clear debris and wreckage resulting from a major disaster from publicly and privately owned lands and waters; and

(2) to make grants to any State or local government or owner or operator of a private nonprofit facility for the purpose of removing debris or wreckage resulting from a major disaster from publicly or privately owned lands and waters.

(b) No authority under this section shall be exercised unless the affected State or local government shall first arrange an unconditional authorization for removal of such debris or wreckage from public and private property, and, in the case of removal of debris or wreckage from private property, shall first agree to indemnify the Federal Government against any claim arising from such removal.

(c) RULES RELATING TO LARGE LOTS.—The President shall issue rules which provide for recognition of differences existing among urban, suburban, and rural lands in implementation of this section so as to facilitate adequate removal of debris and wreckage from large lots.

(d) FEDERAL SHARE.—The Federal share of assistance under this section shall be not less than 75 percent of the eligible cost of debris and wreckage removal carried out under this section.

(e) EXPEDITED PAYMENTS.—

(1) GRANT ASSISTANCE.—In making a grant under subsection (a)(2), the President shall provide not less than 50 percent of the President's initial estimate of the Federal share of assistance as an initial payment in accordance with paragraph (2).

(2) DATE OF PAYMENT.—Not later than 60 days after the date of the estimate described in paragraph (1) and not later than 90 days after the date on which the State or local government or owner or operator of a private nonprofit facility applies for assistance under this section, an initial payment described in paragraph (1) shall be paid.

【42 U.S.C. 5173】

**SEC. 408. FEDERAL ASSISTANCE TO INDIVIDUALS AND HOUSEHOLDS.****(a) IN GENERAL.—**

(1) **PROVISION OF ASSISTANCE.**—In accordance with this section, the President, in consultation with the Governor of a State, may provide financial assistance, and, if necessary, direct services, to individuals and households in the State who, as a direct result of a major disaster, have necessary expenses and serious needs in cases in which the individuals and households are unable to meet such expenses or needs through other means.

(2) **RELATIONSHIP TO OTHER ASSISTANCE.**—Under paragraph (1), an individual or household shall not be denied assistance under paragraph (1), (3), or (4) of subsection (c) solely on the basis that the individual or household has not applied for or received any loan or other financial assistance from the Small Business Administration or any other Federal agency.

**(b) HOUSING ASSISTANCE.—**

(1) **ELIGIBILITY.**—The President may provide financial or other assistance under this section to individuals and households to respond to the disaster-related housing needs of individuals and households who are displaced from their predisaster primary residences or whose predisaster primary residences are rendered uninhabitable, or with respect to individuals with disabilities, rendered inaccessible or uninhabitable, as a result of damage caused by a major disaster.

**(2) DETERMINATION OF APPROPRIATE TYPES OF ASSISTANCE.—**

(A) **IN GENERAL.**—The President shall determine appropriate types of housing assistance to be provided under this section to individuals and households described in subsection (a)(1) based on considerations of cost effectiveness, convenience to the individuals and households, and such other factors as the President may consider appropriate.

(B) **MULTIPLE TYPES OF ASSISTANCE.**—One or more types of housing assistance may be made available under this section, based on the suitability and availability of the types of assistance, to meet the needs of individuals and households in the particular disaster situation.

**(c) TYPES OF HOUSING ASSISTANCE.—****(1) TEMPORARY HOUSING.—****(A) FINANCIAL ASSISTANCE.—**

(i) **IN GENERAL.**—The President may provide financial assistance to individuals or households to rent alternate housing accommodations, existing rental units, manufactured housing, recreational vehicles, or other readily fabricated dwellings. Such assistance may include the payment of the cost of utilities, excluding telephone service.

(ii) **AMOUNT.**—The amount of assistance under clause (i) shall be based on the fair market rent for the accommodation provided plus the cost of any transportation, utility hookups, security deposits, or

unit installation not provided directly by the President.

(B) DIRECT ASSISTANCE.—

(i) IN GENERAL.—The President may provide temporary housing units, acquired by purchase or lease, directly to individuals or households who, because of a lack of available housing resources, would be unable to make use of the assistance provided under subparagraph (A).

(ii) LEASE AND REPAIR OF RENTAL UNITS FOR TEMPORARY HOUSING.—

(I) IN GENERAL.—The President, to the extent the President determines it would be a cost-effective alternative to other temporary housing options, may—

(aa) enter into lease agreements with owners of multifamily rental property impacted by a major disaster or located in areas covered by a major disaster declaration to house individuals and households eligible for assistance under this section; and

(bb) make repairs or improvements to properties under such lease agreements, to the extent necessary to serve as safe and adequate temporary housing.

(II) IMPROVEMENTS OR REPAIRS.—Under the terms of any lease agreement for property entered into under this subsection, the value of the improvements or repairs shall be deducted from the value of the lease agreement.

(iii) PERIOD OF ASSISTANCE.—The President may not provide direct assistance under clause (i) with respect to a major disaster after the end of the 18-month period beginning on the date of the declaration of the major disaster by the President, except that the President may extend that period if the President determines that due to extraordinary circumstances an extension would be in the public interest.

(iv) COLLECTION OF RENTAL CHARGES.—After the end of the 18-month period referred to in clause (iii), the President may charge fair market rent for each temporary housing unit provided.

(2) REPAIRS.—

(A) IN GENERAL.—The President may provide financial assistance for—

(i) the repair of owner-occupied private residences, utilities, and residential infrastructure (such as a private access route) damaged by a major disaster to a safe and sanitary living or functioning condition; and

(ii) eligible hazard mitigation measures that reduce the likelihood of future damage to such residences, utilities, or infrastructure.

(B) RELATIONSHIP TO OTHER ASSISTANCE.—A recipient of assistance provided under this paragraph shall not be

required to show that the assistance can be met through other means, except insurance proceeds.

(3) REPLACEMENT.—

(A) IN GENERAL.—The President may provide financial assistance for the replacement of owner-occupied private residences damaged by a major disaster.

(B) APPLICABILITY OF FLOOD INSURANCE REQUIREMENT.—With respect to assistance provided under this paragraph, the President may not waive any provision of Federal law requiring the purchase of flood insurance as a condition of the receipt of Federal disaster assistance.

(4) PERMANENT HOUSING CONSTRUCTION.—The President may provide financial assistance or direct assistance to individuals or households to construct permanent or semi-permanent housing in insular areas outside the continental United States and in other locations in cases in which—

(A) no alternative housing resources are available; and

(B) the types of temporary housing assistance described in paragraph (1) are unavailable, infeasible, or not cost-effective.

(d) TERMS AND CONDITIONS RELATING TO HOUSING ASSISTANCE.—

(1) SITES.—

(A) IN GENERAL.—Any readily fabricated dwelling provided under this section shall, whenever practicable, be located on a site that—

(i) is complete with utilities;

(ii) meets the physical accessibility requirements for individuals with disabilities; and

(iii) is provided by the State or local government, by the owner of the site, or by the occupant who was displaced by the major disaster.

(B) SITES PROVIDED BY THE PRESIDENT.—A readily fabricated dwelling may be located on a site provided by the President if the President determines that such a site would be more economical or accessible.

(2) DISPOSAL OF UNITS.—

(A) SALE TO OCCUPANTS.—

(i) IN GENERAL.—Notwithstanding any other provision of law, a temporary housing unit purchased under this section by the President for the purpose of housing disaster victims may be sold directly to the individual or household who is occupying the unit if the individual or household lacks permanent housing.

(ii) SALE PRICE.—A sale of a temporary housing unit under clause (i) shall be at a price that is fair and equitable.

(iii) DEPOSIT OF PROCEEDS.—Notwithstanding any other provision of law, the proceeds of a sale under clause (i) shall be deposited in the appropriate Disaster Relief Fund account.

(iv) HAZARD AND FLOOD INSURANCE.—A sale of a temporary housing unit under clause (i) shall be made on the condition that the individual or household pur-

chasing the housing unit agrees to obtain and maintain hazard and flood insurance on the housing unit.

(v) USE OF GSA SERVICES.—The President may use the services of the General Services Administration to accomplish a sale under clause (i).

(B) OTHER METHODS OF DISPOSAL.—If not disposed of under subparagraph (A), a temporary housing unit purchased under this section by the President for the purpose of housing disaster victims—

(i) may be sold to any person; or

(ii) may be sold, transferred, donated, or otherwise made available directly to a State or other governmental entity or to a voluntary organization for the sole purpose of providing temporary housing to disaster victims in major disasters and emergencies if, as a condition of the sale, transfer, or donation, the State, other governmental agency, or voluntary organization agrees—

(I) to comply with the nondiscrimination provisions of section 308; and

(II) to obtain and maintain hazard and flood insurance on the housing unit.

(e) FINANCIAL ASSISTANCE TO ADDRESS OTHER NEEDS.—

(1) MEDICAL, DENTAL, CHILD CARE, AND FUNERAL EXPENSES.—The President, in consultation with the Governor of a State, may provide financial assistance under this section to an individual or household in the State who is adversely affected by a major disaster to meet disaster-related medical, dental, child care, and funeral expenses.

(2) PERSONAL PROPERTY, TRANSPORTATION, AND OTHER EXPENSES.—The President, in consultation with the Governor of a State, may provide financial assistance under this section to an individual or household described in paragraph (1) to address personal property, transportation, and other necessary expenses or serious needs resulting from the major disaster.

(f) STATE ROLE.—

(1) STATE- OR INDIAN TRIBAL GOVERNMENT-ADMINISTERED ASSISTANCE AND OTHER NEEDS ASSISTANCE.—

(A) GRANT TO STATE.—Subject to subsection (g), a Governor may request a grant from the President to provide assistance to individuals and households in the State under subsections (c)(1)(B), (c)(4), and (e) if the President and the State or Indian tribal government comply, as determined by the Administrator, with paragraph (3).

(B) ADMINISTRATIVE COSTS.—A State that receives a grant under subparagraph (A) may expend not more than 5 percent of the amount of the grant for the administrative costs of providing assistance to individuals and households in the State under subsections (c)(1)(B), (c)(4), and (e).

(2) ACCESS TO RECORDS.—In providing assistance to individuals and households under this section, the President shall provide for the substantial and ongoing involvement of the States in which the individuals and households are located, including by providing to the States access to the electronic

records of individuals and households receiving assistance under this section in order for the States to make available any additional State and local assistance to the individuals and households.

(3) REQUIREMENTS.—

(A) APPLICATION.—A State or Indian tribal government desiring to provide assistance under subsection (c)(1)(B), (c)(4), or (e) shall submit to the President an application for a grant to provide financial assistance under the program.

(B) CRITERIA.—The President, in consultation and coordination with State and Indian tribal governments, shall establish criteria for the approval of applications submitted under subparagraph (A). The criteria shall include, at a minimum—

(i) a requirement that the State or Indian tribal government submit a housing strategy under subparagraph (C);

(ii) the demonstrated ability of the State or Indian tribal government to manage the program under this section;

(iii) there being in effect a plan approved by the President as to how the State or Indian tribal government will comply with applicable Federal laws and regulations and how the State or Indian tribal government will provide assistance under its plan;

(iv) a requirement that the State or Indian tribal government comply with rules and regulations established pursuant to subsection (j); and

(v) a requirement that the President, or the designee of the President, comply with subsection (i).

(C) REQUIREMENT OF HOUSING STRATEGY.—

(i) IN GENERAL.—A State or Indian tribal government submitting an application under this paragraph shall have an approved housing strategy, which shall be developed and submitted to the President for approval.

(ii) REQUIREMENTS.—The housing strategy required under clause (i) shall—

(I) outline the approach of the State in working with Federal partners, Indian tribal governments, local communities, nongovernmental organizations, and individual disaster survivors to meet disaster-related sheltering and housing needs; and

(II) include the establishment of an activation plan for a State Disaster Housing Task Force, as outlined in the National Disaster Housing Strategy, to bring together State, tribal, local, Federal, nongovernmental, and private sector expertise to evaluate housing requirements, consider potential solutions, recognize special needs populations, and propose recommendations.

(D) **QUALITY ASSURANCE.**—Before approving an application submitted under this section, the President, or the designee of the President, shall institute adequate policies, procedures, and internal controls to prevent waste, fraud, abuse, and program mismanagement for this program and for programs under subsections (c)(1)(B), (c)(4), and (e). The President shall monitor and conduct quality assurance activities on a State or Indian tribal government’s implementation of programs under subsections (c)(1)(B), (c)(4), and (e). If, after approving an application of a State or Indian tribal government submitted under this paragraph, the President determines that the State or Indian tribal government is not administering the program established by this section in a manner satisfactory to the President, the President shall withdraw the approval.

(E) **AUDITS.**—The Inspector General of the Department of Homeland Security shall provide for periodic audits of the programs administered by States and Indian tribal governments under this subsection.

(F) **APPLICABLE LAWS.**—All Federal laws applicable to the management, administration, or contracting of the programs by the Federal Emergency Management Agency under this section shall be applicable to the management, administration, or contracting by a non-Federal entity under this section.

(G) **REPORT ON EFFECTIVENESS.**—Not later than 18 months after the date of enactment of this paragraph, the Inspector General of the Department of Homeland Security shall submit a report to the Committee on Homeland Security and Governmental Affairs of the Senate and the Committee on Transportation and Infrastructure of the House of Representatives on the State or Indian tribal government’s role to provide assistance under this section. The report shall contain an assessment of the effectiveness of the State or Indian tribal government’s role in providing assistance under this section, including—

(i) whether the State or Indian tribal government’s role helped to improve the general speed of disaster recovery;

(ii) whether the State or Indian tribal government providing assistance under this section had the capacity to administer this section; and

(iii) recommendations for changes to improve the program if the State or Indian tribal government’s role to administer the programs should be continued.

(H) **REPORT ON INCENTIVES.**—Not later than 12 months after the date of enactment of this paragraph, the Administrator of the Federal Emergency Management Agency shall submit a report to the Committee on Homeland Security and Governmental Affairs of the Senate and the Committee on Transportation and Infrastructure of the House of Representatives on a potential incentive structure for awards made under this section to encourage participation by eligible States and Indian tribal governments.

In developing this report, the Administrator of the Federal Emergency Management Agency shall consult with State, local, and Indian tribal entities to gain their input on any such incentive structure to encourage participation and shall include this information in the report. This report should address, among other options, potential adjustments to the cost-share requirement and management costs to State and Indian tribal governments.

(I) PROHIBITION.—The President may not condition the provision of Federal assistance under this Act on a State or Indian tribal government requesting a grant under this section.

(J) MISCELLANEOUS.—

(i) NOTICE AND COMMENT.—The Administrator of the Federal Emergency Management Agency may waive notice and comment rulemaking with respect to rules to carry out this section, if the Administrator determines doing so is necessary to expeditiously implement this section, and may carry out this section as a pilot program until such regulations are promulgated.

(ii) FINAL RULE.—Not later than 2 years after the date of enactment of this paragraph, the Administrator of the Federal Emergency Management Agency shall issue final regulations to implement this subsection as amended by the Disaster Recovery Reform Act of 2018.

(iii) WAIVER AND EXPIRATION.—The authority under clause (i) and any pilot program implemented pursuant to such clause shall expire 2 years after the date of enactment of this paragraph or upon issuance of final regulations pursuant to clause (ii), whichever occurs sooner.

(g) COST SHARING.—

(1) FEDERAL SHARE.—Except as provided in paragraph (2), the Federal share of the costs eligible to be paid using assistance provided under this section shall be 100 percent.

(2) FINANCIAL ASSISTANCE TO ADDRESS OTHER NEEDS.—In the case of financial assistance provided under subsection (e)—

(A) the Federal share shall be 75 percent; and

(B) the non-Federal share shall be paid from funds made available by the State.

(h) MAXIMUM AMOUNT OF ASSISTANCE.—

(1) IN GENERAL.—No individual or household shall receive financial assistance greater than \$25,000 under this section with respect to a single major disaster, excluding financial assistance to rent alternate housing accommodations under subsection (c)(1)(A)(i) and financial assistance to address other needs under subsection (e).

(2) OTHER NEEDS ASSISTANCE.—The maximum financial assistance any individual or household may receive under subsection (e) shall be equivalent to the amount set forth in paragraph (1) with respect to a single major disaster.

(3) ADJUSTMENT OF LIMIT.—The limit established under paragraphs (1) and (2) shall be adjusted annually to reflect

changes in the Consumer Price Index for All Urban Consumers published by the Department of Labor.

(4) EXCLUSION OF NECESSARY EXPENSES FOR INDIVIDUALS WITH DISABILITIES.—

(A) IN GENERAL.—The maximum amount of assistance established under paragraph (1) shall exclude expenses to repair or replace damaged accessibility-related improvements under paragraphs (2), (3), and (4) of subsection (c) for individuals with disabilities.

(B) OTHER NEEDS ASSISTANCE.—The maximum amount of assistance established under paragraph (2) shall exclude expenses to repair or replace accessibility-related personal property under subsection (e)(2) for individuals with disabilities.

(i) VERIFICATION MEASURES.—In carrying out this section, the President shall develop a system, including an electronic database, that shall allow the President, or the designee of the President, to—

(1) verify the identity and address of recipients of assistance under this section to provide reasonable assurance that payments are made only to an individual or household that is eligible for such assistance;

(2) minimize the risk of making duplicative payments or payments for fraudulent claims under this section;

(3) collect any duplicate payment on a claim under this section, or reduce the amount of subsequent payments to offset the amount of any such duplicate payment;

(4) provide instructions to recipients of assistance under this section regarding the proper use of any such assistance, regardless of how such assistance is distributed; and

(5) conduct an expedited and simplified review and appeal process for an individual or household whose application for assistance under this section is denied.

(j) RULES AND REGULATIONS.—The President shall prescribe rules and regulations to carry out this section, including criteria, standards, and procedures for determining eligibility for assistance.

【42 U.S.C. 5174】

【Sec. 409 repealed by section 104(c)(2) of Public Law 106–390 (114 Stat. 1559).】

#### UNEMPLOYMENT ASSISTANCE

SEC. 410. (a) The President is authorized to provide to any individual unemployed as a result of a major disaster such benefit assistance as he deems appropriate while such individual is unemployed for the weeks of such unemployment with respect to which the individual is not entitled to any other unemployment compensation (as that term is defined in section 85(b) of the Internal Revenue Code of 1986) or waiting period credit. Such assistance as the President shall provide shall be available to an individual as long as the individual's unemployment caused by the major disaster continues or until the individual is reemployed in a suitable position, but no longer than 26 weeks after the major disaster is

declared. Such assistance for a week of unemployment shall not exceed the maximum weekly amount authorized under the unemployment compensation law of the State in which the disaster occurred. The President is directed to provide such assistance through agreements with States which, in his judgment, have an adequate system for administering such assistance through existing State agencies.

(b) REEMPLOYMENT ASSISTANCE.—

(1) STATE ASSISTANCE.—A State shall provide, without reimbursement from any funds provided under this Act, reemployment assistance services under any other law administered by the State to individuals receiving benefits under this section.

(2) FEDERAL ASSISTANCE.—The President may provide reemployment assistance services under other laws to individuals who are unemployed as a result of a major disaster and who reside in a State which does not provide such services.

(c) APPLICATION DEADLINE.—

(1) IN GENERAL.—With respect to a major disaster for which assistance is provided under this section and section 408, the application deadline for an individual seeking assistance under this section shall match the application deadline for individuals and households seeking assistance under section 408.

(2) EXTENSION.—The President may accept an application from an individual described in paragraph (1) that is submitted after the deadline described in paragraph (1) if—

(A) the individual has good cause for the late submission; and

(B) the individual submits the application before the date on which the period during which assistance is provided under this section for the applicable major disaster expires.

[42 U.S.C. 5177]

[Sec. 411 repealed by section 206(c) of Public Law 106–390 (114 Stat. 1571).]

#### BENEFITS AND DISTRIBUTION

SEC. 412. (a) Whenever the President determines that, as a result of a major disaster, low-income households are unable to purchase adequate amounts of nutritious food, he is authorized, under such terms and conditions as he may prescribe, to distribute through the Secretary of Agriculture or other appropriate agencies benefit allotments to such households pursuant to the provisions of the Food Stamp Act of 1964<sup>6</sup> (P.L. 91–671; 84 Stat. 2048) and to make surplus commodities available pursuant to the provisions of this Act.

<sup>6</sup>The reference to the “Food Stamp Act of 1964” probably should be a reference to the “Food Stamp Act of 2008”. The global amendment to the Robert T. Stafford Disaster Relief and Emergency Assistance Act made by section 4002(b)(1)(C) and (2)(DD) of Public Law 110–246 to strike “Food Stamp Act” and insert “Food and Nutrition Act of 2008” was not carried out.

(b) The President, through the Secretary of Agriculture or other appropriate agencies, is authorized to continue to make such benefit allotments and surplus commodities available to such households for so long as he determines necessary, taking into consideration such factors as he deems appropriate, including the consequences of the major disaster on the earning power of the households, to which assistance is made available under this section.

(c) Nothing in this section shall be construed as amending or otherwise changing the provisions of the Food Stamp Act of 1964<sup>6</sup> except as they relate to the availability of supplemental nutrition assistance program benefits in an area affected by a major disaster.

【42 U.S.C. 5179】

#### FOOD COMMODITIES

SEC. 413. (a) The President is authorized and directed to assure that adequate stocks of food will be ready and conveniently available for emergency mass feeding or distribution in any area of the United States which suffers a major disaster or emergency.

(b) The Secretary of Agriculture shall utilize funds appropriated under section 32 of the Act of August 24, 1935 (7 U.S.C. 612c), to purchase food commodities necessary to provide adequate supplies for use in any area of the United States in the event of a major disaster or emergency in such area.

【42 U.S.C. 5180】

#### RELOCATION ASSISTANCE

SEC. 414. Notwithstanding any other provision of law, no person otherwise eligible for any kind of replacement housing payment under the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91-646) shall be denied such eligibility as a result of his being unable, because of a major disaster as determined by the President, to meet the occupancy requirements set by such Act.

【42 U.S.C. 5181】

#### LEGAL SERVICES

SEC. 415. Whenever the President determines that low-income individuals are unable to secure legal services adequate to meet their needs as a consequence of a major disaster, consistent with the goals of the programs authorized by this Act, the President shall assure that such programs are conducted with the advice and assistance of appropriate Federal agencies and State and local bar associations.

【42 U.S.C. 5182】

#### CRISIS COUNSELING ASSISTANCE AND TRAINING

SEC. 416. 【42 U.S.C. 5183】

(a) IN GENERAL.—The President is authorized to provide professional counseling services, including financial assistance to State or local agencies or private mental health organizations to provide such services or training of disaster workers, to victims of major

disasters in order to relieve mental health problems caused or aggravated by such major disaster or its aftermath.

(b) TRAINING.—Each State, local agency, or private mental health organization providing professional counseling services described in subsection (a) shall ensure that, any individual providing professional counseling services to victims of a major disaster as authorized under subsection (a), including individuals working for nonprofit partners and recovery organizations, is appropriately trained to address impacts from major disasters in communities, and to individuals, with socio-economically disadvantaged backgrounds.

#### COMMUNITY DISASTER LOANS

SEC. 417. (a) IN GENERAL.—The President is authorized to make loans to any local government which may suffer a substantial loss of tax and other revenues as a result of a major disaster, and has demonstrated a need for financial assistance in order to perform its governmental functions.

(b) AMOUNT.—The amount of any such loan shall be based on need, shall not exceed—

(1) 25 percent of the annual operating budget of that local government for the fiscal year in which the major disaster occurs, and shall not exceed \$5,000,000; or

(2) if the loss of tax and other revenues of the local government as a result of the major disaster is at least 75 percent of the annual operating budget of that local government for the fiscal year in which the major disaster occurs, 50 percent of the annual operating budget of that local government for the fiscal year in which the major disaster occurs, and shall not exceed \$5,000,000.

(c) REPAYMENT.—

(1) CANCELLATION.—Repayment of all or any part of such loan to the extent that revenues of the local government during the three full fiscal year period following the major disaster are insufficient to meet the operating budget of the local government, including additional disaster-related expenses of a municipal operation character shall be cancelled.

(2) CONDITION ON CONTINUING ELIGIBILITY.—A local government shall not be eligible for further assistance under this section during any period in which the local government is in arrears with respect to a required repayment of a loan under this section.

(d) EFFECT ON OTHER ASSISTANCE.—Any loans made under this section shall not reduce or otherwise affect any grants or other assistance under this Act.

[42 U.S.C. 5184]

#### EMERGENCY COMMUNICATIONS

SEC. 418. The President is authorized during, or in anticipation of, an emergency or major disaster to establish temporary communications systems and to make such communications available to State and local government officials and other persons as he deems appropriate.

[42 U.S.C. 5185]

## EMERGENCY PUBLIC TRANSPORTATION

SEC. 419. The President is authorized to provide temporary public transportation service in an area affected by a major disaster to meet emergency needs and to provide transportation to governmental offices, supply centers, stores, post offices, schools, major employment centers, and such other places as may be necessary in order to enable the community to resume its normal pattern of life as soon as possible.

[42 U.S.C. 5186]

**SEC. 420. FIRE MANAGEMENT ASSISTANCE.**

(a) **IN GENERAL.**—The President is authorized to provide assistance, including grants, equipment, supplies, and personnel, to any State or local government for the mitigation, management, and control of any fire on public or private forest land or grassland that threatens such destruction as would constitute a major disaster.

(b) **COORDINATION WITH STATE AND TRIBAL DEPARTMENTS OF FORESTRY.**—In providing assistance under this section, the President shall coordinate with State and tribal departments of forestry.

(c) **ESSENTIAL ASSISTANCE.**—In providing assistance under this section, the President may use the authority provided under section 403.

(d) **HAZARD MITIGATION ASSISTANCE.**—Whether or not a major disaster is declared, the President may provide hazard mitigation assistance in accordance with section 404 in any area affected by a fire for which assistance was provided under this section.

(e) **RULES AND REGULATIONS.**—The President shall prescribe such rules and regulations as are necessary to carry out this section.

[42 U.S.C. 5187]

## TIMBER SALE CONTRACTS

SEC. 421. (a) Where an existing timber sale contract between the Secretary of Agriculture or the Secretary of the Interior and a timber purchaser does not provide relief from major physical change not due to negligence of the purchaser prior to approval of construction of any section of specified road or of any other specified development facility and, as a result of a major disaster, a major physical change results in additional construction work in connection with such road or facility by such purchaser with an estimated cost, as determined by the appropriate Secretary, (1) of more than \$1,000 for sales under one million board feet, (2) of more than \$1 per thousand board feet for sales of one to three million board feet, or (3) of more than \$3,000 for sales over three million board feet, such increased construction cost shall be borne by the United States.

(b) If the appropriate Secretary determines that damages are so great that restoration, reconstruction, or construction is not practical under the cost-sharing arrangement authorized by subsection (a) of this section, he may allow cancellation of a contract

entered into by his Department notwithstanding contrary provisions therein.

(c) The Secretary of Agriculture is authorized to reduce to seven days the minimum period of advance public notice required by the first section of the Act of June 4, 1897 (16 U.S.C. 476), in connection with the sale of timber from national forests, whenever the Secretary determines that (1) the sale of such timber will assist in the construction of any area of a State damaged by a major disaster, (2) the sale of such timber will assist in sustaining the economy of such area, or (3) the sale of such timber is necessary to salvage the value of timber damaged in such major disaster or to protect undamaged timber.

(d) The President, when he determines it to be in the public interest, is authorized to make grants to any State or local government for the purpose of removing from privately owned lands timber damaged as a result of a major disaster, and such State or local government is authorized upon application, to make payments out of such grants to any person for reimbursement of expenses actually incurred by such person in the removal of damaged timber, not to exceed the amount that such expenses exceed the salvage value of such timber.

[42 U.S.C. 5188]

#### SEC. 422. SIMPLIFIED PROCEDURE.

(a) IN GENERAL.—If the Federal estimate of the cost of—

(1) repairing, restoring, reconstructing, or replacing under section 406 any damaged or destroyed public facility or private nonprofit facility,

(2) emergency assistance under section 403 or 502, or

(3) debris removed under section 407,

is less than \$1,000,000 (or, if the Administrator has established a threshold under subsection (b), the amount established under subsection (b)), the President (on application of the State or local government or the owner or operator of the private nonprofit facility) may make the contribution to such State or local government or owner or operator under section 403, 406, 407, or 502, as the case may be, on the basis of such Federal estimate. Such \$1,000,000 amount or, if applicable, the amount established under subsection (b), shall be adjusted annually to reflect changes in the Consumer Price Index for All Urban Consumers published by the Department of Labor.

(b) THRESHOLD.—

(1) REPORT.—Not later than 1 year after the date of enactment of this subsection, the President, acting through the Administrator of the Federal Emergency Management Agency (in this section referred to as the “Administrator”), shall—

(A) complete an analysis to determine whether an increase in the threshold for eligibility under subsection (a) is appropriate, which shall include consideration of cost-effectiveness, speed of recovery, capacity of grantees, past performance, and accountability measures; and

(B) submit to the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Homeland Security and Governmental Af-

fairs of the Senate a report regarding the analysis conducted under subparagraph (A).

(2) AMOUNT.—After the Administrator submits the report required under paragraph (1), the President shall direct the Administrator to—

(A) immediately establish a threshold for eligibility under this section in an appropriate amount, without regard to chapter 5 of title 5, United States Code; and

(B) adjust the threshold annually to reflect changes in the Consumer Price Index for all Urban Consumers published by the Department of Labor.

(3) REVIEW AND REPORT.—Not later than 3 years after the date on which the Administrator establishes a threshold under paragraph (2), and every 3 years thereafter, the President, acting through the Administrator, shall review the threshold for eligibility under this section and submit to the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Homeland Security and Governmental Affairs of the Senate a report regarding such review, including any recommendations developed pursuant to such review.

[42 U.S.C. 5189]

#### SEC. 423. APPEALS OF ASSISTANCE DECISIONS.

(a) RIGHT OF APPEAL.—Any decision regarding eligibility for, from, or amount of assistance under this title may be appealed within 60 days after the date on which the applicant for such assistance is notified of the award or denial of award of such assistance.

(b) PERIOD FOR DECISION.—A decision regarding an appeal under subsection (a) shall be rendered within 90 days after the date on which the Federal official designated to administer such appeals receives notice of such appeal.

(c) RULES.—The President shall issue rules which provide for the fair and impartial consideration of appeals under this section.

(d) RIGHT OF ARBITRATION.—

(1) IN GENERAL.—Notwithstanding this section, an applicant for assistance under this title may request arbitration to dispute the eligibility for assistance or repayment of assistance provided for a dispute of more than \$500,000 for any disaster that occurred after January 1, 2016. Such arbitration shall be conducted by the Civilian Board of Contract Appeals and the decision of such Board shall be binding.

(2) REVIEW.—The Civilian Board of Contract Appeals shall consider from the applicant all original and additional documentation, testimony, or other such evidence supporting the applicant's position at any time during arbitration.

(3) RURAL AREAS.—For an applicant for assistance in a rural area under this title, the assistance amount eligible for arbitration pursuant to this subsection shall be \$100,000.

(4) RURAL AREA DEFINED.—For the purposes of this subsection, the term “rural area” means an area with a population of less than 200,000 outside an urbanized area.

**Sec. 424 ROBERT T. STAFFORD DISASTER RELIEF AND EMERGENCY... 70**

(5) ELIGIBILITY.—To participate in arbitration under this subsection, an applicant—

(A) shall submit the dispute to the arbitration process established under the authority granted under section 601 of Public Law 111–5; and

(B) may submit a request for arbitration after the completion of the first appeal under subsection (a) at any time before the Administrator of the Federal Emergency Management Agency has issued a final agency determination or 180 days after the Administrator’s receipt of the appeal if the Administrator has not provided the applicant with a final determination on the appeal. The applicant’s request shall contain documentation from the administrative record for the first appeal and may contain additional documentation supporting the applicant’s position.

[42 U.S.C. 5189a]

**SEC. 424. DATE OF ELIGIBILITY; EXPENSES INCURRED BEFORE DATE OF DISASTER.**

Eligibility for Federal assistance under this title shall begin on the date of the occurrence of the event which results in a declaration by the President that a major disaster exists; except that reasonable expenses which are incurred in anticipation of and immediately preceding such event may be eligible for Federal assistance under this Act.

[42 U.S.C. 5189b]

**SEC. 425. TRANSPORTATION ASSISTANCE TO INDIVIDUALS AND HOUSEHOLDS.**

The President may provide transportation assistance to relocate individuals displaced from their predisaster primary residences as a result of an incident declared under this Act or otherwise transported from their predisaster primary residences under section 403(a)(3) or 502, to and from alternative locations for short or long-term accommodation or to return an individual or household to their predisaster primary residence or alternative location, as determined necessary by the President.

[42 U.S.C. 5189c]

**SEC. 426. CASE MANAGEMENT SERVICES.[42 U.S.C. 5189d]**

(a) IN GENERAL.—The President may provide case management services, including financial assistance, to State or local government agencies or qualified private organizations to provide such services, to victims of major disasters to identify and address unmet needs.

(b) TRAINING.—Each State, local government agency, or qualified private organization providing professional counseling services described in subsection (a) shall ensure that any individual providing case management services to victims of a major disaster as authorized under subsection (a), including individuals working for nonprofit partners and recovery organizations, is appropriately trained to address impacts from major disasters in communities, and to individuals, with socio-economically disadvantaged backgrounds.

**SEC. 427. ESSENTIAL SERVICE PROVIDERS.**

(a) **DEFINITION.**—In this section, the term “essential service provider” means an entity that—

- (1)(A) provides—
  - (i) wireline or mobile telephone service, Internet access service, radio or television broadcasting, cable service, or direct broadcast satellite service;
  - (ii) electrical power;
  - (iii) natural gas;
  - (iv) water and sewer services; or
  - (v) any other essential service, as determined by the President; or
- (B)<sup>7</sup> is a tower owner or operator;
- (2) is—
  - (A) a municipal entity;
  - (B) a nonprofit entity; or
  - (C) a private, for profit entity; and
- (3) is contributing to efforts to respond to an emergency or major disaster.

(b) **AUTHORIZATION FOR ACCESSIBILITY.**—Unless exceptional circumstances apply, in an emergency or major disaster, the head of a Federal agency, to the greatest extent practicable, shall not—

- (1) deny or impede access to the disaster site to an essential service provider whose access is necessary to restore and repair an essential service; or
- (2) impede the restoration or repair of the services described in subsection (a)(1).

(c) **IMPLEMENTATION.**—In implementing this section, the head of a Federal agency shall follow all applicable Federal laws, regulations, and policies.

[42 U.S.C. 5189e]

**SEC. 428. PUBLIC ASSISTANCE PROGRAM ALTERNATIVE PROCEDURES.**

(a) **APPROVAL OF PROJECTS.**—The President, acting through the Administrator of the Federal Emergency Management Agency, may approve projects under the alternative procedures adopted under this section for any major disaster or emergency declared on or after the date of enactment of this section<sup>8</sup>. The Administrator may also apply the alternate procedures adopted under this section to a major disaster or emergency declared before enactment of this Act<sup>8</sup> for which construction has not begun as of the date of enactment of this Act<sup>8</sup>.

(b) **ADOPTION.**—The Administrator, in coordination with States, tribal and local governments, and owners or operators of private nonprofit facilities, may adopt alternative procedures to administer assistance provided under sections 403(a)(3)(A), 406, 407, and 502(a)(5).

(c) **GOALS OF PROCEDURES.**—The alternative procedures adopted under subsection (a) shall further the goals of—

- (1) reducing the costs to the Federal Government of providing such assistance;

<sup>7</sup> Margin of subparagraph (B) is so in law.

<sup>8</sup> The date of enactment of P.L. 113–2 is January 29, 2013.

(2) increasing flexibility in the administration of such assistance;

(3) expediting the provision of such assistance to a State, tribal or local government, or owner or operator of a private nonprofit facility; and

(4) providing financial incentives and disincentives for a State, tribal or local government, or owner or operator of a private nonprofit facility for the timely and cost-effective completion of projects with such assistance.

(d) PARTICIPATION.—

(1) IN GENERAL.—Participation in the alternative procedures adopted under this section shall be at the election of a State, tribal or local government, or owner or operator of a private nonprofit facility consistent with procedures determined by the Administrator.

(2) NO CONDITIONS.—The President may not condition the provision of Federal assistance under this Act on the election by a State, local, or Indian tribal government, or owner or operator of a private nonprofit facility to participate in the alternative procedures adopted under this section.

(e) MINIMUM PROCEDURES.—The alternative procedures adopted under this section shall include the following:

(1) For repair, restoration, and replacement of damaged facilities under section 406—

(A) making grants on the basis of fixed estimates, if the State, tribal or local government, or owner or operator of the private nonprofit facility agrees to be responsible for any actual costs that exceed the estimate;

(B) providing an option for a State, tribal or local government, or owner or operator of a private nonprofit facility to elect to receive an in-lieu contribution, without reduction, on the basis of estimates of—

(i) the cost of repair, restoration, reconstruction, or replacement of a public facility owned or controlled by the State, tribal or local government or owner or operator of a private nonprofit facility; and

(ii) management expenses;

(C) consolidating, to the extent determined appropriate by the Administrator, the facilities of a State, tribal or local government, or owner or operator of a private nonprofit facility as a single project based upon the estimates adopted under the procedures;

(D) if the actual costs of a project completed under the procedures are less than the estimated costs thereof, the Administrator may permit a grantee or subgrantee to use all or part of the excess funds for—

(i) cost-effective activities that reduce the risk of future damage, hardship, or suffering from a major disaster; and

(ii) other activities to improve future Public Assistance operations or planning;

(E) in determining eligible costs under section 406, the Administrator shall make available, at an applicant's request and where the Administrator or the certified cost es-

estimate prepared by the applicant's professionally licensed engineers has estimated an eligible Federal share for a project of at least \$5,000,000, an independent expert panel to validate the estimated eligible cost consistent with applicable regulations and policies implementing this section;

(F) in determining eligible costs under section 406, the Administrator shall, at the applicant's request, consider properly conducted and certified cost estimates prepared by professionally licensed engineers (mutually agreed upon by the Administrator and the applicant), to the extent that such estimates comply with applicable regulations, policy, and guidance; and

(G) once certified by a professionally licensed engineer and accepted by the Administrator, the estimates on which grants made pursuant to this section are based shall be presumed to be reasonable and eligible costs, as long as there is no evidence of fraud.

(2) For debris removal under sections 403(a)(3)(A), 407, and 502(a)(5)—

(A) making grants on the basis of fixed estimates to provide financial incentives and disincentives for the timely or cost-effective completion if the State, tribal or local government, or owner or operator of the private nonprofit facility agrees to be responsible to pay for any actual costs that exceed the estimate;

(B) using a sliding scale for determining the Federal share for removal of debris and wreckage based on the time it takes to complete debris and wreckage removal;

(C) allowing use of program income from recycled debris without offset to the grant amount;

(D) reimbursing base and overtime wages for employees and extra hires of a State, tribal or local government, or owner or operator of a private nonprofit facility performing or administering debris and wreckage removal;

(E) providing incentives to a State or tribal or local government to have a debris management plan approved by the Administrator and have pre-qualified 1 or more debris and wreckage removal contractors before the date of declaration of the major disaster; and

(F) if the actual costs of projects under subparagraph (A) are less than the estimated costs of the project, the Administrator may permit a grantee or subgrantee to use all or part of the excess funds for—

(i) debris management planning;

(ii) acquisition of debris management equipment for current or future use; and

(iii) other activities to improve future debris removal operations, as determined by the Administrator.

(f) WAIVER AUTHORITY.—Until such time as the Administrator promulgates regulations to implement this section, the Administrator may—

(1) waive notice and comment rulemaking, if the Administrator determines the waiver is necessary to expeditiously implement this section; and

(2) carry out the alternative procedures under this section as a pilot program.

(g) OVERTIME PAYMENTS.—The guidelines for reimbursement for costs under subsection (e)(2)(D) shall ensure that no State or local government is denied reimbursement for overtime payments that are required pursuant to the Fair Labor Standards Act of 1938 (29 U.S.C. 201 et seq.).

(h) REPORT.—

(1) IN GENERAL.—Not earlier than 3 years, and not later than 5 years, after the date of enactment of this section, the Inspector General of the Department of Homeland Security shall submit to the Committee on Homeland Security and Governmental Affairs of the Senate and the Committee on Transportation and Infrastructure of the House of Representatives a report on the alternative procedures for the repair, restoration, and replacement of damaged facilities under section 406 authorized under this section.

(2) CONTENTS.—The report shall contain an assessment of the effectiveness of the alternative procedures, including—

(A) whether the alternative procedures helped to improve the general speed of disaster recovery;

(B) the accuracy of the estimates relied upon;

(C) whether the financial incentives and disincentives were effective;

(D) whether the alternative procedures were cost effective;

(E) whether the independent expert panel described in subsection (e)(1)(E) was effective; and

(F) recommendations for whether the alternative procedures should be continued and any recommendations for changes to the alternative procedures.

[42 U.S.C. 5189f]

#### SEC. 429. UNIFIED FEDERAL REVIEW.

(a) IN GENERAL.—Not later than 18 months after the date of enactment of this section, and in consultation with the Council on Environmental Quality and the Advisory Council on Historic Preservation, the President shall establish an expedited and unified interagency review process to ensure compliance with environmental and historic requirements under Federal law relating to disaster recovery projects, in order to expedite the recovery process, consistent with applicable law.

(b) CONTENTS.—The review process established under this section shall include mechanisms to expeditiously address delays that may occur during the recovery from a major disaster and be updated, as appropriate, consistent with applicable law.

[42 U.S.C. 5189g]

#### SEC. 430. [42 U.S.C. 5189h] AGENCY ACCOUNTABILITY.

(a) PUBLIC ASSISTANCE.—Not later than 5 days after an award of a public assistance grant is made under section 406 that is in excess of \$1,000,000, the Administrator of the Federal Emergency Management Agency shall publish on the website of the Federal

Emergency Management Agency the specifics of each such grant award, including—

- (1) identifying the Federal Emergency Management Agency Region;
- (2) the disaster or emergency declaration number;
- (3) the State, county, and applicant name;
- (4) if the applicant is a private nonprofit organization;
- (5) the damage category code;
- (6) the amount of the Federal share obligated; and
- (7) the date of the award.

(b) MISSION ASSIGNMENTS.—

(1) IN GENERAL.—Not later than 5 days after the issuance of a mission assignment or mission assignment task order, the Administrator of the Federal Emergency Management Agency shall publish on the website of the Federal Emergency Management Agency any mission assignment or mission assignment task order to another Federal department or agency regarding a major disaster in excess of \$1,000,000, including—

- (A) the name of the impacted State or Indian Tribe;
- (B) the disaster declaration for such State or Indian Tribe;
- (C) the assigned agency;
- (D) the assistance requested;
- (E) a description of the disaster;
- (F) the total cost estimate;
- (G) the amount obligated;
- (H) the State or Indian tribal government cost share, if applicable;
- (I) the authority under which the mission assignment or mission assignment task order was directed; and
- (J) if applicable, the date a State or Indian Tribe requested the mission assignment.

(2) RECORDING CHANGES.—Not later than 10 days after the last day of each month until a mission assignment or mission assignment task order described in paragraph (1) is completed and closed out, the Administrator of the Federal Emergency Management Agency shall update any changes to the total cost estimate and the amount obligated.

(c) DISASTER RELIEF MONTHLY REPORT.—Not later than 10 days after the first day of each month, the Administrator of the Federal Emergency Management Agency shall publish on the website of the Federal Emergency Management Agency reports, including a specific description of the methodology and the source data used in developing such reports, including—

- (1) an estimate of the amounts for the fiscal year covered by the President's most recent budget pursuant to section 1105(a) of title 31, United States Code, including—
  - (A) the unobligated balance of funds to be carried over from the prior fiscal year to the budget year;
  - (B) the unobligated balance of funds to be carried over from the budget year to the budget year plus 1;
  - (C) the amount of obligations for noncatastrophic events for the budget year;

(D) the amount of obligations for the budget year for catastrophic events delineated by event and by State;

(E) the total amount that has been previously obligated or will be required for catastrophic events delineated by event and by State for all prior years, the current fiscal year, the budget year, and each fiscal year thereafter;

(F) the amount of previously obligated funds that will be recovered for the budget year;

(G) the amount that will be required for obligations for emergencies, as described in section 102(1), major disasters, as described in section 102(2), fire management assistance grants, as described in section 420, surge activities, and disaster readiness and support activities; and

(H) the amount required for activities not covered under section 251(b)(2)(D)(iii) of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 901(b)(2)(D)(iii)); and

(2) an estimate or actual amounts, if available, of the following for the current fiscal year, which shall be submitted not later than the fifth day of each month, published by the Administrator of the Federal Emergency Management Agency on the website of the Federal Emergency Management Agency not later than the fifth day of each month:

(A) A summary of the amount of appropriations made available by source, the transfers executed, the previously allocated funds recovered, and the commitments, allocations, and obligations made.

(B) A table of disaster relief activity delineated by month, including—

(i) the beginning and ending balances;

(ii) the total obligations to include amounts obligated for fire assistance, emergencies, surge, and disaster support activities;

(iii) the obligations for catastrophic events delineated by event and by State; and

(iv) the amount of previously obligated funds that are recovered.

(C) A summary of allocations, obligations, and expenditures for catastrophic events delineated by event.

(D) The cost of the following categories of spending:

(i) Public assistance.

(ii) Individual assistance.

(iii) Mitigation.

(iv) Administrative.

(v) Operations.

(vi) Any other relevant category (including emergency measures and disaster resources) delineated by disaster.

(E) The date on which funds appropriated will be exhausted.

(d) CONTRACTS.—

(1) INFORMATION.—Not later than 10 days after the first day of each month, the Administrator of the Federal Emergency Management Agency shall publish on the website of the

Federal Emergency Management Agency the specifics of each contract in excess of \$1,000,000 that the Federal Emergency Management Agency enters into, including—

- (A) the name of the party;
- (B) the date the contract was awarded;
- (C) the amount and scope of the contract;
- (D) if the contract was awarded through a competitive bidding process;
- (E) if no competitive bidding process was used, the reason why competitive bidding was not used; and
- (F) the authority used to bypass the competitive bidding process.

The information shall be delineated by disaster, if applicable, and specify the damage category code, if applicable.

(2) REPORT.—Not later than 10 days after the last day of the fiscal year, the Administrator of the Federal Emergency Management Agency shall provide a report to the appropriate committees of Congress summarizing the following information for the preceding fiscal year:

- (A) The number of contracts awarded without competitive bidding.
- (B) The reasons why a competitive bidding process was not used.
- (C) The total amount of contracts awarded with no competitive bidding.
- (D) The damage category codes, if applicable, for contracts awarded without competitive bidding.

(e) COLLECTION OF PUBLIC ASSISTANCE RECIPIENT AND SUB-RECIPIENT CONTRACTS.—

(1) IN GENERAL.—Not later than 180 days after the date of enactment of this subsection, the Administrator of the Federal Emergency Management Agency shall initiate and maintain an effort to collect and store information, prior to the project close-out phase on any contract entered into by a public assistance recipient or subrecipient that through the base award, available options, or any subsequent modifications has an estimated value of more than \$1,000,000 and is funded through section 324, 403, 404, 406, 407, 428, or 502, including—

- (A) the disaster number, project worksheet number, and the category of work associated with each contract;
- (B) the name of each party;
- (C) the date the contract was awarded;
- (D) the amount of the contract;
- (E) the scope of the contract;
- (F) the period of performance for the contract; and
- (G) whether the contract was awarded through a competitive bidding process.

(2) AVAILABILITY OF INFORMATION COLLECTED.—The Administrator of the Federal Emergency Management Agency shall make the information collected and stored under paragraph (1) available to the Inspector General of the Department of Homeland Security, the Government Accountability Office, and appropriate committees of Congress, upon request.

(3) REPORT.—Not later than 365 days after the date of enactment of this subsection, the Administrator of the Federal Emergency Management Agency shall submit a report to the Committee on Homeland Security and Governmental Affairs of the Senate and the Committee on Transportation and Infrastructure of the House of Representatives on the efforts of the Federal Emergency Management Agency to collect the information described in paragraph (1).

## TITLE V—EMERGENCY ASSISTANCE PROGRAMS

### SEC. 501. PROCEDURE FOR DECLARATION.

(a) REQUEST AND DECLARATION.—All requests for a declaration by the President that an emergency exists shall be made by the Governor of the affected State. Such a request shall be based on a finding that the situation is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local governments and that Federal assistance is necessary. As a part of such request, and as a prerequisite to emergency assistance under this Act, the Governor shall take appropriate action under State law and direct execution of the State's emergency plan. The Governor shall furnish information describing the State and local efforts and resources which have been or will be used to alleviate the emergency, and will define the type and extent of Federal aid required. Based upon such Governor's request, the President may declare that an emergency exists.

(b) CERTAIN EMERGENCIES INVOLVING FEDERAL PRIMARY RESPONSIBILITY.—The President may exercise any authority vested in him by section 502 or section 503 with respect to an emergency when he determines that an emergency exists for which the primary responsibility for response rests with the United States because the emergency involves a subject area for which, under the Constitution or laws of the United States, the United States exercises exclusive or preeminent responsibility and authority. In determining whether or not such an emergency exists, the President shall consult the Governor of any affected State, if practicable. The President's determination may be made without regard to subsection (a).

(c) INDIAN TRIBAL GOVERNMENT REQUESTS.—

(1) IN GENERAL.—The Chief Executive of an affected Indian tribal government may submit a request for a declaration by the President that an emergency exists consistent with the requirements of subsection (a).

(2) REFERENCES.—In implementing assistance authorized by the President under this title in response to a request of the Chief Executive of an affected Indian tribal government for an emergency declaration, any reference in this title or title III (except sections 310 and 326) to a State or the Governor of a State is deemed to refer to an affected Indian tribal government or the Chief Executive of an affected Indian tribal government, as appropriate.

(3) SAVINGS PROVISION.—Nothing in this subsection shall prohibit an Indian tribal government from receiving assistance under this title through a declaration made by the President at the request of a State under subsection (a) if the President does not make a declaration under this subsection for the same incident.

【42 U.S.C. 5191】

**SEC. 502. FEDERAL EMERGENCY ASSISTANCE.**

(a) SPECIFIED.—In any emergency, the President may—

(1) direct any Federal agency, with or without reimbursement, to utilize its authorities and the resources granted to it under Federal law (including personnel, equipment, supplies, facilities, and managerial, technical and advisory services) in support of State and local emergency assistance efforts to save lives, protect property and public health and safety, and lessen or avert the threat of a catastrophe, including precautionary evacuations;

(2) coordinate all disaster relief assistance (including voluntary assistance) provided by Federal agencies, private organizations, and State and local governments;

(3) provide technical and advisory assistance to affected State and local governments for—

(A) the performance of essential community services;

(B) issuance of warnings of risks or hazards;

(C) public health and safety information, including dissemination of such information;

(D) provision of health and safety measures; and

(E) management, control, and reduction of immediate threats to public health and safety;

(4) provide emergency assistance through Federal agencies;

(5) remove debris in accordance with the terms and conditions of section 407;

(6) provide assistance in accordance with section 408 and section 416;

(7) assist State and local governments in the distribution of medicine, food, and other consumable supplies, and emergency assistance; and

(8) provide accelerated Federal assistance and Federal support where necessary to save lives, prevent human suffering, or mitigate severe damage, which may be provided in the absence of a specific request and in which case the President—

(A) shall, to the fullest extent practicable, promptly notify and coordinate with a State in which such assistance or support is provided; and

(B) shall not, in notifying and coordinating with a State under subparagraph (A), delay or impede the rapid deployment, use, and distribution of critical resources to victims of an emergency.

(b) GENERAL.—Whenever the Federal assistance provided under subsection (a) with respect to an emergency is inadequate, the President may also provide assistance with respect to efforts to save lives, protect property and public health and safety, and less-

**Sec. 503 ROBERT T. STAFFORD DISASTER RELIEF AND EMERGENCY... 80**

en or avert the threat of a catastrophe, including precautionary evacuations.

(c) **GUIDELINES.**—The President shall promulgate and maintain guidelines to assist Governors in requesting the declaration of an emergency in advance of a natural or man-made disaster (including for the purpose of seeking assistance with special needs and other evacuation efforts) under this section by defining the types of assistance available to affected States and the circumstances under which such requests are likely to be approved.

[42 U.S.C. 5192]

**SEC. 503. AMOUNT OF ASSISTANCE.**

(a) **FEDERAL SHARE.**—The Federal share for assistance provided under this title shall be equal to not less than 75 percent of the eligible costs.

(b) **LIMIT ON AMOUNT OF ASSISTANCE.**—

(1) **IN GENERAL.**—Except as provided in paragraph (2), total assistance provided under this title for a single emergency shall not exceed \$5,000,000.

(2) **ADDITIONAL ASSISTANCE.**—The limitation described in paragraph (1) may be exceeded when the President determines that—

(A) continued emergency assistance is immediately required;

(B) there is a continuing and immediate risk to lives, property, public health or safety; and

(C) necessary assistance will not otherwise be provided on a timely basis.

(3) **REPORT.**—Whenever the limitation described in paragraph (1) is exceeded, the President shall report to the Congress on the nature and extent of emergency assistance requirements and shall propose additional legislation if necessary.

[42 U.S.C. 5193]

**TITLE VI—EMERGENCY PREPAREDNESS****SEC. 601. DECLARATION OF POLICY.**

The purpose of this title is to provide a system of emergency preparedness for the protection of life and property in the United States from hazards and to vest responsibility for emergency preparedness jointly in the Federal Government and the States and their political subdivisions. The Congress recognizes that the organizational structure established jointly by the Federal Government and the States and their political subdivisions for emergency preparedness purposes can be effectively utilized to provide relief and assistance to people in areas of the United States struck by a hazard. The Federal Government shall provide necessary direction, coordination, and guidance, and shall provide necessary assistance, as authorized in this title so that a comprehensive emergency preparedness system exists for all hazards.

[42 U.S.C. 5195]

**SEC. 602. DEFINITIONS.**

(a) **DEFINITIONS.**—For purposes of this title only:

(1) **HAZARD.**—The term “hazard” means an emergency or disaster resulting from—

(A) a natural disaster; or

(B) an accidental or man-caused event.

(2) **NATURAL DISASTER.**—The term “natural disaster” means any hurricane, tornado, storm, flood, high water, wind-driven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, drought, fire, or other catastrophe in any part of the United States which causes, or which may cause, substantial damage or injury to civilian property or persons.

(3) **EMERGENCY PREPAREDNESS.**—The term “emergency preparedness” means all those activities and measures designed or undertaken to prepare for or minimize the effects of a hazard upon the civilian population, to deal with the immediate emergency conditions which would be created by the hazard, and to effectuate emergency repairs to, or the emergency restoration of, vital utilities and facilities destroyed or damaged by the hazard. Such term includes the following:

(A) Measures to be undertaken in preparation for anticipated hazards (including the establishment of appropriate organizations, operational plans, and supporting agreements, the recruitment and training of personnel, the conduct of research, the procurement and stockpiling of necessary materials and supplies, the provision of suitable warning systems, the construction or preparation of shelters, shelter areas, and control centers, and, when appropriate, the non-military evacuation of the civilian population).

(B) Measures to be undertaken during a hazard (including the enforcement of passive defense regulations prescribed by duly established military or civil authorities, the evacuation of personnel to shelter areas, the control of traffic and panic, and the control and use of lighting and civil communications).

(C) Measures to be undertaken following a hazard (including activities for fire fighting, rescue, emergency medical, health and sanitation services, monitoring for specific dangers of special weapons, unexploded bomb reconnaissance, essential debris clearance, emergency welfare measures, and immediately essential emergency repair or restoration of damaged vital facilities).

(4) **ORGANIZATIONAL EQUIPMENT.**—The term “organizational equipment” means equipment determined by the Administrator to be necessary to an emergency preparedness organization, as distinguished from personal equipment, and of such a type or nature as to require it to be financed in whole or in part by the Federal Government. Such term does not include those items which the local community normally uses in combating local disasters, except when required in unusual quantities dictated by the requirements of the emergency preparedness plans.

(5) MATERIALS.—The term “materials” includes raw materials, supplies, medicines, equipment, component parts and technical information and processes necessary for emergency preparedness.

(6) FACILITIES.—The term “facilities”, except as otherwise provided in this title, includes buildings, shelters, utilities, and land.

(7) ADMINISTRATOR.—The term “Administrator” means the Administrator of the Federal Emergency Management Agency.

(8) NEIGHBORING COUNTRIES.—The term “neighboring countries” includes Canada and Mexico.

(9) UNITED STATES AND STATES.—The terms “United States” and “States” includes<sup>9</sup> the several States, the District of Columbia, and territories and possessions of the United States.

(10) STATE.—The term “State” includes interstate emergency preparedness authorities established under section 611(h).

(b) CROSS REFERENCE.—The terms “national defense” and “defense,” as used in the Defense Production Act of 1950 (50 U.S.C. App. 2061 et seq.), includes<sup>9</sup> emergency preparedness activities conducted pursuant to this title.

【42 U.S.C. 5195a】

#### SEC. 603. ADMINISTRATION OF TITLE.

This title shall be carried out by the Administrator of the Federal Emergency Management Agency.

【42 U.S.C. 5195b】

## Subtitle A—Powers and Duties

#### SEC. 611. DETAILED FUNCTIONS OF ADMINISTRATION.

(a) IN GENERAL.—In order to carry out the policy described in section 601, the Administrator shall have the authorities provided in this section.

(b) FEDERAL EMERGENCY RESPONSE PLANS AND PROGRAMS.—The Administrator may prepare Federal response plans and programs for the emergency preparedness of the United States and sponsor and direct such plans and programs. To prepare such plans and programs and coordinate such plans and programs with State efforts, the Administrator may request such reports on State plans and operations for emergency preparedness as may be necessary to keep the President, Congress, and the States advised of the status of emergency preparedness in the United States.

(c) DELEGATION OF EMERGENCY PREPAREDNESS RESPONSIBILITIES.—With the approval of the President, the Administrator may delegate to other departments and agencies of the Federal Government appropriate emergency preparedness responsibilities and review and coordinate the emergency preparedness activities of the departments and agencies with each other and with the activities of the States and neighboring countries.

<sup>9</sup>The word “includes” in subsections (a)(9) and (b) probably should read “include”.

(d) **COMMUNICATIONS AND WARNINGS.**—The Administrator may make appropriate provision for necessary emergency preparedness communications and for dissemination of warnings to the civilian population of a hazard.

(e) **EMERGENCY PREPAREDNESS MEASURES.**—The Administrator may study and develop emergency preparedness measures designed to afford adequate protection of life and property, including—

(1) research and studies as to the best methods of treating the effects of hazards;

(2) developing shelter designs and materials for protective covering or construction;

(3) developing equipment or facilities and effecting the standardization thereof to meet emergency preparedness requirements; and

(4) plans that take into account the needs of individuals with pets and service animals prior to, during, and following a major disaster or emergency.

(f) **TRAINING PROGRAMS.**—(1) The Administrator may—

(A) conduct or arrange, by contract or otherwise, for training programs for the instruction of emergency preparedness officials and other persons in the organization, operation, and techniques of emergency preparedness;

(B) conduct or operate schools or including the payment of travel expenses, in accordance with subchapter I of chapter 57 of title 5, United States Code, and the Standardized Government Travel Regulations, and per diem allowances, in lieu of subsistence for trainees in attendance or the furnishing of subsistence and quarters for trainees and instructors on terms prescribed by the Administrator; and

(C) provide instructors and training aids as necessary.

(2) The terms prescribed by the Administrator for the payment of travel expenses and per diem allowances authorized by this subsection shall include a provision that such payment shall not exceed one-half of the total cost of such expenses.

(3) The Administrator may lease real property required for the purpose of carrying out this subsection, but may not acquire fee title to property unless specifically authorized by law.

(g) **PUBLIC DISSEMINATION OF EMERGENCY PREPAREDNESS INFORMATION.**—The Administrator may publicly disseminate appropriate emergency preparedness information by all appropriate means.

(h) **EMERGENCY PREPAREDNESS COMPACTS.**—(1) The Administrator shall establish a program supporting the development of emergency preparedness compacts for acts of terrorism, disasters, and emergencies throughout the Nation, by—

(A) identifying and cataloging existing emergency preparedness compacts for acts of terrorism, disasters, and emergencies at the State and local levels of government;

(B) disseminating to State and local governments examples of best practices in the development of emergency preparedness compacts and models of existing emergency preparedness compacts, including agreements involving interstate jurisdictions; and

(C) completing an inventory of Federal response capabilities for acts of terrorism, disasters, and emergencies, making such inventory available to appropriate Federal, State, and local government officials, and ensuring that such inventory is as current and accurate as practicable.

(2) The Administrator may—

(A) assist and encourage the States to negotiate and enter into interstate emergency preparedness compacts;

(B) review the terms and conditions of such proposed compacts in order to assist, to the extent feasible, in obtaining uniformity between such compacts and consistency with Federal emergency response plans and programs;

(C) assist and coordinate the activities under such compacts; and

(D) aid and assist in encouraging reciprocal emergency preparedness legislation by the States which will permit the furnishing of mutual aid for emergency preparedness purposes in the event of a hazard which cannot be adequately met or controlled by a State or political subdivision thereof threatened with or experiencing a hazard.

(3) A copy of each interstate emergency preparedness compact shall be transmitted promptly to the Senate and the House of Representatives. The consent of Congress is deemed to be granted to each such compact upon the expiration of the 60-day period beginning on the date on which the compact is transmitted to Congress.

(4) Nothing in this subsection shall be construed as preventing Congress from disapproving, or withdrawing at any time its consent to, any interstate emergency preparedness compact.

(i) MATERIALS AND FACILITIES.—(1) The Administrator may procure by condemnation or otherwise, construct, lease, transport, store, maintain, renovate or distribute materials and facilities for emergency preparedness, with the right to take immediate possession thereof.

(2) Facilities acquired by purchase, donation, or other means of transfer may be occupied, used, and improved for the purposes of this title before the approval of title by the Attorney General as required by section 355 of the Revised Statutes (40 U.S.C. 255).

(3) The Administrator may lease real property required for the purpose of carrying out the provisions of this subsection, but shall not acquire fee title to property unless specifically authorized by law.

(4) The Administrator may procure and maintain under this subsection radiological, chemical, bacteriological, and biological agent monitoring and decontamination devices and distribute such devices by loan or grant to the States for emergency preparedness purposes, under such terms and conditions as the Administrator shall prescribe.

(j) FINANCIAL CONTRIBUTIONS.—(1) The Administrator may make financial contributions, on the basis of programs or projects approved by the Administrator, to the States for emergency preparedness purposes, including the procurement, construction, leasing, or renovating of materials and facilities. Such contributions shall be made on such terms or conditions as the Administrator shall prescribe, including the method of purchase, the quantity,

quality, or specifications of the materials or facilities, and such other factors or care or treatment to assure the uniformity, availability, and good condition of such materials or facilities.

(2) The Administrator may make financial contributions, on the basis of programs or projects approved by the Administrator, to the States and local authorities for animal emergency preparedness purposes, including the procurement, construction, leasing, or renovating of emergency shelter facilities and materials that will accommodate people with pets and service animals.

(3) No contribution may be made under this subsection for the procurement of land or for the purchase of personal equipment for State or local emergency preparedness workers.

(4) The amounts authorized to be contributed by the Administrator to each State for organizational equipment shall be equally matched by such State from any source it determines is consistent with its laws.

(5) Financial contributions to the States for shelters and other protective facilities shall be determined by taking the amount of funds appropriated or available to the Administrator for such facilities in each fiscal year and apportioning such funds among the States in the ratio which the urban population of the critical target areas (as determined by the Administrator) in each State, at the time of the determination, bears to the total urban population of the critical target areas of all of the States.

(6) The amounts authorized to be contributed by the Administrator to each State for such shelters and protective facilities shall be equally matched by such State from any source it determines is consistent with its laws and, if not matched within a reasonable time, the Administrator may reallocate such amounts to other States under the formula described in paragraph (4). The value of any land contributed by any State or political subdivision thereof shall be excluded from the computation of the State share under this subsection.

(7) The amounts paid to any State under this subsection shall be expended solely in carrying out the purposes set forth herein and in accordance with State emergency preparedness programs or projects approved by the Administrator. The Administrator shall make no contribution toward the cost of any program or project for the procurement, construction, or leasing of any facility which (A) is intended for use, in whole or in part, for any purpose other than emergency preparedness, and (B) is of such kind that upon completion it will, in the judgment of the Administrator, be capable of producing sufficient revenue to provide reasonable assurance of the retirement or repayment of such cost; except that (subject to the preceding provisions of this subsection) the Administrator may make a contribution to any State toward that portion of the cost of the construction, reconstruction, or enlargement of any facility which the Administrator determines to be directly attributable to the incorporation in such facility of any feature of construction or design not necessary for the principal intended purpose thereof but which is, in the judgment of the Administrator necessary for the use of such facility for emergency preparedness purposes.

(8) The Administrator shall submit to Congress a report, at least annually, regarding all contributions made pursuant to this subsection.

(9) All laborers and mechanics employed by contractors or subcontractors in the performance of construction work financed with the assistance of any contribution of Federal funds made by the Administrator under this subsection shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Act of March 3, 1931 (commonly known as the Davis-Bacon Act (40 U.S.C. 276a–276a–5)), and every such employee shall receive compensation at a rate not less than one and ½ times the basic rate of pay of the employee for all hours worked in any workweek in excess of eight hours in any workday or 40 hours in the workweek, as the case may be. The Administrator shall make no contribution of Federal funds without first obtaining adequate assurance that these labor standards will be maintained upon the construction work. The Secretary of Labor shall have, with respect to the labor standards specified in this subsection, the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (5 U.S.C. App.) and section 2 of the Act of June 13, 1934 (40 U.S.C. 276(c)).

(k) **SALE OR DISPOSAL OF CERTAIN MATERIALS AND FACILITIES.**—The Administrator may arrange for the sale or disposal of materials and facilities found by the Administrator to be unnecessary or unsuitable for emergency preparedness purposes in the same manner as provided for excess property under the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 471 et seq.). Any funds received as proceeds from the sale or other disposition of such materials and facilities shall be deposited into the Treasury as miscellaneous receipts.

[42 U.S.C. 5196]

**SEC. 612. MUTUAL AID PACTS BETWEEN STATES AND NEIGHBORING COUNTRIES.**

The Administrator shall give all practicable assistance to States in arranging, through the Department of State, mutual emergency preparedness aid between the States and neighboring countries.

[42 U.S.C. 5196a]

**SEC. 613. CONTRIBUTIONS FOR PERSONNEL AND ADMINISTRATIVE EXPENSES.**

(a) **GENERAL AUTHORITY.**—To further assist in carrying out the purposes of this title, the Administrator may make financial contributions to the States (including interstate emergency preparedness authorities established pursuant to section 611(h)) for necessary and essential State and local emergency preparedness personnel and administrative expenses, on the basis of approved plans (which shall be consistent with the Federal emergency response plans for emergency preparedness) for the emergency preparedness of the States. The financial contributions to the States under this section may not exceed one-half of the total cost of such necessary and essential State and local emergency preparedness personnel and administrative expenses.

(b) **PLAN REQUIREMENTS.**—A plan submitted under this section shall—

(1) provide, pursuant to State law, that the plan shall be in effect in all political subdivisions of the State and be mandatory on them and be administered or supervised by a single State agency;

(2) provide that the State shall share the financial assistance with that provided by the Federal Government under this section from any source determined by it to be consistent with State law;

(3) provide for the development of State and local emergency preparedness operational plans, including a catastrophic incident annex, pursuant to standards approved by the Administrator;

(4) provide for the employment of a full-time emergency preparedness director, or deputy director, by the State;

(5) provide that the State shall make such reports in such form and content as the Administrator may require;

(6) make available to duly authorized representatives of the Administrator and the Comptroller General, books, records, and papers necessary to conduct audits for the purposes of this section; and

(7) include a plan for providing information to the public in a coordinated manner.

(c) **CATASTROPHIC INCIDENT ANNEX.**—

(1) **CONSISTENCY.**—A catastrophic incident annex submitted under subsection (b)(3) shall be—

(A) modeled after the catastrophic incident annex of the National Response Plan; and

(B) consistent with the national preparedness goal established under section 643 of the Post-Katrina Emergency Management Reform Act of 2006, the National Incident Management System, the National Response Plan, and other related plans and strategies.

(2) **CONSULTATION.**—In developing a catastrophic incident annex submitted under subsection (b)(3), a State shall consult with and seek appropriate comments from local governments, emergency response providers, locally governed multijurisdictional councils of government, and regional planning commissions.

(d) **TERMS AND CONDITIONS.**—The Administrator shall establish such other terms and conditions as the Administrator considers necessary and proper to carry out this section.

(e) **APPLICATION OF OTHER PROVISIONS.**—In carrying out this section, the provisions of section<sup>10</sup> 611(h) and 621(h) shall apply.

(f) **ALLOCATION OF FUNDS.**—For each fiscal year concerned, the Administrator shall allocate to each State, in accordance with regulations and the total sum appropriated under this title, amounts to be made available to the States for the purposes of this section. Regulations governing allocations to the States under this subsection shall give due regard to (1) the criticality of the areas which may be affected by hazards with respect to the development of the

<sup>10</sup>So in law. The word “section” in subsection (e) probably should read “sections”.

total emergency preparedness readiness of the United States, (2) the relative state of development of emergency preparedness readiness of the State, (3) population, and (4) such other factors as the Administrator shall prescribe. The Administrator may reallocate the excess of any allocation not used by a State in a plan submitted under this section. Amounts paid to any State or political subdivision under this section shall be expended solely for the purposes set forth in this section.

(g) **STANDARDS FOR STATE AND LOCAL EMERGENCY PREPAREDNESS OPERATIONAL PLANS.**—In approving standards for State and local emergency preparedness operational plans pursuant to subsection (b)(3), the Administrator shall ensure that such plans take into account the needs of individuals with household pets and service animals prior to, during, and following a major disaster or emergency.

(h) **SUBMISSION OF PLAN.**—If a State fails to submit a plan for approval as required by this section within 60 days after the Administrator notifies the States of the allocations under this section, the Administrator may reallocate such funds, or portions thereof, among the other States in such amounts as, in the judgment of the Administrator, will best assure the adequate development of the emergency preparedness capability of the United States.

(h)<sup>11</sup> **ANNUAL REPORTS.**—The Administrator shall report annually to the Congress all contributions made pursuant to this section.

[42 U.S.C. 5196b]

#### **SEC. 614. GRANTS FOR CONSTRUCTION OF EMERGENCY OPERATIONS CENTERS.**

(a) **GRANTS.**—The Administrator of the Federal Emergency Management Agency may make grants to States and Indian tribal governments under this title for equipping, upgrading, and constructing State, local, and Tribal emergency operations centers.

(b) **FEDERAL SHARE.**—Notwithstanding any other provision of this title, the Federal share of the cost of an activity carried out using amounts from grants made under this section shall not exceed 75 percent.

[42 U.S.C. 5196c]

#### **SEC. 615. USE OF FUNDS TO PREPARE FOR AND RESPOND TO HAZARDS.**

Funds made available to the States under this title may be used by the States for the purposes of preparing for hazards and providing emergency assistance in response to hazards. Regulations prescribed to carry out this section shall authorize the use of emergency preparedness personnel, materials, and facilities supported in whole or in part through contributions under this title for emergency preparedness activities and measures related to hazards.

[42 U.S.C. 5196d]

<sup>11</sup>So in law. Two subsections (h) have been enacted.

**SEC. 616. DISASTER RELATED INFORMATION SERVICES.**

(a) **IN GENERAL.**—Consistent with section 308(a), the Administrator of<sup>12</sup> Federal Emergency Management Agency shall—

(1) identify, in coordination with State and local governments, population groups with limited English proficiency and take into account such groups in planning for an emergency or major disaster;

(2) ensure that information made available to individuals affected by a major disaster or emergency is made available in formats that can be understood by—

(A) population groups identified under paragraph (1);

and

(B) individuals with disabilities or other special needs;

and

(3) develop and maintain an informational clearinghouse of model language assistance programs and best practices for State and local governments in providing services related to a major disaster or emergency.

(b) **GROUP SIZE.**—For purposes of subsection (a), the Administrator of Federal Emergency Management Agency shall define the size of a population group.

[42 U.S.C. 5196f]

## Subtitle B—General Provisions

**SEC. 621. ADMINISTRATIVE AUTHORITY.**

(a) **IN GENERAL.**—For the purpose of carrying out the powers and duties assigned to the Administrator under this title, the Administrator may exercise the administrative authorities provided under this section.

(b) **ADVISORY PERSONNEL.**—(1) The Administrator may employ not more than 100 part-time or temporary advisory personnel (including not to exceed 25 subjects of the United Kingdom or citizens of Canada) as the Administrator considers to be necessary in carrying out the provisions of this title.

(2) Persons holding other offices or positions under the United States for which they receive compensation, while serving as advisory personnel, shall receive no additional compensation for such service. Other part-time or temporary advisory personnel so employed may serve without compensation or may receive compensation at a rate not to exceed \$180 for each day of service, plus authorized subsistence and travel, as determined by the Administrator.

(c) **SERVICES OF OTHER AGENCY PERSONNEL AND VOLUNTEERS.**—The Administrator may—

(1) use the services of Federal agencies and, with the consent of any State or local government, accept and use the services of State and local agencies;

(2) establish and use such regional and other offices as may be necessary; and

<sup>12</sup>So in law. Probably should read “of the Federal”.

(3) use such voluntary and uncompensated services by individuals or organizations as may from time to time be needed.

(d) GIFTS.—Notwithstanding any other provision of law, the Administrator may accept gifts of supplies, equipment, and facilities and may use or distribute such gifts for emergency preparedness purposes in accordance with the provisions of this title.

(e) REIMBURSEMENT.—The Administrator may reimburse any Federal agency for any of its expenditures or for compensation of its personnel and use or consumption of its materials and facilities under this title to the extent funds are available.

(f) PRINTING.—The Administrator may purchase such printing, binding, and blank-book work from public, commercial, or private printing establishments or binderies as the Administrator considers necessary upon orders placed by the Public Printer or upon waivers issued in accordance with section 504 of title 44, United States Code.

(g) RULES AND REGULATIONS.—The Administrator may prescribe such rules and regulations as may be necessary and proper to carry out any of the provisions of this title and perform any of the powers and duties provided by this title. The Administrator may perform any of the powers and duties provided by this title through or with the aid of such officials of the Federal Emergency Management Agency as the Administrator may designate.

(h) FAILURE TO EXPEND CONTRIBUTIONS CORRECTLY.—(1) When, after reasonable notice and opportunity for hearing to the State or other person involved, the Administrator finds that there is a failure to expend funds in accordance with the regulations, terms, and conditions established under this title for approved emergency preparedness plans, programs, or projects, the Administrator may notify such State or person that further payments will not be made to the State or person from appropriations under this title (or from funds otherwise available for the purposes of this title for any approved plan, program, or project with respect to which there is such failure to comply) until the Administrator is satisfied that there will no longer be any such failure.

(2) Until so satisfied, the Administrator shall either withhold the payment of any financial contribution to such State or person or limit payments to those programs or projects with respect to which there is substantial compliance with the regulations, terms, and conditions governing plans, programs, or projects hereunder.

(3) As used in this subsection, the term “person” means the political subdivision of any State or combination or group thereof or any person, corporation, association, or other entity of any nature whatsoever, including instrumentalities of States and political subdivisions.

【42 U.S.C. 5197】

#### SEC. 622. SECURITY REGULATIONS.

(a) ESTABLISHMENT.—The Administrator shall establish such security requirements and safeguards, including restrictions with respect to access to information and property as the Administrator considers necessary.

(b) LIMITATIONS ON EMPLOYEE ACCESS TO INFORMATION.—No employee of the Federal Emergency Management Agency shall be

permitted to have access to information or property with respect to which access restrictions have been established under this section, until it shall have been determined that no information is contained in the files of the Federal Bureau of Investigation or any other investigative agency of the Government indicating that such employee is of questionable loyalty or reliability for security purposes, or if any such information is so disclosed, until the Federal Bureau of Investigation shall have conducted a full field investigation concerning such person and a report thereon shall have been evaluated in writing by the Administrator.

(c) NATIONAL SECURITY POSITIONS.—No employee of the Federal Emergency Management Agency shall occupy any position determined by the Administrator to be of critical importance from the standpoint of national security until a full field investigation concerning such employee shall have been conducted by the Director of the Office of Personnel Management and a report thereon shall have been evaluated in writing by the Administrator of the Federal Emergency Management Agency. In the event such full field investigation by the Director of the Office of Personnel Management develops any data reflecting that such applicant for a position of critical importance is of questionable loyalty or reliability for security purposes, or if the Administrator of the Federal Emergency Management Agency for any other reason considers it to be advisable, such investigation shall be discontinued and a report thereon shall be referred to the Administrator of the Federal Emergency Management Agency for evaluation in writing. Thereafter, the Administrator of the Federal Emergency Management Agency may refer the matter to the Federal Bureau of Investigation for the conduct of a full field investigation by such Bureau. The result of such latter investigation by such Bureau shall be furnished to the Administrator of the Federal Emergency Management Agency for action.

(d) EMPLOYEE OATHS.—Each Federal employee of the Federal Emergency Management Agency acting under the authority of this title, except the subjects of the United Kingdom and citizens of Canada specified in section 621(b), shall execute the loyalty oath or appointment affidavits prescribed by the Director of the Office of Personnel Management. Each person other than a Federal employee who is appointed to serve in a State or local organization for emergency preparedness shall before entering upon duties, take an oath in writing before a person authorized to administer oaths, which oath shall be substantially as follows:

“I, \_\_\_\_\_, do solemnly swear (or affirm) that I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I take this obligation freely, without any mental reservation or purpose of evasion; and that I will well and faithfully discharge the duties upon which I am about to enter.

“And I do further swear (or affirm) that I do not advocate, nor am I a member or an affiliate of any organization, group, or combination of persons that advocates the overthrow of the Government of the United States by force or violence; and that during such time as I am a member of \_\_\_\_\_ (name of emergency preparedness organization), I will not advocate nor

**Sec. 623 ROBERT T. STAFFORD DISASTER RELIEF AND EMERGENCY... 92**

become a member or an affiliate of any organization, group, or combination of persons that advocates the overthrow of the Government of the United States by force or violence.”

“After appointment and qualification for office, the director of emergency preparedness of any State, and any subordinate emergency preparedness officer within such State designated by the director in writing, shall be qualified to administer any such oath within such State under such regulations as the director shall prescribe. Any person who shall be found guilty of having falsely taken such oath shall be punished as provided in section 1621 of title 18, United States Code.”

[42 U.S.C. 5197a]

**SEC. 623. USE OF EXISTING FACILITIES.**

In performing duties under this title, the Administrator—

(1) shall cooperate with the various departments and agencies of the Federal Government;

(2) shall use, to the maximum extent, the existing facilities and resources of the Federal Government and, with their consent, the facilities and resources of the States and political subdivisions thereof, and of other organizations and agencies; and

(3) shall refrain from engaging in any form of activity which would duplicate or parallel activity of any other Federal department or agency unless the Administrator, with the written approval of the President, shall determine that such duplication is necessary to accomplish the purposes of this title.

[42 U.S.C. 5197b]

**SEC. 624. ANNUAL REPORT TO CONGRESS.**

The Administrator shall annually submit a written report to the President and Congress covering expenditures, contributions, work, and accomplishments of the Federal Emergency Management Agency pursuant to this title, accompanied by such recommendations as the Administrator considers appropriate.

[42 U.S.C. 5197c]

**SEC. 625. APPLICABILITY OF TITLE.**

The provisions of this title shall be applicable to the United States, its States, Territories and possessions, and the District of Columbia, and their political subdivisions.

[42 U.S.C. 5197d]

**SEC. 626. AUTHORIZATION OF APPROPRIATIONS AND TRANSFERS OF FUNDS.**

(a) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this title.

(b) **TRANSFER AUTHORITY.**—Funds made available for the purposes of this title may be allocated or transferred for any of the purposes of this title, with the approval of the Director of the Office of Management and Budget, to any agency or government corporation designated to assist in carrying out this title. Each such allocation or transfer shall be reported in full detail to the Congress within 30 days after such allocation or transfer.

[42 U.S.C. 5197e]

**SEC. 627. RELATION TO ATOMIC ENERGY ACT OF 1954.**

Nothing in this title shall be construed to alter or modify the provisions of the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.).

[42 U.S.C. 5197f]

**SEC. 628. FEDERAL BUREAU OF INVESTIGATION.**

Nothing in this title shall be construed to authorize investigations of espionage, sabotage, or subversive acts by any persons other than personnel of the Federal Bureau of Investigation.

[42 U.S.C. 5197g]

**SEC. 629. MINORITY EMERGENCY PREPAREDNESS DEMONSTRATION PROGRAM.**

(a) **IN GENERAL.**—The Administrator shall establish a minority emergency preparedness demonstration program to research and promote the capacity of minority communities to provide data, information, and awareness education by providing grants to or executing contracts or cooperative agreements with eligible nonprofit organizations to establish and conduct such programs.

(b) **ACTIVITIES SUPPORTED.**—An eligible nonprofit organization may use a grant, contract, or cooperative agreement awarded under this section—

(1) to conduct research into the status of emergency preparedness and disaster response awareness in African American and Hispanic households located in urban, suburban, and rural communities, particularly in those States and regions most impacted by natural and manmade disasters and emergencies; and

(2) to develop and promote awareness of emergency preparedness education programs within minority communities, including development and preparation of culturally competent educational and awareness materials that can be used to disseminate information to minority organizations and institutions.

(c) **ELIGIBLE ORGANIZATIONS.**—A nonprofit organization is eligible to be awarded a grant, contract, or cooperative agreement under this section with respect to a program if the organization is a nonprofit organization that is described in section 501(c)(3) of the Internal Revenue Code of 1986 (26 U.S.C. 501(c)(3)) and exempt from tax under section 501(a) of such Code, whose primary mission is to provide services to communities predominately populated by minority citizens, and that can demonstrate a partnership with a minority-owned business enterprise or minority business located in a HUBZone (as defined in section 3(p) of the Small Business Act (15 U.S.C. 632(p))) with respect to the program.

(d) **USE OF FUNDS.**—A recipient of a grant, contract, or cooperative agreement awarded under this section may only use the proceeds of the grant, contract, or agreement to—

(1) acquire expert professional services necessary to conduct research in communities predominately populated by mi-

nority citizens, with a primary emphasis on African American and Hispanic communities;

(2) develop and prepare informational materials to promote awareness among minority communities about emergency preparedness and how to protect their households and communities in advance of disasters;

(3) establish consortia with minority national organizations, minority institutions of higher education, and faith-based institutions to disseminate information about emergency preparedness to minority communities; and

(4) implement a joint project with a minority serving institution, including a part B institution (as defined in section 322(2) of the Higher Education Act of 1965 (20 U.S.C. 1061(2))), an institution described in subparagraph (A), (B), or (C) of section 326<sup>13</sup> of that Act (20 U.S.C. 1063b(e)(1)(A), (B), or (C)), and a Hispanic-serving institution (as defined in section 502(a)(5) of that Act (20 U.S.C. 1101a(a)(5))).

(e) APPLICATION AND REVIEW PROCEDURE.—To be eligible to receive a grant, contract, or cooperative agreement under this section, an organization must submit an application to the Administrator at such time, in such manner, and accompanied by such information as the Administrator may reasonably require. The Administrator shall establish a procedure by which to accept such applications.

(f) AUTHORIZATION OF APPROPRIATION.—There is authorized to be appropriated to carry out this section \$1,500,000 for fiscal year 2002 and such funds as may be necessary for fiscal years 2003 through 2007. Such sums shall remain available until expended.

[42 U.S.C. 5197h]

## TITLE VII—MISCELLANEOUS

### AUTHORITY TO PRESCRIBE RULES AND ACCEPT GIFTS

SEC. 701. (a)(1) The President may prescribe such rules and regulations as may be necessary and proper to carry out any of the provisions of this Act, and he may exercise any power or authority conferred on him by any section of this Act either directly or through such Federal agency or agencies as he may designate.

(2) DEADLINE FOR PAYMENT OF ASSISTANCE.—Rules and regulations authorized by paragraph (1) shall provide that payment of any assistance under this Act to a State shall be completed within 60 days after the date of approval of such assistance.

(b) In furtherance of the purposes of this Act, the President or his delegate may accept and use bequests, gifts, or donations of service, money, or property, real, personal, or mixed, tangible, or intangible. All sums received under this subsection shall be deposited in a separate fund on the books of the Treasury and shall be available for expenditure upon the certification of the President or his delegate. At the request of the President or his delegate, the Secretary of the Treasury may invest and reinvest excess monies in the fund. Such investments shall be in public debt securities with maturities suitable for the needs of the fund and shall bear

<sup>13</sup>So in law. Should read “section 326(e)(1)”.

interest at rates determined by the Secretary of the Treasury, taking into consideration current market yields on outstanding marketable obligations of the United States of comparable maturities. The interest on such investments shall be credited to, and form a part of, the fund.

[42 U.S.C. 5201]

SEC. 702. [Amended various other Acts].

#### REPEAL OF EXISTING LAW

SEC. 703. The Disaster Relief Act of 1970, as amended (84 Stat. 1744), is hereby repealed, except sections 231, 233, 234, 235, 236, 237, 301, 302, 303, and 304. Notwithstanding such repeal the provisions of the Disaster Relief Act of 1970 shall continue in effect with respect to any major disaster declared prior to the enactment of this Act.

#### PRIOR ALLOCATION OF FUNDS

SEC. 704. Funds heretofore appropriated and available under Public Laws 91–606, as amended, and 92–385 shall continue to be available for the purpose of providing assistance under those Acts as well as for the purposes of this Act.

#### SEC. 705. DISASTER GRANT CLOSEOUT PROCEDURES.

(a) STATUTE OF LIMITATIONS.—

(1) IN GENERAL.—Notwithstanding section 3716(e) of title 31, United States Code, and except as provided in paragraph (2), no administrative action to recover any payment made to a State or local government for disaster or emergency assistance under this Act shall be initiated in any forum after the date that is 3 years after the date of transmission of the final expenditure report for project completion as certified by the grantee.

(2) FRAUD EXCEPTION.—The limitation under paragraph (1) shall apply unless there is evidence of civil or criminal fraud.

(b) REBUTTAL OF PRESUMPTION OF RECORD MAINTENANCE.—

(1) IN GENERAL.—In any dispute arising under this section after the date that is 3 years after the date of transmission of the final expenditure report for project completion as certified by the grantee, there shall be a presumption that accounting records were maintained that adequately identify the source and application of funds provided for financially assisted activities.

(2) AFFIRMATIVE EVIDENCE.—The presumption described in paragraph (1) may be rebutted only on production of affirmative evidence that the State or local government did not maintain documentation described in that paragraph.

(3) INABILITY TO PRODUCE DOCUMENTATION.—The inability of the Federal, State, or local government to produce source documentation supporting expenditure reports later than 3 years after the date of transmission of the final expenditure report for project completion as certified by the grantee shall not constitute evidence to rebut the presumption described in paragraph (1).

(4) RIGHT OF ACCESS.—The period during which the Federal, State, or local government has the right to access source documentation shall not be limited to the required 3-year retention period referred to in paragraph (3), but shall last as long as the records are maintained.

(c) BINDING NATURE OF GRANT REQUIREMENTS.—A State or local government shall not be liable for reimbursement or any other penalty for any payment made under this Act if—

- (1) the payment was authorized by an approved agreement specifying the costs;
- (2) the costs were reasonable; and
- (3) the purpose of the grant was accomplished.

(d) FACILITATING CLOSEOUT.—

(1) INCENTIVES.—The Administrator of the Federal Emergency Management Agency may develop incentives and penalties that encourage State, local, or Indian tribal governments to close out expenditures and activities on a timely basis related to disaster or emergency assistance.

(2) AGENCY REQUIREMENTS.—The Federal Emergency Management Agency shall, consistent with applicable regulations and required procedures, meet its responsibilities to improve closeout practices and reduce the time to close disaster program awards.

[42 U.S.C. 5205]

#### SEC. 706. FIREARMS POLICIES.

(a) PROHIBITION ON CONFISCATION OF FIREARMS.—No officer or employee of the United States (including any member of the uniformed services), or person operating pursuant to or under color of Federal law, or receiving Federal funds, or under control of any Federal official, or providing services to such an officer, employee, or other person, while acting in support of relief from a major disaster or emergency, may—

(1) temporarily or permanently seize, or authorize seizure of, any firearm the possession of which is not prohibited under Federal, State, or local law, other than for forfeiture in compliance with Federal law or as evidence in a criminal investigation;

(2) require registration of any firearm for which registration is not required by Federal, State, or local law;

(3) prohibit possession of any firearm, or promulgate any rule, regulation, or order prohibiting possession of any firearm, in any place or by any person where such possession is not otherwise prohibited by Federal, State, or local law; or

(4) prohibit the carrying of firearms by any person otherwise authorized to carry firearms under Federal, State, or local law, solely because such person is operating under the direction, control, or supervision of a Federal agency in support of relief from the major disaster or emergency.

(b) LIMITATION.—Nothing in this section shall be construed to prohibit any person in subsection (a) from requiring the temporary surrender of a firearm as a condition for entry into any mode of transportation used for rescue or evacuation during a major disaster or emergency.

aster or emergency, provided that such temporarily surrendered firearm is returned at the completion of such rescue or evacuation.

(c) PRIVATE RIGHTS OF ACTION.—

(1) IN GENERAL.—Any individual aggrieved by a violation of this section may seek relief in an action at law, suit in equity, or other proper proceeding for redress against any person who subjects such individual, or causes such individual to be subjected, to the deprivation of any of the rights, privileges, or immunities secured by this section.

(2) REMEDIES.—In addition to any existing remedy in law or equity, under any law, an individual aggrieved by the seizure or confiscation of a firearm in violation of this section may bring an action for return of such firearm in the United States district court in the district in which that individual resides or in which such firearm may be found.

(3) ATTORNEY FEES.—In any action or proceeding to enforce this section, the court shall award the prevailing party, other than the United States, a reasonable attorney's fee as part of the costs.

【42 U.S.C. 5207】

# Public Assistance

Debris Management Guide

*FEMA-325 / July 2007*

**FEMA**

## Foreword

The Federal Emergency Management Agency (FEMA) encourages State and local governments, tribal authorities, and private non-profit organizations to take a proactive approach to coordinating and managing debris removal operations as part of their overall emergency management plan. Communities with a debris management plan are better prepared to restore public services and ensure the public health and safety in the aftermath of a disaster, and they are better positioned to receive the full level of assistance available to them from FEMA and other participating entities.

The core components of a comprehensive debris management plan incorporate best practices in debris removal, reflect FEMA eligibility criteria, and are tailored to the specific needs and unique circumstances of each applicant. FEMA developed this guide to provide applicants with a programmatic and operational framework for structuring their own debris management plan or ensuring that their existing plan is consistent with FEMA's eligibility criteria. This framework:

1. Identifies and explains the debris removal eligibility criteria that applicants must meet in order to receive assistance under the FEMA Public Assistance (PA) Program
2. Provides a blueprint for assembling an effective and responsive plan for the entire debris management cycle
3. Outlines the FEMA Public Assistance debris removal organizational structure and strategy

We encourage local officials to review their community's vulnerability to a disaster and to consider how to manage large-scale debris clearance, removal, and disposal operations should the need arise. Your State emergency management agency and the FEMA regional office may provide additional technical assistance in your area.

An electronic version of this guide is available on FEMA's website at [fema.gov](http://fema.gov). **Because this document is not exhaustive and the provisions are subject to modification, consultation with the State and FEMA may be necessary.**

## **PART I – PUBLIC ASSISTANCE ELIGIBILITY**

---

# Part I – Public Assistance Eligibility

## Introduction

The Robert T. Stafford Disaster Relief and Emergency Assistance Act, Public Law 93-288, as amended, 42 U.S.C. § 5121, et seq. (hereinafter referred to as the Stafford Act), authorizes the FEMA Public Assistance Program to award Federal funding to State and local governments, Federally recognized tribes, and eligible private non-profit organizations in order to assist them in their disaster response and recovery activities. Specifically, the Program provides assistance for debris removal, implementation of emergency protective measures, and permanent restoration of eligible facilities and infrastructure.

A fundamental goal of the Public Assistance Program is to ensure that everyone shares a common understanding of the Public Assistance Program policies and procedures. To support this goal, FEMA has undertaken an effort to provide its State, tribal, and local partners with more and better information about the Public Assistance Program. Part I describes the Public Assistance Program's basic debris eligibility criteria and is intended to be a reference for planning and recovery purposes.

This document provides a summary of the eligibility criteria specifically for debris removal operations. For a more comprehensive understanding of the Public Assistance Program, additional information regarding FEMA Public Assistance policies, Fact Sheets, and guidance materials, including *FEMA 321 – Public Assistance Policy Digest*, *FEMA 322 – Public Assistance Guide*, and *FEMA 323 – Public Assistance Applicant Handbook*, can be obtained online at [fema.gov](http://fema.gov).

# Chapter 1 – Public Assistance Debris Removal Eligibility

## Chapter Highlights

### Public Assistance Grant Program

#### General Eligibility Criteria

- Definition of Eligibility
- Grantee/Subgrantee
- Facility
- Work
- Public Interest
- Reasonable Cost

#### Environmental and Historic Preservation Special Considerations

- National Environmental Policy Act
- Executive Orders

#### Duplication of Benefits

- Other Federal Agencies
- Insurance Settlements
- Salvage Value

## Public Assistance Grant Program

The Federal government may provide grants through the Public Assistance Program to reimburse the response and recovery efforts of an applicant (State and local governments, and certain private non-profit organizations) for Presidentially declared disasters. To receive supplemental disaster assistance under the Public Assistance Program, applicants must meet FEMA eligibility criteria.

An applicant may conduct debris operations in any manner it deems appropriate. However, only costs associated with applicants, facilities, and work deemed eligible according to FEMA eligibility criteria and complying with special consideration requirements are reimbursed under the Public Assistance Program. Therefore, these eligibility criteria and special consideration requirements should be taken into consideration by the applicant when developing its debris management plan.

## General Eligibility Criteria

### *Definition of Eligibility*

**Eligible** means qualifying for and meeting the stipulated requirements of the Public Assistance grant. The term eligible can be applied to applicants, facilities, work, and costs.

**Eligibility** is based on a hierarchy of statute, regulations, policies, fact sheets, guidance documents, and disaster-specific documents:

- **Statute** is the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. § 5121 et seq. (Stafford Act), the authority governing the Public Assistance Program.
- **Regulations**, which are published in 44 Code of Federal Regulations (CFR), Parts 13 and 206, implement and interpret the statute.
- **Policies** are written to apply the statute and regulations to specific subjects and situations.
- **Fact Sheets, guidance documents, and disaster-specific documents** provide clarification and detailed explanations of issues and concerns.

The terms **ineligible** or **not eligible** are used to indicate the applicant, facility, work, or cost does not qualify for a Public Assistance grant.

### ***Grantee/Subgrantee***

**Grantee** means the government, usually the State, to which a grant is awarded by the Federal government and is accountable for the use of the funds provided.

**Subgrantee** (applicant) is the entity to which a subgrant is awarded and is accountable to the grantee for the use of the funds provided. Four types of subgrantees are eligible for Public Assistance grants:

1. State government agencies, such as:
  - State department of transportation
  - State environmental resources agency
  - State parks agency
2. Local governments, such as:
  - Towns, cities, counties, boroughs
  - Municipalities, townships
  - Local public authorities
3. Private Non-Profit (PNP) organizations or institutions that own or operate facilities that provide certain services otherwise performed by a government agency. Eligible facilities are limited to:
  - Educational
  - Emergency
  - Medical

- Utility
  - Custodial care
  - Irrigation
  - Other essential governmental services, which are open to the general public and do not fall into one of the categories described above include community centers, rehabilitation facilities, homeless shelters, libraries, museums, senior citizen centers, shelter workshops, zoos, performing arts facilities, community arts centers, and health and safety services of a governmental nature.
4. Federally recognized Indian Tribes or authorized tribal organizations and Alaskan Native village organizations. This does not include Alaska Native Corporations, which are owned by private individuals. Indian Tribal Governments may serve as a grantee instead of a subgrantee.

Since this document speaks specifically to debris issues, it is assumed the city, county, township, or other governing body will take responsibility for planning and implementing the debris operations. The terms “jurisdiction” and “governing body” are used to indicate the eligible applicant planning or implementing the debris management operation.

### ***Facility***

A facility is any publicly or privately owned building, works, system, or equipment, built or manufactured, or an improved and maintained natural feature. Land used for agricultural purposes is not an eligible facility. The eligible facility must be located in the designated disaster area and must be the legal responsibility of an eligible applicant.

### ***Work***

FEMA characterizes work eligible for Public Assistance grants as either emergency or permanent work. These are classified into seven different categories identified by letters A through G. This document discusses only emergency work, Category A – Debris Removal and Category B – Emergency Protective Measures. To be eligible, an item of work must meet all of the following:

- Be required as a result of the disaster event;
- Be located within a designated disaster area, except that sheltering and evacuation activities may be located outside of the designated disaster area; and
- Be the legal responsibility of an eligible applicant.

## **Public Interest**

Eligible debris work must be in the public interest, which is defined as work necessary to meet the following:

- Eliminate immediate threats to life, public health and safety;
- Eliminate immediate threats of significant damage to improved public or private property;
- Ensure economic recovery of the affected community to the benefit of the community-at-large; or
- Mitigate the risk to life and property by removing substantially damaged structures and associated appurtenances as needed to convert property acquired through a FEMA hazard mitigation program to uses compatible with open space, recreation, or wetlands management practices.

## **Reasonable Cost**

A reasonable cost is defined by the Office of Management and Budget (OMB) Circular A-87, *Cost Principles for State, Local, and Indian Tribal Governments* and Circular A-122, *Cost Principles for Non-Profit Organizations*, as a cost which in its nature and amount does not exceed that which would be incurred by a prudent person under the circumstance prevailing at the time the decision was made to incur the cost. Considerations include evaluating historical costs for similar work, analyzing costs for similar work in the region, reviewing published unit cost data for the work, or comparing costs with the FEMA Schedule of Equipment Rates and Cost Codes. The source of costs may include: the applicant's force account labor, equipment, and materials; contracted services; and mutual aid agreements. Costs are discussed further in Chapter 2, *Costs*.

## **Environmental and Historic Preservation Special Considerations**

*State and local regulations, laws, and ordinances need to be addressed and followed for all environmental and historic preservation issues.*

FEMA uses the term "special considerations" to describe issues other than basic program eligibility that affect the scope of work and funding for a project. Applicants have a critical role in identifying and resolving special considerations issues. The applicant should assist FEMA by identifying the issues as early as possible and providing the information necessary for review. A brief description of environmental and historic preservation special considerations that relate to debris operations are set forth below.

## **National Environmental Policy Act**

The National Environmental Policy Act (NEPA) requires every Federal agency to follow a specific planning process to ensure that agency decision-makers and applicants have considered and the general public is fully informed about, with the opportunity to comment on, the environmental consequences of a Federally funded action. This review and consultation process is used to evaluate the impact a project and its alternatives may have on the environment. The review process required by NEPA is usually the vehicle through which FEMA addresses other environmental laws and regulations; however, FEMA is provided with statutory exclusions under Section 316 of the Stafford Act. These exclusions exempt certain actions from the NEPA review process and generally include debris removal, clearance of roads, and demolition of unsafe structures. If an action is not statutorily excluded, the appropriate level of NEPA review must be determined. FEMA makes the statutory exclusion determinations.

It should be noted that compliance with other individual laws such as the Endangered Species Act, the National Historic Preservation Act, the Clean Air Act, and the Clean Water Act is still required, even when a project is statutorily excluded from NEPA review. Environmental laws and regulations that may impact debris operations are briefly described in the following sections.

### **Clean Water Act**

The Clean Water Act (CWA) establishes the basic structure for regulating discharges of pollutants into the waters of the United States. It makes it unlawful for any person to discharge any pollutant from a specific source into navigable waters, unless a permit was obtained under its provisions. Through Section 404 of CWA, permits are required to discharge dredged and fill materials into waters of the United States, including wetlands.

Section 402 of CWA implements the National Pollutant Discharge Elimination System, which establishes a permit program controlling water pollution by regulating point sources that discharge pollutants into the waters of the United States.

Debris removal projects such as dredging, demolition, and construction and operation of sites used for debris management must comply with the requirements of CWA as administered by the Federal, State, or local regulatory agency.

### **Clean Air Act**

The Clean Air Act was established to protect the nation's air through the reduction of smog and atmospheric pollution. Several State and local governments have enacted similar legislation, either implementing Federal programs or implementing more stringent air quality requirements within their jurisdictions.

Projects that are funded under the Public Assistance Program such as debris clearance, removal, disposal, recycling, reduction, and demolition, must comply with the air quality standards required by the Federal, State, or local regulatory agencies.

### **Coastal Barrier Resources Act**

The Coastal Barrier Resources Act (CBRA) restricts Federal expenditures and financial assistance that encourage development of coastal barriers so that damage to property, fish, wildlife, and other natural resources associated with the coastal barrier is minimized. Coastal barriers are located along the Atlantic and Gulf Coasts and along the Great Lakes. They are identified on FEMA's Flood Insurance Rate Maps as Coastal Barrier Resources System (CBRS) units.

Costs for debris removal and emergency protective measures in designated CBRS units may be eligible for reimbursement under the Public Assistance Program provided the actions eliminate an immediate threat to lives, public health and safety, or protect improved property.

### **Resource Conservation and Recovery Act**

The Resource Conservation and Recovery Act (RCRA) requires safe disposal of waste materials, promotes the recycling of waste materials, and encourages cooperation with local agencies. It applies to disposal of disaster-generated debris and is of particular concern when hazardous materials may be present.

### **Endangered Species Act**

The Endangered Species Act (ESA) prohibits Federal actions that cause unnecessary harm to species listed as threatened or endangered, or the destruction or adverse modification of the habitat for these species. Endangered species include mammals, fish, birds, reptiles, and amphibians, as well as plants and insects. If a project involves the known habitat of a threatened or endangered species, FEMA must consult with the United States Fish and Wildlife Service and the National Marine Fisheries Service before approving funding for that project.

### **National Historic Preservation Act**

The National Historic Preservation Act (NHPA) requires Federal agencies to take into account the effects of their undertakings on historic properties. Federal agencies must consult with parties who have an interest in the effects of the undertaking in order to identify the affected historic properties, assess the effect of the undertaking on historic properties, and seek ways to avoid, minimize, or treat any adverse effects on historic properties. FEMA complies with NHPA and its implementing regulations in 36 CFR Part 800, either by executing Statewide programmatic agreements or by following standard regulatory procedures, commonly referred to as the Section 106 Process.

Historic properties include districts, buildings, structures, objects, landscapes, archaeological sites, and traditional cultural properties that are included in, or eligible for inclusion in, the National Register of Historic Places. These properties are not just old buildings or well-known historic sites, but places important in local, State, or national history. Facilities as diverse as bridges and water treatment plants may be considered historic. The National Register of Historic Places is a list of recognized historic properties. However, this list is not complete, and States may have additional properties with historic significance. Through the use of programmatic agreements, FEMA has delegated the identification and evaluation tasks to State Historic Preservation Officers (SHPO) in many States.

### **Coastal Zone Management Act**

The Coastal Zone Management Act (CZMA) encourages the management of coastal zone areas and provides grants to be used in maintaining coastal zone areas. It requires that Federal agencies be consistent in enforcing the policies of State coastal zone management programs when conducting or supporting activities that affect a coastal zone. It is intended to ensure that Federal activities are consistent with State programs for the protection and, where possible, enhancement of the nation's coastal zones.

### **Fish and Wildlife Coordination Act**

The Fish and Wildlife Coordination Act authorizes the United States Fish and Wildlife Service to administer programs for the planning, development, maintenance, and coordination of State wildlife resource conservation and rehabilitation. If a proposed project would destroy wildlife habitat or modify a natural stream or body of water, it requires an evaluation of that action's impact on fish and wildlife.

### **Wild and Scenic Rivers Act**

The Wild and Scenic Rivers Act (WSRA) was established by Congress to preserve selected rivers in its free-flowing condition in order to protect the water quality and fulfill other national conservation purposes. These rivers are considered protected, much like a national wildlife refuge. Federal agencies may not fund projects that would have a direct and adverse effect on the values for which a river was designated. If a proposed project is located on a river designated as wild and scenic, FEMA must review it for compliance with WSRA.

### ***Executive Orders***

In addition to the laws described above, several Executive Orders (EOs) issued by the President also affect Public Assistance Program projects. The EOs that most frequently affect the Public Assistance Program are the following:

**EO 11988** requires Federal agencies to undertake certain responsibilities for floodplain management. FEMA's procedures for complying with this EO are outlined in 44 CFR Part 9.

**EO 11990** outlines the protection of wetlands and requires a planning process that considers alternatives and evaluates impacts to wetlands. The process for complying with this EO is similar to that for complying with EO 11988 and is outlined in 44 CFR Part 9.

**EO 12898** requires Federal agencies to evaluate actions for disproportionately high and adverse effects on minority or low-income populations and to find ways to avoid or minimize these impacts where possible. Field personnel should identify any neighborhoods or communities with minority or low-income populations.

## **Duplication of Benefits**

In accordance with Section 312 of the Stafford Act, no applicant will receive assistance for any loss for which financial assistance has been received under any other program or from insurance or from any other source. Therefore, the use of Federal or State funds, insurance settlements, and other grants or cash donations granted for the same purpose constitutes a duplication of benefits.

### ***Other Federal Agencies***

If another Federal agency has the authority to provide an applicant with assistance for debris removal operations, FEMA cannot provide funds for that project. Applicants should pursue funding assistance offered through those agencies.

The Federal Highway Administration (FHWA), United States Army Corps of Engineers (USACE), National Resources Conservation Service (NRCS), Environmental Protection Agency (EPA), Department of Housing and Urban Development (HUD), and United States Coast Guard (USCG) may provide assistance to applicants for certain debris removal activities. Applicants must become aware of the agencies' roles, responsibilities, and jurisdictions to ensure a duplication of benefits does not occur between other Federal agencies and FEMA. Descriptions of other Federal agencies and their programs are found in Appendix G, *FEMA RP9580.202, Fact Sheet: Debris Removal - Authorities of Federal Agencies*.

### ***Insurance Settlements***

Insurance policies that include coverage for debris removal activities are potentially a duplication of benefits. The applicant should contact its insurance provider for a statement of loss to determine the amount of insurance settlement related to debris removal. The insurance settlement is reflected in the Public Assistance grant as a line-item credit against the eligible cost for the project.

Similarly, applicants should be aware that some residents within a declared disaster area may obtain funds for removing debris from their property through their homeowner insurance or

under the FEMA Individual Assistance (IA) Program. Should residents receive funds under the IA Program or insurance proceeds for the removal and disposal of debris from their properties, but also place debris at the curbside rights-of-way, the applicant should make a concerted effort to collect the proportionate cost of the curbside removal from those residents in an effort to comply with Section 312 of the Stafford Act.

While FEMA understands that this could become an arduous task, applicants can put in place protocols to inform residents that receiving a benefit for the same purpose from the Federal government or any other source is in violation of Federal law.

When applicants receive reimbursements from residents for the cost of curbside collection, applicants are required to report the total amount of proceeds collected from those residents to FEMA. The Federal share of the Public Assistance grant is calculated after the reimbursement proceeds are reduced from the total cost of the curbside collection.

### ***Salvage Value***

Applicants may choose to recover materials from disaster debris for beneficial uses. Applicants may sell materials such as metals, woody debris, concrete, masonry, or other types of debris to recyclers, to the construction or agricultural industry, or to energy generators. The salvage value for various recyclable or reusable debris materials depends on the regional recycling markets.

Applicants that sell disaster debris for a salvage value must offset the cost of the eligible debris removal work by the revenues received from the sale of the debris. Applicants must document and report to FEMA the revenues obtained through the sale of debris materials. Public Assistance grant funding is limited to the Federal share of the difference between the amount of revenue received and the cost of the debris removal.

Applicants that contract for debris removal may allow the contractor to take possession of the recoverable debris materials. This type of agreement must take into account the salvage value, and the applicant should negotiate a credit to reflect this value within the terms of the contract. The sale of the recoverable disaster debris materials should offset the cost of the contracted services.

## Chapter 2 – Costs

### Chapter Highlights

#### Applicant Resources

- Labor
- Equipment
- Documentation

#### Mutual Aid Agreements

#### Contract Services

- Competition
- Methods of Procurement
- Types of Contracts

#### Other Considerations

- Contract Scope of Work Recommendations
- Piggyback Contracts
- Prohibited Contracts

#### Additional Contract Requirements

### Applicant Resources

Eligible work accomplished with an applicant's own labor, equipment, and materials may be funded under the Public Assistance Program. An applicant's employees' labor and an applicant's equipment are called force account labor and force account equipment, respectively. It is important for the applicant's staff to document hours worked and equipment used to complete the eligible work.

#### **Labor**

For debris removal work, overtime labor costs (including benefits) are eligible for permanent employees, reassigned employees, and seasonal employees used during the season of anticipated employment. The cost of straight-time labor costs (including benefits) of an applicant's permanently employed personnel are not eligible in calculating the cost of eligible emergency work, which includes debris removal. Straight-time and overtime is determined in accordance with an applicant's pre-disaster policies, which should be applied consistently in both disaster and non-disaster situations.

Both straight-time and overtime labor costs are eligible for non-budgeted employees assigned specifically to perform emergency work.

Please refer to Appendix G, *FEMA RP9525.7, Labor Costs - Emergency Work* for specific eligibility guidance regarding labor costs for permanent, temporary, essential, reassigned, and seasonal employees.

## **Equipment**

Reimbursement for the use of force account equipment is limited to the time the equipment is actually in use. Standby and idle time are not eligible for Public Assistance grant funding.

Force account equipment may be reimbursed at an hourly rate. This hourly rate typically includes the operation, depreciation, maintenance, and fuel for that particular piece of equipment, but does not include operator labor cost. FEMA publishes a FEMA Schedule of Equipment Rates, which is available online at [fema.gov](http://fema.gov).

FEMA may recognize State equipment rates. Applicants that use rates established under State guidelines in their normal day-to-day operations may use State rates up to \$75 per hour upon Public Assistance Program approval of the cost development methodology. Rates over \$75 per hour may be approved by FEMA on a case-by-case basis.

FEMA may also recognize an applicant's use of rates developed by a local government in their normal day-to-day operations. Reimbursement is based either on the local rates or the FEMA Schedule of Equipment Rates, whichever is less. If the local rate is lower and the applicant certifies that the local rate does not reflect the actual cost, the FEMA Schedule of Equipment Rates may be used.

## **Documentation**

Appendix C, *FEMA Forms* are frequently used to document work completed with force account labor and equipment. The FEMA summary record forms provide the minimum information required for Public Assistance grant reimbursement consideration. These summary record forms are not required forms; the applicant may use its own forms or accounting summary, or alter the FEMA forms to fit its needs, as long as the minimum information required is provided.

Applicants are required to maintain source documentation such as timesheets, work logs, and equipment use sheets, that show the work was disaster-related and support the hours claimed on the force account summary forms submitted for the project.

## **Mutual Aid Agreements**

Applicants may have agreements with other jurisdictions and agencies for the provision of debris management services in the event of an emergency. The employees of the entity providing supplemental assistance are considered as extra hires or contract labor; therefore, both straight-time and overtime are eligible. FEMA will reimburse mutual aid costs provided that:

- The assistance is requested by the receiving applicant;

- The work performed is directly related to the disaster and is otherwise eligible for FEMA assistance;
- The entity that received the aid incurred a cost for that aid, i.e. the providing jurisdiction or agency bills the receiving applicant for the service;
- Provision of services under the agreement are not contingent upon declaration of a major disaster or emergency by FEMA; and
- The requesting and providing entities can provide documentation of rates and payment for services.

*FEMA RP9523.6, Mutual Aid Agreements for Public Assistance and Fire Management Assistance* contains additional information on mutual aid agreements and is available online at [fema.gov](http://fema.gov).

## **Contract Services**

An applicant may hire a contractor to perform such work as debris clearance, removal, disposal, reduction, recycling, and/or monitoring. Public Assistance grant funding is limited to the scope of work necessary to remove debris that is an immediate threat to life, public health and safety, or poses an immediate threat of significant damage to improved public or private property. Moreover, the costs must be reasonable for the respective scope of work in order to be eligible for Public Assistance grant reimbursement. The procurement of the contract is subject to all provisions of 44 CFR Part 13. The full text of 44 CFR Part 13 is available online through the United States Government Printing Office at [gpoaccess.gov](http://gpoaccess.gov).

Appendix G, *FEMA RP9580.4, Fact Sheet: Debris Operations - Clarification: Emergency Contracting vs. Emergency Work* should be reviewed by the applicant and taken into consideration when soliciting contractors.

Contracts must be of reasonable cost, generally must be competitively bid, and comply with Federal, State, and local procurement standards. FEMA will reimburse only fair and reasonable costs of any contract an applicant enters into. An applicant must consider costs, conflicts of interest, and all Federal, State, and local laws and regulations when hiring a contractor.

Compliance with local procurement practices and the procurement competition requirements specified in 44 CFR Part 13.36 are essential to successfully receiving Public Assistance grant funding. The Federal procurement regulations ensure that applicants procure contracts in a manner that provides full and open competition, and provide financial and record-keeping requirements. In addition, applicants should maintain a written code of standards for conduct governing the performance of employees, officers, or agents who select and award contracts.

It is important that applicants secure contracts with reputable and qualified licensed contractors. Applicants should conduct reference checks on a contractor's history of performance with the State's contractor licensing board and with the contractor's previous

clients before awarding contracts. Appendix G, *FEMA RP9580.201, Fact Sheet: Debris Removal - Applicant's Contracting Checklist* is provided as guidance to assist Public Assistance applicants in the procurement process.

### **Competition**

Pursuant to 44 CFR Part 13.36(c)(1), applicants may not restrict the bidding in order to disqualify a population of bidders. Some of the situations considered to be restrictive of competition include, but are not limited to:

- Placing unreasonable requirements on firms in order for them to qualify to do business
- Requiring unnecessary experience and excessive bonding
- Noncompetitive pricing practices between firms or between affiliated companies
- Noncompetitive awards to consultants that are on retainer contracts
- Organizational conflicts of interest
- Specifying only a “brand name” product instead of allowing “an equal” product to be offered and describing the performance of other relevant requirements of the procurement
- Any arbitrary action in the procurement process

Applicants who have prequalified lists of persons, firms, or products must keep such lists current in order to ensure open and free competition during the bidding process, in accordance with 44 CFR Part 13.36(c)(4), which states:

*“Grantees and subgrantees will ensure that all prequalified lists of persons, firms, or products which are used in acquiring goods and services are current and include enough qualified sources to ensure maximum open and free competition. Also, grantees and subgrantees will not preclude potential bidders from qualifying during the solicitation period.”*

### **Methods of Procurement**

An applicant may request that FEMA review its procurement process to determine whether the process meets the standards set forth in 44 CFR Part 13.36.

FEMA finds the following four methods of procurement acceptable:

**Small purchase procedures** procurement, an informal method for securing services or supplies that do not cost more than \$100,000 by obtaining several price quotes from different sources.

**Sealed bids** procurement, a formal method where bids are publicly advertised and solicited, and the contract is awarded to the responsible bidder whose proposal is the lowest in price. This method is the preferred method for procuring construction contracts.

**Competitive proposals** procurement, a method similar to sealed bid procurement in which contracts are awarded on the basis of contractor qualifications instead of on price. This method is often used for procuring architectural or engineering professional services. In addition, this method normally involves more than one source submitting an offer and is used when conditions are not appropriate for sealed bids.

**Noncompetitive proposals** procurement, a method whereby a proposal is received from only one source. Noncompetitive proposals should only be used when the award of a contract is not feasible under small purchase procedures, sealed bids, or competitive proposals, and one of the following circumstances applies:

- The item is available only from a single source
- There is an emergency requirement that does not permit a delay
- Solicitation from a number of sources has been attempted, and competition is determined to be inadequate

FEMA strongly discourages applicants from using a noncompetitive contract for debris removal operations. A contract may be regarded as noncompetitive if the applicant has only one responsive bidder. In this case the applicant is required to comply with 44 CFR Part 13.36(f), which states in part:

*“...A cost analysis will be necessary when adequate price competition is lacking, and for sole source procurements, including contract modifications or change orders, unless price reasonableness can be established on the basis of a catalog or market price of a commercial product sold in substantial quantities to the general public or based on prices set by law or regulation. A price analysis will be used in all other instances to determine the reasonableness of the proposed contract price.”*

Applicants are required by 44 CFR Part 13.36(f)(2) to negotiate profit as a separate element of the price for each contract in which there is no price competition and in all cases where cost analysis is performed. Consideration shall be given to the complexity of the work performed, risk borne to the contractor, contractor’s investment, amount of subcontracting, quality of the contractor’s record of past performance, and industry profit rates in the surrounding geographical area for similar work.

## ***Types of Contracts***

FEMA provides reimbursement for four types of contracts:

**Lump sum** contracts, for work within a prescribed boundary with a clearly defined scope and a total price

**Unit price** contracts, for work done on an item-by-item basis with cost determined per unit

**Cost-plus-fixed-fee** contracts, either lump sum or unit price contracts with a fixed contractor fee added into the price

**Time-and-materials** contracts, where the contractor bills the applicant for labor, equipment, materials, and overhead. These contracts should be avoided, but may be allowed for work that is necessary immediately after the disaster has occurred when a clear scope of work cannot be developed. Time-and-materials contracts are allowed in circumstances when they are more cost-effective and appropriate for the amount and type of eligible work to be performed. The costs must be reasonable for the type of work required. Applicants must engage in comprehensive active monitoring activities to ensure contractor efficiency. **Typically, FEMA will reimburse for only 70 hours of a time-and-materials contract.** If a time-and-materials contract is awarded, the applicants must:

- Monitor and document contractor expenses;
- Have a cost ceiling or “not to exceed” provision in the contract; and
- Contact the State to ensure proper guidelines are followed.

After 70 hours of work, the applicant should have sufficient information on the scope of work necessary to complete debris collection and disposal, and on a basis for estimating a reasonable cost for the contract work, to effectively solicit a lump sum or a unit price contract. For some types of debris work where time-and-materials contracts may be the most cost-effective and the most well-suited to the type of work, applicants should work closely with the State and FEMA when awarding the time-and-materials contracts to ensure eligibility requirements are met.

## **Other Considerations**

### ***Contract Scope of Work Recommendations***

The contract scope of work should reference “eligible work,” “work eligible under FEMA Public Assistance regulations, policies, and guidance,” “work performed on public property and/or public rights-of-way,” or other similar elements.

### **Piggyback Contracts**

FEMA does not favor “piggyback contracts.” Applicants have used piggyback contracts on occasion to have disaster-related work performed by another jurisdiction’s contractor. The variables associated with the scope of work and costs generally make this an option to be avoided. The competitive procurement requirements of 44 CFR Part 13 are also a prime concern. If FEMA encounters a request for reimbursement of costs derived from such a contract, the reimbursable costs for eligible work will be based on reasonableness.

### **Prohibited Contracts**

In accordance with 44 CFR Part 13.36(f)(4), cost plus percentage of cost contracts shall not be used. Use of such contracts may result in FEMA limiting the Public Assistance grant to an amount determined to be reasonable based on the eligible work performed.

Contracts that are awarded by an applicant to debarred contractors are prohibited pursuant to 44 CFR Part 13.35; thus, no Federal funding can be awarded for eligible work completed.

### **Additional Contract Requirements**

Contract payment provisions should address the obligations between parties to the contract only and not include any language that makes payment to the contractor contingent upon the applicant’s receipt of funding from FEMA.

All contracts in excess of \$10,000 must contain a provision for termination for cause and for convenience by the applicant, including the manner by which it will be effected and the basis for settlement, according to 44 CFR Part 13.36(i)(2).

For contracts over \$100,000 the applicant must have the following minimum bonding requirements, in accordance with 44 CFR Part 13.36(h):

- A bid guarantee from each bidder equivalent to five percent of the bid price;
- A performance bond on the part of the contractor for 100 percent of the contract price; and
- A payment bond on the part of the contractor for 100 percent of the contract price.

In accordance with 44 CFR Part 13.36(b)(8):

*“Grantees and subgrantees will make awards only to responsible contractors possessing the ability to perform successfully under the terms and conditions of a proposed procurement. Consideration will be given to such matters as contractor integrity, compliance with public policy, record of past performance, and financial and technical resources.”*

## Chapter 2 – Costs

Documentation requirements are specified in 44 CFR Part 13.36(b)(9) and include, but are not limited to, rationale for the procurement method, contract type, contractor selection or rejection, and the basis for contract price.

For additional contracting information, refer to Appendix G, *FEMA RP9580.201, Fact Sheet: Debris Removal - Applicant's Contracting Checklist*.

## Chapter 3 – Debris Removal from Public Property

### Chapter Highlights

Eligible Debris Removal  
Ineligible Debris Removal  
Debris Clearance and Removal Operations  
Field Eligibility Determinations

- Vegetative Debris Eligibility
- Construction and Demolition Debris
- Hazardous Waste
- White Goods
- Soil, Mud, and Sand
- Vehicles and Vessels
- Putrescent Debris
- Infectious Waste
- Chemical, Biological, Radiological, and Nuclear-Contaminated Debris
- Garbage

Monitoring Debris Removal Operations  
Disposal

This chapter discusses debris operations on public property and public rights-of-way. Applicants should document locations, conditions, and special circumstances of the debris prior to removal. This chapter includes preferred documentation information and requirements. Proper documentation enables an applicant to fully account for costs incurred in the event that Federal disaster assistance is made available.

### Eligible Debris Removal

Eligible debris removal work under the Public Assistance Program must meet the following criteria:

- The debris was generated by the major disaster event;
- The debris is located within a designated disaster area on an eligible applicant's improved property or rights-of-way; and
- The debris removal is the legal responsibility of the applicant.

## Ineligible Debris Removal

The following are not eligible for FEMA assistance under the Public Assistance Program:

- Any debris removal from an eligible applicant's unimproved property or undeveloped land;
- Any debris removal from a facility that is not eligible for funding under the Public Assistance Program, such as a PNP cemetery or PNP golf course; or
- Any debris removal from Federal lands or facilities that are the authority of another Federal agency or department, such as Federal-aid roads, USACE navigable waterways, and NRCS canals. See Chapter 16, *Other Federal Assistance*, for a description of these authorities.

## Debris Clearance and Removal Operations

Debris removal operations generally occur in two phases: (1) initial debris clearance activities necessary to eliminate life and safety threats; and (2) debris removal activities as a means to recovery. Whether the work was performed using an applicant's own resources or by contractors, documentation is necessary for Public Assistance grant consideration.

An applicant's initial response phase of the debris operation may begin during the disaster event. Crews may be activated to clear debris on emergency access roads; usually this is vegetative debris that is cut and tossed to the rights-of-way. The purpose is to eliminate an immediate threat to lives, and public health and safety. The transition period from initial clearance activities to debris removal depends on the magnitude of disaster impact. Typically, the debris removal recovery phase begins after the emergency access routes are cleared and police, firefighters, and other first responders have the necessary access.

Often residents begin clearing disaster debris from their properties and placing it on the public rights-of-way. If the property owners move the disaster-related debris to a public right-of-way, an applicant may be reimbursed for debris pickup, haul and disposal from the right-of-way for a limited period of time. If an applicant does not have the legal responsibility to maintain a right-of-way, then debris removal from that right-of-way is not eligible for reimbursement.

## Field Eligibility Determinations

To assist in implementation of the Public Assistance Program and the applicants' understanding of it, FEMA has established specific eligibility guidance for debris. This section addresses the most common eligibility issues for various types of debris and recommends documentation for Public Assistance grant consideration. Consultation with the State and FEMA is advised for scenarios not addressed within this section.

*Only FEMA has the authority to make eligibility determinations for Public Assistance grant funding; contractors cannot make eligibility determinations. Information on eligibility can be found in FEMA 321 – Public Assistance Policy Digest, FEMA 322 – Public Assistance Guide, FEMA 323 – Public Assistance Applicant Handbook, and this document.*

### **Vegetative Debris Eligibility**

Vegetative debris consists of whole trees, tree stumps, tree branches, tree trunks, and other leafy material. Depending on the size of the debris, the collection of vegetative debris may require the use of flat bed trucks, dump trucks, and grapple loaders.

Figure 3.1 - Typical Vegetative Debris on a Public Right-of-Way

Most vegetative debris consists of large piles of tree limbs and branches that are piled on the public rights-of-way by the residents. The collection of this type of debris is eligible for reimbursement if it is within public rights-of-way and collected by an eligible applicant. Applicants normally limit the number of times the debris is collected; for instance, the applicant may choose to make two passes throughout the jurisdiction before resuming its normal collection activities. The applicant should discuss with FEMA the number of passes that may be eligible.

Vegetative debris is bulky and consumes a significant volume of landfill space if buried. To minimize the use of landfill space, it is prudent to reduce the volume of vegetative debris before burying. Vegetative debris may be reduced by as much as 75 percent of its volume by mulching or grinding and as much as 90 percent of its volume through burning technologies. Costs to reduce vegetative debris are eligible for Public Assistance grant funding if found to be reasonable.

A hazardous tree or stump may be collected individually, while downed or fallen debris is collected from rights-of-way or at a designated collection center. Tree and stump collection prices are typically based on the size of the tree or stump and charged by unit. Other fallen or downed material is usually billed by weight (tons) or volume (cubic yards).

Determining eligibility for hazardous trees and stumps is challenging. FEMA has established criteria to assist in making these eligibility determinations, using objective information that can be collected in the field.

## Hazardous Trees

Removing a hazardous tree may be eligible for Public Assistance grant funding. A tree is considered hazardous if its condition was caused by the disaster; it is an immediate threat to lives, public health and safety, or improved property; it has a diameter breast height of six inches or greater; **and one or more of the following criteria are met:**

- It has more than 50 percent of the crown damaged or destroyed;
- It has a split trunk or broken branches that expose the heartwood;
- It has fallen or been uprooted within a public-use area; and/or
- It is leaning at an angle greater than 30 degrees.

Trees determined to be hazardous and that have **less than 50 percent of the root-ball exposed** should be cut flush at the ground level. Grinding of the resulting stump after the tree has been cut flush at the ground level is not eligible work. The cut portion of the tree is included with regular vegetative debris. The applicant should make an effort to cut the tree trunk as close to the ground as possible.

The eligible scope of work for a hazardous tree may include removing the leaning portion and cutting the stump at ground level. An example of an ineligible costing method for such work would be removing the tree and stump for two separate unit costs.

The Public Assistance Program may reimburse straightening and bracing if they are less costly than removal and disposal. Straightening and bracing are emergency protective measures if they eliminate an immediate threat to lives, public health and safety, or improved property. If an applicant chooses to straighten and brace a tree in lieu of removal, the tree would not be eligible for removal if it dies.

## Hazardous Limb Removal (Hangers)

Removing hanging limbs may be eligible for Public Assistance grant assistance. Limbs must be:

- Located on improved public property;
- Greater than two inches in diameter at the point of breakage; and
- Still hanging in a tree and threatening a public-use area, e.g. trails, sidewalks, golf cart paths.

Only the minimum amount of work necessary to remove the hazard is eligible. Pruning, maintenance trimming, and landscaping are not eligible. Work should be executed in an efficient manner. For example, all hazardous limbs in a tree should be cut at the same time, not in passes for particular sizes. Work to remove hanging limbs from a tree that has been determined to be a hazard and is scheduled for removal is not eligible. If this work is contracted out, it is typically done on a per tree basis.

An eligible scope of work may be to cut the branch at the closest main branch junction. Removing the entire branch back to the trunk may not be eligible.

If the canopy of a tree located on private property extends over a public right-of-way such as a sidewalk, removal of hazardous limbs on the tree that extend over the public right-of-way and meet the above criteria may be eligible. Limbs on the tree that do not extend over the public right-of-way are not eligible.

Documentation required for Public Assistance grant consideration:

- Describe the immediate threat, e.g. photos of hanging limbs or leaning trees;
- Clearly define the scope of work to remove the immediate threat;
- Specify the improved public property location by recording the nearest building address and/or GPS location; and
- Denote date, labor (force account or contract), and equipment used to perform the work.

### **Hazardous Tree Stumps**

A stump may be determined to be hazardous and eligible for Public Assistance grant funding as a per-unit cost for stump removal if it meets all of the following criteria:

- It has 50 percent or more of the root-ball exposed (less than 50 percent of the root-ball exposed should be flush cut);
- It is greater than 24 inches in diameter, as measured 24 inches above the ground;
- It is on improved public property or a public right-of-way; and
- It poses an immediate threat to life, and public health and safety.

If an uprooted stump must be removed **prior to FEMA's approval**, the applicant must submit the following information for Public Assistance grant consideration:

- Photographs and GPS coordinates that establish the location on public property;
- Specifics of the threat;
- Diameter of the stump 24 inches from the ground; and
- Quantity of material needed to fill the resultant hole.

FEMA may reimburse a reasonable cost to remove, transport, dispose of, and fill the hole from a stump of **more than 24 inches in diameter** if:

- The applicant and State agree the tree or stump is hazardous according to the above definition;
- Generally, FEMA approved the removal in advance; and

- A Hazardous Stump Worksheet is completed and submitted for FEMA approval. A copy of the Hazardous Stump Worksheet may be found in Appendix G, *FEMA DAP9523.11, Hazardous Stump Extraction and Removal Eligibility*.

In some instances, grinding of an uprooted stump and filling the resulting cavity may cost less than a complete extraction. In these cases, the applicant should present the cost comparison documentation to FEMA for consideration; however, the stump must have already been determined eligible for removal according to the above criteria.

Stumps measuring **24 inches in diameter or less** do not require special equipment for removal; therefore, reimbursement will be based on the reasonable unit cost per cubic yard, using the Stump Conversion Table found in Appendix G, *FEMA DAP9523.11, Hazardous Stump Extraction and Removal Eligibility*. The unit price for stump removal includes the extraction, transport, and disposal of the stump as well as filling the cavity that remains.

FEMA will reimburse the applicant at the unit cost rate (usually cubic yards) for normal debris removal for all stumps, regardless of size, placed on the public rights-of-way by others, i.e., contractors did not extract them from public property or property of eligible PNP organizations. In such instances, applicants do not incur additional costs to remove these stumps; the same equipment used to pick up vegetative debris can be used to pick up these stumps.

See Appendix G, *FEMA DAP9523.11, Hazardous Stump Extraction and Removal Eligibility* for more information on hazardous stumps.

### ***Construction and Demolition Debris***

The definition of construction and demolition debris may vary between States. Construction and demolition debris can be defined as damaged components of buildings and structures such as lumber and wood, gypsum wallboard, glass, metal, roofing material, tile, carpeting and floor coverings, window coverings, pipe, concrete, fully cured asphalt, equipment, furnishings, and fixtures. To be eligible, construction and demolition debris must be a result of a Federally declared disaster.

Certain types of construction and demolition debris are reusable or recyclable. To conserve landfill space, it is prudent to separate materials for reuse or recycling.

Some construction and demolition debris may be hazardous, such as asbestos roofing and floor tile, and lead pipes. Public Assistance grant eligibility is subject to all other Federal laws and regulations, including environmental and hazardous waste ordinances. Documentation of the debris origin, any processing (reduction or recycling), and the final disposition is required for Public Assistance grant consideration.

Figure 3.2 - Construction and Demolition Debris

Typically, removal of construction by-products generated by repairs or rebuilding is covered by insurance policies or included in the overall cost for reconstruction projects; therefore, it is not eligible for Public Assistance grant funding as emergency work under debris removal. It may, however, be reimbursed as part of the permanent work for the reconstruction of an eligible project.

### ***Hazardous Waste***

Hazardous waste is waste with properties that make it potentially harmful to human health or the environment. Hazardous waste is regulated under RCRA. In regulatory terms, a RCRA hazardous waste is a waste that appears on one of the four hazardous waste lists or exhibits at least one of the following four characteristics: ignitability, corrosivity, reactivity, or toxicity.

Public Assistance grant funding may be available for measures that address widespread hazardous materials contamination. The measures may include retrieval and proper disposal of orphan drums, pumping water contaminated with hazardous materials, control or stabilization of oil or other hazardous material releases, and cleanup and disposal of hazardous materials. Certified hazardous waste technicians should handle, capture, recycle, reuse, and dispose of hazardous waste. The applicant must comply with Federal, State, and local environmental requirements for handling hazardous waste.

Public Assistance grant funding is not available to test for mold or contaminants in water, air, or soil for the purposes of long-term cleanup actions. FEMA and EPA determine the specific activities that may be funded under the Public Assistance Program and those activities that are under the authority of EPA.

Figure 3.3 - Hazardous Waste

**Household Hazardous Waste (HHW)** refers to hazardous products and materials that are used and disposed of by residential, rather than commercial or industrial consumers. HHW includes some paints, stains, varnishes, solvents, pesticides, and other products or materials containing volatile chemicals that catch fire, react, or explode under certain circumstances, or that are corrosive or toxic.

**Electronic waste**, or e-waste, refers to electronics that contain hazardous materials such as cathode ray tubes. Examples include computer monitors and televisions.

### ***White Goods***

White goods are defined as discarded household appliances such as refrigerators, freezers, air conditioners, heat pumps, ovens, ranges, washing machines, clothes dryers, and water heaters.

Many white goods contain ozone-depleting refrigerants, mercury, or compressor oils. The Clean Air Act prohibits the release of refrigerants into the atmosphere, and requires that certified technicians extract refrigerants from white goods before they are disposed of or recycled. Some States also require certified technicians to extract compressor oils before disposing of or recycling white goods. Applicants should follow all Federal, State, and local requirements concerning ozone-depleting refrigerants, mercury, or oils. Documentation of proper disposal may be required for Public Assistance grant consideration.

Figure 3.4 - White Goods Stockpiled for Processing

### ***Soil, Mud, and Sand***

Floods, landslides, and storm surges often deposit soil, mud, and sand on improved public property and public rights-of-way. Facilities commonly impacted by this type of debris may include streets, sidewalks, storm and sanitary sewers, water treatment facilities, drainage canals and basins, parks, and swimming pools.

The removal of this type of debris from improved public property and public rights-of-way may be eligible for Public Assistance grant funding. For instance, removing soil, mud, and sand from a roadway or sidewalk, or clearing out mud and sand from sewer lines, may be eligible for Public Assistance grant funding if it is the legal responsibility of an eligible applicant. Natural streams and unimproved property are not considered eligible facilities.

The amount of Public Assistance grant funding for removal of soil, mud, and sand is based on the quantity that was deposited due to the disaster. In order to determine the disaster-related debris quantities, the applicant should provide regularly scheduled maintenance reports that indicate the pre-disaster soil, mud, and sand levels. Maintenance reports are commonly requested for soil, mud, and sand removal from sewers, water treatment facilities, and drainage channels.

The applicant is responsible for identifying the damage incurred due to the disaster. Public Assistance grants do not provide funds for random surveys to look for damage, such as TV inspection of sewer lines. However, if disaster-related damage is evident, a Public Assistance grant may cover inspections to determine the extent of the damage and method of repair.

Drainage channels and canals may be an element of a flood control work or water control facility. These types of facilities are often under the jurisdiction of the United States Army Corps of Engineers (USACE) or the Natural Resources Conservation Service (NRCS). If a flood control work or water control facility falls under another Federal jurisdiction, it is generally not eligible for Public Assistance grant funding. For additional information regarding USACE and NRCS facility eligibility, refer to Appendix G, *FEMA RP9524.3, Policy for Rehabilitation Assistance for Levees and Other Flood Control Works - Decision Tree*.

### ***Vehicles and Vessels***

For the removal of vehicles and vessels to be eligible, the applicant must demonstrate that:

- The vehicle or vessel presents a hazard or immediate threat that blocks ingress/egress in a public-use area;
- The vehicle or vessel is abandoned, e.g. the vehicle or vessel is not on the owner's property and ownership is undetermined;
- The applicant followed local ordinances and State law by securing ownership; and
- The applicant verified chain of custody, transport, and disposal of the vehicle or vessel.

All supporting documentation relating to removal of abandoned vehicles and vessels must be submitted to FEMA for Public Assistance grant consideration. For navigational vessels, applicants must follow their hazard abatement laws, coordinate with the requirements of the marine and harbor patrol agencies, and comply with local laws governing navigational vessels.

It is important for the applicant to follow its normal written procedures regardless of the circumstances. Any duplication of benefits issues should be addressed.

### ***Putrescent Debris***

Putrescent debris is any debris that will decompose or rot, such as animal carcasses and other fleshy organic matter. The cost of putrescent debris collection and disposal may be eligible. Disposal of putrescent debris must be in compliance with applicable Federal, State, and local requirements to be eligible for Public Assistance grant funding. NRCS has developed specific disposal guidelines for animal carcasses.

### ***Infectious Waste***

Infectious waste is waste capable of causing infections in humans, including contaminated animal waste, human blood and blood products, isolation waste, pathological waste, and discarded sharps (needles, scalpels, or broken medical instruments).

Clearance, removal, and disposal of infectious waste may be the authority of another Federal agency. Upon review of applicable Federal statutes, regulations, and policies governing infectious waste, FEMA will determine eligibility on a case-by-case basis and may develop disaster-specific guidance when appropriate.

### ***Chemical, Biological, Radiological, and Nuclear-Contaminated Debris***

Chemical, Biological, Radiological, and Nuclear (CBRN)-contaminated debris is debris contaminated by chemical, biological, radiological, or nuclear materials as a result of a natural or man-made disaster, such as a Weapon of Mass Destruction (WMD) event. Eligibility determinations on the clearance, removal, and disposal of CBRN-contaminated debris will be made by FEMA based on applicable Federal statutes, regulations, policies, and other guidance documents. Depending on the nature of the disaster and the debris it generates, FEMA may develop additional or disaster-specific eligibility guidance.

### ***Garbage***

Garbage is waste that is regularly picked up by an applicant. Common examples of garbage are food, packaging, plastics, and papers. In general, household food wastes can be collected through normal municipal waste collection methods and are not eligible.

## **Monitoring Debris Removal Operations**

Eligible applicants are required to monitor debris removal operations in order to document eligible quantities and reasonable expenses to ensure that the work is eligible for Public Assistance grant funding. Failure to do so properly may jeopardize funding.

In Federally declared disasters, FEMA personnel periodically validate the applicant's monitoring efforts to ensure eligible debris is being removed and processed efficiently. **Debris monitoring is primarily the responsibility of the applicant.** Applicants may use force account resources, temporary hires, and/or contractors to accomplish the monitoring.

Reasonable costs for applicant debris monitors with appropriate qualifications may be eligible. It is not necessary to have professional engineers and other certified professionals perform debris monitoring duties. In addition to the costs for the monitors, the applicant may claim as part of its monitoring activities reasonable costs for the provision of training, oversight, and data compilation to verify debris removal costs as required by the monitoring operation.

Overhead costs for architectural and engineering service are not eligible. Costs associated with attending meetings with FEMA or the State and costs associated with the administration of project worksheets are funded through the administrative allowance as stated in 44 CFR Part 206.228 and cannot be a direct charge to a Public Assistance grant.

Additional guidance on monitoring debris removal operations is located in Appendix G, *FEMA DAP9580.203, Fact Sheet: Debris Monitoring*.

## **Disposal**

Landfill tipping fees usually include fixed and variable costs along with some special taxes or fees assessed by the jurisdiction. Examples of variable costs include costs for labor, supplies, maintenance, utilities, and gas or recovery systems. Fixed costs generally include equipment, construction, permits, landfill closure, post closure, and amortized costs for ancillary landfill building structures.

Eligible landfill costs are limited to the variable and fixed costs that are directly related to landfill operations. Jurisdictions may incorporate special taxes or fees into the landfill tipping fee to fund government services or public infrastructure. When tipping fees include such costs, those costs are not eligible for Public Assistance grant funding.

## Chapter 4 – Private Property Debris Removal and Demolition of Private Structures

### Chapter Highlights

#### Private Property Debris Removal

- Approval for FEMA Assistance
- Documentation for PPDR
- Types of Eligible PPDR Work

#### Demolition of Private Structures

- Eligible Demolition Costs
- Documentation for Demolition

#### Commercial Property

#### Duplication of Benefits for PPDR and Demolition

*The FEMA policies on debris removal from private property and demolition of private structures can be found in Appendix G.*

### Private Property Debris Removal

Private property debris removal (PPDR) is generally not eligible for reimbursement under the Public Assistance Program because debris on private property does not typically present an immediate health and safety threat to the general public. Also, debris removal from private property is generally the responsibility of individual private property owners, and other sources of funding, such as insurance, are commonly available to property owners to cover the cost of work. However, if private property owners move disaster-generated debris to the public right-of-way, the costs associated with removing this debris from the right-of-way may be eligible under the Public Assistance Program.

When large-scale disaster events cause mass destruction and generate large quantities of debris over vast areas, debris on private property may sometimes pose health and safety threats to the public-at-large. If private property owners are not available because they have evacuated, the State or local government may need to enter private property to remove debris considered to be an immediate threat to the lives, health, and safety of its residents. In such situations, the Federal Coordinating Officer (FCO) is authorized to approve the provision of Public Assistance for the removal of debris from private property when it is considered to be in the public interest. The section below describes the process through which applicants may obtain approval for Public Assistance funding for the costs of performing PPDR.

### **Approval for FEMA Assistance**

FEMA will work with States affected by large-scale disasters to designate those areas where the debris is so widespread that removal of debris from private property is in the public interest on a case-by-case basis. Any applicant that intends to seek reimbursement to remove debris from private property within those designated areas will, prior to commencement of work, submit a written request to the FCO seeking approval for reimbursement. The applicant must provide documentation confirming that an immediate threat to the public exists as well as evidence of its legal responsibility to enter private property to eliminate the threat posed by the debris. Specifically, this includes:

#### **Immediate Threat Determination**

The applicant must provide documentation from the applicant's public health authority or other public entity with legal authority stating that disaster-generated debris on private property in the designated area constitutes an immediate threat to life, public health, and safety.

The applicant may also provide documentation stating that the debris poses an immediate threat to improved property and that its removal is cost effective. The cost to remove the debris should be less than the cost of the potential damage to the improved property in order for the debris removal to be eligible.

#### **Documentation of Legal Responsibility**

The applicant must demonstrate its authority and legal responsibility to enter private property to remove debris. The legal basis for this responsibility must be established by law, ordinance, or code at the time of the disaster and must be relevant to the post-disaster condition representing an immediate threat to life, public health, and safety, and not merely define the applicant's uniform level of services. Typically, solid waste disposal ordinances are considered part of an applicant's uniform level of services.

Applicants ordinarily rely on condemnation and/or nuisance abatement authorities to obtain legal responsibility prior to the commencement of debris removal work. There may be circumstances where the applicant determines that ordinary condemnation and/or nuisance abatement procedures are too time consuming to address an immediate public health and safety threat. Applicants do not have to precisely follow their nuisance abatement procedures, or other ordinances, that would prevent the applicant from taking emergency protective measures to protect public health and safety.

In addition to providing documentation detailing an applicant's immediate threat determination and legal responsibility to remove debris from private property, the applicant must confirm that a legally authorized official has ordered the exercise of public authority to enter private property to perform PPDR. The applicant must also submit in its request

indemnification to the Federal government and its employees, agents, and contractors from any claims arising from the removal of debris from private property.

The FCO will approve or disapprove in writing each applicant's request for Public Assistance to perform PPDR. If approval is granted, applicants should immediately begin identifying properties for PPDR work and establishing specific scopes of work on each of these properties.

Additional information on the applicant approval process for PPDR may be found in Appendix G, *FEMA DAP9523.13, Debris Removal from Private Property*.

### **Documentation for PPDR**

If PPDR is authorized and considered for Public Assistance grant funding, applicants are required to properly document all legal processes used to gain access to private property, as well as document applicable scopes of work, and compliance with Federal, State, and local environmental and historic preservation review requirements. Applicants should work with the Public Assistance staff prior to the commencement of any PPDR work to ensure that all legal, environmental, historic, and scope of work considerations are addressed.

The following documents are necessary for Public Assistance funding for PPDR work:

1. **Right-of-Entry.** A right-of-entry signed by the property owner should include a hold harmless agreement and indemnification applicable to the project's scope-of-work. FEMA's Office of Chief Counsel (OCC) should review the right-of-entry form and the language of the hold harmless agreement and indemnification. The right-of-entry form may also include space for the private property owner's insurance information (policy number) for verification purposes, if applicable.
2. **Photos** are strongly encouraged to show the condition of the property prior to the beginning of the work. Generally, pictures are used to confirm the address and identified scope-of-work on the property.
3. A **PPDR Assessment** is a property-specific assessment which establishes the scope of eligible work. This may be a map which serves as a guide indicating the location of the eligible items of work that present an immediate threat relative to improved property or ingress and egress routes. These maps may incorporate symbols and a legend to identify structures, property lines, and eligible items of work. This assessment may also be a work order or may be covered in the right-of-entry form, as long as the scope of work can be clearly identified.

4. **Documentation of Environmental and Historic Review.** Debris removal work from private property must satisfy compliance review requirements as established by 44 CFR Parts 9 and 10 and all other applicable Federal environmental and historic preservation requirements.

Additional documentation may be required by Public Assistance staff on a case-by-case basis to demonstrate eligible work performed and compliance with applicable Federal, State, and local laws and regulations.

### ***Types of Eligible PPDR Work***

**Eligible** debris removal work from private property includes removal of:

- Large piles of disaster-generated debris in the living, recreational, and working areas of properties in urban, suburban, and rural areas, including large lots.
- Disaster-generated debris obstructing primary ingress and egress routes to improved property.
- Disaster-damaged limbs and leaning trees in danger of falling on improved property, primary ingress or egress routes, or public rights-of-way.
  - Hazardous tree removal is eligible only if the tree is greater than six inches in diameter (measured at diameter breast height) and:
    - has more than 50% of the crown damaged or destroyed, or;
    - has split trunk or broken branches that expose heartwood, or; the tree itself is leaning at an angle greater than 30 degrees and shows evidence of ground disturbance.
  - Hazardous limb removal is eligible only if the limb is greater than two inches in diameter measured at the point of break.
- Debris created by the removal of damaged interior and exterior materials from improved property.
- Household hazardous wastes (such as household cleaning supplies, insecticides, herbicides, etc.)
- Disaster-generated debris on private roads and streets of a gated community, provided that the removal of the debris has become the legal responsibility of an eligible applicant.

**Ineligible** debris removal work on private property includes the removal of:

- Debris from vacant lots, forests, heavily wooded areas, unimproved property, and unused areas.
- Debris on agricultural lands used for crops or livestock.
- Concrete slabs or foundations-on-grade.
- Reconstruction debris consisting of materials used in the reconstruction of disaster-damaged improved property.

## **Demolition of Private Structures**

State and local governments may need to enter private property to demolish private structures made unsafe by disasters to eliminate immediate threats to life, public health, and safety. In some cases, the costs of performing demolition of private structures may be eligible for Public Assistance grant funding. Typically, the demolition of private structures to eliminate immediate threats is authorized under Section 403(a)(3)(E) of the Stafford Act.

FEMA will consider alternative measures to eliminate threats to life, public health, and safety posed by disaster-damaged unsafe structures, including fencing off unsafe structures and restricting access, when evaluating requests for Public Assistance grant funding for demolition work. The Public Assistance staff must also concur that the demolition of unsafe structures and removal of demolition debris are in the public interest.

The demolition of unsafe privately owned structures and subsequent removal of demolition debris may be eligible when the following conditions are met:

- The structures were damaged and made unsafe by the declared disaster, and are located in the area of the disaster declaration;
- The applicant certifies that the structures are determined to be unsafe and pose an immediate threat to the public. An unsafe structure is a non-commercial or non-industrial structure that threatens the life, health or safety of the public because the structure is so damaged or structurally unsafe that partial or complete collapse is imminent. This certification may be made by the State or local government's building inspector and may be based on a structural assessment in accordance with local ordinances and building codes;
- The applicant has demonstrated that it has legal responsibility to perform the demolition. Similar to private property debris removal, the applicant must demonstrate its authority and legal responsibility to enter private property to perform demolition of unsafe structures. The legal basis for this responsibility must be established by law, ordinance, or code at the time of the disaster and must be relevant to the post-disaster

condition representing an immediate threat to life, public health, and safety, and not merely define the applicant’s uniform level of services;

- A legally authorized official has ordered the demolition of unsafe structures and removal of demolition debris;
- The applicant has indemnified the Federal government and its employees, agents, and contractors from any claims arising from the demolition work; and
- The demolition work is completed within the completion deadlines outlined in 44 CFR §206.204 for emergency work.

Additional information on the general eligibility of demolition of private structures may be found in Appendix G, *FEMA DAP9523.4, Demolition of Private Structures*.

### ***Eligible Demolition Costs***

**Eligible** costs associated with the demolition of private structures may include, but are not limited to:

- capping wells;
- pumping and capping septic tanks;
- filling in basements and swimming pools;
- testing and removing hazardous materials from unsafe structures including asbestos and household hazardous wastes;
- securing utilities (electric, phone, water, sewer, etc.);
- securing permits, licenses, and title searches. Fees for permits, licenses, and titles issued directly by the applicant are not eligible unless it can be demonstrated that the fees are above and beyond administrative costs; and/or
- demolition of disaster-damaged outbuildings such as garages, sheds, and workshops determined to be unsafe.

**Ineligible** costs associated with the demolition of private structures include:

- removal of slabs or foundations, except in very unusual circumstances, such as when disaster-related erosion under slabs on a hillside causes an immediate public health and safety threat; and/or
- removal of pads and driveways.

Structures condemned as safety hazards before the disaster are not eligible for demolition and subsequent demolition debris removal under Public Assistance grant authority.

Individuals and private organizations (except for eligible PNPs) will not be reimbursed for demolition activities on their own properties under the Public Assistance Program.

### ***Documentation for Demolition***

In order to receive reimbursement of eligible demolition costs, applicants should provide documentation of applicable legal processes and scopes of work performed, similar to the private property debris removal process described above. Specifically, this includes:

- Rights-of-entries;
- Photos of the structures;
- Structural assessments, or other certifications that the structures are determined to be unsafe or pose an immediate threat to the public, based on local ordinances or building codes;
- Notices of demolition; and
- Documentation of environmental and historic review.

All documentation should be consistent with the requirements of applicable Federal, State, and local laws and regulations governing demolition of private structures. Similar to PPDR work, additional documentation may be required by Public Assistance staff on a case-by-case basis to demonstrate eligible work performed and compliance with applicable Federal, State, and local laws and regulations.

### **Commercial Property**

The removal of debris from commercial property and the demolition of commercial structures are generally not eligible for Public Assistance grant funding. It is assumed and expected that these commercial enterprises retain insurance that can and will cover the cost of debris removal and/or demolition. However, in some cases as determined by the FCO, the removal of debris from private commercial property and/or the demolition of private commercial structures by a State or local government may be eligible for FEMA reimbursement only when such removal is in the public interest.

Industrial parks, private golf courses, commercial cemeteries, apartments, condominiums, and mobile homes in commercial trailer parks are generally considered commercial property.

### **Duplication of Benefits for PPDR and Demolition**

FEMA is prohibited from approving funds for work that is covered by any other source of funding. Therefore, State and local governments must take reasonable steps to prevent such an occurrence, and verify that insurance coverage or any other source of funding does not exist for

PPDR work and the demolition of private structures. Typically, the rights-of-entries used for PPDR and demolition of private structure have a clause that states that a private property owner will re-pay an applicant the amount of insurance proceeds received for any PPDR or demolition work performed. The right-of-entry form being used by the applicant may also include space for the private property owner to list insurance information (policy number) for verification purposes.

When PPDR and demolition of private structures is covered by an insurance policy, the insurance proceeds must be used as the first source of funding. Public Assistance grant funding may be eligible for the remainder of the cost of the eligible work after insurance proceeds are recouped from the property owner. If it is discovered that a duplication of benefits has occurred, FEMA will de-obligate funds from the Grantee in the amount that such assistance duplicates funding the property owners received from other sources.

---

**PART II – DEBRIS MANAGEMENT PLANNING  
CONCEPTS**

---

## Part II – Debris Management Planning Concepts

### Introduction

Applicants are encouraged to review their community's vulnerability to a disaster and to consider their response and recovery activities, specifically in handling debris issues.

Debris removal operations can be time-consuming and costly. Over the last five years, debris removal operations accounted for approximately 27 percent of the disaster recovery costs. FEMA urges applicants to develop a debris management plan that considers large-scale debris removal and disposal operations. By developing a debris management plan, communities will be better prepared to address disaster-related debris in a time-efficient manner, expediting the recovery process. Additionally, a sound and properly executed debris management plan may better position an applicant for Public Assistance grant assistance.

Part II, Debris Management Planning Concepts, provides applicants with guidance in planning, organizing, mobilizing, and controlling a debris removal and disposal operation. Chapter 5, *Applicant Roles and Responsibilities*, outlines the staff who will develop a debris management plan. The remaining chapters of Part II describe the major elements of a debris management plan, the considerations applicants need to address, and information that may be required for Public Assistance grant assistance consideration.

Helpful tools within these chapters include the "Questions to Consider" and "To Do Checklist" at the end of the chapters. The "Questions to Consider" are intended to assist the planning team in applying the information within each chapter to the specific needs of their jurisdiction. The "To Do Checklist" is provided as a reminder of important issues and considerations to include within the debris management plan.

It is important to note that all or portions of Part II may be used depending on the size of the debris removal operation. The "Questions to Consider" at the end of each chapter may be used to help determine if a specific debris planning element is applicable for the specific jurisdiction.

## Chapter 5 – Applicant Roles and Responsibilities

### Chapter Highlights

Debris Management Staff Organization and Structure  
Debris Management Staff Responsibilities

- Debris Project Manager
- Debris Management Planning Sections

Questions to Consider  
To Do Checklist

The success of a debris management plan is dependent upon the commitment of an applicant to researching, planning, implementing, and evaluating the plan effectively and efficiently. Proper planning by management and employee training provides an applicant with a foundation for a quick and successful recovery.

The following text discusses the personnel that are necessary to plan and develop the debris management plan. A sample outline for a debris management plan is supplied for use and reference in Appendix A, *Debris Management Plan Outline*. During a disaster event, the same staff members would be expected to implement the plan. The organization of departments and management staff may vary between applicants, but roles and tasks do not change.

### Debris Management Staff Organization and Structure

The size and composition of a staff organized to manage debris clearance, removal, and disposal issues depends on the magnitude of the disaster and the size of the jurisdiction. A pre-disaster debris planning staff may be quite small; however, following a major disaster, additional staff members may be required.

Successful debris operations require collaborative efforts between departments within the applicant and with specific external agencies that have regulatory authority over debris operations. It is essential that prospective staff members have as much training as possible and interface with other agencies responsible for debris clearance, removal, and disposal activities, such as the National Guard, the State department of transportation, the State police, and the State emergency management office, prior to any event.

To implement debris operations quickly, it is important for emergency response and recovery personnel to have a clear understanding of how their normal job responsibilities and functions apply to debris operations. The applicant's debris planning staff should be comprised of full-time personnel supplemented with personnel from other staffs and agencies. The planning process should include a review of individual departmental functions and responsibilities for implementing debris operations.

Immediately following a disaster event, the planning process should establish a disaster debris management team, which convenes as a working group to facilitate successful coordination following a disaster event. Team members should consist of personnel from departments within the applicant and representatives from external agencies, such as regional waste management, joint power authorities, sanitation districts, State and Federal environmental offices, and other agencies which have shared responsibilities for solid waste issues. Each member of the team is responsible for implementing debris operations in accordance with the planned goals and objectives, and in compliance with Federal, State, and local laws.

## **Debris Management Staff Responsibilities**

No two jurisdictions have the same department or section designations; therefore, this document refers to each department or section according to its function rather than a specific department designation. The following discussion gives the function of each department and a brief description of the tasks each performs in developing the debris management plan

Each department is responsible for specific elements of the debris management plan. Those general duties are explained in the remainder of this chapter. Department responsibilities often overlap, making coordination and communication critical to the success of the debris management plan. In many instances, a particular department is involved in numerous elements of the debris management plan.

These overlapping responsibilities illustrate the need for one primary coordinator or Debris Project Manager. The Debris Project Manager's role and responsibilities are paramount in coordinating efforts and ensuring communication between planning and implementation sections.

### ***Debris Project Manager***

The primary decision maker is the Debris Project Manager. The Debris Project Manager should be knowledgeable of the applicant's processes, procedures, personnel, resources, and limitations. It is important for the Debris Project Manager to keep communication and coordination efforts between departments a priority.

The Debris Project Manager has overall responsibility for the operations, planning, logistics, and cost of the debris management operations. The Debris Project Manager assigns tasks to team members and tracks the completion of tasks to ensure quick implementation of the debris removal operations.

## ***Debris Management Planning Sections***

### **Administration**

The Administration department typically includes the finance, personnel, and public information sections within a governing body. It is important for this department to establish a records management system in order to collect and keep all the documentation that may be required for the Public Assistance grants. Documentation may include, but is not limited to:

- Personnel policies.
- Labor and equipment timesheets and summaries.
- Safety procedures.
- Contract procurement procedures.
- Contracts.
- Billing and invoices, including debris hauler load tickets.
- Environmental permits.
- Right of entry and hold harmless agreements for private property debris removal and demolition, when applicable.
- Public information announcements.
- Debris salvage value information.

The finance section is usually responsible for developing an emergency response and recovery budget, tracking expenses, and ensuring funds are available for personnel, equipment, supplies, and contract service costs.

The Administration department should include a public information officer to distribute information and educate citizens about the debris operations. Planning components of the public information strategy should include the use of various types of information vehicles (print, radio, internet, etc.) and the pre-scripted information that will be distributed concerning topics such as:

- Debris pick-up schedules.
- Disposal methods and ongoing actions to comply with Federal, State, and local environmental regulations.
- Disposal procedures for self-help and independent contractors.
- Restrictions and penalties for creating illegal dumps.

- Curbside debris segregation instructions.
- Public drop-off locations for all debris types.
- Process for answering the public’s questions concerning debris removal.

Chapter 14, *Public Information Strategy* further discusses the types of information and how it may be distributed.

## **Contracting and Procurement**

The primary role of the Contracting and Procurement department is to have debris contracts in draft form ready for advertisement or have pre-qualified contractors in place prior to the event. This portion of the plan needs to be updated as the jurisdiction’s procurement procedures and contracts may expire and change over time. Contracting and Procurement planning includes the following tasks:

- Develop contract requirements.
- Establish contractor qualifications.
- Distribute instructions to bidders.
- Advertise bids.
- Establish a pre-disaster list of pre-qualified contractors.
- Manage the contract scope of work.
- Establish a post-disaster contracting procedure if necessary.

## **Legal**

The applicant’s Legal staff leads the review process for all legal matters in the debris management planning process. In addition to advising the debris management planning staff, the following tasks should also be performed by the legal department:

- Review all contracts.
- Review and/or establish a land acquisition process for temporary debris management sites.
- Review all insurance policies.
- Ensure environmental and historic preservation compliance before, during, and after operations.
- Ensure that site restoration and closure requirements are fulfilled.
- Review and/or establish a building condemnation processes.

- Review and/or establish a legal process for private property demolition and debris removal.
- Review right-of-entry and hold harmless agreements.

## **Operations**

The Operations staff is responsible for the supervision of government and contract resources and overall project implementation. The Operations department is responsible for implementing the entire debris removal operation. Planning tasks include:

- Position equipment and resources for the response and recovery debris removal operations.
- Develop staff schedules and strategies.
- Provide communication, facilities, services, equipment, and materials to support the response and recovery activities.
- Monitor and direct force account and contract labor.
- Distribute response and recovery resources.
- Operate and manage the collection, debris management site, and disposal strategies.
- Create a demolition strategy for structures, if necessary.
- Report progress for distribution to the debris management planning staff.

## **Engineering/Planning**

The Engineering staff supports all other debris management sections in a technical role. The Engineering department provides debris quantity assumptions, economic analysis, and feasible solutions for the debris operations. The following are tasks that may be completed by the Engineering staff:

- Forecast debris volume based on assumed disaster type.
- Develop an estimating strategy for post-disaster debris quantities.
- Strategize and map debris haul routes.
- Select debris management sites and design the site layout.
- Determine reduction and recycling means and methods.
- Identify and coordinate environmental issues.
- Assess available landfill space and determine if additional space is needed.
- Develop the debris collection strategy.
- Write contract scopes of work, conditions, and specifications.

- Coordinate with other local and State jurisdictions for road clearance and operations.
  - Establish a process for building damage assessment and condemnation (including public and private properties).
  - Issue permits.
- 

## Questions to Consider

1. What departments within your agency are responsible for:
  - Debris removal?
  - Solid waste removal?
  - Demolition?
  - Public information?
  - Contract services?
2. What departments within your agency should participate in the development of a debris management plan?
3. Who will be the Debris Project Manager for your jurisdiction?
4. What staff positions within your agency or department should be designated to coordinate State and Federal assistance for debris management activities?
5. What local ordinances that have been adopted in your community apply to debris management activities?
6. What Federal and State environmental regulations apply to debris removal activities?
7. Which staff member will be responsible for coordinating efforts with FEMA and the State during a Presidentially declared disaster?

## To Do Checklist

1. Assign management personnel to a debris management team for planning and implementation of the debris management plan. Assignments include management and planners for:
  - Administration
  - Contracting/Procurement
  - Legal
  - Operations
  - Engineering/Planning
2. Establish an organization chart with names and contact numbers for distribution to the planning staff.
3. Assign a primary coordinator, and additional staff if necessary, to coordinate State and Federal assistance for debris management activities.
4. Assemble any local ordinances that have been adopted in the jurisdiction that apply to debris management activities.

## Chapter 6 – Debris Forecasting for a Design Event

### Chapter Highlights

- Design Disaster Event
- Disaster Characteristics
- Land Use and Geography
- Forecasting Methods
  - Buildings
  - Vegetation
  - Volume – Weight Conversion Factors
  - Other Forecasting Methods
- Questions to Consider
- To Do Checklist

Please see Chapter 1, *Public Assistance Debris Removal Eligibility*, and Chapter 3, *Debris Removal from Public Property*, for eligibility issues to consider in developing the debris management plan.

Quantifying the amount of debris after the disaster is known as “estimating.” Predicting the amount and type of debris prior to a disaster event is known as “forecasting.”

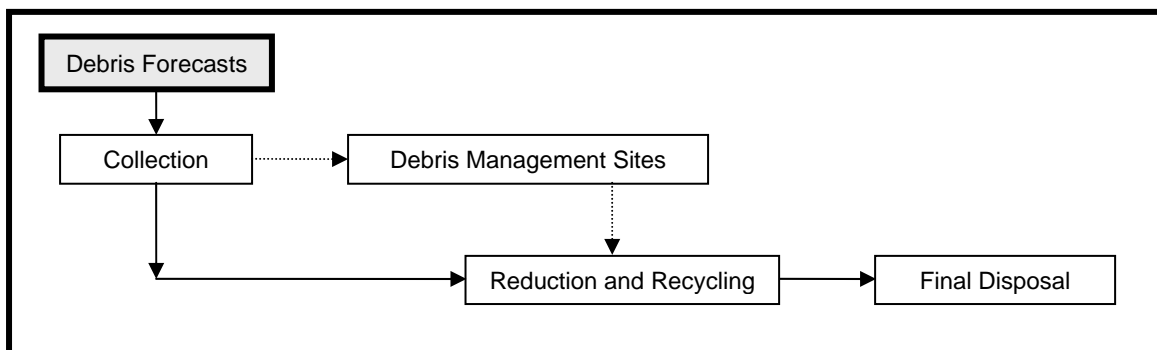

Figure 6.1 – Debris Management Forecasting Component

Forecasting the type and quantity of debris begins the debris planning process. By forecasting the type and quantity of debris, the planning staff can better define the scope of work of the debris management operations. Debris forecasts can be used to determine the required response and recovery resources, the number and size of storage and reduction sites, and the final disposition of the disaster-related debris.

Staff can reasonably forecast debris by becoming familiar with the impacts that result from various types of disasters. Realistic debris forecasts depend on the type and size of disaster an applicant anticipates their community will encounter.

## **Design Disaster Event**

The type of disaster and the debris that is generated may be similar for an entire region of the country, but the size and extent of the affected areas is specific to an applicant's jurisdiction. The more information gathered during the planning process, the more realistic the projected debris quantities will be for future disasters. For planning purposes, an applicant should consider a "design event" to calculate and forecast the amount of debris that will be generated. Planning staff needs to determine the size and extent of a potential disaster.

Historical data is most often used to determine the design event for hurricanes, tornadoes, ice storms, wildfires, and floods. The design disaster event must be within reason and take into account historic events and any additional altered criteria that may affect the disaster scenario. For example, a flood event may not impact as many single-family homes as a previous event, due to a change in a river channel or revised zoning laws that prohibit building in a flood-prone area.

Earthquake design events should be analyzed for reasonableness and practicality. For instance, an applicant may only need to plan with the assumption that a portion of its structures will be damaged or destroyed during a disaster event, rather than all of its structures, if more stringent seismic building codes and better construction practices have been adopted since a previous event of the same nature.

Terrorist events have limited historical data; information from natural disasters and/or analyzing vulnerabilities of a particular applicant's jurisdiction may provide useful insight into the challenges an applicant could anticipate.

## **Disaster Characteristics**

The following are general descriptions of natural and manmade disasters and the associated debris that each generates.

### **Hurricanes and Typhoons**

The terms "hurricane" and "typhoon" are two regional names for the same phenomenon. The damaging forces of hurricanes and tropical storms include high velocity winds (up to 150 miles per hour or higher in gusts), storm surge, and wave action. The most severe damage frequently occurs in the shore lands adjacent to the ocean. The resultant debris consists primarily of vegetative matter, construction materials from damaged or destroyed structures, personal property, marine vessels, and sediment. The greatest concentration of debris is located along the shoreline. Flooding and tornadoes spawned by hurricanes can cause damage and leave extensive amounts of natural and manmade debris far inland.

It is important to consider the mix of debris that may be generated, though there is no standard composition data that can be applied for all hurricanes. For example, the composition of debris from Hurricane Andrew (1992) in Florida was generally 30 percent clean, woody debris and 70 percent construction and demolition debris. After Hurricane Fran (1996) in North Carolina, the mix was exactly the opposite. Considering the land-use types and existing infrastructure (types of structures) will assist in making forecasts for planning purposes.

### **Tsunamis**

A tsunami is a wave train, or series of waves, generated in a body of water by an impulsive disturbance that vertically displaces the water. Earthquakes, landslides, volcanic eruptions, explosions, and even the impact of cosmic bodies, such as meteorites, can generate tsunamis. Tsunamis can savagely attack coastlines, causing devastating property damage and loss of life. They are capable of inundating and flooding areas hundreds of yards inland past the typical high water level. The fast-moving water associated with the inundating tsunami can crush homes and other coastal structures. Debris from tsunamis may consist of construction and demolition debris, vegetative debris, dead mammals, fish, and other marine forms. Tsunamis can be very deadly, and a community could expect to have a high loss of life.

### **Tornadoes**

Damage from tornadoes is caused by high-velocity rotating winds. The severity of the damage depends on the velocity of the tornado funnel and the length of time the funnel is on the ground. Damage is generally confined to a narrow path, which can be up to one-half mile wide and from 100 yards to several miles long. Tornado debris consists primarily of vegetative debris, construction materials from damaged or destroyed structures, and personal property.

### **Floods**

Severe rainstorms, hurricanes, tsunamis, or reservoir failure can cause flooding. Damage to structures from flooding is caused either by inundation or high-velocity water flow. Structural damage is usually limited to the floodway and the floodplain area immediately adjacent to the waterway. Heavy structural damage may result from high-velocity waters in mountainous areas or failure of a flood control project, such as a dam or levee. Flood debris may consist of sediment, wreckage, personal property, and sometimes hazardous materials deposited on public and private property. Additionally, heavy rains and floods may produce landslides; in such cases, debris consists primarily of soil, gravel, rock, and some construction materials.

## **Earthquakes**

Seismic forces along fault lines generate shock waves that cause ground shaking, surface ruptures, liquefaction, landslides, mudflows, and earth cracking. Damage may be localized at the epicenter or widespread across adjoining areas. Secondary effects of earthquakes such as aftershocks, fires, explosions, and landslides cause further damage. Debris from an earthquake generally consists of damaged personal property, structural building materials, charred material, concrete, and asphalt.

## **Fires**

Wildfires or urban fires can destroy or partially damage building structures, vehicles, public infrastructure, and vegetation. The loss of vegetative growth on hillsides may result in mudslides and subsequently cause further structural damage. Debris from fires consists of burnt personal property, burnt metals, charred wood, ash, asbestos, and other hazardous wastes.

## **Ice Storms or Snowstorms**

Debris from ice storms or snowstorms consists of significant amounts of vegetative debris and overhead utility service components.

## **Acts of Terrorism**

Terrorism includes the unlawful use of force and violence against persons or property to intimidate or coerce a government, the civilian population, or any segment thereof, in furtherance of political or social objectives. Since terrorism is regarded as a criminal act, it involves coordination with law enforcement authorities, the coroner's office, and health officials before debris is handled or disposed.

Debris generated as a result of an act of terrorism is highly variable in both quantity and type, depending upon the specific means utilized by the terrorists. An act of terrorism could generate little to no debris at all, or could result in large quantities of multiple types of debris, potentially requiring highly specialized personnel, procedures, and equipment for its removal and disposal.

## Disaster Debris Streams

Typically, disasters generate a mix of different types of debris. Figure 6.2 summarizes the typical types of debris for each type of disaster.

|                    |                       | Typical Debris Streams |                                 |                                    |                 |                                 |             |                    |                      |            |
|--------------------|-----------------------|------------------------|---------------------------------|------------------------------------|-----------------|---------------------------------|-------------|--------------------|----------------------|------------|
|                    |                       | Vegetative             | Construction & Demolition (C&D) | Personal Property/ Household Items | Hazardous Waste | Household Hazardous Waste (HHW) | White Goods | Soil, Mud and Sand | Vehicles and Vessels | Putrescent |
| Types of Disasters | Hurricanes / Typhoons | X                      | X                               | X                                  | X               | X                               | X           | X                  | X                    | X          |
|                    | Tsunamis              | X                      | X                               | X                                  | X               | X                               | X           | X                  | X                    | X          |
|                    | Tornadoes             | X                      | X                               | X                                  | X               | X                               | X           |                    | X                    | X          |
|                    | Floods                | X                      | X                               | X                                  | X               | X                               | X           | X                  | X                    | X          |
|                    | Earthquakes           |                        | X                               | X                                  |                 | X                               | X           | X                  |                      |            |
|                    | Wildfires             | X                      |                                 | X                                  |                 | X                               | X           | X                  |                      |            |
|                    | Ice Storms            | X                      |                                 |                                    |                 | X                               |             |                    |                      |            |

Figure 6.2 – Typical Debris Streams for Different Types of Disasters

Different handling and disposal methods are required for particular debris types and impact the scope of work of the debris management plan. Managing debris containing hazardous, household hazardous, medical, and infectious materials requires various specialized handling and disposal methods. Planning Staff should consider the proper handling and disposal methods for each type of debris that could be generated during each design disaster event when preparing debris management plans. Refer to Chapter 3, *Debris Removal from Public Property*, for discussion on typical debris streams.

## Land Use and Geography

The planning staff should take into consideration land use, terrain, and accessibility of areas located within the applicant's geographic boundaries to determine the types of debris that will be generated and to establish effective debris collection programs.

Understanding the local land use provides information as to the types of debris that will be generated and offers insight as to the type of handling that would be necessary to safely manage the debris. For example, rural areas may have more vegetative debris; whereas, urban residential areas may have more construction and demolition debris. Industrial parks may have

special environmental concerns compared to park areas. Planning staff may find it useful to divide the jurisdiction into sectors in order to keep the forecasting manageable.

Evaluating accessibility and terrain of various locations within a jurisdiction is critical to determining the types of debris collection programs that should be undertaken. Remote areas may require the planners to safely store the debris until accessibility is established. Usually, finding debris contractors, recyclers, or disposal facilities in remote areas is a challenge. To promote expedient recovery efforts, planners should identify and maintain lists of available debris contractors, recyclers, and disposal facilities.

## **Forecasting Methods**

After the disaster parameters and geographic extent is established, specific debris volumes can be quantified by using historical information or forecasting models.

Historical records provide a basis for forecasting disaster-generated debris and can be used for planning purposes. Previous contracts for debris removal, recycling activities, volume-reduction processing, and landfill disposal records should be reviewed thoroughly to determine the quantity of disaster debris that was generated for a particular disaster event.

If previous disaster data is not available, assumptions may be made from neighboring jurisdictions' experience, or from USACE modeling. USACE emergency management staff has developed a modeling methodology designed to forecast potential amounts of hurricane-generated debris. Based on data from Hurricanes Frederic (1979), Hugo (1989) and Andrew (1992), the methodology has a predicted accuracy of plus/minus 30 percent. USACE mathematical modeling forecasts the quantity of debris specifically generated by hurricanes and is available in Appendix B, *USACE Hurricane Debris Estimating Model*.

### ***Buildings***

Several basic techniques have been established to forecast destroyed building debris quantities. These techniques can be used to forecast debris quantities prior to an event or estimate quantities after a disaster.

#### **Residential buildings**

A formula for estimating the debris quantities from a demolished single-family home and associated debris is:

$$L' \times W' \times S \times 0.20 \times VCM = \text{___ cubic yards of debris (cy)}$$

Where:

L = length of building in feet

W = width of building in feet

S = height of building expressed in stories

VCM = Vegetative Cover Multiplier

The vegetative cover multiplier is a measure of the amount of debris within a subdivision or neighborhood. The descriptions and multipliers are described as:

- **Light** (1.1 multiplier) includes new home developments where more ground is visible than trees. These areas will have sparse canopy cover.
- **Medium** (1.3 multiplier) generally has a uniform pattern of open space and tree canopy cover. This is the most common description for vegetative cover.
- **Heavy** (1.5 multiplier) is found in mature neighborhoods and woodlots where the ground or houses cannot be seen due to the tree canopy cover.

The table below can be used to forecast debris quantities for totally destroyed single-family, single-story homes in the applicable vegetative cover category.

| Typical House<br>(square feet) | Vegetative Cover Multiplier |                |                 |                |
|--------------------------------|-----------------------------|----------------|-----------------|----------------|
|                                | None                        | Light<br>(1.1) | Medium<br>(1.3) | Heavy<br>(1.5) |
| 1000 sf                        | 200 cy                      | 220 cy         | 260 cy          | 300 cy         |
| 1200 sf                        | 240 cy                      | 264 cy         | 312 cy          | 360 cy         |
| 1400 sf                        | 280 cy                      | 308 cy         | 364 cy          | 420 cy         |
| 1600 sf                        | 320 cy                      | 352 cy         | 416 cy          | 480 cy         |
| 1800 sf                        | 360 cy                      | 396 cy         | 468 cy          | 540 cy         |
| 2000 sf                        | 400 cy                      | 440 cy         | 520 cy          | 600 cy         |
| 2200 sf                        | 440 cy                      | 484 cy         | 572 cy          | 660 cy         |
| 2400 sf                        | 480 cy                      | 528 cy         | 624 cy          | 720 cy         |
| 2600 sf                        | 520 cy                      | 572 cy         | 676 cy          | 780 cy         |

Figure 6.3 – Debris Forecasting Table for Totally Destroyed Homes

The amount of personal property within an average flooded single-family home has been found to be:

- 25-30 cy for homes without a basement
- 45-50 cy for homes with a basement

Mobile homes have less wasted space due to their construction and use. The walls are narrower, and the units contain more storage space. Therefore, the typical mobile home generates more debris by volume than a single-family home. Historically, the volume of debris from mobile homes has been found to be:

- 290 cy of debris for a single-wide mobile home
- 415 cy of debris for a double-wide mobile home

### **Outbuildings**

All other building volumes may be calculated by using the following formula:

$$\frac{L' \times W' \times H' \times 0.33}{27} = \text{___ cubic yards of debris}$$

Where:

L = length of building in feet

W = width of building in feet

H = height of building expressed in feet

0.33 is a constant to account for the “air space” in the building

27 is the conversion factor from cubic feet to cubic yards

### **Vegetation**

Vegetation is the most difficult to estimate due to the random sizes and shapes of trees and shrubbery. Based on historical events, USACE has established a few rules of thumb in forecasting and estimating vegetative debris.

- Treat debris piles as a cube, not a cone, when estimating
- 15 trees, 8 inches in diameter = 40 cy (average)
- One acre of debris, 3.33 yards high = 16,117 cy

### **Volume – Weight Conversion Factors**

These factors to convert woody debris from cubic yards to tons are considered reasonable and were developed by USACE.

|              |                       |
|--------------|-----------------------|
| Softwoods    | 6 cubic yards = 1 ton |
| Hardwoods    | 4 cubic yards = 1 ton |
| Mixed debris | 4 cubic yards = 1 ton |
| C&D          | 2 cubic yards = 1 ton |

To verify these conversion factors in the field, several truckloads may be tested. Trucks should be well loaded, contain woody debris typical of that being removed, and truck capacities should be verified. It is recommended that testing be performed with all affected parties present.

## **Other Forecasting Methods**

### **Remote Sensing**

The use of remote sensing information (aerial photographs, satellite data, etc.), either alone or in combination with field surveys, may be of significant use in forecasting the amount, mix, and extent of debris. Geographic Information System (GIS) maps should be considered early in the planning process. Depending upon the area, it is usually possible to quickly obtain GIS maps of landfills, Superfund sites, transportation routes, etc. As data on debris is obtained, plotting it on GIS maps should be considered.

### **Forecasting Models in Development**

The private sector is currently developing other debris estimating models for tornadoes and hurricanes. These models are based on GIS or phone book data and on the USACE model. The Federal government and private industry are also working on a model to determine earthquake debris. The model takes into consideration various characteristics of an earthquake to anticipate the quantity of debris that could be generated by an earthquake.

Other debris forecasting methodologies and computer models may be available through other private vendors or other public sources.

Note that FEMA does not specifically endorse a particular product; however, such products may assist in forecasting disaster-generated debris and may be utilized for planning purposes.

### **Questions to Consider**

1. Describe the types of disasters and debris streams that place your jurisdiction at risk.
2. Historically, what type of disaster generated:
  - The most amount of debris (quantity)?
  - The most varied types of debris?
3. Who will be responsible for:
  - Forecasting the debris quantities prior to the disaster?
  - Estimating the post-disaster debris quantities?

## To Do Checklist

1. Establish a design disaster event. This may be based on historical events.
2. Forecast the type and quantity of debris for the design event. This can be based on historical data, recent neighboring community damage, or modeling methods.
3. Consider jurisdictional geography when forecasting and divide the jurisdiction into sectors if necessary.

# Chapter 7 – Debris Collection Strategy

**Chapter Highlights**

- Developing a Collection Strategy
  - Response Operations
  - Recovery Operations
- Types of Collection Methods
  - Curbside Collection
  - Collection Centers
- Collecting Hazardous Waste and White Goods
  - Household Hazardous Waste
  - White Goods
- Questions to Consider
- To Do Checklist

Please see Chapter 1, *Public Assistance Debris Removal Eligibility* and Chapter 4, *Private Property Debris Removal and Demolition of Private Structures*, for eligibility issues to consider in developing the debris management plan.

The next step after determining the design event and debris forecasting is to develop a debris collection strategy.

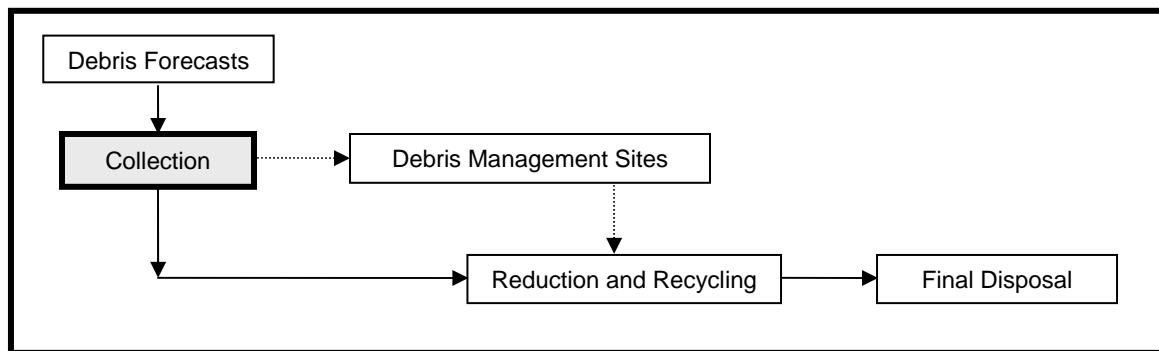

Figure 7.1 – Debris Collection Component

Collection operations are normally broken into two phases: response and recovery. An efficient debris management plan includes collection activities for response and recovery debris strategies. Response occurs sometimes during and always immediately after an event in order to clear emergency access routes. The recovery operation usually begins after the emergency access routes are cleared and the residents return to their homes and begin to bring debris to the public rights-of-way.

## Developing a Collection Strategy

To develop a strategy, the planning staff must consider several variables, which include:

- Amount and type of forecasted debris
- Employee labor resources
- Available equipment
- Urgency of the debris operations
- Damage to priority infrastructure
- Limitations of forces and skills for specialized debris issues

### ***Response Operations***

Debris removal activities during the response phase include immediate actions for the removal of debris to facilitate search and rescue efforts, to allow access to critical facilities, and to prevent flooding. Actions required during the response phase are usually completed within a matter of days following a disaster event.

Applicants often use their own labor force and equipment to remove debris during this phase. In circumstances when the existing labor force is not sufficient, or when specialized services are required, applicants may supplement their work efforts by activating mutual aid agreements or by awarding short-term debris removal contracts for specific work.

Response operations primarily focus on the emergency access routes and main arterials. The planning staff should identify which roads and streets are essential to emergency operations so they can manage and direct local resources. The planning staff should identify and target areas for possible State and mutual aid assistance to augment their efforts.

Prior to and immediately following the event, extricating people and providing access to health care facilities are the top priorities; therefore, the major arterial routes are given priority for the emergency services staff such as police, fire, and ambulance service. Emergency operations infrastructure, such as the emergency operations center and supply distribution centers, normally are the next priority.

Other infrastructure, such as water, wastewater, and utilities, is typically given the third priority. Priorities for all other routes are established by the applicant based on its particular situation. The following is an example priority list:

1. Fire, police, and ambulance service routes
2. Access routes to trauma centers, hospitals, critical care units, and jails
3. Major arterial routes
4. Roads and streets to the debris management center and emergency operations center
5. Supply routes to emergency supply distribution centers

6. Roads and streets to government facilities
7. Communication towers and systems access
8. Utility access routes
9. Routes to shelters

Maps showing specific streets, roads, buildings, hospitals, and addresses, along with specific labor assignments are necessary for emergency staff to understand their roles. All other roads and streets are normally cleared once the emergency and major access routes are opened and the jurisdiction transitions to the recovery operations.

### ***Recovery Operations***

The recovery phase focuses on collecting the remaining debris, reducing or recycling, and final disposal. Development and management of a debris management site is considered a recovery activity as well. Depending on the quantity and the complexity of the debris removal actions, debris removal activities could continue for several months. Applicants can use a combination of force account and contractor services for debris removal activities during this phase.

### **Types of Collection Methods**

The fundamental component of a disaster debris management strategy is the collection of debris. The public expects to have debris removed from neighborhoods immediately after a disaster event. The implementation of disaster debris collection immediately after the disaster event assures the public that recovery efforts are in progress and that the community will return to normal quickly. Developing an approach to collect debris during the planning process will assist applicants to begin collecting debris immediately following a disaster event.

The debris type, amount, and urgency determines which collection method is used. The two main methods of debris collection are curbside collection and collection centers.

The planning staff may tailor the collection operation using curbside collection, collection centers, or a combination of both depending on the specific jurisdiction, quantities, and types of debris.

#### ***Curbside Collection***

Curbside collection parallels an applicant's normal garbage and trash collection operations. Debris is placed at the curb or public rights-of-way by the residents for the applicant's collection. The only difference between the subcategories discussed below is the separation of the types of debris at the point of collection.

### **Mixed Debris Collection**

Collecting mixed debris by the applicant allows for residents to place all debris types in one specified area, usually along the public right-of-way in front of their residence. While this is the most convenient for the public, it does not facilitate effective recycling and reduction efforts, as the debris will need to be handled multiple times. Therefore, this method prolongs recycling and reduction efforts and increases operational costs.

### **Source-Segregated Debris Collection**

Residents are directed to sort the debris by material type and place it at the curb in separate piles. Trucks designated for a particular debris type collect the assigned debris and deliver it to a temporary staging area, or debris management site, reduction, recycling, or disposal facility. The disadvantage of this method is that it requires more trucks to collect the different types of debris; however, this increased equipment cost may be offset by avoiding the labor cost and time to separate the debris by hand. Source-segregated debris collection offers the potential of high salvage value and efficient recycling/reduction processing. This method is important when collecting hazardous and environmentally sensitive debris, such as household hazardous waste and white goods. Both types of debris are discussed at the end of the Collection Methods section.

### **Collection Centers**

The second type of collection method is to have the residents transport their debris to a common location. Large roll-off bins may be placed on public rights-of-way or public property for the residents to bring their debris for collection. This is well suited for rural, sparsely populated areas or logistically difficult conditions (i.e., hilly neighborhoods) where curbside collection is not practical. Separate bins can be designated for particular types of debris. The associated costs are generally low since the public essentially accomplishes the material collection and separation themselves.

The planning staff should assign employees to manage the development of the site and oversee the operations of the collection center. The planning staff needs to design the circulation for proper ingress, egress, and collection bin exchanges. Employees need to be stationed at the centers during the collection period in order to have empty bins brought in when the current ones are full, to ensure that debris materials are placed in the correct bins, and to ensure a collection center does not become a dumping ground for non-disaster-related debris.

The planning staff's legal counsel should investigate the liability issues that the site may present, especially if debris is being brought in and handled by the jurisdiction's residents.

## **Collecting Hazardous Waste and White Goods**

The two most common types of debris that will need special handling are hazardous waste and white goods. Regardless of which collection method is used, the planning staff needs to understand the effects this collection can have on the overall debris clearance, removal, and disposal mission.

### ***Household Hazardous Waste***

HHW mixed with other debris types will contaminate the entire load, which necessitates special disposal methods such as storage in a particular part of a landfill. Typically, the landfill requires special liners and a more intense permit standard due to the hazardous waste. The disposal cost of HHW is generally higher than the disposal of other waste; therefore, the overall cost of debris disposal can escalate quickly if the HHW collection and disposal is not planned and executed with care.

Local governments, in coordination with the State and county, often host HHW collection center events, or “round-ups,” several times during the year. The round-ups are planned scheduled events for residents to legally dispose of unused HHW. The applicants should host a HHW round-up following a disaster event, in order to avoid the commingling of the hazardous waste with other disaster-related debris. This limits the amount of contaminated waste, thereby reducing the overall disposal cost of the debris.

Pre-disaster planning should include training for hazardous waste response teams to collect, sort, store, and dispose of excessive quantities of HHW. The planning staff may consider having emergency hazardous waste removal/disposal contracts in place or pre-qualifying contractors to perform the work. The planning staff may prepare generic scopes of work that can be fine tuned with minimal effort, in order to begin recovery operations as soon as possible.

### ***White Goods***

The planning staff needs to take special care in finding certified recycling centers that are permitted to take white goods. Refrigerants and other machine fluids are normally regulated by the State environmental agency and can only be reclaimed by certified technicians and disposed of at a permitted facility. To avoid releases of refrigerants or oils, the collection of white goods should be accomplished carefully by manually placing the appliance on trucks or by using lifting equipment that will not damage the elements that contain the refrigerants or oils.

Having contracts or agreements in place prior to a disaster expedites the recovery efforts.

Recycling scrap metals and parts from white goods presents an opportunity for applicants to offset the collection and disposal costs. This also reduces the amount of waste going to a landfill.

The State environmental office and EPA provide first response functions in cases of commercial, agricultural, industrial, and toxic waste spills. The debris management plan should include the contact information for both parties in case of a large contamination issue.

---

## Questions to Consider

1. What facilities will be critical for establishing clearance or removal priorities in the debris management plan?
  - Emergency (police, fire, hospitals)
  - Utilities (electrical, water, sewer, communications)
  - Other
2. Who will conduct response and recovery activities? Force account labor? Contractors?
3. How will debris be collected throughout the jurisdiction?
4. How will the collection activities handle HHW and white goods?
5. Have the necessary environmental controls for hazardous waste been designed for the collection centers, such as liners and berms?
6. Have the appropriate State and local regulatory agencies been involved in the selection of collection center sites, to ensure they are not placed in environmentally sensitive areas?

## To Do Checklist

1. Establish priorities for debris clearance and removal during response and recovery operations.
2. Identify which collection method best suits the jurisdiction.
3. If collection centers are used:
  - a. Identify appropriate locations for collection centers
  - b. Identify if hazardous waste or HHW will be collected
  - c. Identify how the collection centers will be monitored
  - d. Identify how long the collection centers will be in place
4. If using curbside collection, identify the work force that will collect the debris:
  - a. If Force account, assignments for:
    - Labor
    - Equipment
    - Sector or section of the applicant's jurisdiction
  - b. If Contractors, assignments for:
    - Labor
    - Equipment
    - Sector or section of the applicant's jurisdiction
    - Monitor assignments for contractor activities
5. Establish a process for handling HHW and white goods.
6. Train staff and emphasize the need for documenting key debris eligibility requirements for Public Assistance grant consideration:
  - a. Hours worked
  - b. Hours the equipment was operating
  - c. Location of work performed
  - d. Amount of debris removed
  - e. Type of debris

## Chapter 8 – Debris Management Sites

### Chapter Highlights

Advantages and Disadvantages

Identifying Debris Management Sites

- Ownership
- Size
- Location
- Environmental and Historic Preservation Concerns

Baseline Data Collection

Environmental Monitoring Program

Permits

Establishment and Operations Planning

- Site Design
- Site Management
- Site Closure

Questions to Consider

To Do Checklist

Please see Chapter 1, *Public Assistance Debris Removal Eligibility*, for eligibility issues to consider in developing the debris management plan.

Debris Management Sites (DMS) are established when applicants are unable to take debris directly from the collection point to the final disposition location.

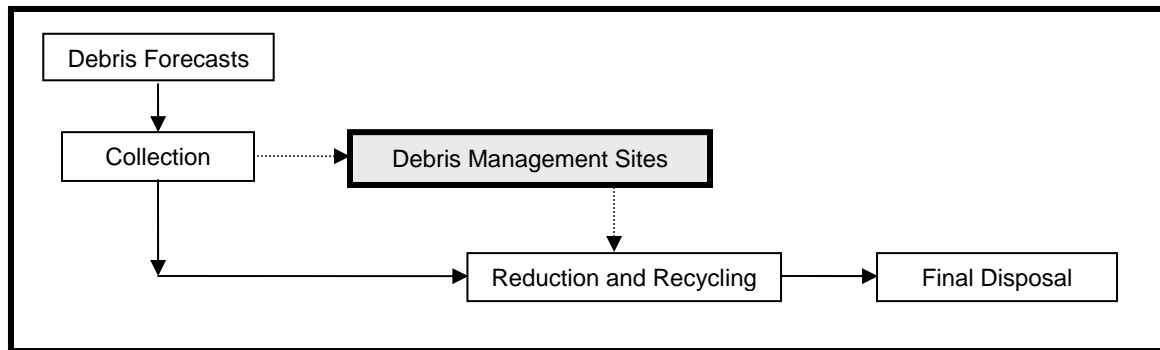

Figure 8.1 – Debris Management Site Component

A DMS is a location for applicants to temporarily store, reduce, segregate, and/or process debris before it is hauled to its final disposition. It is frequently used to increase the operational flexibility when landfill space is limited or when the landfill is not in close proximity to the debris removal area.

By employing a DMS, the debris can be collected from the rights-of-way and public properties in order to expedite permanent recovery operations. Locations for temporary debris storage and processing facilities should be identified during the planning process, and a listing of the locations should be included in the debris management plan.

## **Advantages and Disadvantages**

The advantages and disadvantages of a DMS are:

Advantages:

- Flexibility of operations. The DMS may also include a collection center for the public's use.
- Facilitation of recycling and reduction of debris. Specific reduction, recycling, or segregation needs can be designed into the site.
- Expedition of debris collection. Having a site for temporary storage and reduction allows time for local landfill site preparation before final disposal. The DMS may also be established at a location central to the disaster event, thereby reducing travel time from the disaster area to the disposal site.

Disadvantages:

- Additional cost to handle the debris twice. Once to the DMS and the second time to final disposition.
- If applicant-owned land is not available, leasing land is expensive.
- Additional costs for proper planning, engineering, and permitting.
- Considerable time and effort required to complete environmental and historic preservation compliance reviews prior to establishing the site.
- Environmental review and potentially extensive site cleanup may be necessary to properly close the site.
- DMS requires dedicated site management and staff for efficient operations, safety, and documentation considerations.

## **Identifying Debris Management Sites**

Identifying potential sites before a major natural disaster expedites debris removal and subsequent volume reduction and disposal actions. The designated Debris Project Manager and staff should work closely with other local, tribal, and State officials to develop and maintain

current listings of potential debris storage and reduction sites in areas prone to natural disasters. Site selection should be based on the following criteria:

- Ownership
- Size
- Location
- Environmental and historic concerns (baseline study findings)

### **Ownership**

The planning staff should consider public lands first in order to avoid costly land leases. Existing disposal or recycling facilities that are in close proximity to the disaster area are ideal locations for DMS. Nearby landfill and recycling center capacities need to be evaluated for site feasibility. Applicant-owned sites that will not require extensive repair costs, such as parks, vacant lots, or sports fields, should be considered as well. State-to-State or county-to-county agreements may present possible solutions for public land use.

When this is not possible, the planning staff should develop criteria for identifying potential private property locations for the DMS. Private land leases need to be reviewed by the legal staff in order to avoid extensive damage claims upon site closeout.

### **Land Lease Agreements**

The duration of the land lease agreement should be inclusive of all the time the applicant will be present at the site, beginning with the baseline environmental study and ending once the property owner takes back legal ownership.

The agreement should include a requirement to conduct a baseline environmental evaluation of the site before the site is occupied and an environmental evaluation before returning the property back to the owner. Both documents may become an annex to the land lease agreement.

The land lease agreement should be for a specific time frame with the ability to extend the lease if debris removal and processing activities are not completed.

### **Size**

The size of the site is dependant on the quantity of debris that is stored and processed. The site should be large enough to safely accommodate processing of various debris materials, storing heavy equipment, and maneuvering trucks and large processing equipment. Historic disasters have shown that it takes 100 acres of land to process one million cubic yards of debris. USACE has found that approximately 60 percent of the area will be used for roads, buffers, burn pits, HHW disposal areas, etc.

## ***Location***

The DMS should be established in an area that does not impede the flow of traffic along major transportation corridors, disrupt local business operations, or cause dangerous conditions in residential neighborhoods or schools. Whenever possible, avoid locating a DMS near residential areas, schools, churches, hospitals, and other such sensitive areas.

The DMS requires good ingress/egress to accommodate heavy truck traffic. The planning staff should consider adjusting traffic signals to accommodate projected truck traffic on critical haul routes. The DMS selection criteria should consider access to major routes to allow for trucks to transport material to final disposition locations.

The planning staff needs to consider public acceptability when selecting a potential DMS. It is largely dependent upon the activities planned for the site. Smoke from burning, around-the-clock light and noise from equipment operation, dust, and traffic are generally tolerated early in a disaster recovery operation, but may have to be curtailed later. The planning staff is strongly encouraged to notify citizens early about planned site activities and possible ramifications.

## ***Environmental and Historic Preservation Concerns***

When selecting public or private sites, pre-existing conditions should be considered because the sites will have to be restored upon site closeout. Proper management of the site allows the site to be closed with manageable efforts. For site closure reasons, planning staff should refrain from aggravating an existing environmental issue during the debris management operations.

Therefore, a DMS should not be established in an environmentally or historically sensitive area such as wetlands, critical animal and plant habitats, sole source aquifers, freshwater well fields, historic districts, or archeological sites. This applies specifically to any Superfund site or area within a 100-year floodplain. DMS selection criteria should also take into consideration any disproportionately high or adverse impacts on minority or low-income populations, in accordance with EO 12898. Adverse impacts should be avoided or minimized where possible. If an environmental or historic preservation concern is found during the baseline data collection process (described below), the potential site should be ranked lower than others. However, if use of such areas is unavoidable, the State and local environmental and historic preservation requirements must be followed. Compliance with environmental and historic preservation requirements is still required.

By conducting a baseline data collection study, the planning staff is able to further establish the feasibility of potential sites, document the existing site, and vet potential environmental issues. Data collection needs to be completed prior to establishing the site and continued throughout the operations. The final evaluation should include the same documentation in order to avoid disagreements on the condition of the site prior to the operations and the condition to which it was returned.

## Baseline Data Collection

Baseline data collection is essential to documenting the condition of the land before it is used as a DMS. Private and public land used as a DMS needs to be returned to its original condition following the end of all debris operations. As soon as a potential site is selected, the designated Debris Project Manager and staff should work closely with local, tribal, and State officials to develop baseline data criteria. The following actions are suggested to document the baseline data on all sites:

1. **Videotape and/or Photograph the Site.** Thoroughly videotape and/or photograph (ground or aerial) each site before beginning any activities. Periodically update video and photographic documentation to track site evolution.
2. **Document Physical Features.** Note existing structures, fences, culverts, irrigation systems, and landscaping that can help evaluate possible damage claims made later.
3. **Investigation of Historic Significance.** Research the past use and ownership of the property to document any issues regarding the existence of historic structures or archeological sites. The SHPO may have information about the property.
4. **Sample Soil and Water.** Soil and groundwater samples should be collected prior to use of the site. Advance planning with community and State environmental agencies can establish requirements, chain of custody, acceptable sampling methods, certified laboratories, and testing parameters. If in-house assets are not available, the planning staff may consider establishing a contract with an environmental consulting firm that can respond rapidly. Planned HHW, ash, and fuel storage areas should be sampled prior to site setup.

## Environmental Monitoring Program

As operations proceed additional data should be collected throughout the operations for closeout and quality assurance reasons. The data can be compared to the previously established information in order to determine any remediation that may be necessary.

1. **Sketch Site Operation Layout.** DMS operations may grow, shrink, or shift on the site. It is important to track reduction, hazardous waste collection, fuel, and equipment storage in order to sample soil and water for contaminants. Periodically map or sketch activity locations so that areas of concern can be pinpointed later for additional sampling and testing.

2. **Document Quality Assurance Issues.** Document operations that will have a bearing on site closeout, such as petroleum spills at fueling sites, hydraulic fluid spills at equipment breakdowns, installation of water wells for stock pile cooling or dust control, discovery of HHW, and commercial, agricultural, or industrial hazardous and toxic waste storage and disposal.
3. **Restoration of Site.** Final restoration of the landscape must be acceptable to the landowner, but within reasonable expectations. Therefore, plan the landscape restoration as early as possible, preferably incorporating provisions within the lease.

## Permits

Environmental permits and land-use variances may be required to establish a temporary DMS. Several agencies may be involved in issuing permits and granting land-use approvals. The planning process should identify the potential permits that will be required to establish a facility. A listing of the permits should be part of the debris management plan and may include:

- Waste processing and recycling operations permit
- Temporary land-use permits
- Land-use variances
- Traffic circulation strategies
- Air quality permits
- Water quality permits
- Coastal commission land-use permits
- HHW permits
- Fire department permits

## Establishment and Operations Planning

### *Site Design*

The information gathered during the baseline data collection becomes important to the design of the site. Additional concerns, such as site operations and closure criteria, need to be taken into consideration when the site is designed. Many of these issues will be addressed in planning, but will be implemented after the debris-generating event occurs.

### **Site Preparation**

The topography and soil/substrate conditions should be evaluated to determine the best site layout. When planning site preparation, the designer should consider ways to make site closure and restoration easier. For example, if the local soils are very thin, the topsoil can be scraped to bedrock and stockpiled in perimeter berms. Upon site closeout, the uncontaminated soil can be

re-spread to preserve the integrity of the tillable soils. Operations that modify the landscape, such as substrate compaction and over-excavation of soils when loading debris for final disposal, adversely affect landscape restoration.

### Site Layout

The efficiency and the overall success of the DMS operations is determined by how the site is designed. Debris should be constantly flowing to incinerators and grinders, or recycled with the residue and mixed construction and demolition materials going to a landfill. Significant accumulation of debris should not be allowed to occur at temporary storage sites, due to environmental and safety concerns, such as the risk of fire. Moreover, permits for such sites usually impose maximum capacity restrictions. Additional debris management sites may be required if the actual debris quantities flowing into the site are greater than the site storage and processing capacity.

Figure 8.2 - DMS With Undesired Debris Accumulation

Figure 8.3 - DMS With Little Debris Accumulation

## Operational Boundaries

Operational boundaries are the boundaries or areas that clearly define the difference in use areas at the DMS. In establishing the operational boundaries, the DMS design staff may consider using earthen berms, temporary barriers, or any other physical restriction. This aids traffic circulation and helps keep debris amassing at the DMS to a minimum.

Common operational uses are:

- Reduction
- Recycling
- Tipping areas (unloading)
- Loading areas for processed debris to go to its final disposition
- Drop-off centers for the general public (this may include vegetative, recycling, or construction and demolition debris)
- HHW storage
- Monitoring tower locations at both the ingress and egress points
- Equipment, fuel, and water storage

The separation between all of the areas listed above needs to be clearly delineated and defined. As operations proceed, the lines may be moved to accommodate either growing demand for space or a reduction in preparation for closure.

The reduction, recycling, tipping, and loading areas need ample room for large equipment operations. The design should take into consideration the possibility of multiple pieces of equipment being in the same activity area at one time. Depending on the scale of operations, each debris stream may have its own tipping area and should be designed accordingly. Reduction activity considerations are discussed in Chapter 9, *Debris Reduction/Recycling Methods and Disposal*.

General public drop-off areas for recycling, reduction, and construction and demolition debris may be included within a DMS. These public use areas should be carefully designed for passenger vehicle traffic and public safety.

HHW storage should be close to the public drop-off center yet restricted so that qualified personnel may process the waste appropriately. The design staff may consider constructing an impermeable lining and earthen berms in order to contain spills and prevent surface water runoff from leaving the area.

Monitoring towers should be located at ingress and egress points. Monitoring towers should be constructed of durable structural materials. The structures should be designed to withstand active and static loads. A stepladder is not an acceptable monitoring tower. Additional monitoring concerns and issues are discussed in Chapter 11, *Monitoring Debris Removal*.

Equipment and fuel should have a designated storage area and signs posted appropriately. The fuel storage areas need to be designed to contain spills. Water should be readily available at all times. Water storage areas should be strategically positioned throughout the site and identified appropriately.

**Traffic Patterns**

The traffic circulation needs to be well defined throughout the entire site. Although traffic signs and barricades aid in directing traffic, the planning staff may consider flag personnel to help direct traffic. Drivers unfamiliar with the new environments, routes, and rules will need assistance in order to safely navigate through the DMS.

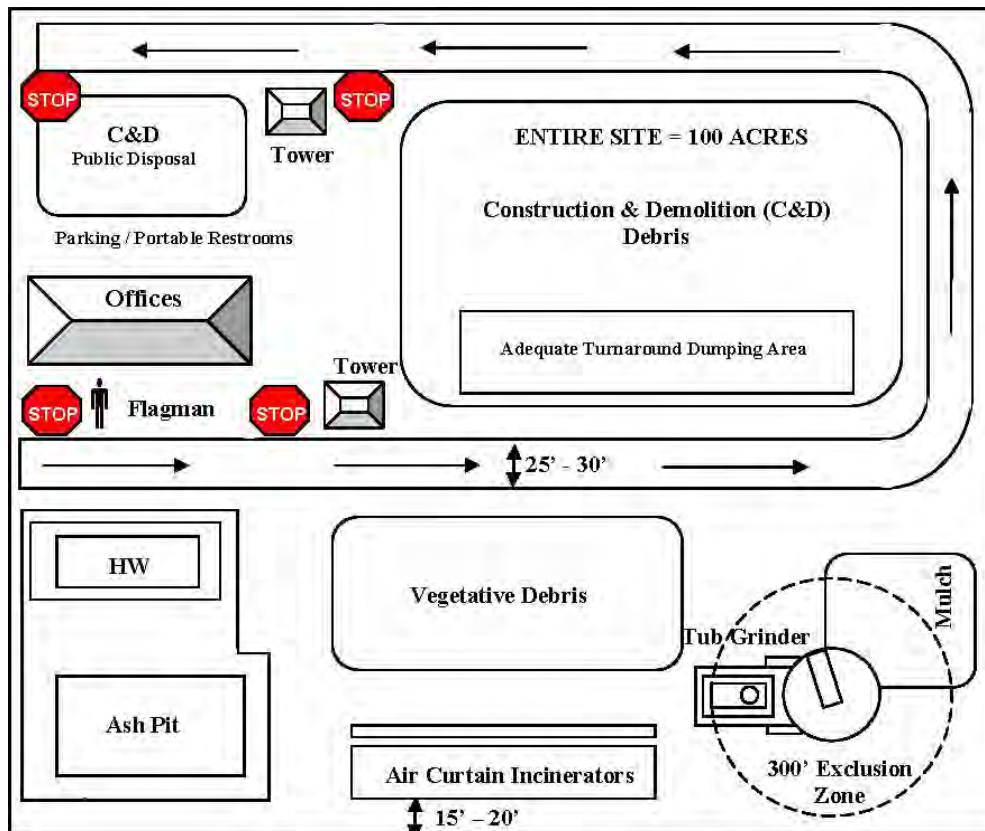

Figure 8.4 - Sample DMS Layout

Optimally, the designed traffic pattern should allow trucks to enter and exit through different access points, as long as each is monitored. Haulers are typically paid by the volume of a load. The load is evaluated when entering the site as a percentage of the full capacity of the truck. Stationing monitors at ingress and egress points ensures every truck releases the entire load prior to leaving the site. This avoids debris left in a truck from a previous load from being counted again in a subsequent load.

The empty trucks that enter the site to remove the processed (reduced) debris should enter and exit through an access point other than that of all other traffic. This reduces the site management and debris monitor confusion regarding debris being deposited or leaving the site.

### **Site Management**

To meet overall debris management strategy goals and to ensure that the site operates efficiently, the management of the site should be under the direction of the applicant.

Applicants could use in-house personnel or contracted services to manage the site. In either situation, a site manager, debris monitors, and safety personnel are needed to ensure safe and efficient operations.

### **Site Manager**

The site manager is responsible for supervising the overall day-to-day operations, maintaining daily logs, preparing site progress reports, and enforcing safety and permitting requirements during site operations. The site manager is also responsible for scheduling the environmental monitoring and updating the site layout. The site manager has oversight for monitoring the activities of the debris removal contractors and the onsite debris processing contractors to ensure they comply with the terms of their contracts.

### **Debris Monitors**

Applicant's monitors (whether force account or contractors) should be placed at ingress and egress points in order to quantify debris loads, issue load tickets, inspect and validate truck capacities, check loads for hazardous waste, and perform quality control checks. The specific duties of the monitors are dependent on how debris is collected. Chapter 11, *Monitoring Debris Removal*, includes additional information concerning monitoring roles and responsibilities.

### **Safety Personnel**

Safety personnel are responsible for traffic control and ensuring that site operations are in compliance with State and Federal occupational safety regulations.

## Site Closure

When the site operations are complete, the property must be restored to its original condition before returning the site to the property owner. Restoration of a site involves removing all traces of the operations and possible remediation of any contamination that may have taken place during the operations. The site, either applicant owned or leased, must be brought back to its environmental state, prior to it being returned to the owner.

Debris, processing equipment, storage tanks, protection berms, and other structures built on the site should be removed from the site upon completion of all debris removal and processing operations.

The final environmental site evaluation is an extension of the environmental monitoring program. Similar testing as completed in the baseline study will be conducted to confirm that the site has been returned to its pre-activity state. Test samples should be taken at the same locations as those of the initial assessment and monitoring program. However, if warranted, additional test samples may need to be taken at other locations on or adjacent to the site.

Based on the results of the testing, additional remediation may be required before the owner takes final acceptance of the site. The lease agreement should have provisions to release the applicant from future damages when the site is returned in its original condition or final acceptance is received from the owner.

### Questions to Consider

1. What are the remaining capacities of your landfills? How would you acquire this information?
2. Are there any restrictions to the types of materials that can be taken to your landfills?
3. Does the governing jurisdiction have available property that can be used as a DMS? If not, who would have the responsibility to locate a potential DMS and prepare legal lease agreements?
4. Who in your staff could manage the DMS? What staff is available to work at the DMS?
5. Will contracting additional labor and equipment be necessary to operate the DMS?

## To Do Checklist

1. Identify landfills within the jurisdiction that can be used for a DMS, final disposal, or both. If landfill space is not available, what are the alternatives?
2. If it is determined that a DMS is necessary:
  - a. Perform the baseline data collection
  - b. Have the legal staff review and obtain a lease (if private property)
  - c. Identify any outstanding environmental concerns with the site
  - d. Obtain all permits from the governing authority or agencies
3. Identify the jurisdictional staff member(s) that will be responsible for the DMS operations.
4. Identify the types of operations that will be taking place at the DMS.
5. Design the DMS layout.
6. Identify how the DMS activities will be performed:
  - Force account labor and equipment
  - Contract labor and equipment.
7. Develop an ongoing environmental monitoring strategy for while the DMS is operating. Document appropriately for potential site closure remediation.
8. Perform a final environmental data collection to ensure the property is returned as it was accepted.
9. If the DMS is leased, ensure the property is returned and accepted by the owner without future action due to environmental contamination.

## Chapter 9 – Debris Reduction/Recycling Methods and Disposal

### Chapter Highlights

#### Methods of Reduction

- Incineration
- Chipping and Grinding
- Recycling

#### Final Disposition Operations

#### Questions to Consider

#### To Do Checklist

Please see Chapter 1, *Public Assistance Debris Removal Eligibility* and Chapter 2, *Costs*, for eligibility issues to consider in developing the debris management plan.

Based on the debris forecasting, the planning staff will have a concept of the amount and types of debris that will be collected and disposed of. During this period, the staff may consider reduction and recycling methods to lower the overall cost of a debris removal operation.

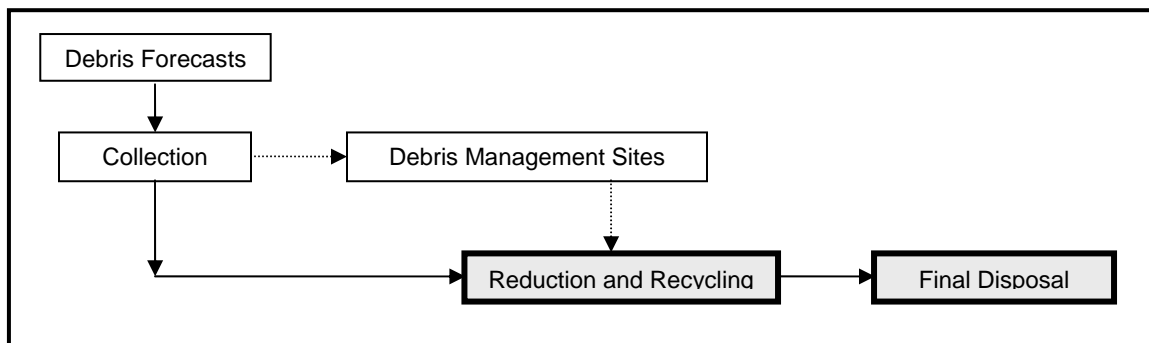

Figure 9.1 – Debris Reduction/Recycling and Final Disposal Component

Reducing and/or recycling disaster-related debris has financial and environmental advantages. These operations can decrease the overall cost of a debris removal operation by reducing the amount of material that is taken to a landfill. This diminishes the cost of final disposition in the form of tipping fees. In the case of recycling, potential end-use products for specific markets may offset the cost of operations even more. In many communities, recycling operations are an important component of the community public policy and are a priority. The staff should evaluate the types of reduction methods appropriate for the anticipated debris based on different disaster scenario events.

## Methods of Reduction

The planning staff has three main types of reduction methods to consider and use during the operations: incineration, chipping/grinding, and recycling.

One method or a combination of methods may be utilized as appropriate depending on the type and anticipated volume of debris. The applicant must ensure all Federal, State, county, and local laws are followed before any reduction activities begin.

### ***Incineration***

Burning vegetative debris is a popular reduction method since it has up to a 95 percent reduction rate. Local agricultural extension personnel should be consulted to determine if the resulting ash can be recycled as a soil additive. This option should be terminated if mixed debris enters the waste stream.

The incineration process requires a minimum of three steps, to include:

1. Unloading the debris.
2. Moving the debris into an incinerator.
3. Removing the ash from the incinerator to final disposition. Final disposition may be an appropriately constructed area at the DMS or a landfill.

This process is illustrated in the following figure.

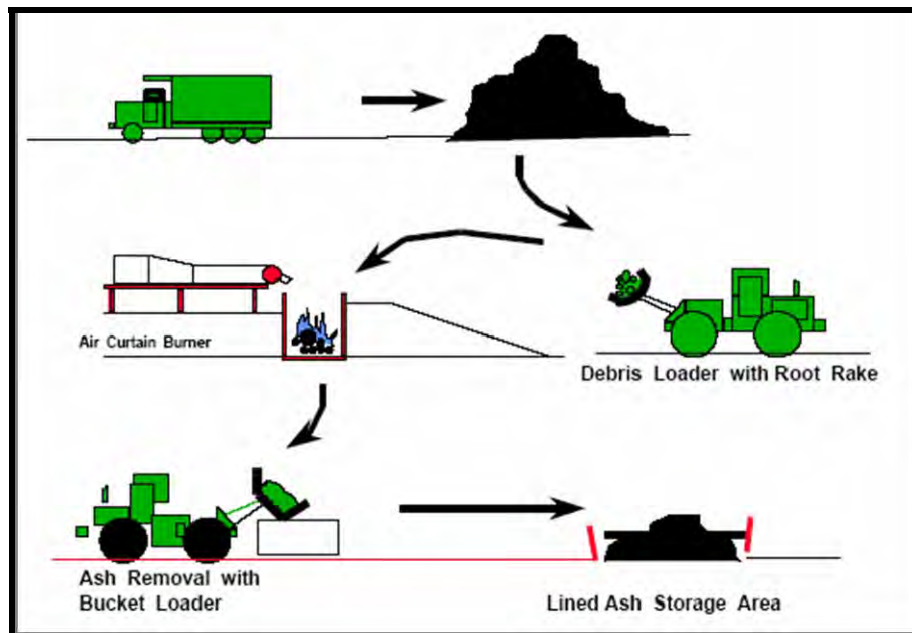

Figure 9.2 – Flow Diagram for a Burning Operation

There are several incineration methods available for volume reduction.

**Uncontrolled Open-Air Incineration** is reducing debris with no control over how much or how quickly it is allowed to burn. It is the least desirable method of volume reduction because it lacks any type of environmental control. Applicants may employ this method early in a disaster to make progress quickly. However, if circumstances dictate that open-air burning is the only option for managing debris, the applicant should conduct environmental evaluations to include air quality monitoring and implement control measures to limit impacts to humans and the environment. This reduction method should be closely monitored to ensure that only clean woody debris is incinerated.

**Controlled Open-Air Incineration** carefully reduces vegetative debris by burning debris within a contained fixed area. The reduction of clean woody debris presents little environmental damage and is cost-effective.

**Air Curtain Pit Incineration** offers an effective means to expedite the volume reduction process while substantially reducing the environmental concerns caused by open-air incineration. The air curtain incineration method uses a pit constructed by digging below grade or building above grade (if a high water table exists) and using a blower unit. The blower unit and pit comprise an engineered system that must be precisely configured to function properly.

The burning chamber is usually no more than 8 feet wide and 9 to 14 feet deep. The length of the pit varies depending on site size, environmental permitting, and labor/equipment limitations. The designs of successful air curtain incinerators used in past disasters are presented in the following figures, for reference and planning use only.

Figure 9.3 - Below-Grade Air Curtain Operation

Figure 9.4 - Above-Grade Air Curtain Operation

It is important to note that there are no industry standards for air curtain pit design. The applicant should seek knowledgeable personnel who are experienced with air curtain pit incinerator design and operating procedures when soliciting expertise to perform incineration services. The planning staff should research and solicit qualified personnel to properly train all staff that may be operating or maintaining this process.

**Portable Air Curtain Incinerators** use the same methods as air curtain pit incinerator systems, except that the portable incinerators use a pre-manufactured pit rather than an onsite constructed earth/limestone pit. Portable air curtain incinerators are the most efficient incineration systems available because the pre-manufactured pit is engineered to precise dimensions to complement the blower system. The pre-manufactured pit requires little or no maintenance as compared to earth or limestone constructed pits, which are susceptible to erosion. Portable air curtain units are ideal for areas with high water tables and sandy soils as well as areas where smoke capacity must be kept to a minimum.

### Environmental and Safety Concerns

With all of the incineration methods, environmental compliance and safety concerns need to be addressed within the plan. The planning staff must check with appropriate State agencies for State-specific requirements. Setback, permitting, and public information suggestions should be included in the plan.

Setbacks and buffer zones need to be established within and around the reduction sites not only for the public safety but also for the safety of the debris operations. A setback of at least 100 feet should be maintained between the debris piles and the incineration area. It is often suggested that 1,000 feet be allowed between the incineration area and the nearest building in order to create a generous buffer zone for emergency vehicles, if needed. The fire should be

extinguished two hours before anticipated removal of the ash mound. The ash mound should be removed before it reaches two feet below the lip of the incineration pit. To prevent explosions, hazardous or contaminated flammable material should not be placed in the pit. Finally, fencing and signage are simple and effective means to keep the public away from the incineration area.

Smoke generated by any of the above incineration methods is often interpreted by the general public as having an environmental impact. Therefore, it is important to also address smoke as part of the air monitoring guidelines. The governing State environmental or forestry agency will have guidelines that need to be met in order to acquire and retain a burn permit.

Planners should take the initiative in keeping the public informed. Applicant staff, environmental groups, and residents should be thoroughly briefed on the incineration methods being used, how the systems work, environmental standards, health issues, and the risks associated with each type of incineration. A proactive public information strategy should be included in any operation that uses incineration as a primary means of volume reduction. Please see Chapter 14, *Public Information Strategy* for additional information.

### ***Chipping and Grinding***

The second most common type of reduction method is to chip or grind disaster-related debris. Vegetative debris is the most common material reduced by using this method. The planning staff may also employ chipping and grinding methods in reducing rubber and some metals prior to being shipped to the recycling facility. The planning staff will have to investigate the opportunities, economics, and equipment in order to determine if this reduction method is appropriate for its jurisdiction.

There are significant differences in volume reduction between chipping and grinding and incineration. Incineration reduces the volume by approximately 95 percent, leaving only ash residue for disposal. Chipping and grinding reduces the volume by 75 percent. Since 25 percent of the volume remains from chipping and grinding, the benefit of this reduction method can be increased by identifying alternate uses of the residual material. The ability to use recycled wood chips as mulch for agricultural purposes, fuel for industrial heating, or in a cogeneration plant helps to offset the cost of the chipping and grinding operation.

If the grinding operation is strictly for volume reduction, the size of the mulch is not important; however, mulch to be used for agricultural purposes must be of a certain size and virtually free of paper, plastic, and dirt. Because of shallow topsoil conditions in some locations, mulch is a desirable product. In other locations, however, the mulch may become nothing more than a landfill product. The designated debris manager and planning staff should work closely with local environmental and agricultural groups to determine if there is a market for mulch.

Plastics should be eliminated completely. To help eliminate contaminants, root rake loaders should be used to feed or crowd materials to the chipper or grinder. Hand laborers should remove contaminants prior to feeding the chippers and grinders.

Bucket-loaders tend to scoop up earth, causing excessive wear to the grinder or chipper. Shaker screens should be used when processing stumps with root-balls or when large amounts of soil are present in the woody debris. The separated soil may be recycled back to the agricultural community.

### **Equipment**

Grinders are ideal for use at debris storage and reduction sites because of their high-volume reduction capacity. However, a large area is needed to hold the resulting mulch. Chips or mulch should be stored in piles no higher than 15 feet and located so as not to hinder hauling operations. Properly locating the grinders is critical for noise and public safety considerations.

There are numerous makes and models of grinders and chippers on the market. Tub-grinders have production rates ranging from 160 to 340 cubic yards per hour for brush and yard waste. Manufacturer-published grinder production logs can be misleading because they reflect only the engine hours and ideal rate of production. These production logs do not take into account personnel monitoring or consider varying debris conditions. Production rates should be verified by monitoring operations.

The reduced debris production output should average 100 to 150 cubic yards per hour when debris is moderately contaminated with plastic and dirt and feeding operations are slow. When the debris is relatively clean, the production rates can increase up to 250 cubic yards per hour.

Brush chippers can be hauled or towed to the site of the downed vegetation and are ideal for use in residential areas. Damaged and uprooted trees present significant problems if they are pushed to the rights-of-way to wait for eventual pick-up and transport to storage and reduction sites. The brush chippers allow the downed trees and limbs to be reduced in place. The use of onsite chippers also allows the material to be used as mulch in the area where it is chipped, thereby saving the cost of transporting it.

### **Recycling**

Based on the debris management goals and objectives, the decision to recycle disaster debris should be made during the planning process. The planning staff may find that marketing and selling the reduced debris is more financially attractive than hauling the unreduced debris to a local landfill.

Processing disaster debris through grinding, shredding, or any other means without an understanding of the end uses and market specifications may result in the products becoming

unusable for their intended purposes, necessitating disposal of the debris. For that reason, it is incumbent upon applicants to thoroughly research the market opportunities and establish criteria to assist emergency personnel in making decisions to recycle certain types of debris.

Debris management plans should include a list of the types of debris materials that can be recycled. The plans should determine end-use products that can be made from disaster debris, determine the market demand for each product, identify the product buyers, and when feasible, secure the sales of those products prior to an event.

The debris management plan needs to detail the implementation of the appropriate processing technique to achieve the desired end product. If the applicant uses contracted services to process debris, the contract agreements should include the processing specifications so that the contractor uses the correct types of equipment to achieve that specification.

Hurricanes and earthquakes may present opportunities to contract large-scale recycling operations and achieve an economic return from some of the contractors who exercise their initiative to segregate and recycle debris as it arrives at the DMS or landfill.

Specialized contractors should be available to bid on disposal of debris by recycling, if it is well sorted. Contracts and monitoring procedures should be developed to ensure that the recycling contractors comply with local, tribal, State, and Federal environmental regulations.

### **Common Recyclable Materials**

**Metals** - Hurricanes and tornadoes can cause extensive damage to mobile homes, sun porches, and green houses. Most of the nonferrous and ferrous metal debris is suitable for recycling. Metal maulers and shredders can be used to shred trailer frames, trailer parts, appliances, and other metal items. Ferrous and nonferrous metals are separated using an electromagnet and then sold to metal recycling firms.

**Soil** - Debris removal operations may include transporting large amounts of soil to the DMS. At the DMS, it may be combined with other organic materials that will decompose over time. This procedure can produce significant amounts of soil that can be sold, recycled back into the agricultural community, or stored onsite to be used as cover.

In agricultural areas where chemical fertilizers are used heavily, recovered soil may be too contaminated for use on residential or existing agricultural land. It may be necessary to monitor and test the soil to ensure that it is not contaminated with chemicals. If the soil is not suitable for any agricultural or residential use, it may ultimately have to be disposed of at a permitted landfill.

**Concrete, Asphalt, and Masonry Debris** - Concrete, asphalt, and masonry products can be crushed and used as base material for certain road construction products or as a trench backfill. Debris targeted for base materials needs to meet certain size specifications as determined by the end user.

## Final Disposition Operations

The planning staff will need to identify the final disposition site of whole, reduced, or recycled debris. The most cost-efficient measure is usually to make use of the applicant's own or normally utilized landfills. The available space often determines the most appropriate type of reduction method to employ. If local landfills are not adequate, the staff should conduct a search of landfills close to the disaster area for disposal.

County-to-county agreements are sometimes used in order to achieve an equitable solution. Some county landfills do not accept waste from other areas and may have stringent rules regarding what can be brought into the landfill.

Landfill tipping fee cost structures become important to the planning staff, especially if debris is being taken to a neighboring county. Tipping fee cost structures include operating and maintenance costs, permitting fees, capital improvement costs, and taxes. The capital improvement costs may be directly related to the landfill itself or may be for projects within the county.

Some fees and taxes may be waived for a neighboring governing body. The planning staff should investigate and compare the fees that are truly applicable for its debris disposal strategy.

### Questions to Consider

1. Do you have a strategy for reduction?
2. Do you currently have a recycling strategy? Is the jurisdiction considering a recycling strategy?
3. Which agency within your jurisdiction would be responsible for developing and implementing a recycling strategy?
4. What departments within the State, county, or your organization would be responsible for permitting burning or incineration operations?
5. What is your strategy for final disposition?

## To Do Checklist

1. Identify potential end use of the reduced or recycled materials. Identify if the end-use materials may represent potential income to offset processing, or entail no cost for disposal.
2. Identify reduction and recycling methods that will be used at the DMS.
3. Identify how the reduction and recycling activities will be performed:
  - a. Force account labor and equipment
  - b. Contract labor and equipment
4. Determine final disposition locations.

## Chapter 10 – Contracted Services

### Chapter Highlights

Common Misconceptions  
Procurement Considerations  
General Contract Provisions  
Types of Contracts  
– Unit Price Contract  
– Lump Sum Contract  
– Time-and-Materials Contract  
– Prohibited Contracts  
– Contract Matrix  
Questions to Consider

Please see Chapter 2, *Costs*, for eligibility issues to consider in developing the debris management plan. This chapter also references information in Chapter 11, *Monitoring Debris Removal*.

The planning staff may find it necessary to contract for debris removal services if the magnitude of the disaster is beyond the capabilities of its force account resources, State resources, mutual aid agreements, and volunteer labor. Possible contracted services include:

- Collection, including clearance during response phase
- Reduction or recycling
- Hazardous waste handling, processing, and disposal
- Hauling to final disposition
- DMS activities
- Demolition
- Monitoring
- Environmental studies
- Project management

The applicant's contracting/procurement and legal staff has a major role in this planning component of the debris management plan. The staff should use the debris management plan development as an opportunity to familiarize themselves with their contracting procedures, particularly with regard to emergency procurements. In procuring and awarding contracts, the applicant should follow its established procurement and contracting procedures.

## Common Misconceptions

Contracts written by contractors often use the FEMA name to gain credibility and give the appearance that the work to be performed would be eligible for Public Assistance grant funding. Applicants should be aware of the common phrases used by contractors and why the statements are false. Three of the most common phrases are:

1. **“FEMA-approved contract and rates.”** FEMA does not certify, credential, or recommend contractors.
2. **“FEMA eligibility determinations.”** Debris contractors do not have the authority to make eligibility determinations. Only FEMA can make an eligibility determination.
3. **“FEMA training in eligibility, documentation, and Project Worksheet development provided.”** These services often have a fee attached. Most of the training and information offered by a contractor is available free from FEMA or the State.

Applicants may enter into any contractual arrangements they wish. However, it should be noted that FEMA is not bound to applicant contractual obligations because it is not a party to those contracts. Applicants are strongly encouraged to work with State emergency management staff and FEMA to ensure compliance with the provisions of the Public Assistance Program, as well as other applicable statutes and regulations, if the applicant intends to seek Public Assistance grant assistance. The applicant is responsible for payment of its contracted services regardless of whether such services are eligible for Public Assistance grant funding. If a contract is in place prior to the applicant’s meeting with FEMA Public Assistance staff, the terms of the contract need to be reviewed to ensure compliance with the Federal procurement regulations and with the Public Assistance Program eligibility criteria. By doing so, it becomes easier for the applicant to provide FEMA with pertinent documentation to receive Public Assistance grant funding.

Additional information on developing contracts that comply with Public Assistance Program requirements is provided in Appendix G, *FEMA RP9580.201, Fact Sheet: Debris Removal – Applicant’s Contracting Checklist*.

There are two main areas of contracting that the applicant’s staff should review in the contract development planning process. These include procurement procedures and general contract provisions. Other provisions and terms are determined by the type of contract being employed for a specific service.

## Procurement Considerations

The applicant's legal staff needs to review the applicant's procedures for compliance with 44 CFR Part 13 requirements, outlined in Chapter 2, *Costs* and available online through the United States Government Printing Office at [gpoaccess.gov](http://gpoaccess.gov).

In the past, some applicants risked losing Public Assistance Program funding when procurement procedures were overlooked in the interest of time. There are methods by which applicants can expedite the procurement process without jeopardizing potential grant funding. An applicant may use one or more of the following methods to best serve its jurisdiction.

- **Pre-drafted contracts** – Applicants may draft a contract prior to a disaster event. Once the extent of the disaster is known, the contract can then be finalized with the appropriate scope of work and advertised in a timely manner.
- **Pre-qualified contractors** – Typically, contractors must meet minimum requirements, such as insurance, bonding, and licensing, prior to being awarded a contract by an applicant. Applicants may advertise a Request for Qualifications (RFQ) for contractors to establish their company as a credible candidate for a contract award. The pre-qualified contractors on the list are invited to bid on a contract. The pre-qualified contractors can then focus on developing costs rather than assembling documentation in order to qualify for bidding.
- **Pre-event contracts** – The applicant may choose to solicit bids and award contracts in non-disaster times. This allows time for a deliberate procurement process and gives applicants flexibility in mobilizing the appropriate resources in anticipation of an event.

The applicant may expedite procurement procedures for purpose of public exigency; this does not mean that competitive proposals are not required. In many cases, an expedited process allows for shorter time frames for receiving competitive bid proposals. Appendix G, *FEMA RP9580.4, Fact Sheet: Debris Operations – Clarification: Emergency Contracting vs. Emergency Work*, explains the emergency contracting procedures provided in 44 CFR Part 13.36(d)(4)(i)(B).

When soliciting competitive bid proposals, the applicant should be the entity that develops the engineering estimate and scope of work for the contract bid solicitation.

## General Contract Provisions

To protect the applicant's interests, specific items should be included in the contract to minimize potential conflicts with the contractor. These items include the basis of payment, the duration of the contract, the performance measures, an agreement to restore collateral damage, a termination for convenience, and a conflict resolution process.

The basis of payment and the payment process should be clearly outlined in the contract. Contractor payments should be based on verification of completed work, and the required information for the payment request should be included within the provisions of the contract. Weight to volume conversion factors should be published in order to further clarify possible differences between invoices and payment.

Basis of payment is usually based on the volume and/or weight of the contractor's loads. If the contract payment is based on volume, specific contract provisions are required to substantiate invoices and payment. These contract provisions need to provide a truck certification process, which includes determining the volume of the truck and how it will be identified during the recovery operation. Recertification of a truck is usually required if the physical truck identification becomes damaged or the volume capacity becomes suspect during operations. Additional information regarding truck certification is included in Chapter 11, *Monitoring Debris Removal*.

Applicants should consider using a progress payment method for contract services. This requires specific documentation from the contractor to verify and validate the completed work, support the contractor's invoices, and receive reimbursement under the Public Assistance Program. Typical documentation includes debris monitor reports, truck certification lists, and load tickets. This documentation is discussed in Chapter 11, *Monitoring Debris Removal*.

To ensure that debris removal is conducted expeditiously, the contract should include specific timelines for work to be completed. The duration of contract should be clearly stated. By doing so, the applicant sets clear expectations for the contractor. Moreover, the contractor can effectively manage resources and schedule work to meet the applicant's expectations.

Debris removal activities may impart damage to the local infrastructure, such as broken curbs, crushed sidewalks, and broken water meters. A contract provision should include a requirement that the contractor is to restore and/or repair, at the contractors cost, all damaged infrastructure back to its pre-existing condition if the damage was caused by their activities.

The contract should also include contract language for performance measures and a termination for convenience and default. A termination clause allows the applicant the ability to terminate the contract if the contractor does not deliver services in the manner delineated in the contract. The contract language clauses should be specific as to how performance will be evaluated and what would be considered reasons for termination.

The conflict resolution process should be well defined within the contract. The process should also include alternatives for mediation should an issue prove difficult to resolve.

To ensure that the contracts are in accordance with the Federal, State, and local procurement laws the planning staff should seek guidance from their legal counsel.

## Types of Contracts

There are several types of contracts that can be used for debris operations. The most common types of contracts are unit price, lump sum, and time-and-materials. Due to the use and structure of a specific type of contract, there are specific provisions and documentation considerations that should be included to keep costs reasonable and to protect the applicant's interests. Descriptions of the different types of contracts, specific contract provisions, monitoring efforts, and documentation requirements are described in this discussion and are summarized in a matrix at the end of this chapter.

### ***Unit Price Contract***

#### **Use and Structure**

The schedule of payment of unit price contracts is based on a set cost for a specific task.

For example:

Remove, haul, and dispose of vegetative debris = \$X / cubic yard

or

Remove and dispose of refrigerant = \$Y / appliance.

Unit price contracts are used when the individual work tasks are known but the total amount of work cannot be quantified. The quantities of work to be completed are estimated by the applicant and included in the applicant's bid solicitation package. The contractor uses the estimated quantities to establish a total contract price. Units of work can be measured in terms of weight, volume, or any other quantifiable measure.

The estimated quantity of work described in the bid solicitation can be adjusted to reflect a more accurate quantity when debris operations are under way and the true extent of the disaster is realized. To keep the price of the contract reasonable, the applicant can eliminate as many variables as possible by incorporating detailed specifications in the contract and monitoring the contract operations.

#### **Contract Provisions**

Developing specifications for unit price contracts requires a full understanding of all the particular tasks that are required to complete the work to the applicant's satisfaction. Applicants should clearly define the individual tasks and activities that are required to accomplish the scope of work when soliciting bids. These may include the collection, transportation, and incineration of vegetative debris; extraction of refrigerants; grinding of debris; or special handling of hazardous wastes.

The estimated quantities of each type of debris that will be collected and clear descriptions of how each is to be handled or processed should be included in the specifications. The solicitation should incorporate special sections for hazardous and special wastes, if applicable. If the applicant intends to market processed debris for certain end uses, the bid specifications should describe the end user's product specifications in detail.

The applicant's bid solicitation and the final contract documents should include details on how the applicant will monitor the contractor's work and how the applicant's monitoring information will be used to verify the contractor's costs and payment.

### ***Lump Sum Contract***

#### **Use and Structure**

Lump sum contracts are used when the scope of work can be easily identified and quantified. These bid requests include a set of specifications that have a well-defined scope of work for a finite amount of time. For example:

Haul 250 tons of mulched debris from 1000 N Debris Road to applicant landfill at 3450 S Main Street = \$XX,YYY.

Two common uses of a lump sum contract define how the debris is to be collected, by geographical area or by "passes."

The **area method** defines the geographical boundary in which the debris is to be collected. By providing geographical boundaries, the quantity of debris may be forecasted or estimated based on topography and land use.

The **pass method** describes the number of times debris will be collected from the curbside within a specified geographical boundary. Limiting the number of passes for an area keeps the scope of work known.

The advantage of a lump sum contract is that the total price for the specified work is known at the time the bids are opened.

#### **Contract Provisions**

Although contractors usually present one total price in their bids, applicants should request a breakdown of costs for each item of work activity in the bid specifications so that if additional work is necessary during the term of the contract, the applicant can easily determine the cost for that work based on the unit cost. By requesting unit costs, the applicant can determine whether the contractor included costs for contingencies in the fixed price and if all costs are reasonable.

The bid specifications for a lump sum contract take more effort to write in comparison with other methods, but may reduce change orders during contract execution. The specifications should include every work activity that will be required, the exact quantity of debris to be removed, or the specific number of passes that will be required, to collect all debris.

If recycling is part of the scope of work, the bid specifications should include a list of debris materials that are expected to be recycled. The contract should also specify who owns the recycled materials and how the revenue from the sale of the recycled materials affects the contract cost.

### ***Time-and-Materials Contract***

#### **Use and Structure**

Time-and-materials contracts are used when the scope of work necessary to achieve an outcome is unknown.

A typical use of time-and-materials contracts for debris is during the response phase of the debris removal operations when an applicant needs additional labor and equipment resources to clear emergency routes. A time-and-materials contract establishes hourly rates for labor and equipment that will be used to perform specific tasks. For example: backhoe, with loader, 1 cy bucket, with operator = \$50 / hour.

The contractor is paid based on the actual time spent to perform the specified tasks and for the usage of equipment. The contractor is also paid for the actual cost of materials that are used during operations.

#### **Contract Provisions**

Solicitation for a time-and-materials contract should include descriptions of the types of work items that would be required inclusive of debris removal, debris processing, and recycling.

Normally, a time-and-materials contract identifies the classification of each worker and a skill level. The equipment rate schedule lists the type of equipment and the hourly rate. The hourly rates for equipment should include the operator, fuel, and maintenance costs. A provision should state that the applicant only pays for the time the equipment is in operation. Mobilization and standby costs should not be invoiced at the hourly equipment rate. Public Assistance grants do not fund standby or idle-time costs.

Applicants should establish the maximum number of hours the contractor can work or set a ceiling for the contract to control costs when using a time-and-materials contract. FEMA generally limits the Public Assistance grant reimbursement cost of a time-and-materials contract to 70 hours of actual work. FEMA may provide a Public Assistance grant for a time-and-

materials contract that has been extended for a short period of time, but only under extreme extenuating circumstances.

Intense monitoring of time-and-materials contracts is extremely important. Work inspection reports should be prepared each day. These reports clearly state the amount of work accomplished that day in quantitative terms, such as the number of cubic yards of debris hauled, the type and number of trucks used, and the number of hours worked.

Load tickets may be used if debris is being hauled based on cubic yards under a time-and-materials contract as a way of checking contractor efficiency.

Applicant personnel should verify the certification of work performed and copies of the inspection reports should be furnished to the contractor to expedite the submittal of invoices for payment.

Time-and-materials contracts are usually terminated once the maximum number of hours or price cap is reached. Contract provisions should include the applicant's right to terminate a contract at its discretion. An applicant should terminate the time-and-materials contract when a more cost-effective contract is awarded for the remainder of the debris removal operations.

Time-and-materials contracts are the least preferred among contracts, and they are typically used only for initial emergency work or when there are complex life-saving activities that are dependent on the removal of debris. Again, FEMA generally limits reimbursement of time-and-materials contracts to the first 70 hours of actual work. The use of a time-and-materials contract for longer than 70 hours may impact the amount of reimbursement the applicant receives.

### ***Prohibited Contracts***

In accordance with 44 CFR Part 13.36(f)(4), cost plus percentage of cost contracts shall not be used. Use of such contracts may result in FEMA limiting the grant to an amount determined to be reasonable based on the eligible work performed.

Contracts that are awarded by an applicant to debarred contractors are prohibited pursuant to 44 CFR 13.35; thus, no Federal funding can be awarded for eligible work completed.

### ***Contract Matrix***

A summary of the aforementioned contracts and their associated characteristics is provided as a reference in the following matrix.

| Unit Price Contract Summary Matrix |  |  |   |   |                        |  |
|------------------------------------|--|--|---|---|------------------------|--|
| Type of Contract                   | Structure and Use  | Required Provisions  | Advantages  | Disadvantages   | Monitoring             | Documentation  |
| <b>UNIT PRICE</b>                  | <p>Uses units of measure (cubic yards, tons, each) and prices to develop line item costs and total contract costs</p> <p>Used when scope of work is difficult to quantify. The bid proposals are based on applicant-estimated quantities and units of work</p> | <p>Specific documentation requirements, based on quantifiable units, such as load tickets, and payment</p> | <p>Scope of work may be adjusted easily at a known cost</p> <p>Accurate account of actual quantities when work is complete</p> <p>Simplicity of contract encourages competition</p> <p>Low risk for contractors</p> | <p>Possibility of contractor fraud if operations are not closely monitored</p> <p>Trucks require measurement and loads accurately documented</p> <p>Segregated curbside collection may complicate the scope of work</p> | <p>Labor intensive</p> | <p>Load ticket system</p> <p>Monitors at collection points and where the debris is unloaded (DMS or final disposition)</p> |

Figure 10.1 – Unit Price Contract Summary Matrix

| Lump Sum Contract Summary Matrix |                                 |   |  |  |  |  |
|----------------------------------|---------------------------------|---|--|--|--|--|
| Type of Contract                 | Structure and Use               | Required Provisions   | Advantages   | Disadvantages  | Monitoring   | Documentation  |
| <b>LUMP SUM</b>                  | <b>All Lump Sum</b>             | <p>Establishes a fixed contract based on the applicant scope of work specified in the bid solicitation</p> <p>Used when the scope of work is clearly defined by the applicant, including quantity, type, and location of debris</p> | <p>Specific process for a change order request, exact quantity of debris, and types of debris.</p> <p>Provision to cover if the collection or unloading location changes after the contract is awarded</p> | <p>Cost is established at the bid opening</p> <p>Easy to determine when the work is complete</p>                     | <p>Scope of work must be very specific to avoid change orders</p> <p>Often difficult to quantify debris and identify the types of debris requiring collection</p>  | <p>Minimum</p> <p>Amount of debris collected, reduced/ recycled, and disposed will be required to establish reasonable price</p> |
|                                  | <b>Collection - Area Method</b> | <p>Used when a well defined area can be provided for bidding purposes</p>   | <p>Specific process for a change order request, exact quantity of debris, and types of debris.</p> <p>Provision to cover if the collection or unloading location changes after the contract is awarded</p> | <p>High probability of change orders if estimates are based on speculation</p>                                       | <p>Scope of work has to be accurately quantified to minimize change orders</p> <p>Estimating the amount of debris to be brought to the rights-of-way difficult to determine</p>  | <p>Minimum</p> <p>Amount of debris collected, reduced/ recycled, and disposed will be required to establish reasonable price</p> |
|                                  | <b>Collection - Pass Method</b> | <p>Defines how many times a curbside collection will be completed on a particular street or through a well defined area</p>   | <p>Specific process for a change order request, exact quantity of debris, and types of debris.</p> <p>Provision to cover if the collection or unloading location changes after the contract is awarded</p> | <p>Possibility of fewer change orders since the scope of work is better defined</p> <p>Average management duties</p> | <p>Up-to-date street information and plans to be included in the scope of work</p> <p>Requires cooperation of the public to place only eligible debris at the curb and participate in segregating materials</p> <p>Intense public information campaign</p> | <p>Minimum</p> <p>Amount of debris collected, reduced/ recycled, and disposed will be required to establish reasonable price</p> |

Figure 10.2 – Lump Sum Contract Summary Matrix

| Time-and-Materials Contract Summary Matrix |   |   |   |  |                 |   |
|--|---|---|---|--|-----------------|---|
| Type of Contract                           | Structure and Use   | Required Provisions   | Advantages  | Disadvantages  | Monitoring      | Documentation   |
| TIME-AND-MATERIALS                         | <p>Paid on an hourly rate for labor, materials, and equipment</p> <p>A known quantity of work is not established prior to the contractor beginning work</p> | <p>Capped by the period of performance and/or monetary ceiling</p> <p>Price for equipment applies only when the equipment is in use</p> <p>Hourly rate for equipment includes fuel, maintenance, and repair</p> <p>Bids should include all overhead costs</p> <p>Specific hours the contractor is to perform work (to ensure monitoring staff is present to document activity)</p> <p>No guarantee of a minimum number of hours</p> <p>If multiple contracts are awarded, the period of performance should run concurrently rather than consecutively</p> | <p>Good for response activities</p> <p>Extremely flexible; not limited by a specific scope of work</p> <p>Range of uses; appropriate clearance of major access routes or roads to critical facilities</p> | <p>Requires close contractor oversight and direction as to work to be performed</p> <p>Requires documentation of actual hours worked by equipment and operators</p> <p>Reasonable hourly rates may be difficult to establish if not competitively bid</p> <p>Equipment specifications may have to be generalized in order to encourage competition</p> <p>Requires full-time trained monitors to document work completed and verify hours worked</p> | Labor Intensive | <p>Intense</p> <p>Actual labor and equipment must be accounted for during entire performance period</p> |

Figure 10.3 – Time-and-Materials Contract Summary Matrix

To assist applicants in identifying and contacting contractor resources, an online debris contractor registry tool is available on FEMA’s website, [fema.gov](http://fema.gov). The information provided in the registry is maintained by contractors and their representatives. FEMA does not verify and takes no responsibility for the accuracy of any of the information submitted. FEMA does not endorse, approve, or recommend any contractors, including those in the registry. Applicants should perform all appropriate due diligence prior to entering into a contract. Contracting with any of the entities listed in the registry does not assure an applicant of reimbursement under a Federal grant. Applicants should follow their competitive procurement procedures when selecting a contractor.

---

### **Questions to Consider**

1. Do you have in-place debris contracts prepared?
2. Do you have a list of local pre-qualified contractors?
3. Can you use components of existing contracts, such as garbage collection or roadway time-and-materials contracts for disaster debris clearance, removal, or disposal?
4. What departments within your agency would be required to prepare the debris management bid documents and contracts?

## Chapter 11 – Monitoring Debris Removal

### Chapter Highlights

Debris Monitoring Staff

- Force Account Resources
- Outsourcing Monitoring Duties

Debris Monitor Roles

Monitoring Methods for Debris Removal

- Debris Monitor Reports
- Truck Certification List
- Load Ticket System

Special Monitoring Issues

- Equipment
- Monitoring Tips

Questions to Consider

To Do Checklist

Please see Chapter 1, *Public Assistance Debris Removal Eligibility*, Chapter 2, *Costs*, Chapter 3, *Debris Removal from Public Property*, and Chapter 4, *Private Property Debris Removal and Demolition of Private Structures*, for eligibility issues to consider in developing the debris management plan.

Debris monitoring procedures should be established and included in the debris management plan for the applicant's financial interest, especially if the applicant has contracted for any component of the debris removal operation. Monitoring debris removal operations achieves two objectives:

- Verifying that the work completed by the contractor is within the contract scope of work
- Providing the required documentation for Public Assistance grant reimbursement

Failure to document eligible work and costs may jeopardize Public Assistance grants. In Federally declared disasters, FEMA periodically validates the applicant's monitoring efforts to ensure that eligible debris is being removed and processed efficiently.

*Only FEMA has the authority to make eligibility decisions; contractors cannot make eligibility determinations. Information on eligibility can be found in this document, FEMA 321 – Public Assistance Policy Digest, FEMA 322 – Public Assistance Guide, and FEMA 323 – Public Assistance Applicant Handbook.*

## **Debris Monitoring Staff**

Applicants can use force account resources, contractors, or a combination of both to monitor debris removal operations.

### ***Force Account Resources***

Applicants are encouraged to use their own employees to monitor debris removal operations. The applicant's employees are the most familiar with the jurisdiction and know the priorities of the applicant's debris management plan. Force account employee costs are reimbursed based on the Public Assistance Program's labor cost policies for emergency work.

### ***Outsourcing Monitoring Duties***

In some cases the monitoring task is outsourced to a contractor. As with any contractual arrangement, the applicant must ensure that the contractor is meeting the performance requirements of the contract. If a contractor is hired to perform a monitoring task, the applicant is required to ensure that the hired contractor performs satisfactorily.

If the applicant outsources a monitoring task, the contract must be awarded to a contractor who has no vested interest in the debris removal contract or contractor. There must be no conflict of interest between the monitoring contractor and the debris removal contractor.

When soliciting for debris monitoring contracts, the advertisement should outline the required qualifications of the debris monitors. The qualifications should be appropriate for the individual responsibilities and duties. Debris monitors should have experience working on construction sites and be familiar with safety regulations, but it is not necessary to have professional engineers and other certified professionals perform these duties. Primarily, debris monitors should be able to estimate debris quantities, differentiate between debris types, properly fill out load tickets, and follow all site safety procedures.

The specifications should outline possible monitoring locations and reporting requirements to document eligible debris quantities.

Monitoring contracts are typically time-and-materials and should contain a not-to-exceed clause per the requirements of 44 CFR Part 13. The applicant should ensure the level of monitoring and overhead claimed is consistent with the level of effort required to effectively monitor the debris removal operations.

It is important that the debris monitoring contract provide for submission of reports and payment estimates to help promote efficiency and effectiveness in the overall debris removal operations. By continuously monitoring the debris removal operations, an applicant can track

progress toward completion and determine the financial status of the monitoring and debris removal contracts.

Applicants should require debris monitors to submit the following reports:

- Debris collected from curbside and/or collection centers
- Debris accepted at the DMS and/or final disposition
- Debris recycled/reduced at the DMS and taken to final disposition
- Any operational or safety issues

If FEMA provides funding for the debris monitoring contract, a sample of the reporting requirements outlined in the contract in order to substantiate eligible costs is required. The sample must be adequate to demonstrate that sufficient measures were taken to ensure that eligible and accurate quantities were reported as part of the grant. If the monitoring contract is time-and-materials, the applicant must supply labor, equipment, and materials records to the Public Assistance Program staff in order to substantiate the actual costs of the grant.

## **Debris Monitor Roles**

Monitoring operations are meant to ensure that the debris removal contractor is performing the scope of work required by the contract, and to document the debris removal operations. The primary role for debris monitors is to document the location and amount of debris collected.

The key elements of information that are needed to verify the contractor's scope of work and determine eligibility are the:

- Type of debris collected
- Amount of debris collected
- Original collection location

From this information the applicant can document eligible location and work completed.

The debris monitor's roles and responsibilities in the field include:

- Measure and certify truck capacities (recertify on a regular basis).
- Complete and physically control load tickets (in monitoring towers and the field).
- Validate hazardous trees, including hangers, leaners, and stumps (use appropriate documentation forms).
- Ensure that trucks are accurately credited for their load.
- Ensure that trucks are not artificially loaded to maximize reimbursement (e.g., debris is wetted, debris is fluffed - not compacted).

- Ensure that hazardous waste is not mixed in with loads.
- Ensure that all debris is removed from trucks at the DMS.
- Report to project manager if improper equipment is mobilized and used.
- Report to project manager if contractor personnel safety standards are not followed.
- Report to project manager if general public safety standards are not followed.
- Report to project manager if completion schedules are not on target.
- Ensure that only debris specified in the scope of work is collected and identify work as potentially eligible or ineligible.
- Monitor site development and restoration of the DMS.
- Ensure daily loads meet permit requirements.
- Ensure that work stops immediately in an area where human remains or potential archeological deposits are discovered.
- Report to project manager if debris removal work does not comply with all local ordinances as well as State and Federal regulations.

The applicant is responsible for ensuring that applicant-managed debris removal work (either force account or contract) being funded under the Public Assistance Program is eligible in accordance with Public Assistance Program criteria.

Applicants may request State/FEMA assistance with debris monitoring or monitor training.

## **Monitoring Methods for Debris Removal**

Additional documentation requirements depend on how the debris is collected and processed. The following describes methods and systems to monitor and document work completed by force account resources and/or contractors.

The planning staff should develop tools for their documentation duties. It is suggested that all three of the following tools be used to document all types of debris removal contracts – unit cost, lump sum, and time-and-materials contracts.

### ***Debris Monitor Reports***

Applicants should develop a debris monitoring report to make all reporting documents consistent regardless of who performs the work. An example of a debris monitor's report is supplied in Appendix D, *Sample Monitoring Forms*. Applicants are not required to use this report; however, they should have a reporting document that captures the types of information if seeking Public Assistance reimbursement.

The debris monitoring report is important for monitoring time-and-materials contracts that may be used during the response phase of the operations. Monitoring documentation for time-and-materials contracts includes:

- Actual labor hours worked
- Actual equipment hours operated
- Type and specification of equipment used

The labor and equipment summary records provided in Appendix C, *FEMA Forms*, are often used by applicants as a starting point for their specific documentation needs and contract requirements.

### ***Truck Certification List***

A truck certification list allows the monitor to identify the truck itself and its hauling capacity in a standardized manner. It is important to know the truck hauling capacity since debris, specifically vegetative debris, is often hauled and billed by volume. The standard list of requirements includes:

- Size of hauling bed in cubic yards
- License plate number
- Truck identification number assigned by the owner
- Short physical description of the truck

Monitors may need to be trained to measure truck capacities for certification purposes. Recertification of the hauling trucks on a random and periodic basis should be implemented for contract compliance and reimbursement considerations. See Appendix D, *Sample Monitoring Forms*, for an example truck certification worksheet.

### ***Load Ticket System***

The term “load ticket” refers to the primary debris-tracking document. A load ticket system tracks the debris from the original collection point to the DMS or landfill. By positioning debris monitors at each point of the operations (collection, DMS, and/or final disposition), the eligible scope of work can be properly documented. This is how the applicant documents and tracks the debris from the initial collection location to the DMS and final disposal location. If the applicant uses a contract hauler, this ticket often verifies hauling activities and is used for billing purposes.

Traditionally, load tickets have been carbon paper tickets with at least four copies generated for one load of debris. More advanced tracking tools have been developed and used in the field to reduce human error and expedite funding. These computer-based systems often include the same information as a traditional load ticket.

Each monitor is responsible for populating specific areas of the load ticket. The following table lists the load ticket information and the portions of the ticket to be completed by the respective monitor.

| Load Ticket Information                                   | Monitor Ticket Responsibilities                 |                         |
|---|---|-------------------------|
|   | Collection Point Monitor                        | DMS or Landfill Monitor |
| Preprinted ticket number                                  | NOT APPLICABLE                                  |                         |
| Contract number   | Contracts may be identified by a number or name |                         |
| Prime contractor's name                                   |   |                         |
| Date  | X   |                         |
| Truck number  | X   |                         |
| Truck driver's name                                       | X   |                         |
| Vegetation  | X   |                         |
| Construction & Demolition                                 | X   |                         |
| White Goods   | X   |                         |
| Household Hazardous Waste                                 | X   |                         |
| Other (required to be described applicable)               | X   |                         |
| Load Location   | GPS or address preferred                        |                         |
| Loading date/time (departure from collection location)    | X   |                         |
| Loading Site Monitor name/signature                       | X   |                         |
| Truck capacity in cubic yards or tons                     |   | X                       |
| Load Size, either cubic yards (percent of actual) or tons |   | X                       |
| Unloading location  |   | X                       |
| Unloading date/time (arrival at disposal site)            |   | X                       |
| Unloading site monitor name/signature                     |   | X                       |

Figure 11.1 – Debris Monitor Responsibilities for Load Tickets

Each monitor keeps a copy of the load ticket, and the driver/contractor keeps two copies for billing purposes.

In computer-based systems, the collection monitor gathers the same information as in a traditional paper load ticket system and inputs this information into a handheld digital device. The collection monitor gives the hauler the information in a digital format (card or small driver). The monitor, stationed at the DMS or landfill, downloads the information, and completes the transaction in a manner similar to the traditional method. The monitor, stationed at the DMS or landfill, can then print a ticket for the hauler's billing purposes.

## Special Monitoring Issues

The issues described below highlight the need for an applicant to closely monitor large contracted debris clearance, removal, and disposal activities. The issues focus on some of the problems associated with major debris disposal contracts and justify the need to monitor activities at local debris management and final disposal sites. It is essential that applicant's staff work to ensure that the debris removal contractors perform the required services at a reasonable cost.

### ***Equipment***

The most typical unit measurement for vegetative and construction and demolition debris is the cubic yard. Debris trucks are evaluated for capacity at the DMS or final disposal sites. Applicants should require contractors to use appropriate equipment to load debris efficiently so that the maximum level of compaction can be achieved to facilitate expeditious removal of debris from the public rights-of-way.

The photos below illustrate the capacities to which a truck may be loaded.

Figure 11.2 - 100% Loaded Truck

Figure 11.3 - Less Than 100% Loaded Truck

Equipment limitations impact the maximum loading capacity of some vehicles. The following is a list of truck conditions and the eligible capacities.

**Hand-loaded trucks and trailers** cannot achieve compaction levels comparable to mechanically-loaded vehicles. This effectively reduces the capacity of the hand-loaded truck or trailer in comparison to a truck or trailer that is loaded mechanically. Therefore, FEMA only reimburses 50 percent of the debris monitor's observed capacity percentage for a hand-loaded truck or trailer.

Example: If a hand-loaded truck or trailer appears to be 100 percent full and would normally be recorded at 100 percent, that load should be recorded at 50 percent.

Figure 11.4 – Hand-Loaded Trailer

**A truck with no tailgate or no solid tailgate** cannot be compacted to its full capacity; therefore, FEMA only considers a maximum of 85 percent of the certified truck capacity for reimbursement purposes.

Figure 11.5 – Truck With No Tailgate

Figure 11.6 – Truck With No Solid Tailgate

Also, hand loading debris in trucks or trailers does not achieve maximum compaction and as a result debris removal operations take longer to complete. A hand-loaded truck hauls less debris by weight per cubic yard than a mechanically loaded truck.

Applicants should be aware of the differences between hand loading and mechanical loading when negotiating unit costs and should establish standard conversion factors in the contract agreements to address those differences. Refer to Appendix G, *FEMA RP9523.12, Debris Operations - Hand-Loaded Trucks and Trailers*, for additional information about hand-loaded trucks and trailers.

## **Monitoring Tips**

Monitors should be aware of situations that could impact an applicant's reimbursement under the Public Assistance Program. They should be on the lookout for:

**Inaccurate Truck Capacities** - Trucks should be measured before operations and load capacities should be documented by truck number. Periodically, trucks should be pulled out of operation and re-measured by the applicant.

**Trucks Not Fully Loaded** - Do not accept the contention that loads are higher in the middle and if leveled would fill the truck. Monitors may check to see if that statement is valid.

**Trucks Lightly Loaded** - Trucks arrive loaded with treetops (or a treetop) with extensive voids in the load. Trucks need to be loaded to their full capacity with front end loaders or other similar equipment.

**Trucks Overloaded** - Trucks cannot receive credit for more than the measured capacity of the truck or trailer bed even if material is above the sideboards. If a truck is measured to carry 18 cubic yards, it cannot receive credit for more than 18 cubic yards. However, it can receive credit for less if not fully loaded or lightly loaded as described above.

**Changing Truck Numbers** - Normally, trucks are listed by an assigned vehicle number and capacity. There have been occasions where truck or trailer numbers with a smaller carrying capacity have been changed to one with a larger capacity. For instance, a 20-cubic-yard truck may have a number for a truck that can carry 30 cubic yards. This can be detected if the applicant periodically re-measures the trucks or records actual State license plate numbers in addition to a description of the truck. Maintaining truck and trailer certifications with attached photos at the DMS tower can assist in mitigating such activities.

**Reduced Truck Capacity or Increased Truck Weight** - There have been occasions where trucks have had heavy steel grating welded two to three feet above the bed after being measured, thus reducing the capacity or inflating the weight of a load. This can be detected by periodically re-measuring the truck bed or recertifying the truck tare weight.

**Wet Debris When Paid by Weight** - Excessive water added to debris will increase the weight of the load. When the contractual unit cost is based on weight, this increases the cost to the applicant. Contractors have added excessive water to debris loads to increase the weight when being paid by the ton. This can be detected during monitoring if there is excessive water dripping from the truck bed or by inspecting the truck bed immediately after unloading. The applicant should periodically recertify the truck tare weight.

**Multiple Counting of the Same Load** - Trucks have been reported driving through the disposal site without unloading, then re-entering with the same load. This can be detected by observing

the time of departure and time of arrival recorded on the driver's load ticket. This may also indicate problems with the applicant's debris monitors at the loading or unloading site. The debris monitors at the unloading area must ensure the truck is empty before it leaves the DMS.

**Picking up Ineligible Debris** - This is difficult to detect unless debris monitors are watching the pick-up process. Monitors should have a good understanding of eligible debris and any time limits imposed on picking up specific types of debris. Examples (from actual occurrences) include sweeping areas for abandoned cars and white goods, cleaning up illegal dump sites, removing cut trees from subdivisions under development, and removing/cutting trees from off the rights-of-way in rural areas.

### Questions to Consider

1. Do you have a process or a strategy for hiring and training debris monitors? If not, who should develop this strategy?
2. Do you have access to a local labor force qualified to perform these functions?
3. What jurisdictional department will coordinate these efforts?
4. Do you have monitoring report procedures and forms established?

### To Do Checklist

1. Evaluate and identify staff that will lead the monitoring operations.
2. Identify if additional labor will be required for the monitoring operations and how they will be trained.
3. Establish a record management system to be implemented during a disaster event. The record management system will include:
  - a. Labor and equipment timesheets
  - b. Labor and benefit rates
  - c. Personnel pay policy

- d. Invoices
- e. Load tickets
- f. Load ticket summaries
- g. All other field documentation that may be required for eligibility considerations.
- h. Staff to organize labor and equipment timesheet

## Chapter 12 – Planning for Private Property Debris Removal and Demolition

### Chapter Highlights

Labor Resources  
Condemnation Criteria and Procedures

- Legal Documentation for Demolition
- Demolition Permitting
- Inspections

Special Use Areas

- Mobile Home Park Procedures
- Navigation Hazard Removal

Questions to Consider  
To Do Checklist

Private property debris removal (PPDR) and/or demolition is not common. Public jurisdictions may undertake PPDR and demolition in extreme cases where public health, life, safety, and the economic recovery of the community-at-large are at risk. The planning staff should establish procedures for this type of work in the event this becomes necessary. The planning effort for PPDR and demolition includes the following:

- Criteria for implementing PPDR and demolition operations
- Documentation requirements and procedures
- Inspection and demolition procedures

Throughout the planning process, the staff needs to establish how the private property owner will be included in decisions and operations.

Appendix G, *FEMA DAP9523.13, Debris Removal from Private Property*, and *FEMA DAP9523.4, Demolition of Private Structures*, set forth the FEMA eligibility criteria and requirements that the planning staff should consider when developing the PPDR and demolition strategy.

### Labor Resources

Demolition and debris removal from private property is an extremely document- and labor-intensive operation. The planning staff is responsible for assigning tasks to the appropriate departments and labor forces.

Typically, the building safety or inspection section takes the lead during these operations, with the administrative staff collecting and logging all of the required documents. The planning staff may consider employing temporary personnel or contractors for any portion of the operation.

## Condemnation Criteria and Procedures

When an applicant assumes the responsibility to demolish structures, it must comply with its normal condemnation procedures. This normally requires a building safety official to contact the homeowner and assess and determine building structural integrity.

The applicant's normal building safety assessment should be used for the disaster condemnation criteria as well. Typically, any building or structure may be condemned if the building official determines that it represents a hazard to the health and safety of the public or poses a threat to public rights-of-way. Following that determination, the applicant would then initiate condemnation proceedings.

Usually, owner notification and condemnation hearings are held in order to give the property owner time to correct the threat without government action. In some cases, liens are secured in order for jurisdictions to enforce the condemnation order. In this case, if the applicant performs the work, executing liens against the property allows the applicant to recoup the costs of demolition and debris removal from the property owner.

The applicant's normal procedures that require multiple notices to property owners, condemnation hearings, and liens may be expedited in the event of a catastrophic disaster that causes a high concentration of debris on private property over a widespread area presenting an immediate health and safety hazard.

In the event of a disaster, it is helpful to have the applicant's laws, regulations, legal notices, and forms within the debris management plan, for reference and use. The planning staff should review the condemnation criteria and procedures for the benefit of the debris management plan.

### ***Legal Documentation for Demolition***

An applicant usually has standard procedures that apply to its condemnation process. During the planning process, the applicant may have its legal counsel review and update any documents for inclusion within the plan.

The following is a general list of documents that may be included in the plan.

- **Verification of ownership** ensures that the proper site and owner are identified and the owner is aware of nature of the scheduled building assessment.
- **A right-of-entry form** is signed by the homeowner and allows the building official to enter the property to complete the assessment. It often contains a hold harmless agreement that documents the property owner's promise that he or she will not bring legal action against the applicant if there is damage or harm done to the property.

- **Building official assessment** is the documentation of the damage to the structure and the description of the threat to public health and safety. This assessment often contains the building official's determination as to whether the structure should be condemned and whether it should be repaired or demolished. This may be an official structural assessment.
- **Verification of insurance information** allows the applicant to pursue financial compensation if the property owner's homeowner insurance policy covers demolition and debris removal.
- **Archeological review** outlines the archeological low-impact stipulations for demolition and debris removal activities and highlights the implications for the applicant if they fail to comply with the guidelines.
- **Environmental review** ensures that adverse impacts to protected environmental resources are minimized or avoided when removing debris from the proposed site. These reviews should be acceptable to the appropriate resource agency. Wetlands and other water resources, hazardous materials, and endangered species habitats are among the resources of most frequent concern. Some jurisdictions may also have State or local requirements for the evaluation or assessment of impacts to natural resources.
- **SHPO review** confirms that SHPO has been notified and correspondence has been received absolving the area of any historic significance.
- **Photos** that show the disaster-damaged condition of the property prior to the beginning of the demolition work. This is generally one or more labeled pictures that confirm the address and identified scope of work on the property.

If it is determined that a structure needs to be demolished, additional documentation may be required, not only for the applicant's legal protection, but also for the public's health and safety during the demolition and debris removal operations.

- **Letter or notice of condemnation** is a document signed by the building official that outlines the specific threat to public safety and health.
- **Notice of demolition** is issued to inform the property owner when the demolition will begin; notices shall be posted so as to provide a reasonable period of time in order for personal property to be removed. The applicant should attempt to notify the property owner, if not already contacted, through direct mail and local media.
- **Notice of intent to demolish** is normally for the public health and safety of the neighboring residents. This notice is conspicuously posted on the structure to be demolished.

## ***Demolition Permitting***

Applicants may have a demolition permitting process in place. The planning staff may want to use those demolition permit requirements during a disaster-related demolition project.

Common requirements for obtaining a demolition permit include a demolition plan, public notification, inspection requirements, and a hazardous waste report.

The demolition strategy may require the following information:

1. **Site map**, to scale, showing the site with all structures and other features of interest.
2. **Site ingress and egress** showing the fronting streets and planned route for the project. This may also include a movement of traffic strategy. Normal traffic will need to be diverted into other lanes.
3. **Site preparation documents** illustrate any pre-demolition work that may be required. Examples include erosion control, vegetation removal, or utility pole adjustments.
4. **Staging strategies** show the sequence of events prior to, during, and after demolition of the structure.
5. **Hazardous waste handling requirements** detail if contents of the structure require dust suppression or wet demolition. These provisions also describe how hazardous waste or environmentally sensitive materials will be handled or disposed. This includes HHW and white goods. Asbestos requires specialized removal, handling, and disposal personnel and permits.

Special documents or strategies may be required if the demolition of the building involves shoring, stabilizing structures, or any other special circumstances that may jeopardize another structure or the public's health and safety.

Once it has been established that the building is to be demolished and the required processes are underway, a notification to demolish notice is posted on the building.

## ***Inspections***

The applicant normally conducts regular inspections of demolition sites a few days prior to, the day of, during (occasionally), and upon completion of the operations. Inspectors generally take photographs at each site visit for their records. These inspections and verifications generally include the following:

1. **Water and sewer/septic tank inspection** to verify the utilities have been terminated and isolated from the proposed sphere of influence during the demolition operations. The inspector normally verifies that all other utilities have been terminated during the same visit.

2. **Occupancy inspection** is conducted immediately prior to demolition to ensure that no one is physically in the building.
3. **Open void inspection** is performed if the structure has a basement that is to be filled. This inspection will be conducted once the above-grade structure is gone and the inspector can visually see the entire below-grade excavation.
4. **Post-demolition inspection** is completed once the structure is demolished, the debris is removed, and the site graded.

The applicant usually requires that a hazardous materials report be submitted to the State environmental protection agency. This report normally includes a description of any hazardous material that was found in the building, the means and measures to collect it, and the final disposal location of the hazardous waste.

A checklist that may be used for demolition activities is available in Appendix F, *Demolition Checklist*.

## **Special Use Areas**

The discussion so far has pertained to fairly low density situations, such as single-family homes or businesses on individual sites. Planning staff may need to consider specific areas of their jurisdiction that require additional planning and coordination for debris operations. Mobile home parks and navigation hazards present intense and sometimes complicated obstacles for the debris operations.

### ***Mobile Home Park Procedures***

Higher density situations, specifically mobile home parks, create an extensive amount of mixed debris in a relatively small area. The planning staff may consider the same procedures for individual sites as a basis to be used in mobile home parks but should expect a more intense operation in all accounts of the operation.

The most complex aspect of the operation may be documenting legal responsibility within the parks. Sometimes the mobile home park site is owned, operated, and maintained by one or more parties. The individual homes may be owned by one of those same parties or by the individuals that occupy the structures.

As part of the planning exercise, the planning staff may investigate the legal responsibility for debris issues within the mobile home parks within its jurisdiction. The applicant should coordinate the potential PPDR and demolition operations with the park owners in order to expedite recovery after an event. Agreements need to be made with respect to the debris collection, location, separation of materials, and the amount of debris expected to be handled.

### ***Navigation Hazard Removal***

Damage to publicly-owned marinas caused by a major disaster can include abandoned sunken boats and other debris that may impede navigation. The procedures used for individual sites may be modified for this situation.

The applicant should coordinate with USCG, the State marine patrol, local government agencies, legal counsel, marine salvage contractors, commercial divers, and certified surveyors to ensure that navigation hazards are removed safely and efficiently.

The two main challenges with navigation hazards are locating the debris and finding legal owners. Marinas can be inspected visually by a helicopter or boat. Sonar or dive teams may need to be employed for submerged vessels. A location or flotation marker may be helpful in order to keep vessel positions documented. The legal owner's information may be obtained by using the vessel's registration number and marina records.

#### **Questions to Consider**

1. How do your laws, codes, and ordinances address entering and condemning private property?
2. What are your emergency police powers as they relate to demolishing private property?
3. Who is responsible for enforcing the existing laws, codes, and ordinances with regard to private property?
4. How do you (the applicant) protect yourself from legal action when taking action on private property?

#### **To Do Checklist**

1. Review, assess, and revise laws, codes, and ordinances to address emergency demolition activities.
2. Assign a primary point of contact to manage the demolition and private property debris removal operations.

## Chapter 13 – Health and Safety Strategy

Applicants should include a health and safety strategy in the overall debris management plan. This enables applicants and their contractors to avoid accidents during debris recovery operations and to protect workers from exposure to hazardous materials. The health and safety strategy should establish minimum safety standards for the applicant and contractor personnel to follow.

To facilitate cooperation between applicant and contractor employees, the health and safety strategy should specify how the applicant will disseminate safety information to all emergency workers and how the applicant will monitor compliance with the minimum safety standards. The strategy should also include specific corrective actions to be taken if workers do not comply with the minimum safety standards.

The health and safety strategy should identify potential hazards at debris loading areas and DMS. Debris operations involve the use of heavy equipment to move and process various types of debris. Many of these actions can pose safety hazards to emergency response and recovery personnel and the public. In addition to those safety hazards, exposure to certain types of debris, such as building materials that contain asbestos and mixed debris that contains hazardous materials, can pose potential health risks to emergency workers.

The health and safety strategy should provide emergency workers with information on how to identify hazardous conditions and specific guidelines on the appropriate and proper use of personal protective equipment.

## Chapter 14 – Public Information Strategy

### Chapter Highlights

Assignment of Tasks

Information to be Included

- Collection
- Debris Management Sites

Distribution Strategy

- Update and Redistribution
- Debris Information Center

To Do Checklist

After a disaster, residents want answers regarding recovery operations. The goal of the public information strategy is to ensure that the residents are given accurate and timely information for their use and own individual planning purposes. If information is not distributed quickly, rumors and misinformation spread and erode confidence in applicant management of the recovery operations.

### Assignment of Tasks

The public information strategy should assign staff the following tasks:

- Prepare information to be distributed.
- Process to distribute the information.
- Process to update, correct, revise, and redistribute information as operations progress.
- Establish a debris information center or a venue to address all concerns, questions, and complaints.

### Information to be Included

The information should include the parameters, rules, and guidelines of debris operations so residents can begin their personal recovery activities. The staff responsible for developing and writing the information must present the information in a clear, direct, and organized manner. The language used must be simple and easy for all residents to understand. Jargon and acronyms only lead to confusion and are ineffective. Information may have to be distributed in more than one language for it to be understood by non-English-speaking populations and neighborhoods.

The public information campaign answers the same questions addressed during the debris management planning process. The following is a list of topics that should be included within the campaign.

### **Collection**

How will the debris be collected?

If curbside collection:

- Will applicant employees or a contractor collect the debris?
- What are the schedules and the routes for collection?
- What is the final collection date for streets, sectors, or subdivisions?
- What type of debris will be collected?

If collection centers:

- Where are the collection centers?
- What are the daily collection center hours?
- Is debris to be segregated at the collection centers?
- What types of debris will be accepted at the centers?
- How long will the collection centers accept disaster-related debris?

### **Debris Management Sites**

A collection center and a DMS may be the same site. If so, the same information for the collection centers above applies to the DMS, along with:

- Where can a resident find a site map of the DMS for public debris drop off of HHW, construction and demolition debris, etc? Are these areas segregated and well marked for vehicular traffic?
- Will residents be charged a fee to use the DMS?
- Will residents be restricted as to how much disaster-related debris can be dropped off at the DMS?
- Will the DMS have burning, chipping, or grinding operations? If so, during which hours will these activities take place? Address any environmental concerns the public may have as well.
- How long will residents be able to bring their disaster-related debris to the DMS?
- How long will the DMS be open to process (reduce/recycle) debris?
- Are there traffic changes that will impact the general public due to the location or operation of the DMS?

## **Distribution Strategy**

The public information strategy should include its methods to disseminate the prepared information to the general public. This can be accomplished in a number of ways. The following are suggested vehicles for distributing the information:

- **Media** – Local television, radio, newspapers, or community newsletters.
- **Internet Site** – Applicant website and debris information flyers for printing.
- **Public Forums** – Interactive meetings at town hall or shopping mall kiosks.
- **Direct Mail Products** – Door hangers, direct mail, fact sheets, flyers within billings, and billboards.

The public information staff must take advantage of every information vehicle available if power, utilities, and other infrastructure have been damaged. Many times the best carriers of information are the responders in the field. The general public recognizes their role and frequently asks questions regarding the operations. Stocking the equipment and trucks with flyers, pamphlets, and other print media allows responders to perform their duties while also satisfying the public's need for information.

### ***Update and Redistribution***

Residents hold community leaders responsible for misinformation and slow progress if information is not routinely updated to remain current and accurate. The planning staff must consider how the public information strategy addresses changes and revisions as the debris removal operations progress. The changes in operations directly affect how often information to the general public is distributed.

During the early stages of the operations, the applicants may rely on the immediate transmission of the information, such as through radio and television, to update the general public regarding the debris removal operations. Once the operations become more routine and predictable, the information can be distributed through the print media, such as newspapers, mailings, and flyers.

### ***Debris Information Center***

Applicants should establish a temporary debris information center to address concerns and complaints, and answer questions that are not included in the public information campaign at-large. The platform for the debris information center may be personal interactions at city hall, a telephone hotline, internet site, or a specific post office box. Regardless of the venue, it is important for applicants to address the residents' concerns, complaints, and questions in a timely and efficient manner.

The feedback from the information center gives the management staff an indication of how effective and efficient the operations are progressing. The management staff may use this information to adjust operations appropriately.

The debris information center may also be utilized to report fraud. Disaster victims want a full and quick recovery and have little tolerance of being taken advantage of during an already trying time. The ability to report fraud and crime is important to the public's feeling of safety and well being when the applicant's law and code enforcement agencies are stretched thin. Applicants should take advantage of residents' eyes and ears after a disaster event and provide an outlet for reporting crime and fraud within the recovery operations.

### **To Do Checklist**

Assign staff to:

1. Prepare debris removal operations information.
2. Establish a process and strategy to distribute the information.
3. Update, correct, revise, and redistribute information as operations progress.
4. Establish and staff a debris information center.

---

## **PART III – FEDERAL GOVERNMENT OPERATIONS**

---

## Part III – Federal Government Operations

### Introduction

Part III describes the Public Assistance staff organization and the other Federal agencies' debris-related roles and responsibilities for disaster events.

FEMA's Public Assistance staff will assemble a debris management team for the size and scope of the disaster. This team is responsible for providing debris-related technical assistance to applicants and managing the Public Assistance grant process. Chapter 15, *FEMA Public Assistance Operations*, describes the staff organizational structure and the roles and responsibilities of each staff member.

Chapter 16, *Other Federal Assistance*, provides an overview of additional Federal agencies' roles and responsibilities for disaster-related debris activities. This chapter also describes FEMA Mission Assignments that may be tasked to other Federal agencies.

## Chapter 15 – FEMA Public Assistance Operations

### Chapter Highlights

Public Assistance Organizational Structure

Public Assistance Staff Roles and Responsibilities

- Infrastructure Branch Director
- Public Assistance Group Supervisor
- Public Assistance Debris Task Force Leader
- Public Assistance Coordinator Crew Leader
- Public Assistance Debris Technical Specialist
- Public Assistance Debris Monitoring Specialist
- Additional Support for the Public Assistance Organization

Debris Operations Strategy

FEMA’s Public Assistance Program goal during recovery operations is to supply staff and technical support to the applicants for the timely, efficient, and accurate production of Public Assistance grants. This is accomplished by the Public Assistance staff fulfilling their established roles and responsibilities and following the disaster-specific Debris Operations Strategy.

This chapter gives an overview of the organizational structure used by the Public Assistance organization, a summary of roles and responsibilities for the Public Assistance debris staff, and a general outline of the Debris Operations Strategy that will be developed by the debris management team.

### Public Assistance Organizational Structure

FEMA Public Assistance follows a staffing organization called Incident Command System (ICS) that allows the Public Assistance organization to expand and contract depending on need. ICS defines the nomenclature, roles, and responsibilities of the staff members in order to ensure consistency across disasters. The following organization chart illustrates one example of staff organization under ICS.

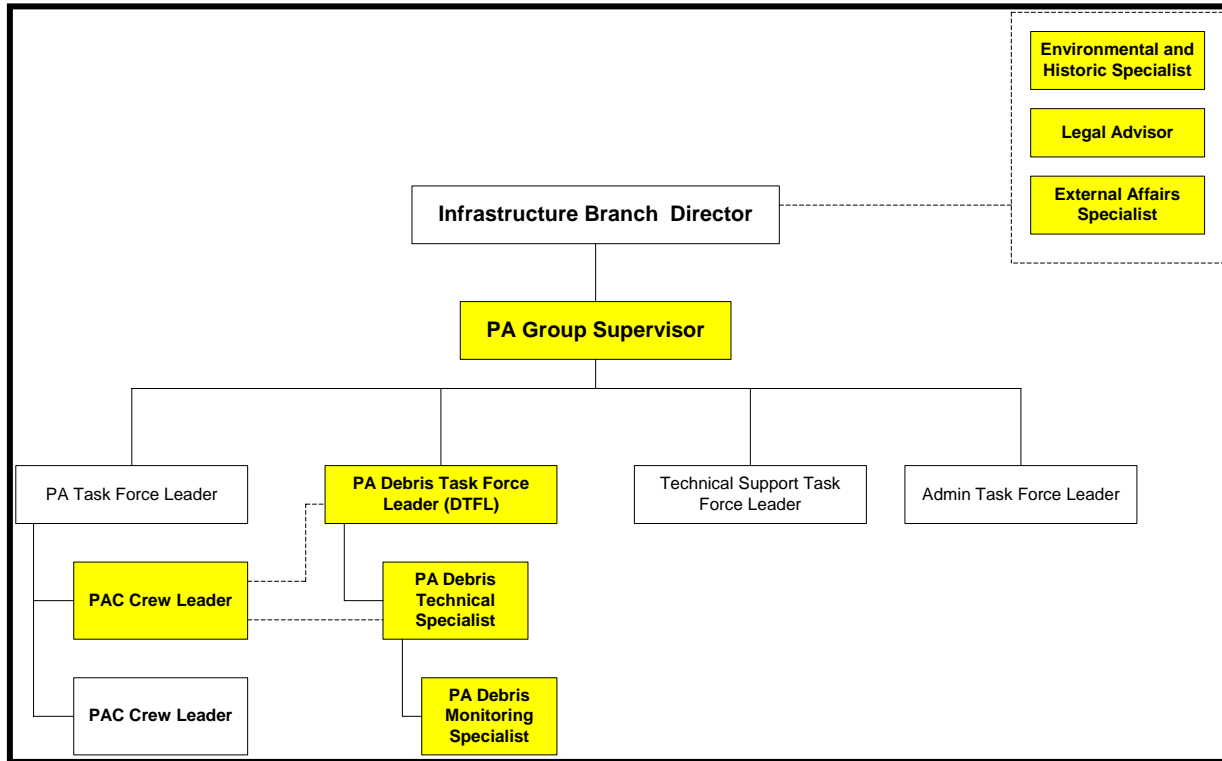

Figure 15.1 – Example Public Assistance Organization Chart

## Public Assistance Staff Roles and Responsibilities

The amount of staff depends on the size and severity of the disaster. The Public Assistance staff roles and responsibilities are outlined in the descriptions below.

### ***Infrastructure Branch Director***

The Infrastructure Branch Director coordinates the restoration of essential public services and administers the Public Assistance Program. The Infrastructure Branch Director is responsible for:

- Identifying cross-programmatic issues and facilitating coordinated problem solving among the Program areas
- Requesting assistance outside of the Public Assistance Program to include supplemental Federal assistance in the form of Mission Assignments, to be completed by supporting Federal agencies

### ***Public Assistance Group Supervisor***

The Public Assistance Group Supervisor manages the overall Public Assistance Program. The Public Assistance Group Supervisor is responsible for:

- Identifying major debris issues and applicants with potential debris problems based on the Preliminary Damage Assessment (PDA) and in coordination with the State Public Assistance Group Supervisor
- Ensuring and approving the development of a Public Assistance Debris Operations Strategy
- Obtaining staffing resources to assist in managing debris operations (e.g. a Public Assistance Debris Task Force Leader and an appropriate number of Public Assistance Debris Technical Specialists and Public Assistance Debris Monitoring Specialists)
- Providing the Debris Task Force Leader with guidance and direction on problems, procedures, and policies pertaining to debris operations
- Coordinating debris-related Mission Assignments
- Advising the Infrastructure Branch Director on potential debris issues
- Allocating and approving the proper funding levels

### ***Public Assistance Debris Task Force Leader***

It is the responsibility of the Public Assistance Debris Task Force Leader (DTFL) to manage the debris operations under the direction of the Public Assistance Group Supervisor. The DTFL is responsible for:

- Ensuring that a Debris Operations Strategy is developed and implemented
- Providing applicants with technical assistance by conducting technical reviews of debris management plans and contracts to document compliance with the requirements of the Public Assistance Program eligibility criteria
- Assigning personnel to assist the applicant in developing the eligible debris scope of work for Public Assistance grants
- Coordinating with the Legal Advisor to review proposed debris-related contracts provided by applicants
- Managing all debris field staff
- Ensuring all of the debris field staff are properly trained
- Providing Public Assistance Coordinator Crew Leaders with information concerning procedures and policies pertaining to debris operations
- Coordinating debris-related Mission Assignments

- Reporting all potential debris issues to the Public Assistance Group Supervisor
- Compiling and submitting reports on debris operations to the Public Assistance Group Supervisor and the Infrastructure Branch Director

### ***Public Assistance Coordinator Crew Leader***

A Public Assistance Coordinator (PAC) Crew Leader is a customer service manager who works with the applicants to ensure that all applicants' Public Assistance grants are processed as efficiently as possible. The DTFL and Public Assistance Debris Technical Specialist keep the PAC Crew Leader informed of debris eligibility concerns. The PAC Crew Leader is responsible for:

- Serving as an applicant's single point of contact concerning eligibility considerations and Public Assistance grant status
- Coordinating and communicating with the Public Assistance Debris Technical Specialist and DTFL for the assigned applicants' debris issues
- Identifying debris issues during the Kickoff Meeting
- Educating the applicant on the availability of Public Assistance grants for debris operations
- Assisting the applicant in establishing priorities
- Managing resources and coordinating with debris staff on Public Assistance Program issues

### ***Public Assistance Debris Technical Specialist***

The Public Assistance Debris Technical Specialist provides applicants technical assistance and support for debris management issues and for the applicants' debris Public Assistance grants. The Public Assistance Debris Technical Specialist is responsible for:

- Estimating quantities of debris
- Collecting monitoring information from the Public Assistance Debris Monitoring Specialists in the field
- Formulating, developing, and writing the Public Assistance grants
- Recommending eligibility of debris projects within the Public Assistance grants
- Managing the Public Assistance Debris Monitoring Specialists
- Informing the PAC Crew Leader and DTFL of potential debris issues
- Supplying debris-related reports and progress updates to the DTFL

### ***Public Assistance Debris Monitoring Specialist***

The Public Assistance Debris Monitoring Specialist is responsible for monitoring and documenting debris removal activities in accordance with the debris monitoring strategy, and issues that may impact compliance with the rules and regulations that pertain to FEMA-funded activities. The Public Assistance Debris Monitoring Specialist is specifically responsible for:

- Recording quantities of debris accurately on load tickets and other documentation that may be outlined in the Debris Operations Strategy
- Completing reports such as daily logs, load tickets, incident reports, periodic reports, photographs, and sketches
- Coordinating with the applicant and contractor on daily operations
- Supplying completed paperwork
- Requesting necessary resources from the Public Assistance Debris Technical Specialist

### ***Additional Support for the Public Assistance Organization***

Other support may be available to assist the Public Assistance Group Supervisor and DTFM with technical, legal, and information issues.

- **Environmental and Historic Specialists** provide technical assistance to Public Assistance staff, management, and the applicant on environmental and historic preservation considerations for debris operations. These specialists research environmental and historic preservation compliance regulations and requirements for Public Assistance staff and applicant briefings. They coordinate with the PAC Crew Leader and Public Assistance Debris Technical Specialist to conduct site visits in order to identify potential environmental and historic preservation site considerations. Additional tasks include recommending eligibility determinations and supplying cost estimates for environmental and historic preservation compliance. Environmental and Historic Specialists provide documentation, comments, and recommendations for any Public Assistance grant that may have environmental and/or historical preservation issues that could impact the grant funding.
- **Legal Advisors** provide legal review and recommendations on issues that may impact the Public Assistance grant process, along with interpretation of Public Assistance regulations and policies. They review proposed and active debris contracts, right of entry permits, and hold harmless agreements. The legal advisors also provide counsel to the Public Assistance staff on such issues as land acquisition, condemnations, insurance requirements, liability, duplication of benefits, and environmental and historic preservation.

- **External Affairs Specialists** are responsible for all of the Public Assistance communications to outside media outlets including newspapers, radio, television, and the internet. The External Affairs Specialists coordinate with the Infrastructure Branch Director, Public Assistance Group Supervisor, and DTFL to clearly communicate debris policy, decisions, and initiatives.

## Debris Operations Strategy

The most common tool used to accomplish FEMA’s Public Assistance debris operations goal is the development and implementation of a Debris Operations Strategy. The Debris Operations Strategy is used to identify issues, assign the appropriate amount of staff, and report progress throughout the recovery efforts. It is a dynamic document meant to be updated to reflect the ongoing progress of the recovery operation and document debris-related decisions.

The DTFL is responsible to ensure the Debris Operations Strategy is written and implemented accordingly. The size and severity of the disaster dictates how detailed the strategy should be. Most strategies include the following key elements:

1. Situational analysis
2. Estimated quantities of debris, which may include specific types of debris
3. Specific debris-related eligibility issues, to include identification and resolutions
4. Concept of operations, to include staffing, goals, and reporting
5. Outline of Public Assistance grant development and routing process within the Public Assistance field office
6. Mission Assignment reporting and any other interagency coordination processes (if applicable)
7. Safety strategy for debris operations. Appendix E, *Debris Collection and Management Site Hazard Analysis*, contains information on safety considerations.

## Chapter 16 – Other Federal Assistance

### Chapter Highlights

#### Authorities of Federal Agencies

- United States Army Corps of Engineers
- United States Coast Guard
- United States Department of Agriculture’s Natural Resources Conservation Service
- Environmental Protection Agency
- Federal Highway Administration

#### FEMA Mission Assignments

- Federal Agencies that Perform Mission Assignments
- Requirements
- Process
- Types of Mission Assignments
- Scope of Work
- Costs

Federal assistance may be available from other Federal agencies and departments in two different ways:

1. Another Federal agency is invested with the authority to address various aspects of debris-related work;
2. FEMA tasks another Federal agency or department with a debris-related Mission Assignment to accomplish the work.

These two types of assistance are distinct and separate. For example, the USCG has the authority to coordinate the removal of navigational hazards within their jurisdictional boundaries; therefore, the USCG would not be issued a FEMA Mission Assignment to complete the same work.

This chapter provides a general description of some of the Federal agencies and departments that provide debris-related work and provides a summary of Mission Assignments.

### Authorities of Federal Agencies

There are Federal agencies and departments, other than FEMA, that have the authority to remove debris and/or coordinate and manage debris-related activities for their specific jurisdiction.

The following describes several Federal agencies' normal responsibilities and their debris-related authority and/or jurisdiction.

### ***United States Army Corps of Engineers***

USACE's mission is to provide design and management services for the construction of military facilities for the army and air force; design and construction management support for other defense and Federal agencies; and planning, design, construction, and operation of water resource and other civil works projects. USACE's authorities for debris-related activities include:

- Developing projects for the collection and removal of drift and debris from publicly maintained commercial harbors and from land and water areas immediately adjacent thereto.
- Continuing debris collection programs for five specific harbors of the United States.
- Removing sunken vessels or other obstructions from navigable waterways under emergency conditions.

Please see Appendix G, *FEMA RP9524.3, Policy for Rehabilitation Assistance for Levees and Other Flood Control Works - Decision Tree*, for further information.

### ***United States Coast Guard***

USCG is a military, multi-mission, maritime service within the Department of Homeland Security and one of the nation's five armed services. USCG has five fundamental roles: maritime safety, maritime security, maritime mobility, national defense, and protection of natural resources.

USCG is tasked to conduct the following debris-related activities in coordination with EPA:

- Conduct emergency removal of oil and hazardous materials from coastal zones.
- Coordinate removal of navigational hazards.
- Provide technical assistance on contaminated debris in coastal zones.

### ***United States Department of Agriculture's Natural Resources Conservation Service***

NRCS, formerly called the Soil Conservation Service, provides technical and financial assistance to private land owners, land users, communities, and units of State and local governments in planning and implementing conservation systems in an effort to conserve soil, water, and other natural resources.

NRCS is limited in its authority in that debris-related activities are limited to either runoff retardation or soil erosion prevention in response to a sudden impairment in the watershed which creates an imminent threat to life or property. Typically, this includes debris within, or close proximity to, a channel.

### ***Environmental Protection Agency***

EPA's role is to establish minimum regulatory standards that are, in most cases, implemented by the State, and to provide technical assistance. EPA administers other laws as well that may impact the management of debris.

EPA's primary authorities related to debris removal fall into two categories:

- Cleaning up debris that is mixed with or contains oil or hazardous materials in coordination with the USCG.
- Establishing a standard for proper management of debris.

### ***Federal Highway Administration***

FHWA provides Federal financial resources and technical assistance to State and local governments for constructing, preserving, and improving the National Highway System. FHWA has an Emergency Relief (ER) Program to support the repair or reconstruction of Federal-aid highways and roads on Federal lands which have suffered damage as a result of natural disasters or catastrophic failures from an external cause.

FHWA's authority for debris-related activities is limited to debris removal and disposal within their jurisdiction when the ER Program is activated.

Please see Appendix G, *FEMA RP9580.202, Fact Sheet: Debris Removal – Authorities of Federal Agencies*, for additional information.

## **FEMA Mission Assignments**

When an impacted State or local government does not have the capability required to respond to a Presidentially declared disaster, a request for Technical or Direct Federal Assistance may be made. The approved request is called a Mission Assignment. A Mission Assignment is a work order issued by FEMA to another Federal agency directing completion of a specific assignment in anticipation of, or response to, a Presidential declaration of a major disaster or emergency.

### ***Federal Agencies that Perform Mission Assignments***

FEMA-issued Mission Assignments are performed by teams established by the National Response Plan (NRP). The NRP is a structured strategy that aligns Federal agencies and

departments to respond to disasters. These Federal teams are called Emergency Support Functions (ESF).

There are two ESFs that perform debris-related activities under FEMA Mission Assignments:

- **ESF #3 – Public Works and Engineering** is responsible for infrastructure protection, emergency repair, and restoration. This group provides engineering services and construction management, and serves as a critical infrastructure liaison. USACE is the lead agency for ESF #3.
- **ESF #10 – Oil and Hazardous Material Response** is responsible for responding to oil and hazardous material issues, environmental safety, and short- and long-term cleanup. The two most commonly deployed agencies that deal with these debris-related activities are EPA and USCG.

### ***Requirements***

All Mission Assignments have the following requirements:

- The Mission Assignment must be requested by the State.
- The community must demonstrate that the required disaster-related efforts exceed State and local resources.
- The scope of work must include specific quantifiable measurable tasks.
- FEMA issues mission assignments.

### ***Process***

The process to request and utilize Mission Assignments is as follows:

- The community demonstrates the work is beyond its capabilities.
- The State makes a formal request to FEMA for the Mission Assignment.
- FEMA reviews the request, and if approved, assigns it to a Federal agency.
- FEMA assigns qualified staff to coordinate and monitor the Mission Assignment activities.
- The assigned agency performs the scope of work included within the Mission Assignment.
- The assigned agency submits a bill to FEMA upon completion.
- FEMA informs the State of the required cost share.

## ***Types of Mission Assignments***

There are two types of Mission Assignments related to debris operations: Technical Assistance and Direct Federal Assistance.

### **Technical Assistance**

Technical Assistance Mission Assignments are available when the State, tribe, or local community lacks technical knowledge or expertise to accomplish an eligible task. Technical assistance may be authorized in anticipation of a declaration of a major disaster or emergency. Eligible debris-related assistance provided through Technical Assistance includes assisting the State and/or applicants in the development of its overall debris management plan, and may include developing DMS plans, monitoring strategies, load ticket processes, and contracting guidelines. Technical Assistance is provided at 100 percent Federal share.

### **Direct Federal Assistance**

Direct Federal Assistance Mission Assignments allow a Federal agency to perform debris activities on behalf of the State or applicant. Direct Federal Assistance Mission Assignments apply only to Emergency Work (debris removal and emergency protective measures) and must meet the general FEMA eligibility criteria for Emergency Work. Federal agencies must comply with all applicable regulations, laws, policies, requirements, and procedures.

An additional requirement for Direct Federal Assistance is that the State must provide a letter giving the Federal agency debris removal authority.

### ***Scope of Work***

In order to prepare the scope of work for a Mission Assignment, the community must provide information to the State about the specific geographic locations or easily definable areas where debris is located as well as estimated types and volumes of debris. The scope of work should be defined for FEMA's consideration.

Eligible debris-related activities provided by Direct Federal Assistance include:

- Removing debris from critical roadways and facilities.
- Removing debris from curbsides or from eligible facilities and hauling it to either temporary or permanent disposal sites.
- Identifying, designing, operating, and closing DMS.
- Monitoring debris removal operations.
- Demolishing and/or removing disaster-damaged structures and facilities in accordance with FEMA regulations and policies.

The duration of Mission Assignments for debris removal is limited to 60 days from the disaster declaration date. The time frame may be extended only under extenuating circumstances pursuant to 44 CFR Part 206.208(d).

### **Costs**

Direct Federal Assistance Mission Assignments are subject to the cost-sharing provisions applicable to the disaster. The State will agree in advance to reimburse FEMA for the appropriate non-Federal share of the work including the overhead of the Federal agency assigned the Mission Assignment.

### **100 Percent Funding for Direct Federal Assistance**

In some cases, the President may authorize 100 percent Federal funding for emergency work or debris removal.

FEMA will provide at 100 percent Federal share the cost of actual debris clearance and/or removal accomplished, not **Mission Assignment task orders** initiated, during the designated period. This includes debris clearance, pickup, hauling, processing, and disposal activities FEMA authorizes during the designated period. If further Federal assistance is necessary for debris clearance or removal after the designated period, the prevailing cost-share rate for that particular disaster applies.

See *FEMA RP9523.9, 100% Funding for Direct Federal Assistance and Grant Assistance*, for additional information.

## Terms Used in This Document

**Chipping or Mulching** - The process of reducing woody material, such as lumber and vegetative debris, by mechanical means into small pieces to be used as mulch or fuel. Woody debris can be reduced in volume by approximately 75 percent, based on data obtained during reduction operations. The terms “chipping” and “mulching” are often used interchangeably.

**Construction and Demolition Debris (C&D)** - The definition of construction and demolition debris may vary between States. Construction and demolition debris can be defined as damaged components of buildings and structures such as lumber and wood, gypsum wallboard, glass, metal, roofing material, tile, carpeting and floor coverings, window coverings, pipe, concrete, fully cured asphalt, equipment, furnishings, and fixtures.

**Debris** - Items and materials broken, destroyed, or displaced by a natural or man-made Federally declared disaster. Examples of debris include, but are not limited to, trees, construction and demolition material, and personal property.

**Debris Clearance** - Clearing roads by pushing debris to the roadside to accommodate emergency traffic.

**Debris Management Site (DMS)** - A location where debris is sorted, processed, reduced in volume, and/or disposed of (if debris management activities take place at a permanent disposal site).

**Debris Removal** - Picking up debris and taking it to a debris management site, composting facility, recycling facility, permanent landfill, or other reuse or end-use facility.

**Demolition** - The act or process of reducing a structure, as defined by State or local code, to a collapsed state. It contrasts with deconstruction, which is the taking down of a building while carefully preserving valuable elements for reuse.

**Force Account Labor** - Labor performed by the applicant’s permanent, full time, or temporary employees.

**Garbage** - Waste that is regularly picked up by an applicant. Common examples of garbage are food, packaging, plastics, and papers.

**Hazardous Waste** - Waste with properties that make it potentially harmful to human health or the environment. Hazardous waste is regulated under the Resource Conservation and Recovery Act (RCRA). In regulatory terms, a RCRA hazardous waste is a waste that appears on one of the four hazardous wastes lists or exhibits at least one of the following four characteristics: ignitability, corrosivity, reactivity, or toxicity.

**Hold Harmless** - Generally, a contractual arrangement whereby one party agrees to hold the other party without responsibility for damage or other liability incurred as a result of a particular action or transaction.

**Household Hazardous Waste (HHW)** - Used or leftover contents of consumer products that contain chemicals defined in regulatory terms under the Resource Conservation and Recovery Act as appearing on one of the four hazardous waste lists or exhibiting one of the following characteristics: ignitability, corrosivity, reactivity, or toxicity. Examples of household hazardous waste include small quantities of normal household cleaning and maintenance products, latex and oil based paint, cleaning solvents, gasoline, oils, swimming pool chemicals, pesticides, and propane gas cylinders.

**Infectious Waste** - Waste capable of causing infections in humans, including contaminated animal waste, human blood and blood products, isolation waste, pathological waste, and discarded sharps (needles, scalpels, or broken medical instruments).

**Legal Responsibility** - In the context of debris management, a statute, formally adopted legal code, or ordinance that gives local government officials responsibility to perform work on public and/or private property.

**Debris Monitoring** - Actions taken by applicants in order to document eligible quantities and reasonable expenses during debris activities to ensure that the work complies with the contract scope-of-work and/or is eligible for Public Assistance grant reimbursement.

**Mutual Aid Agreement** - A written understanding between communities and States obligating assistance during a disaster. See *FEMA RP9523.6, Mutual Aid Agreements for Public Assistance and Fire Management Assistance*.

**National Response Plan (NRP)** - A plan developed to facilitate the delivery of all types of Federal assistance to States following a disaster. It outlines the planning assumptions, policies, concept of operations, organizational structures, and specific assignments and agencies involved in Federal assistance to supplement State, tribal, and local efforts.

**Outbuilding** - Any structure secondary to a house such as a barn, shed, or outhouse separated from the main structure.

**Piggyback Contract** - Term used to describe a type of goods or services procurement. A piggyback contract is a contract let by a government entity which is adopted and extended for use by another government entity.

**Recycling** - Activities by which discarded materials are collected, sorted, processed, and converted into raw materials and are then used in the production of new products.

**Right of Entry** - As used by FEMA, the document by which a property owner confers to an eligible applicant or its contractor or the United States Army Corps of Engineers the right to enter onto private property for a specific purpose without committing trespass.

**Right-of-Way** - The portions of land over which facilities such as highways, railroads, or power lines are built. It includes land on both sides of the facility up to the private property line.

**Scale/Weigh Station** - A scale used to weigh trucks as they enter and leave a landfill. The difference in weight determines the tonnage dumped, and a tipping fee is charged accordingly. It also may be used to determine the quantity of debris picked up and hauled.

**Tipping Fee** - A fee based on weight or volume of debris dumped that is charged by landfills or other waste management facilities to cover their operating and maintenance costs. The fee also may include amounts to cover the cost of closing the current facility and/or opening a new facility.

**United States Army Corps of Engineers (USACE)** - A component of the United States Army responsible for constructing and maintaining military installations and other government-owned and controlled facilities. The USACE may be used by FEMA when direct Federal assistance, issued through a mission assignment, is needed.

**White Goods** - White goods are defined as discarded household appliances such as refrigerators, freezers, air conditioners, heat pumps, ovens, ranges, washing machines, clothes dryers, and water heaters.

**APPENDIX B – USACE HURRICANE DEBRIS  
ESTIMATING MODEL**

---

# USACE HURRICANE DEBRIS ESTIMATING MODEL

## U.S. Army Corps of Engineers Hurricane Debris Estimating Model

### Background

- The U.S. Army Corps of Engineers (USACE) Emergency Management staff has developed a modeling methodology designed to forecast potential amounts of hurricane generated debris.
- Based on actual data from Hurricanes Frederic, Hugo and Andrew.
- The estimated quantities produced by the model have a predicted accuracy of  $\pm 30\%$ .
- The primary factor used by the model is the number of households in a developed urban/suburban area.
- Other factors utilized are:
  - Cubic yards of debris generated per household per storm category.
  - Vegetative cover.
  - Commercial density.
  - Precipitation.
- Household debris includes damage to the house, contents and surrounding shrubs/trees.
- Vegetative cover includes all trees and shrubbery located along public rights-of-way, parks and residential areas.
- Commercial density includes debris generated by damage to businesses and industrial facilities.
- Private contractors will remove the majority of commercial related debris; however, disposal/reduction space is still required.
- Very wet storms will cause ground saturation, increasing tree fall.

### Initial Planning Data

- For planning purposes, the worst case scenario should be used for the subject area.
- The most accurate process is to determine the defined areas by using Doppler Radar (National Weather Service Broadcasts) and Geographical Information Systems (GIS).
- Doppler radar will define the storm's intensity and the exact track of the eye of the storm in relation to the affected area.
- Track the storm and plot the eye path and 5-mile wide bands out from the eye to define areas and estimate wind speeds.
- The wind speed of the eye wall normally determines the reported storm category with the outward or 5-mile bands being a lesser category.

## USACE HURRICANE DEBRIS ESTIMATING MODEL

- Track the storm inland until the wind speeds dissipate below hurricane strength.
- Divide outlined areas by storm category.
- Enter coordinates into a GIS database to determine areas and demographic information, such as:
  - Population.
  - Schools.
  - Businesses.

### STEP 1—ESTIMATING DEBRIS QUANTITIES

The formula used in this model will generate debris quantity as an absolute value based on a known/estimated population or a debris quantity per square mile based upon population density per square mile.

- Determine population (P) in the affected area.
- For example, 1990 census data for Harrison County, MS, is 165,500.
- $P = 165,500$ .
- The assumption of 3 persons per household (H) is used for this model.
- Known/estimated population (P) for a jurisdiction may be used to determine a value for H or  $H=P/3$ .

#### Example

A category 4 storm passes through Harrison County, MS. The area is primarily single family dwellings with some apartment complexes, schools, and shopping centers. Vegetation characteristic is heavy because of the proliferation of residential landscape shrubbery and trees throughout the area. The storm is very wet, with rain before and continuing for a few days after the hurricane.

**Formula:**  $Q= H(C)(V)(B)(S)$

**H=  $P/3= 165,500/3 = 55,167$  (3 persons/household)**

**C= 50 (Factor for a Category 4 storm)**

**V= 1.5 (Multiplier for heavy vegetation)**

**B= 1.3 (Multiplier for heavy commercial due to schools/stores/apartments)**

**S= 1.3 (Multiplier for wet storm event)**

**Then  $Q = 55,167 \times 50 \times 1.5 \times 1.3 \times 1.3 = 6,992,374$  cubic yards of debris or 7 million cy**

## USACE HURRICANE DEBRIS ESTIMATING MODEL

**The Model Formula:**  $Q = H(C)(V)(B)(S)$  where:

**Q** is the quantity of debris in cubic yards.

**H** is the number of households.

**C** is the storm category factor in cubic yards.

**V** is the vegetation characteristic multiplier.

**B** is the commercial/business/industrial use multiplier.

**S** is the storm precipitation characteristic multiplier.

**C** is the storm category factor as shown below. It expresses debris quantity in cubic yards (cy) per household by hurricane category and includes the house and its contents, and land foliage.

| HURRICANE<br>CATEGORY | VALUE OF "C"<br>FACTOR |
|-----------------------|------------------------|
| 1                     | 2 cy                   |
| 2                     | 8 cy                   |
| 3                     | 26 cy                  |
| ✓4                    | ✓50 cy                 |
| 5                     | 80 cy                  |

**V** is the vegetation multiplier as shown below. It acts to increase the quantity of debris by adding vegetation, including shrubbery and trees, on public rights-of-way.

| VEGETATIVE<br>COVER | VALUE OF "V"<br>MULTIPLIER |
|---------------------|----------------------------|
| LIGHT               | 1.1                        |
| MEDIUM              | 1.3                        |
| ✓HEAVY              | ✓1.5                       |

**B** is the multiplier that takes into account areas that are not solely single-family residential, but includes small retail stores, schools, apartments, shopping centers, and light industrial/manufacturing facilities. Built into this multiplier is the offsetting commercial insurance requirement for owner/operator salvage operations.

| COMMERCIAL<br>DENSITY | VALUE OF "B"<br>MULTIPLIER |
|-----------------------|----------------------------|
| LIGHT                 | 1.0                        |
| MEDIUM                | 1.2                        |
| ✓HEAVY                | ✓1.3                       |

## USACE HURRICANE DEBRIS ESTIMATING MODEL

S is the precipitation multiplier that takes into account either a "wet" or "dry" storm event. A "wet" storm for category 3 or greater storms will generate more vegetative debris due to the uprooting of complete trees.

| PRECIPITATION<br>CHARACTERISTIC | VALUE OF "S"<br>MULTIPLIER |
|---------------------------------|----------------------------|
| NONE TO LIGHT                   | 1.0                        |
| ✓MEDIUM TO HEAVY                | ✓1.3                       |

**NOTE:** Steps 2 and 3 of this model can also be applied to other debris generating events once an estimated quantity of debris is established.

### STEP 2—DEBRIS STORAGE SITE REQUIREMENTS

- Estimate debris pile stack height of 10-feet.
- 60% usage of land area to provide for roads, safety buffers, burn pits and household hazardous waste areas.

1 acre (ac) = 4,840 square yards (sy)  
 10 foot stack height = 3.33 yards(y)  
 total volume per acre = 4,840 sy/ac x 3.33 y = 16,117 cy/ac

- From the example above, the acreage required for debris reduction sites is:

$7,000,000 / 16,117 \text{ cy/ac} = 434 \text{ acres}$  (required for debris storage only, no buffers, etc.)

- To provide for roads and buffers, the acreage must be increased by a factor of 1.66.

$434 \text{ ac} \times 1.66 = 720 \text{ acres}$  or, since one square mile (sm) = 640 acres  $720\text{ac}/640\text{as/sm}=1.12 \text{ sm.}$

- If you assume a 100 acre storage site can be cycled every 45 to 60 days or one time during the recovery period, then  $720/2 = 360 \text{ ac}$  or four 100 acre sites would be required.
- The number of sites varies with:
  - Size.
  - Distance from source.
  - Speed of reduction (mixed debris is slower than clean woody debris).
  - Removal urgency.
- The USACE commonly removes approximately 70% of the total volume generated with local governments, volunteer groups, and private individuals removing the remainder.

**If 7 million cy were estimated, the USACE would estimate removing approximately 4.9 million cy of debris.**

# USACE HURRICANE DEBRIS ESTIMATING MODEL

## STEP 3—CATEGORIES OF DEBRIS

Debris removed will consist of two broad categories:

- Clean wood debris.
- Construction and demolition (C&D) debris.
- The clean debris will come early in the removal process as residents and local governments clear yards and rights-of-way.
- The debris removal mission can be facilitated if debris is segregated as much as possible at the origin along the right-of-way, according to type.
- The public should be informed regarding debris segregation as soon as possible after the storm.
- Time periods should be set for removal, the first 7-10 days clean woody debris only, then followed by other debris, with the metals segregated from non-metals.
- Most common hurricane-generated debris will consist of the following:
  - 30% Clean woody debris
  - 70% Mixed C&D
- Of the 70% mixed C&D:
  - 42% Burnable but requires sorting
  - 5% Soil
  - 15% Metals
  - 38% Landfilled
- Based upon the above, 7,000,000 cy of debris would break down as follows:
  - 2,100,000 cy Clean woody debris
  - 4,900,000 cy Mixed C&D
- Of the 4,900,000 cy of mixed C&D, 2,058,000 cy is burnable but requires sorting, 245,000 cy is soil, 735,000 cy is metals, and 1,862,000 cy is landfilled.
- Burning will produce about 95% volume reduction.
- Chipping and grinding reduce the debris volume on a 4-to-1 ratio (4 cy is reduced to 1 cy) or by 75%.
- The rate of burning is basically equal to the rate of chipping/grinding, about 200 cy/hr. However, chipping requires on-site storage and disposal of the chips/mulch.

## TRUCK CERTIFICATION FORM

### DUMP TRUCK

**Measurements**

Truck Measurements      Length (L) =       Width (W) ft =       Height (H) ft =

Hoist Measurement      Length<sub>1</sub> (L<sub>1</sub>) ft =       Width<sub>H</sub> (W<sub>H</sub>) ft =       Height<sub>H</sub> (H<sub>H</sub>) ft =

   Length<sub>2</sub> (L<sub>2</sub>) ft =

Radius      Radius ft =       Height (H) =

**Calculations**

Bed Volume (Basic)       $(L \times W \times H) / 27 =$   cyd

Hoist Volume       $((L_1 + L_2 / 2) \times W_H \times H_H) / 27 =$   cyd

Radius Volume       $(3.14 \times R^2 \times H) / 27 =$   cyd

**Total =**  cyd

Cubic Yards

### EXTRA TRAILER

**Measurements**

Truck Measurements (Basic)      Length (L) =       Width (W) ft =       Height (H) ft =

Hoist Measurement      Length<sub>1</sub> (L<sub>1</sub>) ft =       Width<sub>H</sub> (W<sub>H</sub>) ft =       Height<sub>H</sub> (H<sub>H</sub>) ft =

   Length<sub>2</sub> (L<sub>2</sub>) ft =

Radius      Radius ft =       Height (H) =

**Calculations**

Bed Volume (Basic)       $(L \times W \times H) / 27 =$   cyd

Hoist Volume       $((L_1 + L_2 / 2) \times W_H \times H_H) =$   cyd

Radius Volume       $(3.14 \times R^2 \times H) / 27 =$   cyd

**Total =**  cyd

Cubic Yards

### ROUND BOTTOM TRUCK

**Measurements**

Truck Measurements      Length (L) ft =       Diameter (D) ft =

**APPENDIX E – DEBRIS COLLECTION AND  
MANAGEMENT SITE HAZARD ANALYSIS**

---

# DEBRIS COLLECTION and MANAGEMENT SITE HAZARD ANALYSIS

Disaster debris collection and management sites pose a multitude of health and safety concerns. Hazards and exposures are a function of the unstable nature of the site, the potential of hazardous substances being present, and the type of work being performed. This hazard analysis serves as general guidance only. Each site will have its own unique hazards, all of which cannot be anticipated.

The listed hazards, risks, and accompanying general recommendations represent suggested site hazard assessment and therefore will not represent actual field hazards present at all debris collection and management sites. It is incumbent upon the responsible entity (e.g. – State, local government, private contractor, etc.) chosen to perform and/or manage this work to assure a comprehensive site specific hazard analysis is performed and that resulting recommendations are implemented.

## SITE SAFETY CHECKLIST

- Conduct a job hazard analysis to identify hazards prior to beginning site work.
- Assign key personnel and alternates responsible for site safety.
- Describe risks associated with each operation conducted.
- Confirm that personnel are adequately trained to perform jobs.
- Describe the protective clothing and equipment to be worn by personnel during site operations.
- Describe needed air monitoring, personnel monitoring, and environmental sampling.
- Describe actions to be taken to mitigate existing hazards to make work environment less hazardous.

## POTENTIAL HAZARDS AND GENERAL RECOMMENDATIONS

### HAZARD 1: Massive piles of woody debris and other types of debris; unstable work surfaces

**Risks:** Traumatic, serious, or fatal injuries or illnesses can occur due to slips, trips, falls, or collapsing materials.

- **General Recommendations:**

- Ensure that surfaces are as stable as possible.
- Ensure scaffolding is erected on a stable surface; anchor scaffolding to a structure capable of withstanding the lateral forces generated.
- Ensure workers have ANSI approved safety footwear with slip resistant soles. Consider drop and roll over hazards as well as puncture hazards.
- Site personnel to be observant of changes in walking surfaces.

### HAZARD 2: Hazardous noise

**Risks:** Communication and possible noise induced hearing loss.

- **General Recommendations:**

- Monitor noise levels. If 8-hour time-weighted average exposures are 85 decibels (dB) or more, a Hearing Conservation Plan is needed.
- Try engineering out workplace noise by isolating the equipment, reduce the equipment vibration, or installing sound barriers.
- Consider hearing protection devices are used whenever noisy equipment (e.g., large trucks, grinding equipment, loaders, generators, large motors, etc.) is used.

### HAZARD 3: Breathing dust containing fine airborne particles and gases generated through diesel exhaust fumes, smoke, ash, and road dust

**Risks:** Irritation of eye, nose, throat, and lung.

- **General Recommendations:**

- Workers should be protected from breathing airborne contaminants as determined through the site's analysis of respiratory hazards.
- Respiratory protection: determine respirator type, as needed, through site specific hazard analysis.
- Respirators must fit properly to protect workers.

- Dust concentrations in the air should be appropriately monitored.
- Stay upwind of dust generating activities.
- Maintain low speeds on construction equipment to keep dust down.
- Airborne dust may be suppressed by application of water based mist.

**HAZARD 4: Heat stress from working in a hot, humid climate**

**Risks:** Significant fluid loss can progress to clinical dehydration, raised core body temperature, impaired judgment, disorientation, fatigue, muscle cramping, resulting in heat stroke.

● **General Recommendations:**

- Adjust work schedules, rotate personnel, and add additional personnel if needed.
- Replenish fluids (e.g. – water, electrolytes) as needed.
- Consider personnel and environmental monitoring plans.
- Know the warning signs of heat related illnesses.
- Provide shelter for personnel in shaded areas.
- Where possible, block out sun or other direct sources of heat from fixed work locations.
- Prevent sun related overexposure to skin by using a sunscreen lotion with a significant sun protection factor (SPF) of 15 or greater.

**HAZARD 5: Cold stress from working in a cold, wet climate**

**Risks:** This allows exposed skin and the extremities to cool rapidly and increases the risk of frostbite and hypothermia.

● **General Recommendations:**

- Get into heated shelter as necessary to maintain body temperature.
- Replace wet clothing immediately.
- Drink warm fluids often.
- Wear adequate clothing to reduce threat of cold stress.
- Know the signs of cold stress.

**HAZARD 6: Carbon monoxide risk from heaters, gasoline or propane-powered generators, or heavy machinery**

**Risks:** Headache, dizziness, drowsiness, or nausea. This may progress to vomiting, loss of consciousness, and collapse. Coma or death may occur under prolonged or high exposures.

● **General Recommendations:**

- Use CO warning sensors when using or working around combustion sources since CO has no warning properties. CO is a colorless and odorless gas.
- Shut off equipment or machinery immediately if symptoms of exposure appear and immediately go to a fresh air source or location.

**Warning!** Do not use gasoline generators or portable heaters in confined spaces or poorly ventilated areas.

**HAZARD 7: Work zone traffic hazards**

**Risks:** Traumatic or fatal injuries due to failure of or improper use of equipment or workers being struck by moving equipment.

● **General Recommendations:**

- Establish a traffic control plan for motorists and pedestrians.
- Use standard highway signs and control devices to instruct drivers.
- Use barriers (concrete, water, sand, collapsible barriers, crash cushions, and truck-mounted attenuators) to limit motorist intrusion into the work zone.
- High visibility safety garments should be provided for those providing temporary traffic control (class 2 or 3) and workers on foot (class 1, 2, or 3).
- Seat belts and rollover protection should be used on equipment and vehicles as stated by the manufacturer.
- Workers on foot, equipment operators, and drivers in internal work zones need to know the routes construction vehicles will use.
- Be mindful of limited visibility (e.g. – blind spots) which heavy machine operators have while driving machines at the work site.
- Maintain safe driving distances, avoid using cell phones while driving, and obey all traffic laws.

#### **HAZARD 8: Eye, face, hand, and head injuries from flying debris; wood particles**

**Risks:** Traumatic injuries, ranging from minor injuries requiring first aid to serious eye injuries, even disabling or fatal traumatic injuries.

- **General Recommendations:**

- Only use protective eyewear, face shields, and protective head wear that are ANSI approved.
- Educate workers regarding safe work procedures before beginning work.
- Provide workers with a full array of personal protective equipment, including hard hats, safety shoes, eyeglasses, and work gloves.
- Ensure that workers do not walk under or through areas where cranes and other heavy equipment are being used to lift objects.
- Proper eye protection (e.g. - goggles or safety glasses).
- As a minimum requirement use safety glasses with side shields by all site workers. Faceshields are not a substitute for safety glasses.
- Use safety goggles for protection from fine dust particles rather than using regular prescription eyeglasses.
- Choose hand protection to fit the hazards determined through the hazard analysis (e.g. – laceration hazards, need for gripping, need for dexterity, etc.).
- Stay outside the 300 foot safety zone while a chipper is in operation.
- Check the kick-back device on chainsaws before use.

#### **HAZARD 9: Use of various types of heavy equipment, including cranes, bucket trucks, skid-steer loaders, etc.**

**Risks:** Traumatic injury, including serious and fatal injuries, due to failure of improper use of equipment, or workers being struck by moving equipment.

- **General Recommendations:**

- Wear safety vests. Safety orange vests with reflective stripes are recommended.
- Ensure operators are aware of the activities around them to protect workers on foot from being struck by moving equipment.
- Ensure that workers do not walk under or through areas where cranes and other heavy equipment are being used to lift objects.
- Ensure that workers do not climb onto or ride loads being lifted or moved.
- Ensure that all equipment warning devices are working (flashers, strobes, back-up alarms).
- Machinery is to be inspected by a qualified worker before each use, per OSHA requirements.
- Stay at least 20 feet beyond maximum equipment swing radius or movement areas. Assign spotters as needed.
- Do not exceed the load capacity of cranes and other lifting equipment.

#### **HAZARD 10: Chemicals, flammables and combustibles**

**Risks:** Traumatic, serious, or fatal injuries or illnesses can occur due to inhalational, dermal, and fire hazards.

- **General Recommendations:**

- Ensure that hazardous waste (batteries, PVC piping, solvents, pesticides, and compressed gas cylinders, etc.) are properly separated from “burnable” trash.
- Utilize GFCI for any extension cords or power tools.
- Store gasoline in an approved container not to exceed 5-gallon capacity.
- Allow gasoline power tools to cool down prior to refueling.
- Ensure containers are bonded and grounded during dispensing.
- Ensure adequate fire extinguishers are available at work sites and on work vehicles.
- Maintain a fire watch during all fire-related activities until material has been extinguished and cooled.
- If possible, avoid establishing debris management sites where there is a limited public water supply, lack of 911 service, or delays in fire department response time.

#### HAZARD 11: Isolated work areas and sanitation

**Risks:** Remote locations delay response times from emergency providers. Precaution can reduce the severity of the event.

- **General Recommendations:**

- Water-borne disease:
  - Always wash your hands.
  - Use hand sanitizers frequently.
  - Exercise good housekeeping.
  - Only drink from proven potable water sources.
- Blood-borne disease:
  - Use latex or similar type gloves when handling remains.
  - Replace gloves if punctured or torn.
  - Receive appropriate vaccinations (Hepatitis A, B, Tetanus, Diphtheria, etc).
  - Avoid standing water.
  - Observe universal precautions.
- Food-borne disease:
  - Identify and dispose of food that may not be safe to eat.
  - Handle food properly.
  - Keep a supply of water and food on hand.
  - Rest when off duty.
- Emergencies:
  - Know location and phone numbers of nearest hospital, doctor, and police.
  - Carry a first-aid kit.
  - Know the address or nearest cross-road of work site to notify emergency responders.

#### HAZARD 12: Insects, animals, reptiles, and plants

**Risks:** Traumatic, serious, or fatal injuries or illnesses can occur due to insect or animal bites.

- **General Recommendations:**

- Protection from plants:
  - Be alert of poisonous plants.
  - Use barrier creams if available.
  - Wash affected area after contact.
- Protection from wild or stray animals:
  - Avoid animal habitats (infested areas, rodent burrows, and nests).
  - Do not attempt to take custody of animals unless properly trained.
  - Avoid wild or stray animals. Assume all animals are rabid. Call local authorities to handle animals.
  - Dispose of animal carcasses according to local guidelines.
- Protection from insects (mosquitoes, bees, spiders, fire ants, etc):
  - Wear appropriate clothing (long pants, socks, long sleeved shirts, etc).
  - Avoid infested areas.
  - Use insect repellents that contain DEET or Picaridin, when necessary.
- Protection from snakes:
  - Assume all snakes are poisonous. Be on alert for snakes that may be hiding in unusual places after flooding.
  - Seek immediate medical attention if you are bitten.
  - Try to identify the snake so that if it is poisonous you can be given the correct anti-venom.

#### HAZARD 13: Power lines and gas lines

**Risks:** Traumatic, serious, or fatal injuries or illnesses can occur due to electrocution.

- **General Recommendations:**

- Treat all power lines and cables as energized until proven otherwise. De-energized lines can be energized by a secondary power sources such as a backup generator.
- Use appropriately grounded low voltage equipment.
- Do not approach detected gas leaks.

- Contact utilities (e.g. – utility locate service) for buried power line location.
- Stay at least 10 feet away from live overhead power lines.
- Get the owner or operator of the lines to de-energize and ground lines when working near them.
- Use non-conductive wood or fiberglass ladders when working near power lines.
- Keep area burn piles, observation areas, and areas where heavy equipment is used away from power lines and other electrical equipment.

#### **HAZARD 14: Debris towers**

**Risks:** Traumatic, serious, or fatal injuries or illnesses can occur due to falls from elevated surfaces.

- **General Recommendations:**

- Inspect scaffolds and scaffold components for defects before each work shift and after any incident which could affect structural integrity.
- Provide adequate buffer zones around the tower.
- Anchor the scaffold to prevent displacement from wind with guide wires
- Do not exceed load capacity of the scaffold.
- Footing of the tower must be level, sound, rigid, and capable of supporting the load without settling or displacement.
- A standard guardrail (top, mid, toe) and handrail system must be installed along all open sides.
- Provide appropriate ventilation if a heating system is present.
- No smoking.
- Use established construction guidance (e.g. – US Army Corps of Engineers).

#### **HAZARD 15: Aerial lifts and scissor lifts**

**Risks:** Traumatic, serious, or fatal injuries or illnesses can occur due to falls, tip-overs, and pinch points.

- **General Recommendations:**

- Only trained and authorized people may operate the lift.
- Check for overhead objects before use.
- Stay far from debris piles, drop-offs, and floor openings.
- Never use equipment near electric lines unless the lines are de-energized or adequate clearance is maintained.
- Refuel tanks only when the machine is off.
- Elevate the lift only when it is on a firm and level surface.
- Never drive the lift when in the extended position.

#### **HAZARD 16: Severe weather**

**Risks:** Traumatic, serious, or fatal injuries or illnesses can occur due to hypothermia, hyperthermia, and lightning strikes.

- **General Recommendations:**

- Monitor local weather conditions regularly.
- Recognize the signs of an oncoming thunder and lightning storm and seek shelter.
- Avoid small sheds, wooded areas, metal fences and open areas.

You can help prevent workplace injuries and illnesses by looking at your workplace operations, establishing proper job procedures, and ensuring that all employees are trained properly. One of the best ways to determine and establish proper work procedures is to conduct a job hazard analysis. A job hazard analysis is a technique that focuses on job tasks as a way to identify hazards before they occur. It focuses on the relationship between the worker, the task, the tools, and the work environment. Ideally, after you identify uncontrolled hazards, you will take steps to eliminate or reduce them to an acceptable risk level.

A job hazard analysis can be conducted on many jobs in your workplace. Priority should go to the following types of jobs:

- Jobs with the highest injury or illness rates;
- Jobs with the potential to cause severe or disabling injuries or illness, even if there is no history of previous accidents;
- Jobs in which one simple human error could lead to a severe accident or injury;
- Jobs that are new to your operation or have undergone changes in processes and procedures;
- Jobs that are complex enough to require written instructions.

## **APPENDIX F – DEMOLITION CHECKLIST**

---

## Demolition Checklist

**Property Address:** \_\_\_\_\_

|                       |
|-----------------------|
| <b>Pre-Demolition</b> |
|-----------------------|

|    | Action   | Initial | Date | Notes |
|----|--|---------|------|-------|
| 1  | Establish property management file for each parcel of private property. One (1) copy each for local and State records management |         |      |       |
| 2  | Provide notice of condemnation   |         |      |       |
| 3  | Complete environmental and historic preservation reviews   |         |      |       |
| 4  | Obtain right of entry and hold harmless agreements   |         |      |       |
| 5  | Verify property description and ownership (i.e., tax assessment, legal description)  |         |      |       |
| 6  | Document property owner's insurance coverage for future recovery   |         |      |       |
| 7  | Notify lien holder(s) of intent to demolish as needed  |         |      |       |
| 8  | Conduct building inspection as needed  |         |      |       |
| 9  | Conduct public health inspection as needed   |         |      |       |
| 10 | Conduct fire inspection as needed  |         |      |       |
| 11 | Provide public notification of condemnation/demolition   |         |      |       |
| 12 | Verify personal property removal   |         |      |       |

|                   |
|-------------------|
| <b>Demolition</b> |
|-------------------|

|    |   |  |  |  |
|----|---|--|--|--|
| 13 | Verify structure is unoccupied  |  |  |  |
| 14 | Cap well, water, sewer, and septic lines. Disconnect electrical service. Remove propane tanks.                                      |  |  |  |
| 15 | Mark easements and underground utilities  |  |  |  |
| 16 | Identify/remove/dispose of asbestos, lead-based paint and other hazardous materials per State environmental agency/EPA requirements |  |  |  |
| 17 | Identify/remove/dispose of all HHW per State environmental agency/EPA requirements  |  |  |  |
| 18 | Record GPS coordinates. Photograph site before and after demolition.  |  |  |  |
| 19 | Document actual demolition and removal of debris  |  |  |  |

Complete documentation is compiled within the project file for each individual structure/property.

I, the authorized applicant official, certify that all processes and documentation referred to in this checklist are complete (except Item 19) prior to the demolition of the referenced structure.

## DISASTER ASSISTANCE POLICY

DAP9523.4

**I. TITLE: Demolition of Private Structures**

**II. DATE: JUL 18 2007**

**III. PURPOSE:**

This policy provides guidance in determining the eligibility of demolition of private structures under the Federal Emergency Management Agency's (FEMA) Public Assistance Program.

**IV. SCOPE AND AUDIENCE:**

The policy is applicable to all major disasters declared on or after the date of publication of this policy. It is intended for FEMA personnel involved in the administration of the Public Assistance Program.

**V. AUTHORITY:**

Section 403(a)(3)(E) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act), 42 U.S.C. 5170b, 42 U.S.C. 5172, 44 CFR 206.225, and 44 CFR 206.226.

**VI. BACKGROUND:**

**A.** Section 403 of the Stafford Act, 42 U.S.C. 5170b, provides FEMA authority to provide assistance essential to meeting immediate threats to life and property resulting from a major disaster. Specifically, Section 403(a)(3)(E) provides FEMA authority to fund the demolition of unsafe structures which endanger the public on public and private property (44 CFR 206.225). Eligible Public Assistance applicants may be eligible for Public Assistance grant funding under Section 403 of the Stafford Act under the conditions of this policy.

**B.** The demolition of unsafe structures owned by eligible public and private nonprofit (PNP) applicants may be eligible for Public Assistance grant funding under Section 406 of the Stafford Act, which funds the repair, restoration, reconstruction, or replacement of eligible facilities (44 CFR 206.226).

# FEMA

## DISASTER ASSISTANCE POLICY

DAP9523.4

### VII. POLICY:

#### A. Definitions.

1. Demolition: The act or process of reducing a structure, as defined by State or local code, to a collapsed state.
2. Demolition debris: Materials including building materials and personal effects that are deposited as a result of the demolition process.
3. Legal responsibility: A statute, formally adopted local code, or ordinance that gives local government officials the responsibility to enter private property to demolish unsafe structures or to perform work to remove an immediate threat (44 CFR 206.223(a)(3), 44 CFR 206.221(c), and 44 CFR 206.225(a)(3)).
4. Unsafe structure: A structure found to be dangerous to the life, health or safety of the public because such structure is so damaged or structurally unsafe as a direct result of the declared disaster that partial or complete collapse is imminent.

**B. Duplication of Benefits (44 CFR 206.191).** FEMA is prohibited by Section 312 of the Stafford Act from approving funds for work that is covered by any other source of funding. Therefore, State and local governments must take reasonable steps to prevent such an occurrence, and verify that insurance coverage or any other source of funding does not exist for the demolition of private structures.

1. When demolition of private structures is covered by an insurance policy, the insurance proceeds must be used as the first source of funding. Public Assistance grant funding may be used to pay for the remainder of the demolition costs.
2. If it is discovered that a duplication of benefits from any other source of funding has occurred, FEMA will de-obligate funds from the Grantee in the amount that such assistance duplicates funding the property owners received from other sources.

#### C. Eligibility of Demolition of Private Structures.

1. Demolition of privately owned structures and subsequent removal of demolition debris may be eligible for Public Assistance grant funding under Section 403 of the Stafford Act when the following conditions are met:

# FEMA

## DISASTER ASSISTANCE POLICY

DAP9523.4

a. The structures were damaged and made unsafe by the declared disaster, and are located in the area of the declared disaster (44 CFR 206.223(a)(1) and (2)).

b. The State or local government applicant certifies that the structures are determined to be unsafe and pose an immediate threat to the public (44 CFR 206.225(a)). The Public Assistance applicant provides a detailed explanation documenting its legal responsibility to enter private property to demolish an unsafe structure, and confirms that all legal processes and permission requirements (e.g., rights-of-entry) for such action have been satisfied. The Public Assistance Group Supervisor must concur that the demolition of unsafe structures and removal of demolition debris are in the public interest. FEMA will consider alternative measures to eliminate threats to life, public health, and safety posed by disaster-damaged unsafe structures, including fencing off unsafe structures and restricting public access, when evaluating requests for demolition.

i. The eligible applicant must demonstrate the legal basis as established by law, ordinance, or code upon which it exercised or intends to exercise its responsibility following a major disaster to demolish unsafe private structures (44 CFR 206.223(a)(3)). Codes and ordinances must be germane to the structural condition representing an immediate threat to life, public health, and safety, and not merely define the local government's uniform level of services.

States and local governments ordinarily rely on condemnation and/or nuisance abatement authorities to obtain legal responsibility prior to the commencement of demolition of private structures. There may be circumstances, however, where the State or local government determines that ordinary condemnation and/or nuisance abatement procedures are too time-consuming to address an immediate public health and safety threat. In such circumstances, applicants may not have to precisely follow their nuisance abatement procedures or other ordinances that would prevent the State or local government from taking emergency protective measures to protect public health and safety (44 CFR 206.225(a)).

ii. The applicant's legal responsibility to take action where there is an immediate threat to life, public health, and safety should be independent of any expectation, or request, that FEMA will reimburse costs incurred for demolition of private structures and the removal of demolition debris from private property. In addition, an applicant's legal responsibility is not established solely by an applicant obtaining signed rights-of-entry and hold harmless agreements from property owners.

c. The State or local government confirms that a legally authorized official has ordered the exercise of public emergency powers or other appropriate authority to enter onto

# FEMA

## DISASTER ASSISTANCE POLICY

DAP9523.4

private property in order to remove/reduce threats to life, public health, and safety threat via demolition of unsafe structures and removal of demolition debris (44 CFR 206.223).

d. The State or local government indemnifies the Federal government and its employees, agents, and contractors from any claims arising from the demolition of unsafe private structures and removal of demolition debris from private property (44 CFR 206.9).

e. The work is completed within the completion deadlines outlined in 44 CFR 206.204 for emergency work.

2. Eligible costs associated with the demolition of private structures may include, but are not limited to:

- a. capping wells;
- b. pumping and capping septic tanks;
- c. filling in basements and swimming pools;
- d. testing and removing hazardous materials from unsafe structures, including asbestos and household hazardous wastes;
- e. securing utilities (electric, phone, water, sewer, etc.);
- f. securing permits, licenses, and title searches. Fees for permits, licenses, and titles issued directly by the applicant are not eligible unless it can be demonstrated that the fees are above and beyond administrative costs; and
- g. demolition of disaster-damaged outbuildings such as garages, sheds, and workshops determined to be unsafe.

3. Ineligible costs associated with the demolition of private structures may include:

- a. removal of slabs or foundations, except in very unusual circumstances, such as when disaster-related erosion under slabs on a hillside causes an immediate public health and safety threat;
- b. removal of pads and driveways;

# FEMA

## DISASTER ASSISTANCE POLICY

DAP9523.4

4. Structures condemned as safety hazards before the disaster are not eligible for demolition and subsequent demolition debris removal under Public Assistance grant authority.

5. Individuals and private organizations (except for eligible PNPs) will not be reimbursed for demolition activities on their own properties under the Public Assistance Program (44 CFR 206.224(c)).

6. The removal of substantially damaged structures and associated appurtenances acquired through a Section 404 FEMA Hazard Mitigation Grant Program buyout and relocation project may be eligible for Public Assistance grant funding under Section 407 of the Stafford Act. Such removal must be completed within two years of the declaration date, unless extended by the Assistant Administrator of the Disaster Assistance Directorate (44 CFR 206.224(a)(4)).

**D. Demolition of Commercial Structures.** The demolition of commercial structures is generally ineligible for Public Assistance grant funding. It is assumed and expected that these commercial enterprises retain insurance that can and will cover the cost of demolition. However, in some cases as determined by the FCO, the demolition of commercial structures by a State or local government may be eligible for FEMA reimbursement only when such removal is in the public interest (44 CFR 206.224(a) and (b)).

Apartments, condominiums, and mobile homes in commercial trailer parks are generally considered commercial structures with respect to Public Assistance funding.

**E. Environmental and Historic Review Requirements.** Eligible demolition activities must satisfy environmental and historic preservation compliance review requirements as established by 44 CFR Parts 9 and 10, the National Historic Preservation Act, the Endangered Species Act, and all other applicable legal requirements.

# FEMA

## DISASTER ASSISTANCE POLICY

DAP9523.11

**I. TITLE: Hazardous Stump Extraction and Removal Eligibility**

**II. DATE: MAY 15 2007**

**III. PURPOSE:**

Establish criteria used to reimburse applicants for removing eligible hazardous stumps from public or, where authorized, private property.

**IV. SCOPE AND AUDIENCE:**

The policy is applicable to all major disasters and emergencies declared on or after the date of publication. It is intended for all personnel involved in the administration and execution of the Public Assistance Program, including applicants.

**V. AUTHORITY:**

Sections 403 and 407 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121-5206, as amended.

**VI. BACKGROUND:**

Public Assistance regulations authorize reimbursement for the removal of debris from public and private land when it is in the public interest. Such removal is in the public interest when it is necessary to: eliminate immediate threats to life, public health and safety, or eliminate immediate threats of significant damage to improved public or private property; or to ensure economic recovery of the affected community to the benefit of the community at large. Trees that are uprooted during a disaster event such that all or part of their roots are exposed may pose an immediate threat to public health and safety.

**VII. POLICY:**

A. When a disaster event uproots a tree or stump (i.e., 50% or more of root ball is exposed) on a public right-of-way, improved public property or improved property owned by certain private nonprofit organizations, and the exposed root ball poses an immediate threat to life, public health and safety, FEMA may provide supplemental assistance to remove, transport, dispose, and provide fill for the root cavity of an eligible uprooted tree or stump. The Federal Emergency Management Agency (FEMA) will reimburse applicants reasonable costs for this type of work only when uprooted stumps are more than 24 inches in diameter (measured two feet from the ground), with the consensus of the Applicant and the State, and is approved in

# FEMA

## DISASTER ASSISTANCE POLICY

DAP9523.11

advance by FEMA, using the attached Hazardous Stump Worksheet.

1. If it is necessary to remove an uprooted stump before it can be inspected by FEMA because it poses a threat that must be dealt with immediately, the applicant must submit documentation, to FEMA including photographs, that establishes its location on public property, specifics on the threat, stump diameter measured two feet up the trunk from the ground, quantity of material to fill the hole, and any special circumstances.

2. FEMA will reimburse applicants for extraction, transport and disposal of stumps with a diameter of 24 inches or smaller at the unit cost rate for regular vegetative debris, using the attached Stump Conversion Table, as such stumps do not require special equipment.

3. FEMA will reimburse applicants at the unit cost rate (usually cubic yards) for normal debris removal for all stumps, regardless of size, placed on the rights-of-way by others (i.e., contractors did not extract them from public property or property of eligible Private Non Profit organization). In such instances, applicants do not incur additional cost to remove these stumps because the same equipment that is used to pick up "regular" debris can be used to pick-up these stumps.

4. If an applicant incurs additional costs in picking up large stumps (over 24 inches in diameter) from rights-of-way, it should complete the Hazardous Stump Worksheet and present documentation to FEMA in advance for consideration.

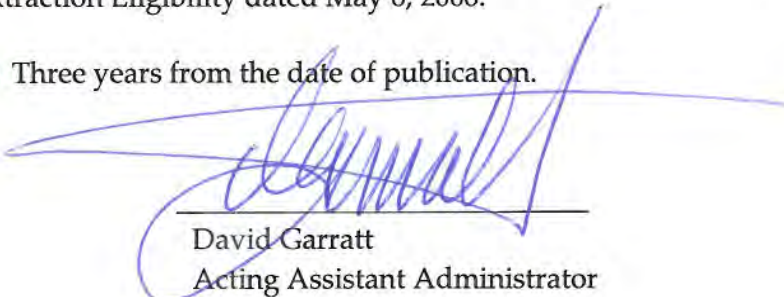

5. Stumps with less than 50% of their root ball exposed should be cut flush at ground level and the cut portion included with regular vegetative debris.

6. Straightening or bracing of trees is eligible for reimbursement if it is less costly than removal and disposal. Applicant must provide a cost analysis showing cost effectiveness.

**VIII. ORIGINATING OFFICE:** Disaster Assistance Directorate (Public Assistance Division)

**IX. SUPERSESSION:** This policy supersedes Recovery Policy Number 9523.11, Hazard Stump Removal and Extraction Eligibility dated May 6, 2006.

**X. REVIEW DATE:** Three years from the date of publication.

# Stump Conversion Table

## Diameter to Volume Capacity

The quantification of the cubic yards of debris for each size of stump in the following table was derived from FEMA field studies conducted throughout the State of Florida during the debris removal operations following Hurricanes Charley, Frances, Ivan and Jeanne. The following formula is used to derive cubic yards:

$$\frac{[(\text{Stump Diameter}^2 \times 0.7854) \times \text{Stump Length}] + [(\text{Root Ball Diameter}^2 \times 0.7854) \times \text{Root Ball Height}]}{46656}$$

0.7854 is one-fourth Pi and is a constant.

46656 is used to convert cubic inches to cubic yards and is a constant

The formula used to calculate the cubic yardage used the following factors, based upon findings in the field:

- Stump diameter measured two feet up from ground
- Stump diameter to root ball diameter ratio of 1:3.6
- Root ball height of 31"

| Stump Diameter<br>(Inches) | Debris Volume<br>(Cubic Yards) | Stump Diameter<br>(Inches) | Debris Volume<br>(Cubic Yards) |
|----------------------------|--------------------------------|----------------------------|--------------------------------|
| 6                          | 0.3                            | 46                         | 15.2                           |
| 7                          | 0.4                            | 47                         | 15.8                           |

# FEMA

## RECOVERY POLICY - RP9523.12

**I. TITLE: Debris Operations – Hand-Loaded Trucks and Trailers**

**II. DATE:** May 1, 2006

**III. PURPOSE:**

To describe the criteria the Federal Emergency Management Agency (FEMA) will use to reimburse applicants for eligible debris removal accomplished with trucks and trailers loaded physically by hand, rather than with mechanical equipment.

**IV. SCOPE AND AUDIENCE:**

The policy is applicable to all major disasters and emergencies declared on or after the date of publication. It is intended for all personnel involved in the administration and execution of the Public Assistance Program, including applicants.

**V. AUTHORITY:**

Sections 403 and 407 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121-5206, as amended.

**VI. BACKGROUND:**

A. Debris removal companies under contract with local governments have frequently supplemented their vegetative debris removal operations by hiring subcontractors who modify their trucks and trailers by extending sidewalls with plywood or other materials to increase the vehicle's load capacity. Because of the tenuous nature of these improvements, operators typically load these vehicles physically by hand. The inefficiencies associated with loading these trucks or trailers by hand, instead of using mechanical equipment, effectively negates the increased capacity advantages of these vehicles. Hand loading cannot achieve compaction levels comparable to mechanically loaded vehicles. Further, the unit cost for transporting debris is based on mechanical loading of trailers and trucks.

B. FEMA performed studies throughout the State of Florida following the four devastating hurricanes in 2004 and determined that a mechanically-loaded vehicle had a weight-to-volume ratio at least twice that of hand-loaded vehicles. In other words, vehicles of the same measured capacity that were loaded by mechanical equipment and reasonably compacted carried at least

# FEMA

## RECOVERY POLICY - RP9523.12

twice the volume of debris as those loaded physically by hand. FEMA has therefore determined it is not reasonable to reimburse applicants - for hand-loaded vehicles and mechanically loaded vehicles - at the same rate.

### VII. POLICY:

A. Debris monitors located at temporary or final debris disposal sites will reduce the observed capacity of each hand-loaded truck or trailer load by 50% because of the low compaction achieved by hand-loading. For example, if a 40 cubic-yard (CY) hand-loaded truck or trailer arrives at a debris management or disposal site, and it appears to be 100 percent full, the actual quantity of debris in the truck or trailer will be recorded as 20 CY  $\{(40 \text{ CY} / 2) * 100\}$ . In the same manner, if the truck or trailer appears half full, the load will be recorded as 10 CY  $\{(40 \text{ CY} / 2) * 50\}$ . The maximum amount recorded for a hand-loaded vehicle will be 50% of its measured capacity.

B. FEMA will reimburse applicants on the basis of capacities calculated in VII-A.

VIII. ORIGINATING OFFICE: Recovery Division (Public Assistance Branch)

IX. SUPERSESION: Not applicable.

## DISASTER ASSISTANCE POLICY

DAP9523.13

**I. TITLE: Debris Removal from Private Property**

**II. DATE: JUL 18 2007**

**III. PURPOSE:**

This policy describes the criteria that the Federal Emergency Management Agency (FEMA) will use to evaluate the eligibility of debris removal work from private property under the Public Assistance Program.

**IV. SCOPE AND AUDIENCE:**

The policy is applicable to all major disasters and emergencies declared on or after the date of publication of this policy. It is intended for FEMA personnel involved in the administration of the Public Assistance Program.

**V. AUTHORITY:**

Sections 403(a)(3)(A), 407, and 502 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act), 42 U.S.C. 5170b, 42 U.S.C. 5173, 42 U.S.C. 5192, and 44 CFR 206.224.

**VI. BACKGROUND:**

**A.** Sections 403(a)(3)(A) and 407 of the Stafford Act, 42 U.S.C. 5170b and 5173, respectively, provide FEMA authority to fund debris removal from private property provided that the State or local government arranges an unconditional authorization for removal of the debris, and agrees to indemnify the Federal government against any claim arising from the removal.

**B.** The regulations implementing Sections 403 and 407 of the Stafford Act at 44 CFR 206.224 establish the requirement that debris removal be in the "public interest" in order to be eligible for reimbursement. "Public interest" is defined as being necessary to:

1. eliminate immediate threats to life, public health, and safety; or
2. eliminate immediate threats of significant damage to improved public or private property; or

# FEMA

## DISASTER ASSISTANCE POLICY

DAP9523.13

3. ensure economic recovery of the affected community to the benefit of the community-at-large.

C. Generally, debris removal from private property following a disaster is the responsibility of the property owner. However, large-scale disasters may deposit enormous quantities of debris on private property over a large area resulting in widespread immediate threats to the public-at-large. In these cases, the State or local government may need to enter private property to remove debris to: eliminate immediate threats to life, public health, and safety; eliminate immediate threats of significant damage to improved property; or ensure economic recovery of the affected community to the benefit of the community-at-large. In these situations, debris removal from private property may be considered to be in the public interest and thus may be eligible for reimbursement under the Public Assistance Program (44 CFR 206.224).

### VII. POLICY:

#### A. Definitions.

1. Disaster-generated debris: Any material, including trees, branches, personal property and building material on public or private property that is directly deposited by the disaster.

2. Improved property: Any structure, facility, or equipment that was built, constructed, or manufactured. Examples include houses, sheds, car ports, pools, and gazebos. Land used for agricultural purposes is not improved property (44 CFR 206.221(d)).

3. Legal responsibility: A statute, formally adopted State or local code, or ordinance that gives local government officials responsibility to enter private property to remove debris or to perform work to remove an immediate threat (44 CFR 206.223(a)(3), 44 CFR 206.221(c), and 44 CFR 206.225(a)(3)).

4. Private property: Land and structures, to include contents within the structures, built on land that is owned by non-governmental entities (44 CFR 206.224(b)).

5. Private road: Any non-public road for which a subdivision of the State is not legally responsible to maintain. Private roads include roads owned and maintained by homeowners associations, including gated communities, and roads for which no entity has claimed responsibility. Local police, fire, and emergency medical entities may use these roads to provide services to the community (44 CFR 206.224(b)).

# FEMA

## DISASTER ASSISTANCE POLICY

DAP9523.13

**B. Approval for FEMA Assistance.** FEMA will work with states affected by a disaster to designate those areas where the debris is so widespread that removal of the debris from private property is in the “public interest” pursuant to 44 CFR 206.224, and thus is eligible for FEMA Public Assistance reimbursement on a case-by-case basis.

1. Any State or local government that intends to seek reimbursement to remove debris from private property within a designated area will, prior to commencement of work, submit a written request for reimbursement to, and receive approval from, the Federal Coordinating Officer (FCO). The written request will include the following information:

a. Public Interest Determination (44 CFR 206.224(a)):

i. Immediate Threat to Life, Public Health, and Safety Determination. The basis of a determination by the State, county or municipal government's public health authority or other public entity that has legal authority to make such a determination that disaster-generated debris on private property in the designated area constitutes an immediate threat to life, public health, and safety; or

ii. Immediate Threat to Improved Property Determination. The basis of the determination by the State, county, or municipal government that the removal of disaster-generated debris is cost effective. The cost to remove the debris should be less than the cost of potential damage to the improved property in order for the debris removal to be eligible; or

iii. Ensure Economic Recovery of the Affected Community to the Benefit of the Community at Large Determination. The basis of the determination by the State, county, or municipal government that the removal of debris from commercial properties will expedite economic recovery of the community-at-large. Generally, commercial enterprises are not eligible for debris removal.

b. Documentation of Legal Responsibility (44 CFR 206.223(a)(3)).

A detailed explanation documenting the requesting State or local government’s authority and legal responsibility at the time of disaster to enter private property to remove debris, and confirmation that all legal processes and permission requirements (e.g., right-of-entry) for such action have been satisfied.

i. The eligible applicant requesting assistance must demonstrate the legal basis as established by law, ordinance, or code upon which it exercised or intends to exercise its responsibility following a major disaster to remove disaster-related debris from private property. Codes and ordinances must be germane to the condition representing an immediate

# FEMA

## DISASTER ASSISTANCE POLICY

DAP9523.13

threat to life, public health, and safety, and not merely define the applicant's uniform level of services. Typically, solid waste disposal ordinances are considered part of an applicant's uniform level of services.

States and local governments ordinarily rely on condemnation and/or nuisance abatement authorities to obtain legal responsibility prior to the commencement of debris removal work. There may be circumstances, however, where the State or local government determines that ordinary condemnation and/or nuisance abatement procedures are too time-consuming to address an immediate public health and safety threat. In such circumstances, applicants do not have to precisely follow their nuisance abatement procedures or other ordinances that would prevent the State or local government from taking emergency protective measures to protect public health and safety (44 CFR 206.225(a)).

ii. The applicant's legal responsibility to take action where there is an immediate threat to life, public health, and safety must be independent of any expectation, or request, that FEMA will reimburse costs incurred for private property debris removal. In addition, legal responsibility is not established solely by an applicant obtaining signed rights-of-entry and hold harmless agreements from property owners.

c. Authorization for Debris Removal from Private Property (44 CFR 206.223(a)(3)). Confirmation that a legally-authorized official of the requesting applicant has ordered the exercise of public emergency powers or other appropriate authority to enter onto private property in the designated area in order to remove/reduce threats to life, public health, and safety threat via debris removal.

d. Indemnification (44 CFR 206.9). The requesting entity indemnifies the Federal government and its employees, agents, and contractors from any claims arising from the removal of debris from private property.

2. The FCO will approve or disapprove in writing each written request submitted by the State or local government for FEMA to designate areas eligible for private property debris removal. After receiving approval from the FCO, the State or local government may begin identifying properties and the specific scope of work for private property debris removal activities and apply for supplemental assistance through the Public Assistance Program.

**C. Duplication of Benefits** (44 CFR 206.191). FEMA is prohibited by Section 312 of the Stafford Act from approving funds for work that is covered by any other source of funding. Therefore, State and local governments must take reasonable steps to prevent such an occurrence, and verify that insurance coverage or any other source of funding does not exist for the debris removal work accomplished on each piece of private property.

# FEMA

## DISASTER ASSISTANCE POLICY

DAP9523.13

1. When debris removal from private property is covered by an insurance policy, the insurance proceeds must be used as the first source of funding. Public Assistance grant funding may be used to pay for the remainder of the costs of debris removal from private property.

2. If FEMA discovers that a duplication of benefits from any other source of funding has occurred, FEMA will de-obligate funds from the Grantee in the amount that such assistance duplicates funding that the property owners received from other sources.

### **D. Eligibility of Debris Removal Work from Private Property (44 CFR 206.224(b)).**

1. Eligible debris removal work from private property includes removal of:

a. Large piles of disaster-generated debris in the living, recreational, and working areas of properties in urban, suburban, and rural areas, including large lots.

b. Disaster-generated debris obstructing primary ingress and egress routes to improved property.

c. Disaster-damaged limbs and leaning trees in danger of falling on improved property, primary ingress or egress routes, or public rights-of-way.

i. Hazardous tree removal is eligible only if the tree is greater than six inches in diameter (measured at diameter breast height) and meets any of the following criterion: more than 50% of the crown is damaged or destroyed; the trunk is split or broken branches expose the heartwood; or the tree is leaning at an angle greater than 30 degrees and shows evidence of ground disturbance.

ii. Hazardous limb removal is eligible only if the limb is greater than two inches in diameter measured at the point of break.

d. Debris created by the removal of disaster-damaged interior and exterior materials from improved property.

e. Household hazardous wastes (such as household cleaning supplies, insecticides, herbicides, etc.)

f. Disaster-generated debris on private roads, including debris originating from private property and placed at the curb of public or private rights-of-way, provided that the

# FEMA

## DISASTER ASSISTANCE POLICY

DAP9523.13

removal of the debris is the legal responsibility of an eligible applicant, on the basis of removing an immediate threat to life, public health, and safety.

2. Ineligible debris removal work on private property includes the removal of:

- a. Debris from vacant lots, forests, heavily wooded areas, unimproved property, and unused areas.
- b. Debris on agricultural lands used for crops or livestock.
- c. Concrete slabs or foundations-on-grade.
- d. Reconstruction debris consisting of materials used in the reconstruction of disaster-damaged improved property.

**E. Debris Removal from Commercial Property.** The removal of debris from commercial property is generally ineligible for Public Assistance grant funding. It is assumed and expected that these commercial enterprises retain insurance that can and will cover the cost of debris removal. However, in some cases as determined by the FCO, the removal of debris from private commercial property by a State or local government may be eligible for FEMA reimbursement only when such removal is in the public interest (44 CFR 206.224(a) and (b)).

Industrial parks, golf courses, commercial cemeteries, apartments, condominiums, and mobile homes in commercial trailer parks are generally considered commercial property with respect to Public Assistance funding.

**F. Environmental and Historic Review Requirements.** Eligible debris removal activities on private property must satisfy environmental and historic preservation compliance review requirements as established by 44 CFR Parts 9 and 10, the National Historic Preservation Act, the Endangered Species Act, and all other applicable legal requirements.

# FEMA

## RECOVERY POLICY – RP9525.7

### I. TITLE: **Labor Costs - Emergency Work**

II. DATE: **November 16, 2006**

### III. PURPOSE:

Provide guidance on the eligibility of labor costs for an applicant's permanent, temporary, and contract employees who perform emergency work under Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act), 42 U.S.C. 5121-5206, as amended.

### IV. SCOPE AND AUDIENCE:

This policy applies to all emergencies, major disasters, and fire management assistance declarations, declared on or after the publication date of this document.

### V. AUTHORITY:

Sections 403, 407, 420 and 502 of the Stafford Act and 44 Code of Federal Regulations (CFR) §204.42, §206.224 and §206.225.

### VI. BACKGROUND:

A. On October 14, 1993, FEMA published a regulation that made the force account labor straight-time salary for work under Section 403 and 407 ineligible under the Public Assistance Program. The 1993 regulation did not include emergency work accomplished under Section 502 (Federal Emergency Assistance) of the Stafford Act. The ineligibility of straight-time salaries for emergency work under Section 502 is included as a provision of the FEMA-State Agreement.

B. Labor (straight-time, overtime, and fringe benefits to the extent the benefits were being paid before the disaster) performed under Section 406 (permanent work) of the Stafford Act remains eligible for reimbursement.

### VII. POLICY:

A. Under Sections 403, 407, and 502 of the Stafford Act, eligible emergency work labor costs are those costs incurred by an eligible applicant while performing eligible work. The cost of straight-time salaries and benefits of an applicant's permanently employed personnel is not eligible in calculating the cost of eligible emergency work. The FEMA-State Agreement will

# FEMA

## RECOVERY POLICY – RP9525.7

stipulate the ineligibility of straight-time salaries and benefits of an applicant's permanently employed personnel performing emergency work (Categories A and B). For the purpose of this policy, "permanently employed personnel" will refer to those employees whose positions are already included in the applicant's budget.

B. Fixed-term employees, such as seasonally employed personnel, when covered under existing budgets and used for a disaster during the season of employment, are considered permanently employed for the purpose of cost eligibility.

C. Straight-time and overtime will be determined in accordance with the applicant's pre-disaster policies, which should be applied consistently in both disaster and non-disaster situations. For example, one applicant may define labor exceeding 8 hours a day as overtime, while another might define labor exceeding 40 hours a week as overtime. However, all costs, including premium pay, must be reasonable and equitable for the type of work being performed.

D. The actual costs of salaries and benefits for individuals sent home or told not to report due to emergency conditions are not eligible for reimbursement. Extraordinary costs for essential employees who are called back to duty during administrative leave to perform disaster-related emergency work are eligible if the costs were provided for in written policy prior to the disaster.

E. The costs for contract labor, mutual aid in accordance with an existing agreement, or temporary hires needed to accomplish emergency work are eligible for reimbursement. However, straight-time salary and benefits of force account labor overseeing contractors performing emergency work are not eligible in calculating the cost of eligible emergency work.

F. The reimbursement of force account or temporary labor to backfill regular staff who are performing eligible emergency work may be eligible. Backfill cost is defined as the straight-time salary and benefits and overtime of replacement personnel who perform the regular duties of other personnel while they are performing eligible emergency work under the Public Assistance Program. There are several circumstances which affect the eligibility of the backfill employee.

1. If the backfill employee is a contract or extra hire, the cost of this extra person represents an extra cost to the applicant. Regular and overtime are eligible. If the employee is permanently employed, straight time is not eligible. Only overtime costs are eligible.

# FEMA

## RECOVERY POLICY – RP9525.7

2. The cost of straight-time salaries and benefits of an applicant's permanently employed personnel, of any department, regardless of any inter-departmental agreements, are not eligible.

3. If the backfill employee is a regular employee who is called in on his/her day off (weekend or other off day), there may be an extra cost to the applicant. Regular and overtime costs may be eligible.

4. If the backfill employee is called in from scheduled leave, there should be no extra cost as the leave can be rescheduled. Only the overtime is eligible.

5. Generally, exempt employees (i.e. those who are exempt from minimum wage and overtime provisions of the Fair Labor Standards Act) are not eligible for overtime, unless specified in an applicant's pre-disaster policy.

G. Permanent employees who are funded from an external source (e.g., by a grant from a Federal agency, statutorily dedicated funds, rate-payers, etc.) to work on specific non-disaster tasks may be paid for emergency work. However, the FEMA Region is to consult with FEMA headquarters before approving payment.

H. Reimbursement of labor costs for employees performing emergency work is limited to actual time worked, even when the applicant is contractually obligated to pay for 24 hour shifts. It is not reasonable for a person to work more than 48 hours continuously without an extended rest period. Therefore, FEMA will reimburse up to 24 hours for each of the first two days, and up to 16 hours for each of the following days for emergency work. All requested hours must be for actual time worked. Standby time is not eligible under the Public Assistance Program or Fire Management Assistance Grant Program. Pre-positioning under the Fire Management Assistance Grant Program is eligible if the resources were actually used to suppress a declared fire.

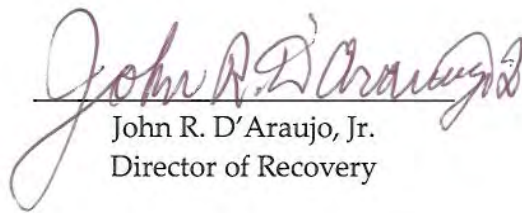

I. The value of volunteers accomplishing eligible emergency work can be credited toward the non-Federal cost share of the applicant's emergency work in accordance with Donated Resources Policy #9525.2.

# FEMA

## RECOVERY POLICY – RP9525.7

- VIII. **ORIGINATING OFFICE:** Recovery Division (Public Assistance Branch).
- IX. **SUPERSESSON:** This policy updates and replaces all relevant provisions of previous Public Assistance policy documents or guidance on this subject.

**PUBLIC ASSISTANCE PROGRAM**

---

---

**FACT SHEET  
DEBRIS OPERATIONS - CLARIFICATION  
EMERGENCY CONTRACTING VS. EMERGENCY WORK**

**SUMMARY:** Contracting for debris operations, even though it is “emergency work” in FEMA operations, does not necessarily mean the contracts can be awarded without competitive bidding. Applicants should comply with State laws and regulations, but should be aware that non-competitive contracting is acceptable ONLY in rare circumstances where there can be no delay in meeting a requirement. In general, contracting for debris work requires competitive bidding. The definition of “emergency” in contracting procedures is not the same as FEMA’s definition of “emergency work”.

**DISCUSSION:** There appears to be some confusion regarding the awarding of some contracts, especially for debris, without competitive bidding. The reason cited for such actions is that the contract is for emergency work, and competitive bidding is not required.

Part 13 of 44 CFR is entitled “Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments”. These requirements apply to all grants and subgrants to governments, except where inconsistent with Federal statutes or regulations authorized in accordance with the exception provisions of Section 13.6. In essence, these regulations apply to all Federal grants awarded to State, tribal and local governments.

Non-competitive proposals awarded under emergency requirements are addressed as follows:

“Procurement by non-competitive proposals may be used only when the award of a contract is infeasible under small purchase procedures, sealed bids, or competitive proposals and one of the following circumstances applies:

(A) .....

(B) The public exigency or emergency of the requirement will not permit a delay resulting from competitive solicitation.” (44 CFR Part 13.36(d)(4)(1)(B)).”

Staff of the Office of General Counsel and the Office of the Inspector General have expressed concern that contracts are being awarded under this section without an understanding of the requirement. Simply stated, non-competitive contracts can be awarded only if the emergency is such that the contract award **cannot be delayed by the amount of time required to obtain competitive bidding.**

FEMA's division of disaster work into "emergency" and "permanent" is generally based on the period of time during which the work is to be performed, and not on the urgency of that work. Therefore, the award of non-competitive contracts cannot be justified on the basis of "emergency work", as defined by FEMA.

In some situations, such as clearing road for emergency access (moving debris off the driving surface to the shoulders or rights-of-way), or removal of debris at a specific site, awarding a non-competitive contract for site-specific work may be warranted; however, normally, non-competitive bid awards should not be made several days (or weeks) after the disaster or for long-term debris removal. Obviously, the latter situations do not address a public exigency or emergency which "will not permit a delay resulting from competitive solicitation".

Regarding competitive solicitations, applicants can use an expedited process for obtaining competitive bids. In the past, applicants have developed a scope-of-work, identified contractors that can do the work, made telephone invitations for bids, and received excellent competitive bids. Again, applicants must comply with State and local bidding requirements.

Please remind applicants that no contractor has the authority to make determinations as to eligibility, determinations of acceptable emergency contracting procedures, or definitions of emergency work. Such determinations are to be made by FEMA.

FEMA

# RECOVERY DIVISION FACT SHEET

RP9580.201

## DEBRIS REMOVAL APPLICANT'S CONTRACTING CHECKLIST

### Overview

To be eligible for reimbursement under the Public Assistance Program, contracts for debris removal must meet rules for Federal grants, as provided for in 44 CFR Part 13.36 *Procurement* ([http://www.access.gpo.gov/nara/cfr/waisidx\\_04/44cfr13\\_04.html](http://www.access.gpo.gov/nara/cfr/waisidx_04/44cfr13_04.html)). Public Assistance applicants should comply with their own procurement procedures in accordance with applicable State and local laws and regulations, provided that they conform to applicable Federal laws and standards identified in Part 13. The following guidance is provided to assist Public Assistance applicants in the procurement process.

### Contracting Process Checklist

- Use competitive bidding procedures. Complete and document a cost analysis to demonstrate price reasonableness on any contract or contract modification where adequate price competition is lacking, as detailed in 44 CFR 13.36(f).
- Provide a clear and definitive scope of work and monitoring requirements in the request for proposals/bids. Use acceptable emergency contracting procedures that include an expedited competitive bid process only if time does not allow for more stringent procedures.
- Require bidders to provide copies of references, licenses, financial records, and proof of insurance and bonding.
- Obtain review from your legal representative of your procurement process and any contract to be awarded to ensure they are in compliance with all Federal, State, and local requirements.
- Document procedures used to obtain/award contracts (procurement information, bid requests and tabulations, etc).
- Use load ticket requirement to record with specificity (e.g., street address) where debris is picked up and the amount picked up, hauled, reduced and disposed of.

*FEMA will, when requested by applicants, assist in the review of debris removal contracts. However, such a review does not constitute approval.*

FEMA

# RECOVERY DIVISION FACT SHEET

RP9580.201

## DEBRIS REMOVAL APPLICANT'S CONTRACTING CHECKLIST

### Contract Provisions Checklist

**All contracts must contain/reflect the following provisions:**

- All payment provisions must be based on unit prices.
- No payments may be based on time and material costs unless limited to work performed during the first 70 hours of actual work following a disaster event.
- That payment will be made only for debris that FEMA determines eligible, referencing FEMA regulations and Public Assistance guides and fact sheets. (This is an optional provision to protect the applicant, and is used only following a major disaster declaration.)
- An invoice provision requiring contractors to submit invoices regularly and for no more than 30-day periods.
- A "Termination for Convenience" clause allowing contract termination at any time for any reason.
- A reasonable limit on the period of performance for the work to be done.
- A subcontract plan including a clear description of the percentage of the work the contractor may subcontract out and limiting use of subcontractors to only those you approve.
- The preference that the contractor use mechanical equipment to load and reasonably compact debris into the trucks and trailers.
- The requirement that the contractor provide a safe working environment, including properly constructed monitoring towers.
- Option of a unit price for extracting from ground and removing FEMA-eligible stumps (only for stumps with diameters larger than 24 inches, measured 24 inches above the ground, and with 50% or more of the root ball exposed), or including all stumps in the unit price.

FEMA

# RECOVERY DIVISION FACT SHEET

RP9580.201

## DEBRIS REMOVAL APPLICANT'S CONTRACTING CHECKLIST

### Contract Provisions Checklist - Continued

**All contracts must contain/reflect the following provisions:**

- Requirement that all contract amendments and modifications be in writing.
- Requirement that contractor obtain adequate payment and performance bonds and insurance coverage.

### Pre-Disaster and Stand-By Contracts Checklist

- It is recommended that you pre-qualify contractors prior to an event and solicit bid prices from this list of contractors once an event has occurred.
- The solicitation for pre-qualifying contractors must adequately define in the proposed scope of work all the potential types of debris, typical haul distances, and size of events for which a contract may be activated.
- To ensure reasonable debris removal costs, award debris removal contracts based on unit prices (volume or weight).
- If the contract is awarded on a time and material basis, it should be limited to no more than 70 hours of actual clearance and removal operations.
- After the initial 70-hour period, payment should be on a unit price basis (volume or weight).

FEMA

# RECOVERY DIVISION FACT SHEET

RP9580.201

## DEBRIS REMOVAL APPLICANT'S CONTRACTING CHECKLIST

### Avoidance Checklist

- DO NOT:** Award a debris removal contract on a sole-source basis.
- DO NOT:** Sign a contract (including one provided by a contractor) until it has been thoroughly reviewed by your legal representative.
- DO NOT:** Allow any contractor to make eligibility determinations, since only FEMA has that authority.
- DO NOT:** Accept any contractor's claim that it is "FEMA certified." FEMA does not certify, credential, or recommend debris contractors.
- DO NOT:** Award a contract to develop and manage debris processing sites unless you know it is necessary, and have contacted the State for technical assistance concerning the need for such operations. Temporary debris storage and reduction sites are not always necessary.
- DO NOT:** Allow separate line item payment for stumps 24 inches and smaller in diameter; these should be treated as normal debris.
- DO NOT:** "Piggyback" or utilize a contract awarded by another entity. Piggybacking may be legal under applicable state law; however, the use of such a contract may jeopardize FEMA funding.
- DO NOT:** Award pre-disaster/stand-by contracts with mobilization costs or unit costs that are significantly higher than what they would be if the contract were awarded post-disaster. Such contracts should have variable mobilization costs depending upon the size of the debris work that may be encountered.

FEMA

RECOVERY DIVISION

# FACT SHEET

9580.202

## DEBRIS REMOVAL AUTHORITIES OF FEDERAL AGENCIES

### Overview

This fact sheet identifies and describes the authorities of federal departments and agencies in support of debris operations following a presidential emergency or major disaster declaration. The following nine Federal agencies and departments are invested with authorities (described in detail below) addressing various aspects of debris management.

- Department of Homeland Security
  - *Federal Emergency Management Agency*
  - *United States Coast Guard*
- Department of Defense: *U.S. Army Corps of Engineers*
- Department of Agriculture
  - *Natural Resources and Conservation Service*
  - *Farm Service Agency*
  - *Animal Plant and Health Inspection Service*
- Department of Transportation: *Federal Highway Administration*
- Department of Commerce: *National Oceanic and Atmospheric Administration*
- Environmental Protection Agency

### Department of Homeland Security

#### **Federal Emergency Management Agency (FEMA)**

- FEMA is authorized in Sections 403, 407 and 502 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act to provide assistance to eligible applicants to remove debris from public and private property following a Presidential disaster declaration, when in the public interest.
- Removal must be necessary to eliminate immediate threats to lives, public health and safety; eliminate immediate threats of significant damage to improved public or private property; or ensure

## DEBRIS REMOVAL AUTHORITIES OF FEDERAL AGENCIES

the economic recovery of the affected community to the benefit of the community-at-large. The debris must be the direct result of the disaster and located in the disaster area, and the applicant must have the legal responsibility to remove the debris.

- FEMA will (1) reimburse applicants to remove eligible debris, or (2) through a mission assignment to another Federal agency (and upon request of the State) - provide *direct Federal assistance* when it has been demonstrated that the State and local government lack the capability to perform or contract for the requested work.
- Assistance will be cost-shared (at no less than 75% Federal and 25% non-Federal). In extreme circumstances, FEMA will provide up to 100% funding for a limited period of time.

### **United States Coast Guard (USCG)**

- Under the National Contingency Plan (NCP), the USCG and Environmental Protection Agency (EPA) are responsible for providing pre-designated Federal On-Scene Coordinators (FOSCs) to conduct emergency removals of oil and hazardous materials.
- USCG is responsible for the coastal zone, and the EPA is responsible for the inland zone. The delineation between coastal and inland zones is by mutual agreement between the USCG and the EPA, and the geographic limits are indicated in Area Contingency Plans.
- Under the Comprehensive Environmental Response, Compensation, and Liability Act, or CERCLA (also known as Superfund), and the Clean Water Act, USCG has the authority to respond to actual or potential discharges of oil and actual or potential releases of hazardous substances, pollutants and contaminants that may endanger public health or the environment.
- Response actions may include containment, stabilization, decontamination, collection (e.g., orphan drums tanks and drums), and final disposal. Debris may be mixed with, or contain, oil or hazardous materials that are subject to USCG response authorities. Oil removal is funded from the Oil Spill Liability Trust Fund, while hazardous materials removal is conducted using CERCLA funds.
- USCG, under the Ports and Waterways Safety Act (33 U.S.C. §§1221), is responsible for keeping waterways safe and open. While there is no specific language stating that the USCG is responsible for debris removal from waterways, the USCG has been tasked - in the past - to assist in waterway and marine transportation system recovery.

## DEBRIS REMOVAL AUTHORITIES OF FEDERAL AGENCIES

### Department of Defense

#### United States Army Corps of Engineers (USACE)

- USACE is authorized by Section 202 of Water Resources Development Act (WRDA) of 1976 (PL 94-587) to develop projects for the collection and removal of drift and debris from publicly maintained commercial harbors, and from land and water areas immediately adjacent thereto.
- Specific and limited local programs for continuing debris collection and disposal have been authorized (on an individual basis, with the authorized work carried out at each locality as a separate, distinct project) by Congress for:
  - New York Harbor
  - Baltimore Harbor
  - Norfolk Harbor
  - Potomac and Anacostia Rivers, in the Washington, D.C. Metropolitan area
  - San Francisco Harbor/Bay, California.
- Sections 15, 19, and 20 of the River and Harbor Act of 1899, as amended, authorize USACE to remove sunken vessels or other obstructions from navigable waterways under emergency conditions. A navigable waterway is one that has been authorized by Congress, and which USACE operates and maintains for general (including commercial and recreational) navigation. Funding for operation and maintenance of these "Federal" waterways is through USACE's annual Operations and Maintenance General Appropriation. USACE's policy is to oversee removal of sunken vessels by an identifiable owner, operator or lessee if the sunken vessel is in or likely to be moved into a Federal navigation channel. USACE will remove a vessel using its emergency authorities only if the owner, operator, or lessee cannot be identified or they cannot effect removal in a timely and safe manner.
- USACE is also authorized, under Flood Control and Coastal Emergencies (PL 84-99), to provide assistance for debris removal from flood control works, i.e., structures designed and constructed to have appreciable and dependable effects in preventing damage by irregular and unusual rises in water level. Under this authority, USACE requires that an applicant, to be eligible for assistance, be an active participant in its PL 84-99 Rehabilitation and Inspection Program at the time of the disaster.

## DEBRIS REMOVAL AUTHORITIES OF FEDERAL AGENCIES

### United States Department of Agriculture

#### Natural Resources Conservation Service (NRCS)

- NRCS' Emergency Watershed Protection Program (EWP) is authorized by Section 216 of the Flood Control Act of 1950, PL 81-516, 33 U.S.C. 701b-1; and Section 403 of the Agricultural Credit Act of 1978, PL 95-334, as amended by Section 382, of the Federal Agriculture Improvement and Reform Act of 1996, PL 104-127, 16 U.S.C. 2203.
- Debris clean up must be for either runoff retardation or soil erosion prevention that is causing a sudden impairment in the watershed creating an imminent threat to life or property. Typically, this includes debris within channels but could also include debris in close proximity to a channel or situated where the next event could create an imminent threat to life or property. There is no size limit to the watershed except that EWP assistance is not eligible for coastal erosion restoration.
- The EWP is funded through specific Congressional appropriations.
- Public and private landowners are eligible for assistance but must be represented by a project sponsor (a state or political subdivision thereof, qualified Indian tribe or tribal organization, or unit of local government).
- Work can be done either through Federal or local contracts. Sponsors are responsible for the 75% local cost share.
- NRCS can provide assistance when the President declares an area to be a major disaster area or when an NRCS State Conservationist determines that a watershed impairment exists.
- NRCS will not provide funding for activities undertaken by a sponsor prior to the signing of an agreement between NRCS and the sponsor.

#### Farm Service Agency (FSA)

- Emergency Conservation Program (ECP) is authorized by Sections 401 - 406 of the Agricultural Credit Act of 1978, PL 95-334, and provides emergency assistance for debris removal from privately-owned land following a natural disaster. It is funded through Congressional supplemental appropriations.

# DEBRIS REMOVAL AUTHORITIES OF FEDERAL AGENCIES

- The damage must be so costly that Federal assistance is or will be required to return the land to productive agricultural use or to provide emergency water for livestock.
- The ECP provides emergency cost share funding (up to 75% federal share) and technical assistance for farmers and ranchers to remove debris (other than animal carcasses).

### Animal, Plant and Health Inspection Service (APHIS)

- APHIS has two programs under which it can provide debris removal assistance:
  - Veterinary Services (VS) program authorized by Animal Health Protection Act (7 U.S.C. 8301–8317) which provides for removal and burial of diseased animal carcasses.
  - Plant Protection and Quarantine (PPQ) program authorized by Plant Protection Act (Title IV, Pub. L. 106–224, 114 Stat. 438, 7 U.S.C. 7701–7772). This program manages issues related to the health of plant resources. Primary objective is to regulate and monitor in order to reduce the risk of introduction and spread of invasive species, including planning, surveillance, quick detection, containment, and eradication.
- Both public and private lands are eligible under these programs which provide assistance to Federal, State, tribes, local jurisdictions, and private landowners to manage animal and plant health by collecting and providing information, conducting or supporting treatments, providing technical assistance for planning and program implementation (removal).

### Environmental Protection Agency (EPA)

- EPA's primary authorities related to debris removal fall into two categories: (1) authorities related to cleaning up debris that is mixed with or contains oil or hazardous materials; and (2) authorities related to establishing standards for proper management of debris (hazardous and non-hazardous). EPA generally does not remove non-hazardous debris after emergencies/disasters.
- Under the Comprehensive Environmental Response, Compensation, and Liability Act, or CERCLA (also known as Superfund), and the Clean Water Act, EPA and the United States Coast Guard (USCG) have the authority to respond to actual or potential discharges of oil and actual or potential discharges of hazardous substances, and to actual or potential discharges of pollutants and contaminants that may present an imminent and substantial danger to the public health or welfare.

# DEBRIS REMOVAL AUTHORITIES OF FEDERAL AGENCIES

- EPA has responsibility for responses in the inland zone and USCG has responsibility for responses in the coastal zone. The delineation between the inland and coastal zone is determined by mutual agreement by the EPA and USCG, and the geographic boundaries are indicated in Area Contingency Plans.
- EPA and USCG carry out these responsibilities under implementing regulations known as the National Oil and Hazardous Substances Pollution Contingency Plan (NCP). EPA and USCG pre-designate Federal On-Scene Coordinators (FOSCs) to direct and coordinate response actions.
- Response actions may include containment, stabilization, decontamination, collection (e.g., orphan tanks and drums), and disposal. Debris may be mixed with, or contain, oil or hazardous materials that are subject to these response authorities.
- CERCLA requires that the State in which the site is located fund 10% of remedial action costs, with the other 90% drawn from the Superfund. However, where the potentially responsible party is a political subdivision of a State, the State must agree to fund 50% of the remedial action costs, with the other 50% drawn from the Superfund.
- The Resource Conservation and Recovery Act established a framework for Federal, State, and local cooperation in controlling the management of hazardous and non-hazardous solid waste. The EPA role is to establish minimum regulatory standards that are, in most cases, implemented by the States and to provide technical assistance. EPA administers other laws as well that may impact the management of debris (e.g., Clean Air Act requirements that apply to asbestos-containing debris). Again, some of these programs may be delegated to the States.
- FEMA may mission assign the EPA through the United States Army Corps of Engineers to dispose of household hazardous waste following a major disaster declaration from the President.

## Department of Transportation

### Federal Highway Administration (FHWA)

- The Emergency Relief (or ER) program is authorized in Title 23, United States Code, Section 125, from the Highway Trust Fund, and supports repair or reconstruction of Federal-aid highways and roads on Federal lands which have suffered serious damage as a result of natural disasters or catastrophic failures from an external cause.
- Debris removal from Federal-aid roads is eligible for 100% reimbursement during the first 180 days following an emergency event that qualifies and is approved for the ER program.

## DEBRIS REMOVAL AUTHORITIES OF FEDERAL AGENCIES

- The ER program is funded \$100 million in annual authorizations. If the annual authorization is expended, FHWA will reimburse eligible costs when ER funds become available.
- The State must incur a cost of at least \$700,000 statewide to qualify for ER assistance. The cost of individual projects (sites) must be \$5,000.
- It is the responsibility of individual States to request ER funds for assistance in the cost of necessary repair of Federal-aid highways damaged by natural disasters or catastrophic failures.

### Department of Commerce

#### National Oceanic and Atmospheric Administration (NOAA)

- The Coastal and Geodetic Survey Act of 1947 and the Hydrographic Services Improvement Acts of 1998, 2002, authorize NOAA to be directly involved in programs to assess and remove hazards and debris. NOAA does not fund debris removal.
- NOAA's Office of Coastal Survey is responsible for surveying and charting the nation's waters and coast, and has been heavily involved in hydro-surveying using side-scan and multi-beam sonar to identify hazards and debris and dangers to navigation along the Gulf Coast for the last three years.

## DEBRIS MONITORING

### Overview

When a disaster event occurs that produces large amounts of debris, effective coordination is required between the Public Assistance applicant, State, and FEMA to ensure that debris removal operations are efficient, effective, and eligible for FEMA Public Assistance grant funding. Eligible Public Assistance applicants are encouraged to monitor debris removal operations and document eligible quantities and reasonable expenses to ensure that the work is eligible for Public Assistance grant funding. Failure to do so properly may jeopardize this funding.

Public Assistance applicants can use force account resources or contractors to monitor debris removal operations, or a combination of both. Regardless of the method, the applicant is responsible for ensuring that applicant-managed debris removal work (either force account or contract) being funded through Public Assistance grants is eligible in accordance with Public Assistance guidelines. This Fact Sheet provides Public Assistance applicants with information on how to properly monitor applicant-managed debris removal operations to ensure compliance with these guidelines. It also provides information on debris monitoring responsibilities and duties that apply to both force account and contractor operations; however, some information provided only applies to debris operations performed under contract.

### Debris Monitoring Roles and Responsibilities

Monitoring debris removal operations requires comprehensive observation and documentation by the Public Assistance applicant of debris removal work performed from the point of debris collection to final disposal. Monitoring debris removal work involves constant observation of crews to ensure that workers are performing eligible work in accordance with Public Assistance guidelines, and helps to verify compliance with all applicable Federal, State, and local regulations.

A number of different entities play a role in monitoring debris removal operations to ensure that they are efficient, effective and eligible for FEMA Public Assistance funding. It is important that these entities work together to communicate and resolve issues in the field so that reimbursement funding for debris removal operations is not jeopardized. Below is a table which addresses the general monitoring responsibilities and tasks of different partners in the debris removal operation. The table is followed by specific monitoring responsibilities and duties for both force account and contractor debris monitors in the field.

## DEBRIS MONITORING

| Entity   | Responsibilities   | Tasks   |
|--|--|---|
| <b>Debris Removal Contractor</b>                         | Conduct debris removal operations per the terms of the contract.   | <ul style="list-style-type: none"> <li>▪ Monitor its own day-to-day operations to ensure its contractual obligations are being met.</li> </ul>  |
| <b>Public Assistance Applicant Monitoring Contractor</b> | Works for Applicant to monitor debris contractor's day-to-day operations to ensure the applicants expectations and contractual requirements are being met.   | <ul style="list-style-type: none"> <li>▪ Provide debris monitoring personnel who are trained in eligibility.</li> <li>▪ Monitor operations in accordance with the contract requirements.</li> <li>▪ Provide all monitoring documents as required in the monitoring contract.</li> </ul>   |
| <b>Public Assistance Applicant (subgrantee)</b>          | Provide oversight and quality assurance of both the debris removal contract and the monitoring contract (if applicable). Request PA funds for eligible work. Ensure performance measures are met and eligible work is documented. Understand eligibility requirements and ensure work performed under the contract meets these requirements. | <ul style="list-style-type: none"> <li>▪ Designate project manager.</li> </ul> <p><i>If debris removal is performed by force account labor:</i></p> <ul style="list-style-type: none"> <li>▪ Provide documentation to substantiate eligible debris quantities.</li> <li>▪ Ensure compliance with subgrant requirements.</li> </ul> <p><i>If debris removal is performed under contract:</i></p> <ul style="list-style-type: none"> <li>▪ Ensure that debris removal contractors and monitoring contractors (if applicable) understand eligibility requirements for the debris removal operations.</li> <li>▪ Ensure that only eligible debris quantities are being claimed for Public Assistance.</li> <li>▪ Resolve issues or discrepancies associated with the contract.</li> </ul> |
| <b>State (Grantee)</b>                                   | Ensure grant requirements outlined in the 44 CFR are being met and that PA applicants are receiving funds for eligible costs. Responsible for monitoring the grant and subgrant to ensure compliance with Federal, State and local laws and regulations.   | <ul style="list-style-type: none"> <li>▪ Monitor the grant and subgrant requirements.</li> <li>▪ Ensure that the applicant is sufficiently monitoring the debris removal operation (FEMA \Grantee effort).</li> <li>▪ Conduct random monitoring at load sites and disposal sites to ensure compliance with grant requirements (FEMA \Grantee effort).</li> <li>▪ Notify subgrantee of compliance issues and outline corrective actions (FEMA \Grantee effort).</li> </ul>   |
| <b>FEMA</b>  | Ensure grant requirements outlined in 44 CFR are being met. Fund eligible work. Responsible for the preparation of large project worksheets, development of the scope of work and the obligation of funds. Responsible for monitoring the grant to ensure compliance with Federal, State and local laws and regulations.                     | <ul style="list-style-type: none"> <li>▪ Develop large project worksheets in coordination with the Grantee and subgrantee.</li> <li>▪ Utilize monitors to ensure that the applicant is sufficiently monitoring the debris removal operation. (FEMA \Grantee effort)</li> <li>▪ Conduct random monitoring at load sites and disposal sites to ensure compliance with grant requirements. (FEMA \Grantee effort).</li> <li>▪ Notify Grantee/subgrantee of compliance issues and outline corrective actions (FEMA \Grantee effort).</li> <li>▪ Increase or decrease monitoring efforts as necessary to ensure corrective actions are in place and operations are being effectively monitored.</li> </ul>   |

## DEBRIS MONITORING

The specific responsibilities and duties of individual debris monitors in the field are the same for both force account and contracted debris monitoring operations. They are:

- Report issues to their direct supervisor which require action (such as safety concerns, contractor non-compliance and equipment use)
- Accurately measure and certify truck capacities (recertify on a regular basis)
- Properly and accurately complete and physically control load tickets (in tower and field)
- Ensure that trucks are accurately credited for their load
- Ensure that trucks are not artificially loaded (ex: debris is wetted, debris is fluffed—not compacted)
- Validate hazardous trees, including hangers, leaners, and stumps
- Ensure that hazardous wastes are not mixed in loads
- Ensure that all debris is removed from trucks at Debris Management Sites (DMS)
- Report if improper equipment is mobilized and used
- Report if contractor personnel safety standards are not followed
- Report if general public safety standards are not followed
- Report if completion schedules are not on target
- Ensure that only debris specified in the contract is collected (and is identified as eligible or ineligible)
- Assure that force account labor and/or debris contractor work is within the assigned scope of work
- Monitor site development and restoration of DMSs
- Report to supervisor if debris removal work does not comply with all local ordinances as well as State and Federal regulations (i.e., proper disposal of hazardous wastes)
- Record the types of equipment used (Time & Materials contract)
- Record the hours equipment was used, include downtime of each piece of equipment by day (Time & Materials contract)

Applicants may request FEMA/State assistance with debris monitoring or monitor training.

*Only FEMA has the authority to make eligibility decisions; contractors cannot make eligibility determinations. Information on eligibility can be found in the Public Assistance Debris Management Guide FEMA 325, the Public Assistance Policy Digest FEMA 321, the Public Assistance Applicant Handbook FEMA 323, and the Public Assistance Guide FEMA 322.*

### Monitoring Requirements by Type of Contract

Unlike other categories of work eligible for Public Assistance grants, initial debris removal project worksheets typically do not have a defined scope of work, since precise quantities of debris are difficult to attain. Therefore, unit price contracts which pay by debris volume or weight removed are typically implemented. Unit price contracts require extensive monitoring to determine accurate quantities of eligible debris removed and disposed. As load tickets are compiled and accurate quantities are determined through monitoring, the scope of work for the project worksheet, or version, is established.

## DEBRIS MONITORING

In some cases, time and materials contracts may be more cost effective and appropriate for the amount and type of eligible work to be performed. For both time and materials and lump sum contracts, debris monitors must still document and quantify eligible debris amounts in order to determine reasonableness of costs.

The table below includes a breakdown of monitoring requirements by contract type.

| Type of Contract   | Project Worksheet Scope of Work  | Subgrantee Monitoring Required |           |      |                |       | Comments   |
|--------------------|--|--------------------------------|-----------|------|----------------|-------|--|
|                    |  | Crew Efficiency                | Load site | DMSs | Disposal sites | Fraud |  |
| Lump Sum           | Defined debris quantities and reasonable costs. Estimate is basis for contract costs.                      |                                | √         |      | √              |       | Quantities are still required to determine reasonable costs.   |
| Unit Price - CY    | Based on eligible debris listed on load tickets  | √                              | √         | √    | √              | √     |  |
| Unit Price - Ton   | Based on actual weight measurements of eligible debris listed on load tickets.                             |                                | √         |      | √              | √     |  |
| Time and Materials | Based on labor, equipment and materials records. Reasonable costs evaluated by determining costs per unit. | √                              | √         |      | √              | √     | Typically used for road clearance. If used for debris removal, quantities are still required to determine reasonable costs. Eligible costs are restricted to up to 70 hours. |

### Monitoring Contracts

The request for proposal (RFP) for debris monitoring contracts should outline the qualification of debris monitors. The qualifications should be appropriate for the individual responsibilities and duties listed above, and debris monitors should have experience working on construction sites and be familiar with safety regulations. It is not necessary to have professional engineers and other certified professionals perform these duties. Debris monitors primarily should have the ability to estimate debris quantities, differentiate between debris types, properly fill out load tickets, and follow all site safety procedures.

The RFP should also outline possible locations to be monitored and reporting requirements to document eligible debris quantities.

## DEBRIS MONITORING

Monitoring contracts are typically time and materials and must contain a *not-to-exceed* clause per the requirements of Part 13 of 44 CFR. The subgrantee should ensure the level of monitoring and overhead claimed is commensurate with the level of effort required to effectively monitor the debris removal and monitoring operation. In addition to the costs for the monitors, the subgrantee can claim as part of its monitoring project worksheet reasonable costs for the debris monitoring contractor to provide training, oversight, and data compilation as required by the terms of the contract. Architectural and engineering service overhead should not be claimed. Additional information on costs that are eligible can be found in the *Public Assistance Debris Management Guide FEMA 325*.

The monitoring contractor costs associated with compiling data to verify costs invoiced by the debris removal contractor can be an eligible expense. Costs associated with attending meetings with FEMA and/or the Grantee and compiling documentation for the production of project worksheets are funded through the administrative allowance as stated in 44 CFR, Part 206.228 and cannot be a direct charge to a Public Assistance grant.

### Reporting Requirements & Performance Measures

If FEMA is providing grant assistance for the applicant's monitoring contract, a sample of the reporting requirements outlined in the contract will be required to substantiate the eligible costs. This sample must be adequate to demonstrate that sufficient measures were taken to ensure eligibility and accurate quantities are being reported as part of the grant. Applicants should require debris monitors to submit daily reports on load quantities, debris management site operations, and operational and safety issues in the field. Regular reporting helps to promote quality assurance and provides the applicant with a consistent accounting of operations in the field.

If a time and materials monitoring contract is used, the contractor will have to supply labor, equipment and material records to the subgrantee in order to substantiate the actual costs in the project worksheet.

Continuous monitoring of all activities of a debris contractor can help promote efficiency and effectiveness in the debris removal operation. In evaluating a contractor's performance, primary interest is in the progress toward completion of the services called for and the financial status of the contract. It is important that the contract provide for submission of reports and payment estimates to aid in evaluating the contractor's progress.

Applicant debris monitoring responsibilities may include tracking performance measures used to assess the progress of debris removal operations in the field. Specific debris contract performance measures may include:

- Percentage completion tracking
- Adherence to contract time schedules
- Adherence to contract cost schedules

## DEBRIS MONITORING

### Contract Procurement Requirements

To be eligible for reimbursement under the Public Assistance Program, contracts for debris monitoring must meet rules for Federal grants, as provided for in 44 CFR Part 13.36 *Procurement* ([http://www.access.gpo.gov/nara/cfr/waisidx\\_04/44cfr13\\_04.html](http://www.access.gpo.gov/nara/cfr/waisidx_04/44cfr13_04.html)). Public Assistance applicants should comply with their own procurement procedures in accordance with applicable State and local laws and regulations, provided that they conform to applicable Federal laws and standards identified in Part 13.

## Purpose

When a disaster or emergency that generates large amounts of debris occurs, the Federal Emergency Management Agency (FEMA), through its Public Assistance (PA) program, may reimburse eligible PA Applicants, including State, local, tribal, and territorial (SLTT) governments and certain Private Nonprofit (PNP) organizations, for costs associated with debris removal operations.

This *Debris Monitoring Guide* provides PA Applicants and Recipients (States, Territories, or Tribes that are the pass-through entity between the Applicant and FEMA) with guidance on monitoring debris removal operations and eligibility requirements associated with necessary work and reasonable costs to carry out a debris monitoring program.

## Executive Summary

Effective coordination is required between the Applicant, the Recipient, and FEMA to ensure that debris removal operations are efficient, effective, and eligible for FEMA PA grant funding. Applicants must monitor their debris removal operations and document work and costs that may be eligible for reimbursement through the PA grant program. Monitoring debris removal operations requires observation and documentation of all work from the point of debris collection to final disposal. This is to ensure that all work performed is in accordance with PA guidelines and all applicable Federal and SLTT laws and regulations. Failure to properly monitor debris removal operations may jeopardize PA funding.

In monitoring all aspects of its debris removal operations, including activities at all loading, staging, and disposal sites, the Applicant can use its own staff (force account labor) or procure a contract for these services. Applicants are required to use competitive contract bidding procedures when procuring these services, unless circumstances only allow for a noncompetitive method of procurement. Contracting out debris monitoring services does not absolve the Applicant of their responsibility to supervise the performance of the contract. The Applicant should provide clear direction, direct supervision, and a system of control and verification of the performance of debris monitoring contract services. Overall, Applicants are strongly encouraged to work with SLTT emergency management staff and FEMA to ensure compliance with the provisions of the PA program.

While the Applicant has the primary responsibility for daily monitoring operations, the Recipient is responsible for verifying that those monitoring activities are implemented. The primary role of FEMA is to provide technical assistance and debris monitoring guidance to ensure that PA grant requirements and eligibility criteria are met by the Applicant in all areas of the debris operation. FEMA will evaluate the level of effort of debris monitoring operations for reasonableness when determining the eligibility of debris monitoring costs. The level of effort for debris monitoring operations should be proportionate with the magnitude of the disaster, the types and quantities of debris to be removed, and the scope of the debris removal operation.

A good debris monitoring program should ensure accurate documentation of debris removal and disposal operations and associated costs. This documentation serves as the basis for PA Project Worksheets (PWs), which document work and costs eligible for reimbursement from FEMA. Debris monitoring documentation is critical to verify that debris operations are eligible for reimbursement, costs are reasonable, debris quantities are accurate, debris is tracked to its final disposition, and all work and costs comply with regulatory requirements.

Pursuant to FEMA Directive 112-12, this guidance will have a review cycle of no greater than three years. The FEMA PA Division will be responsible for any updates and changes to this guidance.

## Chapter 1: General Eligibility Requirements

In order for debris removal activities to be eligible for PA program funding, debris must be generated by a Presidentially declared disaster; be located within the designated disaster area; be the legal responsibility of an eligible Applicant to remove; and present an immediate threat to life, improved property, or public health and safety. Applicants should consult FEMA's *Public Assistance Program and Policy Guide*<sup>1</sup> (PAPPG), which provides comprehensive information regarding FEMA assistance and the requirements that Applicants must meet in order to receive assistance for debris removal activities.

### A. Eligible Debris Monitoring Work and Costs

The Applicant is responsible for monitoring debris operations to ensure that debris removal activities claimed to the FEMA PA program for reimbursement are completed in accordance with contract specifications and other supplemental guidance, PA program eligibility criteria, and applicable Federal and SLTT laws, regulations and other requirements. FEMA PA personnel will determine eligibility based on the defined scope of work (SOW) of the debris removal operation, field observations, documentation, and reasonable costs. Eligible activities should be clearly documented on loading tickets and the summary of debris totals.

Reasonable costs associated with the following debris monitoring activities may be eligible for PA funding:

- Labor and material costs associated with debris monitoring staff such as field supervisors, loading and tower/site monitors, and staff needed to complete documentation as necessary to substantiate PA grant funding;
- Data compilation of load tickets and field debris monitoring reports to verify eligible work and costs invoiced by the debris removal contractor (if under contract);
- Training of debris monitors on debris removal operations, debris monitoring and documentation processes, and FEMA eligibility (FEMA can provide training to Applicant debris monitors upon request); and/or
- Use of electronic load ticket system or automated debris monitoring system (ADMS) to document debris quantities and eligibility. The Applicant should demonstrate through a cost analysis that the use of the system is cost effective and the cost is reasonable.

### B. Reasonable Cost Guidance

Costs associated with debris monitoring must be reasonable and necessary.<sup>2</sup> Competitively bid debris monitoring contracts that comply with Federal and SLTT procurement regulations and procedures will help to establish reasonableness for debris monitoring costs. Federal procurement standards are found in Title 2 Part 200 of the *Code of Federal Regulations*.<sup>3</sup>

---

<sup>1</sup> *Public Assistance Program and Policy Guide* (PAPPG) Version 4 located at: [www.fema.gov/sites/default/files/2020-06/fema\\_public-assistance-program-and-policy-guide\\_v4\\_6-1-2020.pdf](http://www.fema.gov/sites/default/files/2020-06/fema_public-assistance-program-and-policy-guide_v4_6-1-2020.pdf)

<sup>2</sup> 2 Code of Federal Regulations (C.F.R.) Part 200, Subparts D and E.

<sup>3</sup> 2 C.F.R. §§ 200.317 - 200.327.

In determining if costs are reasonable, FEMA performs a preliminary review of the documentation to assess the complexity of the project and expertise required to conduct the work. Specific to debris monitoring, FEMA determines reasonableness<sup>4</sup> by evaluating:

- **Labor:** Are labor rates, labor classifications, and number of proposed labor hours reasonable for the proposed SOW? The labor rates should be commensurate with the skill level required by the job function. Professional engineers and those with similar qualifications are not required to perform debris monitoring duties.
- **Materials and Supplies:** Are costs necessary and reasonable for the materials and supplies, considering the type of work being performed.
- **Profit:** Was profit negotiated as a separate element of the contract price?<sup>5</sup>

### *Project Management and Design Services*

Costs which are considered project management and/or design services<sup>6</sup> differ from eligible debris monitoring costs. Project management and design services are expenses for the initial design and oversight of work performed related to an eligible project from the design phase (when necessary) to the completion of work. These costs should be documented and claimed separately. The eligibility of this work and its cost will be evaluated on a case-by-case basis.

Such project management and/or design services may include costs associated with direct management and oversight of the debris removal operation by an Applicant's force account labor or by a consulting firm retained to analyze, design, and oversee the debris removal operation. These costs may also include labor costs associated with project management services for the debris removal operation, developing reports to establish contractor performance measures, and evaluating operational efficiency. These costs are separate and distinct from costs related to management and administration of PA awards and subawards.<sup>7</sup>

---

<sup>4</sup> Chapter 6:I.A. Reasonable Cost Analysis of the PAPPG (V4).

<sup>5</sup> 2 C.F.R. § 200.323(b).

<sup>6</sup> Chapter 6:XV. Project Management and Design Services of the PAPPG (V4).

<sup>7</sup> Chapter 6:XVI. Grant Management and Administration of the PAPPG (V4).

## Chapter 2: Debris Monitoring Roles and Responsibilities

The Applicant has the primary responsibility for monitoring its debris removal operations. The Recipient, as a pass-through entity, is responsible for ensuring that Applicants comply with grant conditions and monitoring the activities of the Applicant. FEMA provides guidance and technical assistance and makes final eligibility determinations related to debris-related work and costs.

### **A. Applicant's Role and Responsibilities**

Applicants are required to maintain oversight to ensure that contractors perform in accordance with the terms, conditions, and specifications of their contracts or purchase orders.<sup>8</sup> Debris monitors serve as the Applicant's field representatives. They ensure that the terms and specific monitoring and documentation requirements of debris removal contracts are adhered to and met. Having a debris monitor does not relieve Applicants of the obligation to maintain oversight over both the debris monitoring and debris removal costs.

FEMA recommends that Applicants clearly outline their debris monitoring requirements in their debris management plan, requests for proposals (RFPs), and debris removal contracts. These documents should include instructions on actions the Applicant needs to take to document and correct non-compliance issues. If an Applicant undertakes work that is ineligible for FEMA funding, a methodology should also be established to separate ineligible work from eligible work. Optimally, this methodology should be discussed with the Recipient and FEMA prior to implementation to ascertain compliance. Refer to Appendix B: Sample Debris Monitoring Plan and Monitoring Forms for a sample debris monitoring plan, including monitoring forms and refer to Appendix C: Monitoring Contract Process/Documents for Contract documents.

### **B. Recipient's Role and Responsibilities**

While the Applicant has the primary responsibility for daily monitoring operations, the Recipient is responsible for verifying that those monitoring activities are implemented. As Recipient, the State or Tribe are the pass-through entity between the Applicant and FEMA. The Recipient should ensure that the Applicant is complying with all grant requirements and is performing adequate monitoring. The Recipient may conduct random monitoring at loading and disposal sites to ensure compliance with PA grant requirements. Refer to Appendix A: Field Reference Guides for more information.

---

<sup>8</sup> 2 C.F.R. § 200.318(b).

### C. FEMA Public Assistance Role and Responsibilities

The primary role of FEMA is to provide technical and debris monitoring guidance to ensure that PA grant requirements and work and costs in all areas of the debris operation meet PA eligibility criteria. FEMA may also conduct random, periodic checks of debris loading, staging, reduction, and disposal sites. FEMA is responsible for:

- Determining whether the debris removal activities are eligible;
- Verifying compliance with all environmental and historic preservation laws and executive orders; and
- Reporting any noncompliance, misconduct, or other issues for resolution with the Recipient and Applicant.

In disasters where the estimated amount of debris is 200,000 cubic yards (CY) or greater, the Federal Coordinating Officer (FCO) may provide technical expertise and advise to the Recipient or Applicant on debris monitoring through a mission assignment with the U.S. Army Corps of Engineers (USACE).

FEMA does not direct field operations on behalf of the Applicant. FEMA is not a party to the Applicants contract and will not resolve disputes. The Applicant is responsible for implementing and managing its debris removal and monitoring activities. Refer to Appendix A: Field Reference Guides for additional information.

## Chapter 3: Debris Monitoring Resources and Duties

### A. Force Account Resources

Applicants are encouraged to use their own employees (force account labor) to monitor debris removal operations.<sup>9</sup> An Applicant's own employees are the most familiar with the jurisdiction and know the priorities of the Applicant's debris management plan.

Other benefits of using force account labor for debris monitoring include:

- The local workforce may be able to respond immediately after the disaster.
- Standard timesheet and equipment documentation procedures are typically adequate for documentation purposes.

### B. Contractor Resources

An Applicant may hire contractors to provide debris monitoring services. Debris monitoring contractors should not be employed by or affiliated with the debris removal contractor.

Applicants are required to use competitive contract bidding procedures when procuring these services, unless they can justify sole sourcing.<sup>10</sup> If the Applicant, in compliance with SLTT law, wants to issue a sole source contract rather than conduct a sealed bidding process, the Applicant would have to demonstrate that there are "exigent circumstances" necessitating procurement by non-competitive methods and use of a sealed bidding process would cause an unacceptable delay. Applicants are also required to maintain proper oversight of these contracts to ensure compliance with contract terms.<sup>11</sup> The Applicant must include in the contract a termination date for the non-competitively procured contract and justify in writing why the period of performance is reasonable under the prevailing circumstances.<sup>12</sup> More information on debris monitoring contracts is found in Chapter 4: Debris Monitoring Contract Provisions and Methods.

### C. General Debris Monitor Qualifications

Applicant debris monitors should:

- Fully understand their responsibilities in accordance with the terms of the debris removal contract and other specific guidance provided by the Applicant;
- Possess the capability to estimate debris quantities accurately and objectively;
- Understand all phases of debris management operations, including loading sites, debris management sites (DMSs), and final disposition locations;
- Be able to differentiate between debris types;
- Be able to complete load tickets properly;
- Understand site safety procedures;
- Communicate effectively and efficiently; and
- Possess previous construction site experience (preferred).

---

<sup>9</sup> 44 C.F.R. § 206.228.

<sup>10</sup> 2 C.F.R. § 200.320(f) or analogous state obligations if procurement under 2 C.F.R. § 200.317 auspices.

<sup>11</sup> 2 C.F.R. § 200.318(b).

<sup>12</sup> See generally 2 C.F.R. § 200.320(f).

- Have general knowledge pertaining to the operation of large construction machinery (preferred).

Debris monitors do not need to be registered professional engineers.

In addition to the general qualifications for debris monitors, field supervisors need to:

- Possess the ability to communicate with field staff as well as management;
- Be able to resolve conflicts and issues in the field; and
- Understand when to elevate issues to the Applicant's management.

### D. Types of Debris Monitors

Applicants need to monitor all aspects of the debris removal operation, including activities at all loading, staging, and disposal sites. Debris monitors may have different roles and responsibilities at different stages or components of a debris removal operation; an individual may assume the role of each monitor type at various stages of the disaster. Debris monitors report directly to the field supervisor regarding their daily oversight. All logs and load tickets are submitted daily to the field supervisor. See Appendix A: Field Reference Guides for lists of debris monitoring duties by type of debris monitor.

#### *Loading Site Monitors*

Loading site monitors perform on-site, street-level debris monitoring at all loading sites to verify debris eligibility based on contract requirements, and initiate debris removal documentation using load tickets. Loading site debris monitors' primary duties are:

- Estimating load volumes and issuing load tickets at the load sites, retaining a copy of the ticket (for detailed description of load ticket chain-of-custody, refer to Appendix B: Sample Debris Monitoring Plan and Monitoring Forms); and
- Maintaining logs of daily subcontractor performance, eligibility, or other activities as required.
- Can be a roving monitor who follows a truck around throughout the day or checks-in on multiple loading trucks. Produces roving monitor report.

#### *Tower/Site Monitors*

Debris monitors at a DMS are often referred to as "tower" or "site" monitors." Tower/site monitors' primary duties are:

- Accurately measuring and documenting load hauling compartments prior to debris hauling operations (and recertifying on regular basis);
- Collecting and physically controlling load tickets;
- Ensuring that all debris is removed from trucks at DMSs;
- Monitoring DMS development and restoration; and
- Overseeing debris reduction (grinding, burning, chipping, etc.).

### *Field Supervisor*

The Applicant's field supervisor resolves field operational, eligibility, and safety issues, and communicates these issues to the Applicant. They may also coordinate daily activities with FEMA, the Recipient, and Applicant field personnel. The field supervisors' primary duties are:

- Scheduling and deploying the loading and tower/site debris monitors and overseeing their daily activities at loading sites and disposal and staging sites;
- Conducting or overseeing truck certifications, load measurements, and photo-documentation as required; and
- Collecting daily logs from the debris monitors and tabulating truck load data for the daily report.

### **E.** Reasonable Level of Effort Guidance

All costs must be associated with a reasonable level of effort, including appropriate numbers of debris monitoring personnel and clerical staff related to the scope of the debris removal operation. FEMA will evaluate the level of effort of debris monitoring operations for reasonableness when determining the eligibility of debris monitoring costs. The level of effort for debris monitoring operations should be proportionate with the magnitude of the disaster, the types and quantities of debris to be removed, and the scope of the debris removal operation. Historical data for debris monitoring operations suggests the following level of effort may be appropriate for field efforts.

#### *Level of Effort for Debris Loading Sites*

- **Rural areas:** One loading monitor may be provided for each loading device/location in order to properly observe all debris loading activity. The number of loading monitors can be amended to allow one monitor to oversee two or three contractor loading sites, if the loading activity can be properly observed from a single controlled location and the collected debris can be documented and verified as eligible or ineligible.
- **Urbanized or higher-density areas:** One loading monitor may be provided for each loading site. One loading monitor may be provided for every three to four loading sites if the loading monitor can monitor the sites via line-of-sight or a controlled access point.

#### *Level of Effort for Debris Management Sites*

- **Tower/site monitors:** Tower/site monitors are required at DMSs regardless of if the site is a temporary or a permanent one. Depending on the set-up of the DMS, a minimum of one tower/site monitor is required to document load quantities and verify that trucks are emptied. Additional tower/site monitors may be needed at exit locations to verify that trucks are emptied, or at reduction (grinding burning, chipping, etc.) locations to document and verify production rates.
- **Field supervisors:** If multiple DMSs are in operation, one field supervisor may be added for every 10 debris load site monitors, or as needed for exceptionally large and unique operations to ensure adequate management of operations.
- **Clerical/data entry support:** Typically, one or two data entry personnel can accommodate the daily data amassed when debris operations use load tickets for

documentation. Larger or faster operations with a multitude of reports may require additional clerical support. The number of clerical/data entry personnel should be adjusted to the needs of the Applicant. The use of automated debris monitoring documentation systems may significantly reduce the required level of effort for data entry support.

## Chapter 4: Debris Monitoring Contract Provisions and Methods

When procuring contracts for debris removal operations and monitoring services, Applicants must use their standard procurement processes and practices that conform to SLTT procurement policies and regulations, as well as those required by Federal regulations.<sup>13</sup> Failure to adequately follow procurement requirements may result in the deobligation of all or some of an Applicant's PA funding. If a Federal requirement is different than the SLTT requirements, or the Applicant's own requirements, it must use the more restrictive requirement.<sup>14</sup>

Applicants are strongly encouraged to work with SLTT emergency management staff and FEMA to ensure compliance with the provisions of the PA program, as well as other applicable statutes and regulations, if they intend to seek PA grant funding. Upon request, FEMA PA program personnel will review an Applicant's procurement process to highlight potential instances of non-compliance with the federal procurement rules.<sup>15</sup> FEMA can also provide high-level reviews of contracts to highlight potential instances of non-compliance with the federal procurement rules.

### A. General Procurement and Contract Oversight

Applicants are strongly encouraged to consider, and/or comply with, the following guidance when procuring and overseeing contracts for debris monitoring services:

#### *Procurement Process*

- Use competitive bidding procedures to meet procurement requirements for Federal grants.<sup>16</sup>
- Use abbreviated emergency procurement procedures that include an expedited competitive bid process only if time does not allow for more stringent procedures and if they are allowed under SLTT and Federal laws, codes, or ordinances.
- Maintain records regarding the history of the procurement<sup>17</sup> and document procedures used to obtain/award contracts (procurement information, bid requests, and tabulations, etc.).
- Seek legal review of the contract from Applicant's legal counsel and the process used to procure it, to ensure compliance with all applicable Federal and SLTT requirements.

#### *Scope of Work*

- Verify that all requests for proposals, bids, and contracts have a well-defined SOW, specified costs, basis of payment, performance schedule, and descriptions of the type of service provided by each labor category and skill class.

---

<sup>13</sup> 2 C.F.R. § 200.318(a).

<sup>14</sup> Chapter 6:VIII.B. Procurement and Contracting Requirements for Tribal and Local Government Agencies and Private Nonprofits of the PAPPG (V4).

<sup>15</sup> 2 C.F.R. §§ 200.317 - 200.327.

<sup>16</sup> 2 C.F.R. § 200.319.

<sup>17</sup> 2 C.F.R. § 200.318(i).

- Ensure that labor rates are commensurate with the skill level required by the debris monitoring job function. Professional engineers and other similar qualifications are not required to perform monitoring duties.
- Use a load ticket system (paper or electronic) to record with specificity where debris is picked up (e.g., street address) and the amount picked up, hauled, reduced, and disposed of.
- Ensure that the level of effort provided by the monitoring contractor and the contract terms is reasonable.

#### *Reasonable Costs*

- Ensure that debris monitoring contract costs are reasonable and necessary.<sup>18</sup> Competitively bid contracts that comply with Federal and SLTT procurement regulations and procedures will help to establish reasonable costs for the work.
- The Applicant must perform a price/cost analysis for all contractors or contract modifications over the simplified acquisition threshold currently set at \$250,000.<sup>19</sup> Additionally, profit must be negotiated as a separate element when performing a cost analysis and for each contract when there is no price competition.<sup>20</sup>

#### *Contract Requirements*

- Award contracts to responsible bidders who are reputable and qualified contractors.
  - Conduct reference checks on contractors' performance history with the State's contractor licensing board and with previous clients before awarding contracts.
  - Verify that potential contractors are not on a State's "Debarred Contractor" listing.<sup>21</sup>
  - Check SAM.gov to verify that potential contractors have not been suspended or debarred from performing work funded by the federal government.
- Require the contractor to provide a safe working environment, including properly constructed monitoring towers.
- Ensure that complete and accurate records are kept of contractor activities and costs to include in reimbursement requests.

### **B. Basis of Payment**

The basis of payment and the payment process must be clearly outlined in the contract. Contractor payments should be based upon verification of completed work, and the required information for the payment request should be included within the provisions of the contract.

The SOW and costs for the service are key factors in analyzing reasonable costs. When determining if a cost for debris monitoring is reasonable, FEMA considers the level of effort required for the monitoring services, supervision, and support services to perform the job requirements effectively and efficiently. Debris monitoring services should be tailored to the scale of the debris operations, the schedule requirements, and the Applicant's overall concept of

---

<sup>18</sup> 2 C.F.R. Part 200, subpart E.

<sup>19</sup> The simplified acquisition threshold is set by the Federal Acquisition Regulation at 48 C.F.R. § 2.101. The threshold is adjusted periodically for inflation.

<sup>20</sup> 2 C.F.R. § 200.324(b).

<sup>21</sup> 2 C.F.R. § 200.318(h).

operations. This includes planning for the number of DMSs and final disposition sites, acceptable travel distances, truck routes, neighborhood safety issues, personnel planning, and documentation requirements.

The debris monitoring contract must include the applicable contract provisions addressing payment, contract duration, performance measures, termination for convenience, termination for cause, and a conflict resolution process, and any other required contract provisions.<sup>22</sup> The Applicant should:

- Consider using a progress payment method for contract services. This method requires specific documentation from the contractor to verify and validate the completed work and support the contractor's invoices.
- Provide supervision and oversight of the debris monitoring operations to ensure that only approved and necessary hours are applied to the debris monitoring contract. Applicants are required to maintain contractor oversight to ensure that contractors perform in accordance with the terms, conditions, and specifications of their contracts or purchase orders.<sup>23</sup>
- Confer with the contractor to determine the deployment of monitors, daily schedules, and the number of personnel, supervisors, and clerical/data support assigned at any given time.

Generally, documentation for debris monitoring reimbursement includes:

- Personnel assignments, duties, and responsibilities
- Timesheets
- Debris monitoring reports
- Debris totals (CY and tonnage)
- DMS reports
- Exception reports (when debris monitoring reveals problems with debris operations)
- Truck/Trailer Certification reports
- Geographic information system (GIS) planning and progress reports
- Debris progress reports
- Safety reports

### **C.** Duration of Contract

Debris removal and monitoring services contracts should include specific timelines for work to be completed. The contract should clearly state the duration and the scheduled milestones. By doing so, the Applicant sets clear expectations for the contractor. Moreover, the contractor can effectively manage resources and schedule work to meet the Applicant's requirements. The Applicant should determine the contractor's mobilization requirements (e.g., whether debris monitors are required during the debris clearance phase).

---

<sup>22</sup> 2 C.F.R. § 200.327.

<sup>23</sup> 2 C.F.R. § 200.318(b).

#### **D.** Performance Measures and Termination Clause

The contract should include performance measures that specify how performance will be evaluated and measured, including the size and number of monitoring crews, the number of truckloads monitored each day by the monitoring crews, the number of truckloads arriving at each DMS or final disposition site, the processing rate for a reduction site, and the number of monitoring crews in relation to the debris removal crews. Additionally, all contracts in excess of \$10,000 must address termination for cause and for convenience by the non-Federal entity, including the manner by which termination will be effected and the basis for settlement. This clause should describe probable reasons for termination.

#### **E.** Conflict Resolution Process

The conflict resolution process should be well defined in the contract. The process should include alternatives for mediation in case an issue proves difficult to resolve. Contracts in excess of \$250,000 must include a remedies clause that addresses administrative, contractual, or legal remedies in instances where contractors violate or breach contract terms and provide for such sanctions and penalties as appropriate.<sup>24</sup>

#### **F.** Types of Debris Removal Contracts

There are several types of debris removal contracts and each type of debris removal contract has variables that can dictate adaptations to the necessary debris monitoring activities to protect the Applicant's interests. The different types of contracts, specific contract provisions, monitoring efforts, and documentation requirements are described in this discussion and summarized in Table 1 at the end of Section 6. The most common types of debris removal contracts are unit price, lump-sum, and time-and-materials (refer to Appendix A: Field Reference Guides).

##### *Unit Price*

Unit price contracts are used when the individual work tasks are known, but the total amount of work cannot be known in advance. Units of work can be measured in terms of weight, volume, or any other quantifiable measure (Figure 1). The contractor uses estimated quantities to establish a total contract price.

---

<sup>24</sup> 2 C.F.R. § 200.327.

Since a unit price contract is initiated based on an estimate of debris quantities, documentation of the location, eligibility, and quantities of debris (CY or tonnage) during the debris processing is essential.

- Debris monitoring is essential during pick up, transportation, eligibility determination, segregation, staging, reduction, and final disposition.
- The Applicant should manage the measurement of the trucks/trailers used to haul the debris. The volume of each truck should be measured and certified before being allowed into service.

### *Lump-Sum*

Lump-sum contracts are used when the SOW can be identified and quantified. Bid requests for lump-sum contracts include a set of specifications that have a well-defined SOW for a finite amount of time.

The advantage of a lump-sum contract is that the total price for the specified work is known at the time the contract is awarded. For example, 250 tons of mulched debris hauled from 1000 N. Debris Road to the county landfill at 3450 S. Main Street will equal \$XX,XXX.

Loading monitors are required to validate that only contract-identified debris is collected. These quantities should match the quantities identified in the debris removal contract.

- The DMS site/tower monitors should carefully review the processing of materials, especially the quantities of materials collected for processing (grinding, burning, chipping, etc.), and the quantities at the back end of the processing.
- Documentation of truckloads and debris volumes are still needed if the final tally of debris quantities vary significantly from the original contract estimates; change orders may be necessary to adjust the contract price. This documentation is essential to establish final debris volumes.
- When applicable, the debris quantities entering a DMS should be compared with the debris quantities that have been processed. For example, chip piles or outbound truckloads can be measured to corroborate the debris volumes.

### *Time-and-Materials*

A time-and-materials contract establishes hourly rates for labor and equipment that will be used to perform specific tasks. For example, backhoe with loader, X CY bucket, and operator = \$XX/hour. The contractor is paid based on the sum of the actual cost of materials and the direct

labor hours charged at a fixed hourly rate that reflect wages, general and administrative expense, and profit.<sup>25</sup>

Applicants should work closely with the SLTT and FEMA when awarding such contracts to ensure PA eligibility requirements are met. The following requirements apply to time-and-materials contracts and must be memorialized:

- Use only after determining that no other contract type is suitable;
- Time-and-materials contract must contain a not-to-exceed clause;<sup>26</sup>
- The contract must include a ceiling price which the contractor exceeds at its own risk;
- The Applicant must maintain a high degree of contractor oversight to avoid any unnecessary cost overruns; and
- Once the scope of work becomes clear, the Applicant must transition to a more suitable contract type.

**Figure 2:** Type and Duration of Equipment Used Must Be Documented

A higher level of monitoring of time-and-materials contracts is required. Debris monitors should produce daily inspection reports that clearly quantify the amount of work accomplished each day, including:

- The number of hours worked (scheduled work hours/crew size).
- The type and quantity of each type of truck/trailer/equipment used (Figure 2).
- Verification of equipment hours. Only active work hours should be submitted for FEMA reimbursement.
- Standby time is not eligible for FEMA reimbursement.
- Verification of labor hours as compared to equipment hours. Intermittent use of equipment may result in a crew having more equipment hours than labor hours; this type of discrepancy needs to be verified by the debris monitors.
- The weather conditions as they affect daily work.
- Production rates for each staging and reduction site.
- Quantities of debris hauled (CY or per ton). If debris is hauled based on CY, load tickets may be used as a way of checking contractor efficiency.

---

<sup>25</sup> 2 C.F.R. § 200.318(j)(1).

<sup>26</sup> 2 C.F.R. § 200.318(j).

Table 1 outlines the monitoring requirements for each type of contract.

**Table 1: Monitoring Requirements by Contract Type**

| Contract Type      | Scope of Work   | Monitoring Required |                 |      |               |            | Comments   |
|--------------------|---|---------------------|-----------------|------|---------------|------------|--|
|                    |   | Crew Efficiency     | Collection Site | DMSs | Disposal Site | Compliance |  |
| Lump-Sum           | Defined debris quantities and reasonable costs. Estimate is basis for contract costs.                       |                     | ✓               |      | ✓             |            | <ul style="list-style-type: none"> <li>Assess debris eligibility at collection site</li> <li>Quantities are required to determine reasonable costs and establish change orders</li> <li>Ensure ONLY debris from within contract limits is processed</li> </ul>   |
| Unit Price – CY    | Based on eligible debris listed on load tickets.  | ✓                   | ✓               | ✓    | ✓             | ✓          | <ul style="list-style-type: none"> <li>Assess debris eligibility at collection site</li> <li>Document debris quantities</li> <li>Verify debris processing volumes</li> </ul>   |
| Unit Price – Ton   | Based on actual weight measurements of eligible debris listed on load tickets.                              | ✓                   | ✓               | ✓    | ✓             | ✓          | <ul style="list-style-type: none"> <li>Assess debris eligibility at collection site</li> <li>Document debris quantities</li> <li>Verify debris processing weights</li> <li>Verify calibration of scales</li> </ul>   |
| Time-and-Materials | Based on labor, equipment, and materials records. Reasonable costs evaluated by determining costs per unit. | ✓                   | ✓               |      | ✓             | ✓          | <ul style="list-style-type: none"> <li>Assess debris eligibility at collection site</li> <li>Typically used for road clearance activities during the Response Phase</li> <li>Supervising and monitoring every work crew is required</li> <li>Tracking debris removal quantities is still required to determine reasonable costs</li> </ul> |

## Chapter 5: Debris Monitoring by Debris Type

Debris monitoring considerations and responsibilities may vary depending on the type of debris being removed. Debris monitoring considerations for each of the primary debris types are described below. Refer to Appendix A: Field Reference Guides for additional debris monitoring recommendations.

### A. Vegetative Debris

Vegetative debris may consist of whole trees, tree stumps, tree branches, tree trunks, and other leafy material. Depending on the size of the debris, the collection of vegetative debris may require the use of flatbed trucks, dump trucks, and grapple loaders. For consideration:

- Hand-loaded trucks/trailers are graded at 50 percent of a load because of the low compaction achieved by hand-loading.<sup>27</sup>
- This type of debris may be recyclable or have salvage value. Document separation and salvage operations when implemented.
- For special vegetative debris considerations, refer to the PAPPG.<sup>28</sup>

**Figure 3: Hand-Loaded Truck**

### B. Construction and Demolition Debris

Construction and demolition (C&D) debris can be defined as damaged components of buildings and structures, such as lumber and wood, gypsum wallboard, glass, metal, roofing material, tile, carpeting and floor coverings, window coverings, pipe, concrete,<sup>29</sup> fully cured asphalt, equipment, furnishings, and fixtures. The definition of C&D debris may vary between jurisdictions and what is included in one jurisdiction may be excluded in another. When monitoring, consider that the C&D debris must be disaster-generated (i.e., eligible C&D debris cannot be the result of an Applicant's rebuilding efforts) and must present an immediate threat to be considered for FEMA eligibility.

### C. Hazardous Waste

The Applicant must comply with Federal and SLTT environmental requirements for handling hazardous waste. Acceptable FEMA reimbursable activities related to hazardous materials are described in the PAPPG.<sup>30</sup> Hazardous waste is regulated under the Resource Conservation and Recovery Act (RCRA) and contains properties that make it potentially harmful to human health or the environment. In regulatory terms, a RCRA hazardous waste is a waste that appears on one of the four hazardous waste lists<sup>31</sup> or exhibits at least one of the following four characteristics:

<sup>27</sup> Chapter 7:I.E.3. Hand-Loaded Trucks and Trailers of the PAPPG (V4).

<sup>28</sup> Chapter 7:I.B. Hazardous Limbs, Trees, and Stumps of the PAPPG (V4).

<sup>29</sup> Chapter 7:II.U.4. Ineligible Work of the PAPPG (V4).

<sup>30</sup> Chapter 7:II.K. Hazardous Materials of the PAPPG (V4).

<sup>31</sup> 40 C.F.R. Part 261.

- Ignitability
- Corrosivity
- Reactivity
- Toxicity

When monitoring, consider:

- Hazardous wastes may require segregation and special handling (Figure 4).
- Improper segregation of the hazardous waste debris should be documented.
- If unsafe practices are observed during the handling and disposal of hazardous materials, the appropriate authorities should be notified.
- Safety precautions will vary depending upon the circumstances and type of hazardous materials encountered, but they may include personal protective equipment, decontamination stations, closed and secured containers, and covered trucks or specialized containers.
- Monitor hazardous material processing carefully and regularly to verify that proper precautions are taken and that the chain-of-custody is maintained.
- Verify that hazardous materials are delivered to an appropriate DMS since hazardous wastes typically require special handling, transportation, and final disposition that are significantly more costly than typical waste disposal.

**Figure 4:** Segregation of Hazardous Debris

#### **D.** Household Hazardous Waste

Household Hazardous Waste (HHW) refers to hazardous products and materials that are used and disposed of by residential consumers, rather than commercial or industrial consumers. HHW include, but are not limited to, some paints, stains, varnishes, solvents, pesticides, and other products or materials containing volatile chemicals that catch fire, react, or explode under certain circumstances, or that are corrosive or toxic. When monitoring:

- Verify and document that HHW is picked up and handled by specialists licensed by the Recipient's Department of Environmental Quality (DEQ) and managed in designated areas within the DMS.
- Verify and document that the chain-of-custody is maintained throughout the collection, handling, transport, and disposal of HHW.

#### **E.** Electronic Waste

Electronic waste (e-waste) refers to electronics that contain hazardous materials, such as cathode ray tubes. Examples of e-waste include, but are not limited to, computer monitors and

televisions.<sup>32</sup> Typically, these products contain minerals and chemicals that require specific disposal methods. When monitoring ensure that:

- E-waste is removed intact, collected, and stored at the DMS for later processing;
- E-waste complies with state e-waste requirements where applicable;
- Separation and salvage activities are implemented and documented as this type of debris may be recyclable or have salvage value; and
- E-waste is segregated (in wildfire events, white goods and E-waste may not be able to be segregated and therefore should be documented as one).

## F. White Goods

White goods are defined as discarded household appliances such as refrigerators, freezers, air conditioners, heat pumps, ovens, ranges, washing machines, clothes dryers, and water heaters. Many white goods contain ozone-depleting refrigerants, mercury, or compressor oils that must be removed and processed following environmental protocols and procedures before the white goods can be further processed for disposal and recycling. When monitoring:

- Document that white goods are collected separately, cleaned, and processed to remove putrescent debris inside and to remove all oils, solvents, and refrigerants (Figure 5).
- If white goods are to be collected without being cleaned, verify and document that the DMS includes ample space for processing the collected white goods.
- This type of debris may be recyclable or have salvage value. Document separation and salvage activities that are implemented.

**Figure 5:** White Goods Being Staged

## G. Soil, Mud, and Sand

Floods, landslides, winds, wildfires, and storm surges often result in soil, mud, and sand debris on improved public property and public rights-of-way. Facilities commonly affected by this type of debris include streets, sidewalks, storm and sanitary sewers, water treatment facilities, drainage canals and basins, parks, and public swimming pools. When monitoring:

- Document that only the disaster-generated silt and soils are removed. This requires an understanding of pre-disaster conditions as well as the documented maintenance of the affected area.
- Contaminated soils may require special handling depending on the contaminant. Document any contaminated soil issues to ensure proper handling, processing, and disposition.
- Verify that any contaminated disaster-generated soils are addressed by specialists from the State's DEQ and/or U.S. Department of Environmental Protection (EPA) and managed appropriately in designated areas.

<sup>32</sup> 40 C.F.R. Part 261.

## H. Vehicles and Vessels

Vehicles and vessels may be damaged, destroyed, displaced, or lost as a result of a disaster (Figure 6). These vehicles and vessels may eventually be abandoned because of the damage incurred or because the original owners have relocated. Vehicles and vessels may be classified as debris if they block public access and critical facilities and are abandoned.<sup>33</sup> When monitoring:

- Verify that each vehicle or vessel identification number is documented and processed appropriately according to applicable municipal, state, or coastal law.
- Verify that collected vehicles and vessels are transported to a collection area where they are secured and protected. Depending on the ownership, the vehicles or vessels can be returned, salvaged, or destroyed.
- Verify that all vehicles and vessels have all minerals and fluids removed before processing or destruction.
- This type of debris may be recyclable or have salvage value. Document separation and salvage activities that are implemented.

**Figure 6:** Boat and Vessel Debris

## I. Putrescent Debris

Putrescent debris is any debris that will decompose or rot, such as animal carcasses and other fleshy organic matter. Handling of putrescent debris must comply with applicable Federal and SLTT requirements. When monitoring:

- Document that putrescent debris is collected in accordance with contract specifications or other specific requirements.
- Document the volume of putrescent debris. The volume of putrescent materials cannot be determined based solely on the volume of the originally inventoried materials because the spoiled materials may have lost a significant portion of their volume. The actual volume at the time of removal needs to be documented.

## J. Infectious Waste

Infectious waste is waste capable of causing infections in humans and can include contaminated animal waste, human blood and blood products, medical waste, pathological waste, and discarded sharps (needles, scalpels, or broken medical instruments). Clearance, removal, and disposal of infectious waste may be under the authority of another Federal agency (the Centers for Disease Control and Prevention, EPA, etc.) or applicable state agency. Upon review of applicable Federal statutes, regulations, and policies governing infectious waste, FEMA will determine eligibility on a case-by-case basis. When monitoring:

<sup>33</sup> Chapter 7:I.D. Privately Owned Vehicles and Vessels on Public Property of the PAPPG (V4).

- Document that the disaster-related infectious waste is collected and separated in accordance with prescribed safety and medical practices. SLTT or Federal health officials may dictate the collection process, including collection containers, protective gear, decontamination requirements, and disposal methods.
- The collection method and the volume of debris should be documented.
- Verify that chains-of-custody of the collected materials are maintained. Based on the condition and type of materials, this debris may require special handling, containerization, and disposal, including incineration.

## K. Chemical, Biological, Radiological, and Nuclear-Contaminated Debris

Chemical, biological, radiological, and nuclear (CBRN)-contaminated debris is any debris contaminated by chemical, biological, radiological, or nuclear materials as a result of a natural or man-made disaster, such as a weapon of mass destruction event. The clearance, removal, and disposal of CBRN-contaminated debris should be performed in accordance with applicable Federal statutes, regulations, policies, and other guidance documents. When monitoring:

- Man-made disasters may create debris that is considered evidence as part of a crime scene. Law enforcement officials may need to clear the activities before debris operations can begin. Monitors should ensure the CBRN-contaminated debris is cleared by law enforcement officials before removal so as not to undermine the integrity of the crime scene. Debris operations may also proceed concurrently with incident investigations.
- Be aware of the types of evidentiary material being sought in case CBRN-contaminated debris is encountered outside the identified crime scene area.
- CBRN-contaminated debris may be either disposed of or taken to a special collection area for further processing. Verify and document that separation, processing, and disposal follow the prescribed procedures.

| Type of Waste   | Examples  |
|---|---|
| Hazardous Waste   | Any debris containing any of the characteristics of ignitability, corrosivity, reactivity, or toxicity  |
| Household Hazardous Waste   | Any hazardous debris disposed of by resident consumers (some paints, stains, varnishes, solvents, and pesticides)   |
| Infectious Waste  | Any debris that can cause infections in humans (animal waste, human blood and blood products, medical waste, pathological waste, and discarded sharps (needles, scalpels, or broken medical instruments)) |
| Chemical, Biological, Radiological, and Nuclear-Contaminated Debris | Any debris contaminated by chemical, biological, radiological, or nuclear materials (weapons of mass destruction)   |

## Chapter 6: Documenting Eligible Work and Costs

With proper documentation, an Applicant may fully account for debris clearance and removal costs incurred as a result of a Presidentially declared disaster. A load ticket provides the most comprehensive information and a paper trail for FEMA PA program reimbursement. To support the documentation provided by the load tickets, monitors should use tower-monitoring logs, roving monitor reports, daily issue logs, and truck certification forms as part of their reporting process. Samples of these forms are included in Appendix B: Sample Debris Monitoring Plan and Monitoring Forms. When ADMS technology is used, the data generated should clearly display loading monitor and tower/site monitor names, load times, and locations so that an individual's daily activities can be easily reviewed.

The following describes the types of documentation that should be provided to FEMA PA to substantiate eligible work performed and associated costs for grant funding.

### A. Documenting Force Account Debris Operation Costs

When an Applicant uses its own force account resources to perform debris removal and disposal work, requests for reimbursement should be supported by documentation of the labor and equipment charges incurred in the operation. This includes:

- Payroll records of full-time and temporary employees working debris removal operations.
- Records of Applicant-owned equipment used in debris removal operations, including a record of equipment hours in service, associated equipment rates, and operator name.
- Invoices of rental equipment used in the debris removal operation.
- Documentation from permitted final disposal locations including:
  - Temporary disposal permits from State DEQ if temp site is utilized and Municipal Solid Waste Permit number for final disposition.
  - Invoices of disposal tipping fees.
  - Quantities of debris disposed.
- Documentation of the location of the debris removal activities demonstrating FEMA debris eligibility and/or documentation certifying that FEMA-eligible debris work was performed.

### B. Documenting Contractor Debris Operation Costs

The debris operation, if completed by contract, should have adequate controls in place to ensure contract terms are adhered to, that only specified debris is removed, and proper documentation is collected and compiled for payment purposes. Applicants should monitor the performance of their contractors and ensure that they comply with their contract terms and conditions.<sup>34</sup>

When an Applicant has hired a contractor to perform debris removal work, documentation should correspond with the invoiced costs and line item prices of the debris removal contract. This documentation will be provided on monitoring forms and reports (refer to Appendix B:

---

<sup>34</sup> Refer to PDAT resources when procuring with Federal grant awards: [www.fema.gov/procurement-disaster-assistance-team](http://www.fema.gov/procurement-disaster-assistance-team).

Sample Debris Monitoring Plan and Monitoring Forms), including load tickets and tower logs, which will provide information on:

- Locations of debris removal.
- Type of debris removed.
- FEMA debris removal eligibility determination.
- Debris quantities (volume or weight determined at inspection site).
- Identification of debris hauling truck/trailer and contractor.
- Location of permitted final debris disposal site.
- Documentation of labor, equipment, and materials charges including hours of service and associated charges (for time and materials contracts).
- Documentation of quantities of debris reduced or recycled at DMSs and associated detailed charges.
- Invoices of disposal tipping fees.

In addition to the load tickets, summaries of the information included in the load tickets are typically provided in support of an Applicant's PA funding request. FEMA and the Recipient may also request to see all backup supporting documentation and reports, including truck certification forms, tower logs, roving monitor reports, and daily issue logs used to substantiate claimed costs (refer to Appendix B: Sample Debris Monitoring Plan and Monitoring Forms).

### C. Monitoring Reports

Applicants should have debris monitors submit daily reports on operational issues, including DMS operations and safety issues, to promote situational awareness and help identify and resolve issues. Regular reporting promotes quality assurance and provides the Applicant with a consistent accounting of operations, issues, and costs in the field. This information is included in reports such as tower monitor logs, roving monitor reports, and daily issue logs.

### D. Electronic Load Tickets and Automated Reporting

Historically, debris monitoring operations have used the four-part paper load ticket system. Depending on the size of the event, the manual process of filling out load tickets, transferring copies, and entering data for reporting and data compilation purposes can be labor and time intensive, and can result in human error.

Automated debris management tracking systems provide real-time and automated tracking and reporting. Electronic load tickets, computer tablets, and systems employing electronic contractor ID cards allow for instant data tracking, verification, and reporting. Some systems also incorporate truck tracking systems, global positioning system (GPS) capability, and enhanced analytical capabilities of debris monitoring data.

FEMA embraces technological advancements and recognizes the potential benefits of these automated systems. As discussed in **Chapter 1: General Eligibility Requirements**, reasonable costs associated with the use of electronic load ticket systems and other automated debris monitoring systems may be eligible for PA funding.

Appendix A: Field References Guides

## GENERAL DEBRIS MONITORING TIPS AND CONSIDERATIONS

### Equipment

- The most common unit of measurement for vegetative and C&D debris is the CY. Debris trucks are evaluated for capacity at the DMS or final disposal sites. Applicants should require contractors to use appropriate equipment to load debris efficiently so that the maximum level of compaction can be achieved to facilitate expeditious removal of debris from the public rights-of-way.
- All trucks and trailers will be measured and placarded with the measured capacity of the vehicle. The Applicant should photograph all trucks/trailers to ensure that the capacity is not reduced by removing sideboards or tailgates on the truck as the debris removal operation unfolds.
- Equipment limitations affect the maximum loading capacity of some vehicles.
- **Hand-loaded trucks and trailers** cannot achieve compaction levels comparable to mechanically loaded vehicles. This effectively reduces the capacity of the hand-loaded truck or trailer compared to a truck or trailer that is loaded mechanically. Therefore, FEMA only reimburses 50 percent of the debris monitor's observed capacity for a hand-loaded truck or trailer. Example: If a hand-loaded truck or trailer appears to be 100 percent full, that load should be recorded at 50 percent. Hand-loading debris in trucks or trailers does not achieve maximum compaction, and as a result, debris removal operations take longer to complete. A hand-loaded truck hauls less debris by weight per CY than a mechanically loaded truck.<sup>35</sup>
- **A truck with no tailgate or no solid tailgate** cannot be compacted to its full capacity; therefore, FEMA would automatically apply a 15 percent reduction to the total quantity and only considers a maximum of 85 percent of the certified truck capacity for reimbursement purposes.

### Debris Challenges

- **Vegetative Debris Challenges:** Hazardous leaners, stumps, and hangers can be difficult to measure consistently (particularly because monitors must determine if leaners are leaning at least 30 degrees and eligible to be cut). Debris monitors should have a map of all roads and work with the Applicant's public works department to determine the length and location of the public right-of-way.
- **Construction and Demolition Debris Challenges:** Debris generated from prior construction work may be comingled with disaster-generated C&D debris by citizens. Some citizens may claim that remodeling or renovation work is C&D material too. Many people will choose to remodel a house after a storm instead of demolishing it. The materials from the remodeling are not eligible; these are notable because they look like new materials instead of disaster-damaged materials. A rule of thumb is that no bricks or foundation material would be hauled or considered eligible for FEMA PA reimbursement.
- **Hazardous Waste Challenges:** Health issues, such as headaches and vomiting, can arise at a burning site if the debris stream includes mixed debris and hazardous chemicals. Soil and air contamination can occur at the pick-up location, along the transit route, and at the DMS. Appropriate precautionary measures should be implemented when hazardous materials are identified. Further, the Applicant should implement proactive measures to ensure that all hazardous materials are identified.
- **White Goods Challenges:** When debris removal is extended beyond 90-180 days, some residents will try to discard their current appliance for free by claiming it is storm debris. The disposal requirements for white goods should include instruction on how to prepare the white goods, ensuring the materials on the curb do not present a safety hazard.
- **Animal and/or Plant Pest and Noxious Weeds Challenges:** When debris is generated from within a regulated area to suppress and control an animal/plant pest, such as the Asian Longhorn Beetle, it becomes important to ensure that the movement of debris does not allow the spread of said pest outside of the area of containment. It will be important to follow proper biosecurity measures and environmental

<sup>35</sup> Chapter 7.I.E.3 of the PAPPG.

## GENERAL DEBRIS MONITORING TIPS AND CONSIDERATIONS

assessments, plus coordination with State and Federal regulators, prior to removal of debris from a containment area and similar approvals to move them to another area, especially across local/tribal/state lines.<sup>36</sup>

### Monitoring Tips

Monitors should be aware of situations that could impact an Applicant's reimbursement under the PA program. They should look for:

- ***Inaccurate Truck Capacities:*** Trucks should be measured before operating and load capacities should be documented by truck number. Periodically, the Applicant should pull trucks out of operation and re-measure.
- ***Trucks Not Fully Loaded:*** Do not accept the contention that loads are higher in the middle and if leveled would fill the truck. Monitors should check to see if that statement is valid.
- ***Trucks Lightly Loaded:*** Trucks may arrive loaded with treetops (or a treetop) with extensive voids in the load. Trucks need to be loaded to their full capacity with front-end loaders or other similar equipment to compress the debris materials and remove any voids.
- ***Trucks Overloaded:*** Trucks cannot receive credit for more than the measured capacity of the truck or trailer bed, even if material is above the sideboards. If a truck is measured to carry 18 CY, it cannot receive credit for more than 18 CY. However, it can receive credit for less if not fully loaded or lightly loaded as described above.
- ***Changing Truck Numbers:*** Typically, trucks are listed by an assigned vehicle number and capacity. There have been occasions where truck or trailer numbers with a smaller carrying capacity have been changed to one with a larger capacity. For instance, a 20 CY truck may have a number for a truck that can carry 30 CY. This can be detected if the Applicant periodically re-measures the trucks or records actual license plate numbers in addition to a description of the truck. Maintaining truck and trailer certifications with attached photographs at the DMS tower can assist in eliminating such activities.
- ***Reduced Truck Capacity or Increased Truck Weight:*** On some occasions, trucks have had heavy steel grating welded 2 to 3 feet above the bed after being measured, thus reducing the capacity or inflating the weight of a load. This can be detected by periodically re-measuring the truck bed or recertifying the truck tare weight.
- ***Wet Debris When Paid by Weight:*** Excessive water added to debris increases the weight of the load. This can be detected during monitoring if there is excessive water dripping from the truck bed or by inspecting the truck bed immediately after unloading. The Applicant should periodically recertify the truck tare weight.
- ***Multiple Counting of the Same Load:*** To prevent reentry with the same load, trucks should not exit the disposal site without unloading. This can be prevented by observing the time of departure and time of arrival recorded on the driver's load ticket. This check may also indicate problems with the Applicant's debris monitors at the loading or unloading site. Tower monitors should ensure the load ticket is checked in and compared to the tower log-in sheet to determine if the truck's round-trip time is appropriate.

<sup>36</sup> Please refer to this website for current operations: <https://www.aphis.usda.gov/aphis/ourfocus/planthealth/plant-pest-and-disease-programs/pests-and-diseases>.

## GENERAL DEBRIS MONITORING TIPS AND CONSIDERATIONS

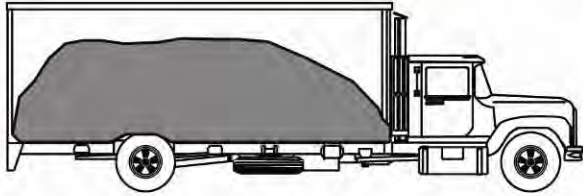

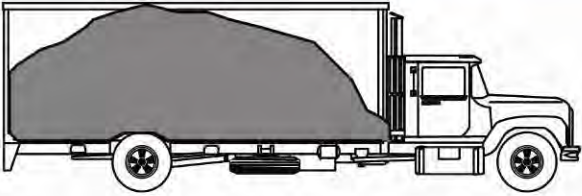

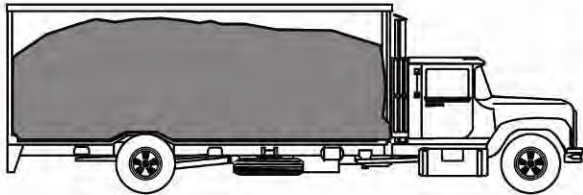

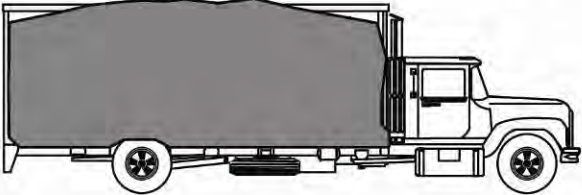

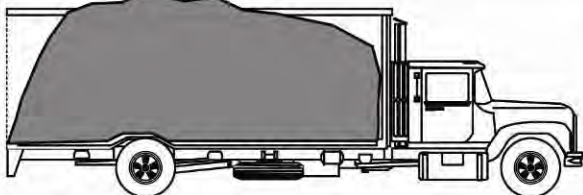

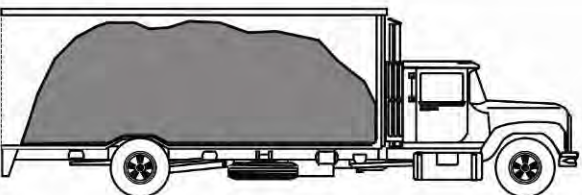

- **Picking up Ineligible Debris:** Debris monitors should be present at loading sites. Monitors should have a good understanding of eligible debris and any time limits imposed on picking up specific types of debris. Examples of ineligible debris activities include sweeping areas for abandoned cars and white goods; cleaning up illegal dump sites; removing cut trees from subdivisions under development; removing debris from private property; and removing/cutting trees from off rights-of-way in rural areas.

## DEBRIS MONITOR GUIDELINES FOR ESTIMATING QUANTITIES

### Monitoring Debris Trucks – Guideline for Estimating Loads in Trucks

- Check the truck number on the placard.
- Check that the capacity (size) of the truck written on the ticket matches the size marked on the side of the truck.
- Observe the truck load from the tower. Make sure that the truck is loaded with disaster debris. Ensure that the truck is not falsely loaded.
- When the truck leaves, make sure it is completely empty.
- If there is no tailgate on a truck, the truck is not full. The maximum estimate of the capacity of the load is 85 percent full. However, the monitor must use good judgment to determine if the load is really 85 percent. It is more likely that the truck is between 40 percent and 60 percent full.
- There are other percentage variations of how a truck can be filled (see illustrations and photographs that follow).
- If there is a handloaded truck, there is an automatic 50 percent reduction.

Note: It is difficult, though not impossible, for a truck to be 100 percent loaded because woody debris, trees, branches, and rubble cannot be placed in a truck without having air holes. Applicant debris monitors typically record estimated volumes in 5 percent increments. FEMA will allow a truck to be recorded as 100 percent full if debris volumes can reasonably (and safely) be estimated to meet or exceed certified truck container capacities.

| <b>DEBRIS MONITOR GUIDELINES FOR ESTIMATING QUANTITIES</b>   |  |
|--|--|
|   |    |
| <p><b>60 Percent Debris Load in Truck</b></p> <p>If truck bed measured 20 cubic yards (CY), this 60 percent load would be 12 CY.</p>   | <p><b>75 Percent Debris Load in Truck</b></p> <p>If truck bed measured 20 CY, this 75 percent load would be 15 CY.</p>   |
|   |    |
| <p><b>85 Percent Debris Load in Truck</b></p> <p>If truck bed measured 20 CY, this 85 percent load would be 17 CY.</p>   | <p><b>95 Percent Debris Load in Truck</b></p> <p>If truck bed measured 20 CY, this 95 percent load would be 19 CY.</p>   |
|   |    |
| <p><b>85 Percent Debris Load in Truck w/ No Tailgate</b></p> <p>This truck has no structural tailgate—the capacity would automatically be reduced from 20 CY to 17 CY (15 percent reduction). Then the debris load itself is 85 percent of fully loaded—14.5 CY.</p> | <p><b>75 Percent Debris Load in Truck w/ No Tailgate</b></p> <p>This truck has no structural tailgate—the capacity would automatically be reduced from 20 CY to 17 CY (15 percent reduction). Then the debris load itself is 75 percent of fully loaded—12.8 CY.</p> |

| <b>DEBRIS MONITOR GUIDELINES FOR ESTIMATING QUANTITIES</b>  |   |
|---|---|
|    |   |
| <p>Truck without a structural tailgate. Its maximum load is automatically reduced to 85 percent of the rated truck size.</p>  | <p>Truck without a tailgate. Its load capacity is automatically reduced to 85 percent. Slat-sided trucks may not be capable of being mechanically compacted. This means the truck capacity should be further reduced.</p> |
|   |    |
| <p>Truck without a tailgate. Its maximum load capacity is reduced to 85 percent. This truck is claimed to be ‘fully loaded’ with branches sticking above the top and beyond the back of the truck bed—the actual load is only 75 percent.</p>                 | <p>Truck with branches extending above the top of the truck sides. Although claiming to be ‘fully loaded,’ the load is filled with air pockets and the actual load is only 70 percent of the rated load capacity.</p>     |
|    |   |
| <p>This 20-CY roll-off container has a tailgate (in open position). The load appears to be near top of truck sides and was estimated at 85 percent. The assessment was done from the ground; no monitor tower was used at this DMS (see next photograph).</p> | <p>This is the actual load from the 20-CY container truck shown on left. It measures approximately 4 CY when on the ground.</p>   |

| TYPES OF DEBRIS AND MONITORING CONSIDERATIONS |  |   |
|---|--|---|
| Type of Debris                                | Description of Debris  | Considerations for Monitoring Operations  |
| <b>Vegetative</b>                             | Includes whole trees, tree stumps, tree branches, tree trunks, and other leafy material.   | <ul style="list-style-type: none"> <li>• Verify that only eligible debris is counted for reimbursement purposes; keep a map of all roads and rights-of-way for area.</li> <li>• Ineligible debris should be identified accordingly.</li> <li>• Evaluate the loaded capacities of the trucks/trailers to determine the percentage of the rated capacity.</li> <li>• Hand-loaded trucks/trailers are graded at 50 percent of a load because of the low compaction achieved by hand-loading.<sup>37</sup></li> <li>• This type of debris may be recyclable or have salvage value; document separation and salvage operations when implemented.</li> <li>• For special vegetative debris considerations, please refer to the PAPPG.<sup>38</sup></li> </ul> |
| <b>Construction and Demolition (C&amp;D)</b>  | Includes, but is not limited to, damaged components of buildings and structures, such as lumber and wood, gypsum wallboard, glass, metal, roofing material, tile, carpeting and floor coverings, pipe, concrete, fully cured asphalt, equipment, furnishings, and fixtures.                                    | <ul style="list-style-type: none"> <li>• To be eligible for PA funding, C&amp;D debris must present an immediate threat.</li> <li>• Must be disaster-generated.</li> </ul>  |
| <b>Hazardous Waste</b>                        | <p>Waste that is potentially harmful to human health or the environment that exhibits at least one of the following four characteristics:</p> <ul style="list-style-type: none"> <li>• Ignitability</li> <li>• Corrosivity</li> <li>• Reactivity</li> <li>• Toxicity</li> </ul>                                | <ul style="list-style-type: none"> <li>• Hazardous wastes may require segregation and special handling.</li> <li>• Document improper segregation.</li> <li>• Notify appropriate authorities if unsafe practices are observed during handling and disposal (know required safety procedures for the circumstances).</li> <li>• Monitor processing carefully and regularly to verify the proper precautions are taken and the chain-of-custody is maintained.</li> <li>• Verify that hazardous wastes are delivered to an appropriate DMS, as they can require special handling, transportation, and final disposition.</li> </ul>  |
| <b>Household Hazardous Waste (HHW)</b>        | Includes hazardous products and materials used and disposed of by residential consumers, such as some paints, stains, varnishes, solvents, pesticides, and other products or materials containing volatile chemicals that catch fire, react, or explode under certain circumstances or are corrosive or toxic. | <ul style="list-style-type: none"> <li>• Verify and document that HHW is picked up and handled by specialists from the State’s DEQ and/or the EPA and managed in designated areas within the DMS.</li> <li>• Verify and document that the chain-of-custody is maintained throughout the collection, handling, transport, and disposal of HHW.</li> </ul>  |
| <b>Electronic Waste (e-waste)</b>             | Includes electronics such as cathode ray tubes (computer monitors and televisions) that contain hazardous materials.   | <ul style="list-style-type: none"> <li>• Ensure e-waste is segregated.</li> <li>• Ensure e-waste is removed intact, collected, and stored at the DMS for later processing.</li> <li>• Document separation and salvage activities.</li> </ul>  |

<sup>37</sup> Chapter 7.I.E.3 of the PAPPG.

<sup>38</sup> Chapter 7.I.B of the PAPPG.

| TYPES OF DEBRIS AND MONITORING CONSIDERATIONS                                     |   |  |
|---|---|--|
| Type of Debris  | Description of Debris   | Considerations for Monitoring Operations   |
| <b>White Goods</b>  | Includes discarded household appliances such as refrigerators, freezers, air conditioners, heat pumps, ovens, ranges, washing machines, clothes dryers, and water heaters.  | <ul style="list-style-type: none"> <li>• Document that white goods are collected separately, cleaned, and processed to remove putrescent debris inside and to remove all oils, solvents, and refrigerants.</li> <li>• Verify and document that the DMS has adequate space for processing white goods if collected without being cleaned.</li> <li>• Document separation and salvage activities.</li> </ul>   |
| <b>Soil, Mud, and Sand</b>  | Can be deposited on streets, sidewalks, storm and sanitary sewers, water treatment facilities, drainage canals and basins, parks, and public swimming pools.  | <ul style="list-style-type: none"> <li>• Document that only disaster-generated silt and soils are removed (must know pre-disaster condition and documented maintenance).</li> <li>• Document any contaminated soil issues to ensure proper handling, processing, and disposition.</li> <li>• Verify that any contaminated disaster-generated soils are addressed by specialists from the State’s DEQ and/or the EPA and managed appropriately in designated areas.</li> </ul>                |
| <b>Vehicles and Vessels</b>   | Includes vehicles and vessels meeting one of the following criteria: <ul style="list-style-type: none"> <li>• Presents a hazard or immediate threat that blocks ingress/egress within a public use area.</li> <li>• It is abandoned.</li> <li>• Applicant followed local ordinance and SLTT and Federal laws in securing possession.</li> <li>• Applicant has verified chain-of-custody for the vehicle or vessel.</li> </ul> | <ul style="list-style-type: none"> <li>• Verify that each vehicle or vessel identification number is documented and processed appropriately.</li> <li>• Verify that collected vehicles and vessels are transported to a secure collection area.</li> <li>• Verify that vehicles are processed to remove all minerals and fluids before processing or destruction.</li> <li>• Document separation and salvage activities that are implemented.</li> </ul>                                     |
| <b>Putrescent Debris</b>  | Includes debris that will decompose or rot, such as animal carcasses.   | <ul style="list-style-type: none"> <li>• Document that collection is in accordance with contract specifications or other requirements.</li> <li>• Document actual volume of putrescent debris.</li> </ul>  |
| <b>Infectious Waste</b>   | Waste capable of causing infection in humans including contaminated animal waste, human blood and blood products, medical waste, pathological waste, and discarded sharps.  | <ul style="list-style-type: none"> <li>• Document that collection and separation is in accordance with prescribed safety and medical practices.</li> <li>• Document volume of debris.</li> <li>• Verify that infectious waste debris quantities are well documented, and chains-of-custody are maintained.</li> <li>• Special handling, containerization, and disposal may be required.</li> </ul>   |
| <b>Chemical, Biological, Radiological, and Nuclear (CBRN)-Contaminated Debris</b> | Includes debris contaminated by CBRN sources.   | <ul style="list-style-type: none"> <li>• Ensure CBRN-contaminated debris is cleared by law enforcement officials before removal so as not to undermine integrity of the crime scene (as from a man-made disaster).</li> <li>• Be aware of the types of evidentiary material being sought in case debris is located outside of the identified crime scene.</li> <li>• Verify and document the separation, processing, and disposal to ensure it follows the prescribed procedures.</li> </ul> |

| TYPES OF DEBRIS REMOVAL CONTRACTS AND MONITORING CONSIDERATIONS |  |  |
|---|--|--|
| Contract Type   | Description of Contract  | Considerations for Monitoring Operations   |
| <b>Unit Price Contract</b>                                      | <ul style="list-style-type: none"> <li>Used when individual work tasks are known but the total amount of work cannot be verified.</li> <li>Units of work can be measured in terms of weight, volume, or any other quantifiable measure.</li> </ul> | <ul style="list-style-type: none"> <li>Documentation of the location, eligibility, and quantities of debris is essential because the unit price contract is based on an estimate of debris quantities.</li> <li>Closely monitor pick up, transportation, eligibility determination, segregation, staging, reduction, and final disposition.</li> <li>Maintain management of truck/trailer measurements; certify all trucks before use.</li> </ul>  |
| <b>Lump-Sum Contract</b>  | <ul style="list-style-type: none"> <li>Used when the SOW can be identified and quantified; use for a well-defined SOW with a finite contract period.</li> </ul>  | <ul style="list-style-type: none"> <li>Loading monitors must validate that only contract-identified debris is collected.</li> <li>Debris should only be obtained from eligible sources.</li> <li>DMS site monitors should carefully review processing of materials (quantities collected for processing and quantities post-processing).</li> <li>Document truckloads and debris volumes to make sure final volume matches contract.</li> </ul>  |
| <b>Time-and-Materials Contract</b>                              | <ul style="list-style-type: none"> <li>Used when the SOW necessary to achieve an outcome is unknown contractor is paid for actual time, equipment usage based on hourly rates, and materials used (a ceiling prices is required).</li> </ul>       | <ul style="list-style-type: none"> <li>Monitoring must be thorough.</li> <li>Inspection reports should be produced every day and should include the following information:                             <ul style="list-style-type: none"> <li>Number of hours worked</li> <li>Type and quantity of each type of truck/trailer/equipment used</li> <li>Verification of equipment hours—document active work hours only; “stand-by” time is not eligible for FEMA funding</li> <li>Verification of labor hours compared to equipment hours</li> <li>Document weather conditions as they might affect daily work</li> <li>Monitor production rates for each staging and reduction site</li> <li>Monitor performance</li> <li>Check quantities of debris hauled (CY)</li> <li>Load tickets can be used as a way of checking contractor efficiency if debris is hauled based on CY</li> </ul> </li> </ul> |

Appendix B: Sample Debris Monitoring Plan and Monitoring Forms

Sample Forms and Tables  
are intended as guidance and  
should be modified to meet  
SLTT procurement rules and  
regulations.

## 1.0 General

The \_\_\_\_\_ has entered into a contract with \_\_\_\_\_ for the purpose of:

- Removing storm-generated debris from \_\_\_\_\_ rights-of-way and hauling the debris to a temporary debris management site (DMS) for volume reduction and/or to a final disposal site
- Setting up and operating \_\_\_\_\_ ( ) DMS located at \_\_\_\_\_
- Hauling chips/mulch from the debris volume reduction site(s) to a location of the Debris Manager's choosing

The Debris Manager will be responsible for monitoring the contractor's debris removal and disposal activities using debris monitoring contractor personnel to prepare debris load tickets and oversee the debris removal and disposal contractor's operations.

## 2.0 Purpose

The purpose of this plan is to outline the debris monitoring responsibilities of the debris monitoring contractor's personnel. This plan is subject to revision based on changing conditions.

## 3.0 Monitoring Operations

The debris removal and disposal contractor will be responsible for removing all eligible debris from maintained street rights-of-way and hauling the debris to designated DMSs.

Contractor debris monitoring activities will be controlled by the Contractor's Project Manager located at \_\_\_\_\_. Phone number is \_\_\_\_\_.

The debris monitor's workday is expected to be from 7 a.m. to 6 p.m., or a maximum of 10 hours per day, 7 days per week.

Debris monitors will be responsible for initiating debris load tickets at contractor debris loading sites and estimating and recording the quantity of debris, in cubic yards (CY) on debris load tickets of *all* vehicles entering temporary DMSs (Figure B-1).

### 3.1 Loading Site Monitors

The loading site monitor is responsible for completing the debris load ticket, the Daily Loading Site Monitor Log, and the Daily Debris Issue Log. Each of these is described below.

#### *Sample Debris Load Ticket*

The loading site monitor will complete Section 1 of the load ticket (Figure B-1) for all contractor debris-hauling vehicles. The monitor will keep one copy and give the original and remaining copies to the truck driver. The monitor's copy will be submitted to the debris monitoring

Appendix B: Sample Debris Monitoring Plan and Monitoring Forms

contractor’s Data Entry Supervisor or designated representative on a daily basis. Load ticket information will be entered into a database by the monitoring contractor’s data entry staff.

**Figure B-1: Sample Debris Load Ticket**

The loading site monitor should be responsible for initiating load tickets (Figure B-1) where trucks are loaded and verifying the estimated amount of debris hauled at the temporary storage area or landfill. The Applicant monitors must provide a list of the measured truck capacities in CY and license plate number of all trucks to be used to move debris upon award of the debris removal contract.

Once a truck is loaded with debris at the loading site, the loading site monitor should fill out a load ticket. The load tickets issued by the loading site monitors are the basis for debris contractor payment. Each item in the load ticket must be completed or the load ticket will not be considered valid.

*Sample Daily Debris Loading Site Monitor Log*

The Daily Debris Loading Site Monitor Log (Figure B-2) is used by the Applicant and/or FEMA debris loading site monitor to collect data at the debris pick-up sites. The loading site monitor

Appendix B: Sample Debris Monitoring Plan and Monitoring Forms

monitors the removal and disposal crews at several loading sites. The number of crews monitored will depend on the geographical area and volume of debris.

It is important for the debris loading site monitor to document the pick-up site locations (using addresses, mile-markers, or GPS readings) to ensure that debris being picked up is eligible and contractors are working where they were assigned. When issues arise, they should be documented on the Daily Issues Log (see next section). Each loading site monitor should provide his or her name and company name on the form. The loading site monitor should record any issues noted for that day and provide comments concerning that day’s operation; photographs should also be provided as needed. Photographs should be taken of any safety violations or other unusual events affecting the debris operation. The debris loading site monitor should document the type of debris being removed.

| Time | Ticket Number | Truck Number | Full Truck Rated Capacity (CY) | Pickup Location | Vegetative Debris | C&D Debris | White Goods/ Metals | Other | Issues or Comments/ Pictures Disc |
|------|---------------|--------------|--------------------------------|-----------------|-------------------|------------|---------------------|-------|-----------------------------------|
|      |               |              |                                |                 |                   |            |                     |       |                                   |
|      |               |              |                                |                 |                   |            |                     |       |                                   |
|      |               |              |                                |                 |                   |            |                     |       |                                   |

**Figure B-2:** Debris Loading Site Monitor Log

*Sample Daily Issue Log*

The Daily Issue Log (Figure B-3) is used by the Applicant and/or FEMA debris loading site monitor to collect data at the location where any issue of significance should be recorded. When documenting information on the Daily Issue Log, the location, monitoring personnel, truck identification data, and details of the issue being resolved should be recorded. For any eligibility or capacity issues, photographs (identified by corresponding numbers on the log sheet) should accompany this log.

| Issue No. | Truck No. | Load Ticket | Pick-Up Location | Contractor/ Sub-contractor | Applicant Monitor | Photo/ Disc | Issue/Resolution |
|-----------|-----------|-------------|------------------|----------------------------|-------------------|-------------|------------------|
|           |           |             |                  |                            |                   |             |                  |
|           |           |             |                  |                            |                   |             |                  |
|           |           |             |                  |                            |                   |             |                  |

**Figure B-3:** Daily Issue Log

### 3.2 Debris Disposal Tower/Site Monitors

Disposal tower/site monitors will be located at the entrance to the DMS or landfill where the inspection tower is located. They will be responsible for estimating and recording the CY of debris in appropriate location on the lower portion of the load ticket (Figure B-1) for *all* incoming debris-hauling vehicles. The following procedures will be followed:

- The tower/site monitor will be stationed in the inspection tower and estimate the quantity of debris contained in the truck or trailer in CY. Each truck or trailer will have the measured hauling capacity in CY recorded on the side of the truck or trailer. That number should be validated with the quantity stated in appropriate location on the upper portion of the load ticket (Figure B-1).
- The tower/site monitor will record the name and the arrival time of the truck and confirm the type of debris in the truck.
- The tower/site monitor will record the estimated volume of debris contained within the bed of the truck or trailer, in CY, under “Unloading Information” on the load ticket. The monitor must print and sign his/her name in the designated block on the load ticket.

The tower/site monitor may find it useful to use an estimating table such as shown in Table B-1 and should also refer to the job aid presented in Appendix A: Field Reference Guides - Debris Monitor Guidelines for Estimating Quantities.

**Table B-1: Estimating Truck/Trailer Capacity**

| <b>Truck/Trailer Size<br/>- CY</b> | <b>100%<br/>CY</b> | <b>90%<br/>CY</b> | <b>85%<br/>CY</b> | <b>80%<br/>CY</b> | <b>75%<br/>CY</b> |
|------------------------------------|--------------------|-------------------|-------------------|-------------------|-------------------|
|                                    |                    |                   |                   |                   |                   |
|                                    |                    |                   |                   |                   |                   |
|                                    |                    |                   |                   |                   |                   |

*Note: Truck/trailer without a tailgate is rated at 85 percent of capacity to start.*

- The tower/site monitor will retain the original of the load ticket and give the remaining copies to the truck driver. The original load ticket will be submitted to the monitoring contractor’s Data Entry Supervisor or designated representative on a daily basis. Load ticket information will be entered into a database by the monitoring contractor’s data entry staff. Load tickets are controlled forms and cannot be lost since they will be used to verify the amount of money paid to the debris reduction site contractor and to the debris hauling contractor.

*Sample Daily Debris Site/Monitoring Tower Log*

The Daily Debris Tower Log (Figure B-4) on the following page can be used by the Applicant and/or FEMA tower/site monitor to record the truck data, document estimates of the load volumes, and describe what types of debris are being brought into the DMS or landfill.

Documenting the tower and pick-up site locations is important so that debris can be correlated and tracked. Each tower/site monitor should provide his or her name and company name on the form. The tower/site monitor should record any issues noted for that day and provide comments concerning that day’s operation; photographs should also be provided as needed. Photographs should be taken of any safety violations or other unusual things affecting the debris operation.

| Time | Ticket Number | Truck Number | Full Truck Rated Capacity (CY) | Applicant QA Eligible Capacity (% CY/Weight(Wt)) | FEMA Eligible Capacity (% CY/Wt) | Vegetative Debris | C&D Debris | White Goods/ Metals | Other | Issues or Comments/ Pictures Disc |
|------|---------------|--------------|--------------------------------|--|----------------------------------|-------------------|------------|---------------------|-------|-----------------------------------|
|      |               |              |                                |  |                                  |                   |            |                     |       |                                   |
|      |               |              |                                |  |                                  |                   |            |                     |       |                                   |
|      |               |              |                                |  |                                  |                   |            |                     |       |                                   |

**Figure B-4:** Daily Debris Tower/Site Monitoring Log

**4.0 Truck Certification Form**

The Applicant should ensure that every truck and trailer to be used in debris removal operations is measured and documented on a Truck Certification Form (Figure B-5). Knowing the hauling capacity of each truck is necessary because debris, specifically vegetative debris, is often hauled and billed by volume. Accurately capturing all the truck capacity information and driver profile information is important; having a FEMA PA representative present when certifying debris trucks is recommended.

Truck documentation should include all trucks to be used, including City/County trucks and trailers. A Truck Certification Form allows the debris monitor to identify the truck itself and its hauling capacity in a standardized manner. The following information should be documented:

- Capacity of hauling bed (CY)
- License plate number
- Truck identification number assigned by the owner
- Brief physical description of the truck
- Photographs

Determining an accurate capacity for each truck is important. Refer to Truck Certification Form Calculation Instructions (on page B-12) for additional information.

Appendix B: Sample Debris Monitoring Plan and Monitoring Forms

The information on the Truck Certification Form should be entered into a database by the data entry staff. Copies of the Truck Certification Form should be on file with the Applicant and kept in the truck throughout the operational period.

Debris monitors may need to be trained to measure truck capacities for certification purposes. Recertification of the hauling trucks on a random and periodic basis should be implemented for contract compliance and reimbursement considerations.

**Figure B-5:** Truck Certification Form

*Truck Certification Form Calculation Instructions*

Instructions to take the necessary dimensions of corner wedge (refer to Figure B-6):

“a”: Along the side of the bed, measure the distance from the point where the rounded part of the bed starts, to the front corner of the bed.

“b”: Equal to “a.”

“c” and “d”: Along the side of the bed, mark the point where the rounded part of the bed starts, and along the front of the bed, also mark the point where the rounded part of the bed ends. Run a string between the two points and measure the distance between them; half of that distance is “c” and half of the distance is “d” (“c” and “d” are equal).

“e”: Measure the distance from the mid-point of the string that was stretched from the side to the front of the bed in the previous step to the rounded part of the bed.

Extra trailer: The volume calculations for the extra trailer would be simply length x width x height if the extra trailer has a rectangular bed. However, if the extra trailer also has round corners at the front, the volume calculation would be the same as explained above.

Instructions to take the necessary dimensions of round bottom truck (refer to Figure B-6):

“a”: The width of the bed.

“b”: The depth of the vertical portion (the side) of the bed.

“c” and “d”: Both are equal to half the width of the bed.

“e”: Run a string between the lower ends of the vertical portions of the bed (the sides) and measure the distance from the mid-point of the string to the bottom of the bed.

*NOTE: All dimensions used in the above formulas must be in feet, with inches converted to fractions of feet, using the following conversions (for example, 8 feet, 5 inches should be written as 8.42 feet):*

|                     |                      |
|---------------------|----------------------|
| 1 inch = .08 foot   | 7 inches = .58 foot  |
| 2 inches = .17 foot | 8 inches = .67 foot  |
| 3 inches = .25 foot | 9 inches = .75 foot  |
| 4 inches = .33 foot | 10 inches = .83 foot |
| 5 inches = .42 foot | 11 inches = .92 foot |
| 6 inches = .50 foot |                      |

**5.0 Sample Debris Collection Summary Spreadsheet**

The Debris Collection Summary Spreadsheet (Figure B-7) is used to capture the total amount and types of debris removed and disposed of, as well as the cost for each. This information may also be helpful to FEMA to validate any debris prediction models that are run, as well as establishing reasonable costs for debris removal.

| CY         | Unit Price \$ | CY  | Unit Price \$ | CY  | Unit Price \$ | CY          | Unit Price \$ | Average Haul Distance | Primary Disposal Method | CY to Landfill |
|------------|---------------|-----|---------------|-----|---------------|-------------|---------------|-----------------------|-------------------------|----------------|
| Vegetative |               | C&D |               | HHW |               | White Goods |               |                       |                         |                |
|            |               |     |               |     |               |             |               |                       |                         |                |

**Figure B-7: Debris Data Collection Summary Spreadsheet**

Appendix C: Monitoring Contract Process/Documents

Sample documents are intended as guidance and should be modified to meet applicable SLTT procurement rules and regulations.

Sample Request for Proposal Cover Letter for Debris Monitoring Services

Date:

Subject: Request for Proposals for Disaster Debris Monitoring

The \_\_\_\_\_ invites qualified firms to respond to this request for proposal (RFP) by providing their qualification and experience for consideration to provide Disaster Debris Monitoring Services on an as-needed basis.

**DISASTER DEBRIS MONITORING SERVICES**

The scope of services shall include, but not be limited, to the following:

The \_\_\_\_\_ seeks qualified firm(s) to assist in the monitoring of disaster debris collection and disposal operations on behalf of the \_\_\_\_\_, ensuring compliance with Federal requirements and Applicant debris management plans as related to contractor oversight, truck measurements, load ticket preparation and issuing, report preparation, and project administration.

The Debris Monitoring Contractor shall provide personnel to monitor at least \_\_\_\_\_ debris loading sites and up to \_\_\_\_\_ personnel to monitor debris management sites (DMS)/disposal sites located in \_\_\_\_\_. Each site will operate approximately 12 to 14 hours per day, 7 days per week. The exact number and locations of sites will be determined by the Debris Manager.

The Debris Monitoring Contractor's on-site Project Manager shall also assign a field supervisor who will be assigned to provide oversight of up to 10 loading site and tower/site debris monitors.

The Debris Monitoring Contractor shall provide all management, supervision, labor, transportation, and equipment necessary to initiate load tickets at debris loading sites, estimate the volume of debris (in cubic yards) being delivered by trucks to each DMS/disposal site, and support the operations of the field supervisor(s), debris loading and tower/site monitors, and clerical staff.

Scope of Services for Debris Management to include field supervisors, debris loading monitors, tower/site debris monitors, and clerical staff is at Attachment 1.

The Bid Schedule (Attached) must be completed and submitted with your proposal.

The RFP should be limited to 10 pages and address the following:

- Office location responsible for this project
- Key personnel

- Evidence of satisfactory completion of disaster debris monitoring in the past 5 years at similar jurisdictions
- The scope, project budget, and operational duration (include the firm's contract manager, and phone number and e-mail address for each disaster response or project, if available)
- Summarized past relevant experience for each response should include the following:
  - Type of disaster—hurricane, tropical storm, tornado, etc.
  - Type of jurisdiction—city, county, district, or combination
  - Collection debris monitoring assignments
  - DMS debris monitoring assignments
  - Final disposal debris monitoring functions
  - FEMA reimbursement actions and issue resolution
- List of references
- Knowledge and experience with Applicant solid waste regulations and the disaster debris management policies
- Sub-consultant(s)/subcontractors that may be used on this project
- 3-year claims/litigation history and status

Any material received that is not requested may be discarded. Bindery (except removable fasteners) in any form is not preferred, nor is specially prepared covers, dividers, tables of content, organizational charts, reference letters, etc.

The evaluations made as a result of reviewing the above information from each firm will be part of the basis for developing a short list of firms who may be scheduled to make presentations before the Selection/Negotiation Committee (S/NC), and may serve as continuing information for the final ranking.

## **SELECTION/NEGOTIATION PROCESS**

An S/NC has been appointed by the \_\_\_\_\_ and will be responsible for recommending the most qualified firm(s) with whom to begin negotiation of an agreement for this project. The process for this procurement is anticipated, but not required, to proceed in the following manner:

### **REVIEW OF WRITTEN SUBMITTALS**

Each firm should submit documents that provide evidence of capability to provide the Debris Monitoring services required for this project. Each short-listed firm will be contacted via telephone and a follow-up letter advising of date and time for presentations/interviews.

The \_\_\_\_\_ will not consider oral/written communications, prior to the conclusion of short-listing firms, that vary the terms of the submittals.

### **PRESENTATIONS/INTERVIEWS**

Appendix C: Monitoring Contract Process/Documents

The S/NC may provide a list of subject matter for discussion. Each short-listed firm will be given equal time to make presentations, but the question-and-answer time may vary.

All inquiries are to be directed to \_\_\_\_\_ at \_\_\_\_\_.

Interested firms should submit four copies of materials that indicate interest and qualifications to:

Submittals **MUST BE RECEIVED** by the \_\_\_\_\_ no later than 5:00 p.m. on \_\_\_\_\_, 20\_\_\_. Electronically transmitted and late or misdirected submittals will not be accepted.

Signature \_\_\_\_\_

Attachment 1 – Scope of Services

Attachment 2 – Bid Schedule

**THIS SAMPLE IS INTENDED AS GUIDANCE AND SHOULD BE MODIFIED TO MEET APPLICABLE SLTT PROCUREMENT RULES AND REGULATIONS.**

## Sample Scope of Services for Debris Monitoring Services

### **General**

Provide debris monitors and debris monitoring services to assist the City/County with monitoring the operations of the disaster debris removal and disposal contractor(s). The debris monitoring services to be provided are contract compliance supervision and inspection, not professional engineering services. All debris monitoring activities are to be in compliance with current FEMA guidance and applicable SLTT and Federal regulations.

### **Pre-Event Requirements**

Contractor will provide assistance in preparation for disasters through participation in meetings and workshops and the establishment of data management and other integrated systems.

Contractor will, at no cost to the City/County:

- Provide City/County full-time personnel with a half-day debris management training session. Training program must, at a minimum, meet the training requirement for debris monitors as outlined by current FEMA debris management guidance.
- Provide a list of key personnel and subcontractors that may be involved in the disaster debris monitoring activities to include facsimile, cell phone numbers, and e-mail addresses.
- Participate in annual workshops or planning meetings with City/County representative and debris hauling and disposal contractor(s) to establish/review applicable policies and procedures.

### **Post-Event Requirements**

Contractor will assist with load inspections for storm debris cleanup being performed by one or more debris hauling and disposal contractors or City/County agencies.

Contractor shall supply sufficient number of trained debris monitors and trained field supervisors to accommodate the volume of debris to be removed at loading sites and debris management sites or final disposal sites.

Contractor shall supply one field supervisor to oversee no more than 10 loading and tower/site debris monitors.

Contractor shall remove and replace employees immediately upon notice from the City/County Debris Manager for conduct or actions not in keeping with this contract.

## **Personnel Requirement and Responsibilities**

### **Debris Monitoring Field Supervisor**

Consultant will provide one debris monitoring field supervisor for no more than 10 debris loading site debris monitors.

Services include, but are not limited to:

- Overseeing and supervising loading site and disposal site debris monitoring activities
- Scheduling debris monitoring resources and deployment timing
- Communicating and coordinating with City/County personnel
- Providing suggestions to improve the efficiency of collection and removal of debris
- Coordinating daily activities and future planning
- Remaining in contact with debris management/dispatch center or supervisor
- Identifying, addressing, and troubleshooting any questions or problems that could affect work area safety and eligibility
- Supervising the accurate measurement of load hauling compartments and accurately computing volume capacity in cubic yards (CY)
- Documenting and recording measurements and computations
- Documenting truck hauling compartment condition using digital photographs
- Ensure all truck certifications are complete and available to all parties

### **Debris Monitors**

Consultant will provide trained debris monitoring personnel to oversee the loading of eligible debris at collection sites and verification of load capacity and documentation at designated temporary debris management or final disposal sites. Services include, but are not limited to:

#### **Debris Loading Site Monitors**

Consultant will perform on-site, street-level debris monitoring at all contractor loading sites to verify debris eligibility based on the monitoring contract's requirements and initiate debris removal documentation using load tickets. Services include, but are not limited to:

- Providing trained debris monitoring personnel at designated loading sites to check and verify information on debris removal operations
- Monitoring collection activity of trucks
- Issuing load tickets at loading site for each load
- Checking the area for safety considerations such as downed power lines and children playing in area, and ensuring that traffic control needs are met, and trucks and equipment

are operated safely. Notify supervisors of concerns regarding the safe operation of trucks and equipment

- Ensuring that Freon-containing appliances are sorted and ready for Freon removal on-site or separating transport for Freon removal before final disposal
- Performing a pre-work inspection of areas to identify potential problems such as covered utility meters, transformers, fire hydrants, mailboxes, etc. to mitigate damage from loading equipment
- Documenting damage to utility components, driveways, road surfaces, private property, vehicles, etc., should it occur, with photographs (if possible, collect information about owner, circumstances of the damage [who, what, when, where] and report to field supervisor)
- Ensuring the work area is clear of debris to the specified level before equipment is moved to a new loading area. Notify supervisor/manager of any concerns regarding inadequate debris clearance
- Properly monitoring and recording performance and productivity of debris removal crew
- Remaining in regular contact with debris management/dispatch center or supervisor
- Ensuring that loads are contained properly before leaving the loading area
- Ensuring that only eligible debris is collected for loading and hauling
- Ensuring that only debris from approved public areas is loaded for removal
- Performing other duties from time to time as directed by the debris management project manager or designated debris management personnel

#### Debris Tower/Site Monitors

Consultant will provide debris tower and site monitors to verify estimated quantities of eligible debris hauled by contractor trucks and documented on load tickets. Services include, but are not limited to:

- Providing trained debris monitoring personnel to accurately measure load hauling compartments and accurately compute volume capacity in CY for all contractor trucks and trailers prior to commencement of debris hauling operations
- Documenting measurements and computations
- Completing record of contract haulers' cubic yardage and other recordkeeping as needed on the load ticket
- Initialing each load ticket before permitting trucks to proceed from the check-in area to the tipping area
- Remaining in regular contact with debris management/dispatch center or field supervisor
- Performing other duties as directed by the dispatch/staging operation, debris management project manager, or other designated personnel

### **Clerical/Data Entry Supervisor**

Consultant will provide a clerical/data entry supervisor to coordinate data entry and information management systems. Services include, but are not limited to:

- Supervising the preparation of detailed estimates and submitting them to the City/County debris manager
- Implementing and maintaining a disaster debris management system linking the load ticket and debris management site information, including reconciliation and photographic documentation processes
- Providing daily, weekly, or other periodic reports for the City/County debris manager noting work progress and efficiency, current/revised estimates, project completion, and other schedule forecasts/updates

### **Clerical Staff/Data Entry Clerk**

Consultant will provide clerical staff/data entry clerk(s) as required to enter load ticket information into the contractor's information management systems and to respond to specific directions from the data entry supervisor.

### **Terms**

The work shall begin on notice to proceed and continue for no longer than 60 days, unless extended by the City/County with 10 days written notice.

### **Deployment**

Consultant must be prepared to deploy debris monitors within 24 hours from the notice to proceed. When additional debris monitoring is needed to meet requirements of the monitoring contract, consultant shall be prepared to increase the number of debris monitors for the City/County to use as needed.

**THIS SAMPLE IS INTENDED AS GUIDANCE AND SHOULD BE MODIFIED AS APPROPRIATE TO ADDRESS THE CONDITIONS OF THE OPERATION.**

# FOREWORD

On behalf of the Federal Emergency Management Agency (FEMA), I am pleased to issue this Fourth Edition (Version 4) of the *Public Assistance Program and Policy Guide* (PAPPG). FEMA has archived previous editions at [www.fema.gov/assistance/public/policy-guidance-fact-sheets/policy-archives](http://www.fema.gov/assistance/public/policy-guidance-fact-sheets/policy-archives). FEMA applies this Version 4 to incidents declared on or after June 1, 2020. This version supersedes Version 3.1.

As part of this version of the PAPPG, FEMA has incorporated the *Public Assistance Alternative Procedures for Permanent Work Pilot Policy* (FP 104-009-7). This establishes Alternative Procedures as the first option considered for all large permanent work projects in order to ensure the ability of Applicants to drive their own recovery. It standardizes a single process for the development and consideration of fixed cost estimates for all permanent work projects. Applicants will be able to agree to a fixed cost estimate or choose to pursue funding under standard, actual cost procedures. This approach maximizes Applicant awareness of the opportunities and benefits provided by the Alternative Procedures, which include, but are not limited to:

- Flexibility in meeting post-disaster recovery needs, as opposed to being limited to rebuilding back to what existed prior to the disaster;
- Ability to share funds across all Alternative Procedures Permanent Work Projects;
- Ability to retain and use excess funds to reduce risk and improve future disaster operations (subject to timely closeout); and
- Eligibility for cost-effective hazard mitigation on replacement projects.

[Appendix M: \*Alternative Procedures for Permanent Work Pilot\*](#), provides additional information along with a summary of benefits in comparison to the standard Public Assistance (PA) procedures.

Additionally, this PAPPG Version 4 incorporates the following:

## List of Changes and Clarifications Grouped by General Topic

| Administrative   |
|--|
| Reorganized and simplified language throughout the PAPPG   |
| Incorporated the <b>Program Delivery Process</b> throughout the PAPPG  |
| Updated <a href="#">References and Resources</a> list  |
| Updated <a href="#">Appendix A: <i>Environmental and Historic Preservation Compliance</i></a>  |
| Added language on <b>outcome-driven recovery</b> ( <a href="#">Chapter 2. <i>Operational Coordination</i></a> )  |
| Incorporated key <b>Grants Management</b> language and requirements such as <b>work completion definition</b> and deadline requirements throughout the PAPPG |
| Moved documentation checklists to relevant sections and <b>specified required documents</b> throughout the PAPPG   |
| Defined <b>policy on logical grouping</b> of damage ( <a href="#">Chapter 5:II. <i>Grouping Impacts into Projects</i></a> )                                  |
| Incorporated <b>Documentation Retention</b> Requirement ( <a href="#">Chapter 12:IV. <i>Documentation Retention Requirements</i></a> )                       |
| Incorporated <b>Appeal policy</b> ( <a href="#">Chapter 3:V.C. <i>Appeal Rights and Requirements</i></a> )   |

| Administrative  |
|---|
| Incorporated <b>Determination Memo</b> and <b>Administrative Record</b> guidance ( <a href="#">Chapter 3:V.B. Notification of Ineligibility Determination</a> )   |
| Added <b>Closeout</b> policy and <b>documentation requirements</b> ( <a href="#">Chapter 12. Final Reconciliation and Closeout</a> )  |
| Added standard <b>Request for Information</b> deadlines ( <a href="#">Chapter 3:V. Eligibility Determinations</a> )   |
| Added definition for <b>site</b> ( <a href="#">Chapter 5: Damage and Impact Information</a> )   |
| Added FEMA <b>validation</b> of Applicant-submitted <b>damage</b> information and documentation ( <a href="#">Chapter 5:III.B. Site Inspections</a> )   |
| Added requirement for all <b>documentation</b> to be submitted <b>within 90 days</b> of work completion <b>regardless of obligation</b> status ( <a href="#">Chapter 9:II.C. Costs for Projects with All Work Completed</a> ) |

| Applicant Eligibility   |
|---|
| Added <b>animal control services, center-based childcare, and food banks</b> to eligible private nonprofit (PNP) list ( <a href="#">Chapter 3:VI.D.2. Private Nonprofit Essential Social Services</a> ) |
| Proration of emergency work on PNP <b>mixed-use facilities</b> ( <a href="#">Chapter 4:II.B.1. Mixed-Use Facility</a> )   |
| Clarified that <b>PNP</b> facilities that provide <b>flood control</b> are <b>ineligible</b> ( <a href="#">Chapter 3:VI.D.3. Private Nonprofit Ineligible Services</a> )                                |
| Clarified requirements for <b>PNPs exempt from 501c</b> requirement ( <a href="#">Chapter 3:VI.D. Private Nonprofit Organizations</a> )   |
| Clarified <b>Community Development District</b> requirement to <b>serve the public</b> ( <a href="#">Chapter 3:VI.D. Private Nonprofit Organizations</a> )  |
| Moved <b>public broadcasting</b> to PNP <b>critical service</b> table based on Stafford Act ( <a href="#">Chapter 3:VI.D.1. Private Nonprofit Critical Services</a> )                                   |

| Emergency Work Eligibility  |
|---|
| Clarified <b>demolition versus debris</b> ( <a href="#">Chapter 7:I.G. Debris Removal from Private Property</a> )   |
| Added reference to Operation <b>Blue Roof</b> ( <a href="#">Chapter 7:II.X.1. Operation Blue Roof</a> )   |
| Clarified that FEMA may provide exceptions to <b>demolish commercial structures</b> in limited, extraordinary circumstances ( <a href="#">Chapter 7:II.U.2. Commercially Owned Structures</a> )                 |
| Clarified and aligned <b>standby time</b> and <b>pre-positioning</b> of resources ( <a href="#">Chapters 6:II.B.7. Standby Time</a> and <a href="#">7:II.E. Pre-positioning Resources</a> )                     |
| Simplified the <b>opt-in</b> procedure for <b>debris removal Alternative Procedures</b> ( <a href="#">Chapter 7:I.A. Alternative Procedures for Debris Removal</a> )  |
| <b>Removed “temporary”</b> from emergency repair language ( <a href="#">Chapter 7:II.X. Emergency Repair or Stabilization</a> )   |
| Clarified <b>debris clearance vs. debris removal</b> ( <a href="#">Chapter 7:II.J. Emergency Access</a> )   |
| Reduced list of <b>services eligible for temporary relocation</b> and added examples of eligible and ineligible support services ( <a href="#">Chapter 7:II.V. Temporary Relocation of Essential Services</a> ) |
| Clarified that <b>Mosquito Abatement</b> may be eligible if any one of the bullet scenarios exists ( <a href="#">Appendix G: Mosquito Abatement</a> )   |
| Eliminated requirement to make at least 10 percent of <b>sheltering capacity</b> available in Host-State sheltering ( <a href="#">Chapter 7:II.O.4. Host-State or Host-Tribe Evacuation and Sheltering</a> )    |
| Refined <b>beach</b> eligibility language ( <a href="#">Chapter 7:II.X.4. Emergency Dunes or Berms on Beaches</a> )   |
| Clarified language on <b>essential employees</b> being called-back from leave ( <a href="#">Chapter 6:II.B.4. Essential Employees Called Back from Furlough</a> )   |

| Emergency Work Eligibility  |
|---|
| Clarified that the <b>return of evacuees</b> is eligible ( <a href="#">Chapter 7:II.O.1. Evacuation</a> )   |
| Clarified language regarding <b>damage caused during Emergency Work</b> ( <a href="#">Chapter 7:III. Damage Caused During Performance of Emergency Work</a> ) |

| Permanent Work Eligibility   |
|--|
| Eliminated <b>Alternate Project</b> reduction ( <a href="#">Chapter 8:VIII.A. Capped Project Funding</a> )   |
| Clarified that replacement of <b>moldy</b> construction materials is only eligible as Permanent Work ( <a href="#">Appendix I: Mold Remediation</a> )                |
| Clarified cost-effective <b>mitigation for low slope roofs</b> ( <a href="#">Appendix J: Cost-Effective Public Assistance Hazard Mitigation Measures</a> )           |
| Refined <b>beach</b> eligibility language ( <a href="#">Chapter 8:IX.E.1. Beaches</a> )  |
| Clarified eligibility of <b>Americans with Disability Act</b> requirements ( <a href="#">Chapter 8:III.G. Accessibility for Individuals with Disabilities</a> )      |
| Refined hazard <b>mitigation policy</b> language ( <a href="#">Chapter 8:IV.A. Public Assistance Hazard Mitigation</a> )   |
| Defined which <b>Flood Control Works</b> are under authority of the Natural Resources Conservation Service ( <a href="#">Chapter 8:IX.B.2. Flood Control Works</a> ) |

| Cost Eligibility  |
|---|
| Added language on <b>cost share matching</b> with Other Federal Agency funds ( <a href="#">Chapter 1:IV.E. Federal Cost Share</a> )   |
| Clarified PNP cost ineligibility when a <b>PNP declines or misses the deadline</b> to apply for a disaster loan from the Small Business Administration ( <a href="#">Chapter 4:II.B.2. Small Business Administration Loan Requirement</a> )   |
| Clarified Small Business Administration loan requirement for PNP <b>mixed-use facilities</b> ( <a href="#">Chapter 4:II.B.2. Small Business Administration Loan Requirement</a> )   |
| Incorporated additional language on <b>procurement and contracting</b> ( <a href="#">Chapter 6:VIII. Procurement and Contracting Requirements</a> )   |
| Added language on what costs are covered by <b>increased cost shares</b> ( <a href="#">Chapter 6:XIII. Increased Federal Cost Share for a Limited Timeframe</a> )   |
| Explained difference between <b>project management</b> and <b>grant management</b> costs ( <a href="#">Chapter 6:XV. Project Management and Design Services</a> and <a href="#">XVI. Grant Management and Administration</a> )  |
| Clarified eligibility of costs related to <b>pursuing insurance</b> proceeds ( <a href="#">Chapter 6:XVIII.A. Insurance Proceeds</a> )  |
| Added language on eligibility of <b>interest on loans</b> ( <a href="#">Chapter 6:XX. Interest on Loans</a> )   |
| Incorporated <b>increased operating cost clarifications</b> , including ineligibility of costs related to transportation of students to alternate schools or temporary facilities, staff being held-over to cover shifts, and new landfills ( <a href="#">Chapter 7:II.F. Expenses Related to Operating a Facility or Providing a Service</a> ) |
| Clarified that the <b>minimum threshold</b> does not apply to Donated Resources or Management Costs ( <a href="#">Chapter 9:II.A. Project Thresholds</a> )  |
| Allowing <b>Small Project completed work</b> to be <b>estimated and certified</b> ( <a href="#">Chapter 9:II.C. Costs for Projects with All Work Completed</a> )  |

### Cost Eligibility

Added language conveying that FEMA **does not re-evaluate reasonable costs on Alternative Procedure Permanent Work Pilot projects** ([Chapter 9:II.E.6. Fixed-Cost Offer for Alternative Procedures Projects](#))

Eliminated allowance for **insurance** adjustments on **individual small projects** ([Chapter 12:I.A. Project Reconciliation and Closeout, Small Projects](#))

FEMA makes updates to the PAPPG at [www.fema.gov/assistance/public/policy-guidance-fact-sheets](http://www.fema.gov/assistance/public/policy-guidance-fact-sheets) on an annual basis when necessary and conducts a comprehensive review no less than every three years. We look forward to your feedback to help inform the next version. FEMA staff may send policy recommendations through the PA Change Control Tool at [usfema.sharepoint.com/teams/ORRApps/NewPA/Pages/SubmitRequest-CCT-P3.aspx](https://usfema.sharepoint.com/teams/ORRApps/NewPA/Pages/SubmitRequest-CCT-P3.aspx). Recipients and Applicants may request changes via email at [FEMA-Recovery-PA-Policy@fema.dhs.gov](mailto:FEMA-Recovery-PA-Policy@fema.dhs.gov).

Keith Turi  
Assistant Administrator  
Recovery Directorate

# INTRODUCTION

## I. Public Assistance Program Overview

The mission of the Federal Emergency Management Agency’s (FEMA’s) Public Assistance (PA) Program is to provide assistance to State, local, Territorial, or Tribal, and local (SLTT) governments, and certain types of private nonprofit (PNP) organizations so that communities can quickly respond to and recover from major disasters or emergencies declared by the President. Through the PA Program, FEMA provides supplemental Federal grant assistance for debris removal, emergency protective measures, and the restoration of disaster-damaged, publicly owned facilities and specific facilities of certain PNP organizations. The PA Program also encourages protection of these damaged facilities from future incidents by providing assistance for hazard mitigation measures. FEMA provides this assistance based on authority in statutes, executive orders (EOs), regulations, and policies.

## II. Authorities

FEMA provides assistance based on authorities defined in statutes and regulations. These authorities also specify requirements that must be met. When the PAPPG uses the words “must” or “required,” it is a legal requirement. The Applicant jeopardizes its PA funding if it does not comply with these requirements.

### A. Statutes

Statutes are Federal laws passed by the U.S. Congress and signed by the President. All PA Program assistance must comply with all applicable statutes. The statute that authorizes FEMA to provide assistance via the PA Program is the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as Amended (Stafford Act), Title 42 of the United States Code (U.S.C.) § 5121 et seq.<sup>1</sup> The following sections of the Stafford Act specifically authorize the assistance FEMA provides under the PA Program:

- Title I – Findings, Declarations and Definitions
- Title III – Major Disaster and Emergency Assistance Administration
  - Sec. 311. Insurance
  - Sec. 312. Duplication of Benefits
  - Sec. 324. Management Costs
- Title IV – Major Disaster Assistance Programs (applies to Major Disaster Declarations)
  - Sec. 403. Essential Assistance
  - Sec. 406. Repair, Restoration, and Replacement of Damaged Facilities
  - Sec. 407. Debris Removal
  - Sec. 428. Public Assistance Program Alternative Procedures
    - Section 428 of the Stafford Act authorizes FEMA to provide specific exceptions, or “Alternative Procedures,” to PA Program regulations.<sup>2</sup> FEMA is currently

<sup>1</sup> [www.fema.gov/disasters/stafford-act](http://www.fema.gov/disasters/stafford-act).

<sup>2</sup> The Robert T. Stafford Disaster Relief and Emergency Assistance Act, Public Law 93-288, as Amended (Stafford Act) § 428, Title 42 of the United States Code (U.S.C.) § 5189f.

piloting these Alternative Procedures as optional procedures. These procedures are available to each Applicant on a voluntary basis. The specific alternatives are presented throughout this document, where applicable.

- Title V – Emergency Assistance Programs (applies to Emergency Declarations)
  - Sec. 502. Federal Emergency Assistance
- Title VII – Miscellaneous
  - Sec. 705. Disaster Grant Closeout Procedures

## B. Regulations

Regulations are Federal rules with the force and effect of law that implement a statute based on a Federal agency’s interpretation of that statute.<sup>3</sup> FEMA and any entity receiving PA assistance must comply with all applicable Federal Regulations.<sup>4</sup>

FEMA publishes PA Program rules in the following parts of Title 44 of the Code of Federal Regulations (C.F.R.), Emergency Management and Assistance:<sup>5</sup>

- Part 206 Subpart G, Public Assistance Project Administration;
- Part 206 Subpart H, Public Assistance Eligibility; and
- Part 206 Subpart I, Public Assistance Insurance Requirements.

The Office of Management and Budget establishes regulations regarding administrative requirements, cost principles, and audit requirements in 2 C.F.R. Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards.

## III. Document Purpose and Use

FEMA issues policy to articulate the Agency’s intent and direction in applying statutory and regulatory authority to achieve desired outcomes. The purpose of the *Public Assistance Program and Policy Guide* (PAPPG) is to define FEMA’s PA Program and its policy and procedural requirements. Only the Assistant Administrator of Recovery at FEMA Headquarters has the authority to modify or waive PA Policy.

The PAPPG provides high-level program delivery information and describes important PA functions that occur throughout the entire program delivery lifecycle.

FEMA staff use the PAPPG to guide decision-making and ensure consistent implementation of the PA Program across the Nation. Separate FEMA policies and guidance documents that apply

<sup>3</sup> Stafford Act § 321, 42 U.S.C. § 5164.

<sup>4</sup> Title 44 of the Code of Federal Regulations (C.F.R.) § 206.200(b). The electronic version of the C.F.R. is available at [www.ecfr.gov](http://www.ecfr.gov).

<sup>5</sup> Stafford Act § 325, 42 U.S.C. § 5165c; 44 C.F.R. § 1.4.

to the PA Program are referenced where applicable and listed in the [References and Resources](#) section at the end of the PAPPG.

## IV. Scope

The PAPPG provides comprehensive PA policy to use when evaluating eligibility. It includes FEMA’s policy statements and provides a summary of each step of the PA Program lifecycle beginning with pre-declaration activities through closure of the PA Program award for a declared incident. Figure 1 below provides an overview of the PA Program delivery process. The PAPPG references and provides weblinks to other FEMA policies and documents such as standard operating procedures and job aids that provide detailed instructions for individuals involved with implementing each of the various steps.

**Figure 1. PA Program Delivery Process**

## V. Applicability

FEMA applies Version 4 of the PAPPG to incidents declared on or after June 1, 2020. Individuals who have responsibilities managing, implementing, or pertaining to the PA Program should refer to the PAPPG for PA policy and procedural requirements.

## VI. Document Management and Maintenance

FEMA generally publishes proposed PA policy language for public comment prior to publishing in this document.<sup>6</sup> When the policy is deemed significant, FEMA publishes it in the *Federal*

<sup>6</sup> Stafford Act § 325, 42 U.S.C. § 5165c.

*Register.*<sup>7</sup> FEMA conducts a comprehensive review of this publication no less than every three years. FEMA staff may send policy recommendations through the PA Change Control Tool at [usfema.sharepoint.com/teams/ORRApps/NewPA/Pages/SubmitRequest-CCT-P3.aspx](https://usfema.sharepoint.com/teams/ORRApps/NewPA/Pages/SubmitRequest-CCT-P3.aspx). Recipients and Applicants may request changes via email at [FEMA-Recovery-PA-Policy@fema.dhs.gov](mailto:FEMA-Recovery-PA-Policy@fema.dhs.gov).

---

<sup>7</sup> FEMA is required to publish policies for comment if they are deemed “significant” by the Office of Management and Budget, pursuant to Executive Order 12866.

# CHAPTER 1: PRE-AWARD ACTIVITIES

The Stafford Act<sup>8</sup> authorizes the President to provide Federal assistance when the magnitude of an incident or threatened incident exceeds the affected State,<sup>9</sup> local<sup>10</sup> Territorial, and Indian Tribal<sup>11</sup> government capabilities to respond or recover. This chapter explains procedures and requirements for activities that occur during the pre-award phase, including the process for requesting a Presidential declaration, FEMA's evaluation criteria, the contents of the declaration, and the initial administrative requirements for a State, Territorial, or Tribal government to receive assistance.

## I. Preliminary Damage Assessment

When a State, Territorial, or Tribal government determines that an incident may exceed SLTT capabilities to respond, it requests a joint Preliminary Damage Assessment (PDA) with FEMA.<sup>12</sup> Federal, SLTT government, and certain PNP organization officials work together to estimate and document the impact and magnitude of the incident.<sup>13</sup> Accurate and comprehensive PDAs are critical to enabling efficient response and recovery. FEMA's *Damage Assessment Operations Manual*<sup>14</sup> provides detailed information to assist staff involved with damage assessments and describes how FEMA utilizes the information when evaluating requests for Major Disaster Declarations.

## II. Declaration Request

The Governor<sup>15</sup> or Tribal Chief Executive<sup>16</sup> may request a declaration from the President through FEMA. A Tribal government may elect to be a Recipient<sup>17</sup> or a Subrecipient<sup>18</sup> under a

---

<sup>8</sup> [www.fema.gov/disasters/stafford-act](http://www.fema.gov/disasters/stafford-act).

<sup>9</sup> Stafford Act § 102(4), 42 U.S.C. § 5122; 44 C.F.R. § 206.2(a)(22), State governments include the District of Columbia, American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, and the U.S. Virgin Islands.

<sup>10</sup> Stafford Act § 102(8), 42 U.S.C. § 5122; 44 C.F.R. § 206.2(a)(16), local governments include counties, municipalities, cities, towns, townships, local public authorities, school districts, special districts established under State law, intrastate districts, councils of governments (regardless of whether the council of governments is incorporated as a nonprofit corporation under State law), regional or interstate government entities, agencies or instrumentalities of a local government; State-recognized Tribes; and rural communities, unincorporated towns or villages, or other public entities, for which an application for assistance is made by a State or political subdivision of a State.

<sup>11</sup> Stafford Act § 102(6), 42 U.S.C. § 5122; 44 C.F.R. § 206.201(i), an Indian Tribal Government is any Indian or Alaska Native tribe, band, nation, pueblo, village, or community listed as an Indian Tribe under the Federally Recognized Indian Tribe List Act of 1994. Hereinafter referred to as Tribal Government.

<sup>12</sup> 44 C.F.R. § 206.33(a).

<sup>13</sup> 44 C.F.R. § 206.33(b).

<sup>14</sup> [www.fema.gov/disasters/preliminary-damage-assessment-reports/guide](http://www.fema.gov/disasters/preliminary-damage-assessment-reports/guide).

<sup>15</sup> Stafford Act § 102(5), 42 U.S.C. § 5122; 44 C.F.R. § 206.2(12).

<sup>16</sup> Stafford Act § 102(12), 42 U.S.C. § 5122.

<sup>17</sup> 44 C.F.R. § 206.201(e). Per 2 C.F.R. § 200.86, A Recipient is an entity that receives a Federal award directly from a Federal awarding agency to carry out an activity.

<sup>18</sup> Per 2 C.F.R. § 200.93, a Subrecipient is an Applicant that receives a subaward from a pass-through entity to carry out part of a Federal program.

State or Territorial declaration or request its own declaration as a Recipient.<sup>19</sup> The Governor, and/or the Tribal Chief Executive if the Tribal Government wishes to be its own Recipient, must submit the request no later than 30 days after the incident occurs.<sup>20</sup> FEMA may extend the deadline if the Governor or Tribal Chief Executive submits a written time extension request within 30 days of the incident stipulating the reason for the delay.<sup>21</sup> When a severe or catastrophic incident occurs, the Governor or Tribal Chief Executive may submit a declaration request prior to completion of the PDA.<sup>22</sup> This is referred to as an expedited declaration request. In such circumstances, assistance is generally limited to that which would address immediate needs based on rapid assessments until the PDA is completed.

#### **Terminology: Recipients, Subrecipients, and Applicants**

When an entity applies for PA funding, it is the **Applicant**. Once the Applicant receives funding, it is either the **Recipient, pass-through entity** or a **Subrecipient**. For simplicity, FEMA uses the term Applicant throughout this document when referring to the responsible entity for a project rather than making distinctions between an entity as the Applicant, Recipient, pass-through entity, or Subrecipient. FEMA uses the terms Recipient and Subrecipient when necessary to differentiate between the two entities.

### **III. Declaration Evaluation**

FEMA uses PDA information to evaluate the need for assistance under the PA Program.

#### **A. State and Territorial Governments**

For State and Territorial governments, FEMA's evaluation is based on six primary factors:

- Estimated cost of assistance;
- Insurance coverage;
- Other Federal agency programs;
- Localized impacts;
- Hazard mitigation; and
- Recent multiple disasters.<sup>23</sup>

FEMA reviews the facility and cost information to ensure that the estimated costs include all appropriate insurance reductions and do not include costs related to facilities under the authority of another Federal agency. FEMA then compares the estimated eligible amounts to the established annual per capita indicators. To account for localized impacts when the statewide per

---

<sup>19</sup> A Tribal Governmental may also receive one type of assistance under a State or Territorial declaration and another type of assistance under its own declaration, provided there is no duplication of benefits. Additional information for Tribal declarations is available at [www.fema.gov/about/organization/tribes](http://www.fema.gov/about/organization/tribes).

<sup>20</sup> Stafford Act §§ 401 and 501, 42 U.S.C. §§ 5170 and 5191; 44 C.F.R. §§ 206.35 and 206.36. For Emergency Declarations, the Governor or Tribal Chief Executive must submit the request within 5 days after the need for assistance becomes apparent. For Major Disaster Declarations, the Governor or Tribal Chief Executive should submit the request as soon as possible after completion of the Joint PDA. Information and forms for Presidential declaration requests are available at [www.fema.gov/disasters/request-for-presidential-disaster-declaration](http://www.fema.gov/disasters/request-for-presidential-disaster-declaration), and for Tribal governments specifically, [www.fema.gov/disasters/tribal-declarations](http://www.fema.gov/disasters/tribal-declarations).

<sup>21</sup> 44 C.F.R. §§ 206.35(a) and 206.36(a).

<sup>22</sup> 44 C.F.R. § 206.33(d).

<sup>23</sup> 44 C.F.R. § 206.48(a).

capita impact is low, FEMA evaluates whether there are extraordinary concentrations of damage resulting in significantly high per capita impacts at the local government level.

To encourage hazard mitigation, FEMA considers whether SLTT government mitigation measures taken prior to the incident likely reduced the damage impacts, especially if such mitigation averted damage that would have increased the estimated eligible cost above the per capita indicator.

Understanding that the effects of multiple disasters in a confined period of time can affect response and recovery capabilities, FEMA also evaluates the overall impacts of Federal and State, Territorial, or Tribal declarations that have occurred within the past 12 months and the extent to which the State, Territorial, or Tribal government has spent its own funds. If there were disasters prior to the 12-month period that still have substantial impacts on SLTT governments, FEMA may also consider impacts from these disasters.

## **B. Tribal Governments**

Tribal governments requesting a declaration have different declaration factors than State and Territorial governments. PA declaration factors for tribes include:

- Estimated cost of assistance (minimum damage amount of \$250,000);
- Insurance coverage;
- Other Federal agency programs;
- Hazard mitigation;
- Recent multiple disasters (previous 24 months);
- Types and amounts of damage;
- Economic impact of the damage to the community and government;
- Tribal resources available for response and recovery;
- Demographics of the impacted community;
- Impact on community infrastructure;
- Unique conditions that affect Tribal governments (e.g., remoteness, economy, cultural considerations); and
- Other relevant information.

Additional detail is provided in the [Tribal Declaration Pilot Guidance](#).<sup>24</sup>

## **IV. Presidential Declaration**

For FEMA to provide assistance, the President must declare that an emergency or major disaster exists. The declaration<sup>25</sup> establishes the:

- Type of incident;
- Incident period;
- Designated areas;
- Types of assistance;
- Federal cost share; and

---

<sup>24</sup> [www.fema.gov/disasters/tribal-declarations](http://www.fema.gov/disasters/tribal-declarations).

<sup>25</sup> Each Presidential declaration is available at [www.fema.gov/disasters/disaster-declarations](http://www.fema.gov/disasters/disaster-declarations).

- Federal Coordinating Officer (FCO).

### **A. Type of Incident**

The declaration designates the type of incident (e.g., hurricane, tsunami, or earthquake). For Emergency Declarations, an incident is any instance that the President determines warrants supplemental emergency assistance to save lives and protect property and public health and safety, or to lessen or avert the threat of a catastrophe.<sup>26</sup> For Major Disaster Declarations, an incident is any natural catastrophe (including any hurricane, tornado, storm, high water, wind driven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, or drought), or, regardless of cause, any fire, flood, or explosion.<sup>27</sup> Major Disaster Declarations may include a combination of incident types, such as storms and landslides.

### **B. Incident Period**

The declaration designates the incident period. The incident period is the span of time during which the federally declared incident occurs.<sup>28</sup> This period varies in length, depending on the incident.

### **C. Designated Areas**

The declaration designates which areas (e.g., county, parish, city, or Tribal government) are eligible to receive Federal assistance.<sup>29</sup> FEMA may add additional areas after the initial designation. However, for FEMA to consider adding an additional area, the Governor or Governor's Authorized Representative (GAR)<sup>30</sup> or, for Tribal declarations, the Tribal Chief Executive or Tribal Authorized Representative (TAR) must request the addition within 30 days of the declaration date or the end of the incident period, whichever is later.<sup>31</sup> FEMA may extend the deadline if the Governor, GAR, Tribal Chief Executive, or TAR submits a written time extension request within the 30-day deadline with justification of the inability to meet the deadline.<sup>32</sup>

### **D. Types of Assistance**

The declaration designates the types of Federal assistance authorized.<sup>33</sup> The President may authorize assistance to individuals, households, and SLTT governments, and certain types of PNP organizations. FEMA provides assistance to individuals and households via its Individual Assistance (IA) programs. FEMA provides assistance to SLTT governments and certain types of PNP organizations via its PA Program. The type of assistance authorized may vary among designated areas. FEMA may add additional types of assistance after the declaration. However, for FEMA to consider adding additional types of assistance, the Governor or GAR or, for Tribal declarations, the Tribal Chief Executive or TAR must request the assistance within 30 days of

---

<sup>26</sup> Stafford Act § 102(1), 42 U.S.C. § 5122; 44 C.F.R. § 206.2(a)(9).

<sup>27</sup> Stafford Act § 102(2), 42 U.S.C. § 5122; 44 C.F.R. § 206.2(a)(17).

<sup>28</sup> 44 C.F.R. § 206.32(f).

<sup>29</sup> 44 C.F.R. §§ 206.2(a)(6) and 206.40(b).

<sup>30</sup> 44 C.F.R. §§ 206.2(a)(13) and 206.41(d).

<sup>31</sup> 44 C.F.R. § 206.40(c).

<sup>32</sup> 44 C.F.R. § 206.40(d).

<sup>33</sup> 44 C.F.R. § 206.40(a).

the declaration date or the end of the incident period, whichever is later.<sup>34</sup> FEMA may extend the deadline if the Governor, GAR, Tribal Chief Executive, or TAR submits a written time extension request within the 30-day deadline with justification of the inability to meet the deadline.<sup>35</sup> Tribal governments may receive one type of assistance under a State or Territorial declaration as a Subrecipient and another type of assistance under its own declaration as a Recipient, provided there is no duplication of benefits.

FEMA Regional Administrators (RAs)<sup>36</sup> have the authority to issue Fire Management Assistance Grant (FMAG) declarations for wildfires that threaten such destruction that would constitute a major disaster.<sup>37</sup> The FMAG Program is separate and distinct from the PA Program. FMAG declaration criteria, eligibility, and other program information are available at 44 C.F.R. Part 204, Fire Management Assistance Grant Program, and in FEMA's *Fire Management Assistance Grant Program Guide* (FEMA P-954).<sup>38</sup>

If significant damage occurs as a result of one or more FMAG fire incidents, the Governor or Tribal Chief Executive may subsequently request a Major Disaster Declaration for the fire incident(s). FEMA evaluates such requests based on damage and costs not covered under the FMAG Program, such as public infrastructure damage. If the President declares a Major Disaster and authorizes the PA Program, FEMA usually funds all costs related to those fire incidents under the PA Program for efficiency in administration of assistance and to avoid a duplication of benefits between programs.

## E. Federal Cost Share

The assistance FEMA provides through its PA Program is subject to a cost share.<sup>39</sup> The cost share ensures local interest and involvement through financial participation. The Federal share is not less than 75 percent of the eligible costs.<sup>40</sup> FEMA may recommend an increase up to 90 percent if actual Federal obligations, excluding administrative costs, meet or exceed a qualifying threshold.<sup>41</sup>

For Emergency Work specifically, the Federal cost share may be increased in limited circumstances, and for limited periods of time, if warranted.<sup>42</sup> See [Chapter 6:XIII, \*Increased Federal Cost Share for a Limited Timeframe\*](#), for details on how FEMA applies the increased Federal cost share.

### Terminology

A **project** is a logical grouping of work required as a result of the declaration. The damage description, scope of work, and costs are documented in the **project**, which is the basis for PA funding. 44 C.F.R. § 206.201(k).

<sup>34</sup> 44 C.F.R. § 206.40(c).

<sup>35</sup> 44 C.F.R. § 206.40(d).

<sup>36</sup> 44 C.F.R. § 206.2(a)(21).

<sup>37</sup> Stafford Act § 420, 42 U.S.C. § 5187; 44 C.F.R. Part 204.

<sup>38</sup> [www.fema.gov/assistance/public/fire-management-assistance](http://www.fema.gov/assistance/public/fire-management-assistance).

<sup>39</sup> 44 C.F.R. § 206.203(b).

<sup>40</sup> Stafford Act §§ 403(b), 406(b), 407(d), and 503(a), 42 U.S.C. §§ 5170b, 5172, 5173, 5193; 44 C.F.R. §§ 206.47(a) and 206.65.

<sup>41</sup> 44 C.F.R. § 206.47(b).

<sup>42</sup> 44 C.F.R. § 206.47(d).

The Applicant can only apply other Federal award funds toward the PA non-Federal cost share if the other Federal agency has specific statutory authority allowing its funds to be used to meet cost-share requirements.<sup>43</sup> For example, the U.S. Department of Housing and Urban Development's (HUD's) Community Development Block Grant (CDBG) program may be used for the non-Federal share on PA projects if certain requirements are met. FEMA applies the cost share at the project level. Therefore, any other agency's Federal funds must be applied at the project level and may not be used across multiple projects (with exception of Permanent Work Alternative Procedure projects as described in [Chapter 8:VIII. Capped Projects](#)). Further, if the Applicant uses funds from another Federal agency to meet the non-Federal share, it must meet all requirements of the other agency as well as all PA Program requirements. The Applicant cannot apply PA funds toward the non-Federal cost share of other Federal agency awards.

## V. Recipient Administrative Requirements

When the Presidential declaration authorizes assistance to SLTT governments and certain types of PNP organizations, FEMA implements the PA Program. The Recipient is responsible for completing an application for assistance and submitting required documents before FEMA can provide PA funding. This section describes the required documents. The Recipient may upload these documents into PA Grants Portal at the Event Level (see Chapter 3:I, *Public Assistance Web-based Systems*). If the document is related to multiple disasters, such as a Hazard Mitigation Plan, the Recipient should upload it to its Organizational Profile.

### Recipient-Led Public Assistance Disasters

FEMA may approve a Recipient to manage PA disasters. Recipients may choose a scalable approach by performing any one or more of the following key functions: customer service, site inspections, and scoping and costing. The *State-Led Public Assistance Guide* provides guidance on the processes, resources, and capabilities required ([www.fema.gov/sites/default/files/2020-07/fema\\_state-led-public-assistance\\_Guide\\_2-1-2019.pdf](http://www.fema.gov/sites/default/files/2020-07/fema_state-led-public-assistance_Guide_2-1-2019.pdf)).

### A. Application for Federal Assistance

The declared State, Territorial, or Tribal government must complete and submit Standard Form (SF) 424, Application for Federal Assistance, and SF-424D, Assurances for Construction Programs<sup>44</sup> before FEMA provides assistance. The SF-424 includes the period of performance (POP) for the PA award (referred to as the prime award). The prime award POP begins on the first day of the incident period and initially extends four years from the declaration date.

### B. FEMA-State/Territory/Tribe Agreement

After every declaration, the applicable State, Territorial, or Tribal government enters into an agreement with FEMA regarding the understanding, commitments, and conditions under which FEMA provides assistance (FEMA-State/Territory/Tribe Agreement). FEMA and the Governor or Tribal Chief Executive must sign this agreement before FEMA provides assistance. If necessary, because of exigent circumstances, FEMA may authorize essential emergency services

<sup>43</sup> Stafford Act § 312, 42 U.S.C. § 5155.

<sup>44</sup> 44 C.F.R. § 206.202(e). The SF-424 forms are available at [www.grants.gov/web/grants/forms/sf-424-family.html](http://www.grants.gov/web/grants/forms/sf-424-family.html).

or housing assistance under the Individuals and Households Program (IHP) while the agreement is in process for signature.<sup>45</sup>

### **C. Payment Management System**

FEMA provides PA funding to Recipients via the U.S. Department of Health and Human Services (HHS) Payment Management System. Therefore, if an entity is a Recipient for the first time, it must request access to the Payment Management System and complete the Direct Deposit Form (SF-1199A) to obtain a FEMA-specific account before FEMA can provide funding.<sup>46</sup>

### **D. Administrative Plan**

Recipients must have a FEMA-approved Administrative Plan that describes how it intends to administer the PA Program before FEMA provides PA funding for any project. At a minimum, the Administrative Plan must include:

- The agencies responsible for program administration;
- Identification of staffing functions, the source of staff to fill the functions, the management and oversight responsibilities of each function; and
- Procedures for:
  - Notifying potential Applicants of the availability of the PA Program;
  - Conducting Applicant Briefings;
  - Assisting FEMA in determining Applicant eligibility;
  - Participating with FEMA in conducting PDAs;
  - Participating with FEMA in establishing PA mitigation and insurance requirements;
  - Processing appeals, time extension requests, and other project-related correspondence;
  - Complying with Environmental and Historic Preservation (EHP) requirements;
  - Complying with PA administrative requirements including, but not limited to, procurement, contracting, and closeout;
  - Complying with audit requirements;
  - Requesting reimbursement or advanced funds; and
  - Determining staffing and budgeting requirements for proper management of the PA Program.

A Recipient must submit its Administrative Plan to FEMA on an annual basis and an amendment for each incident that occurs within the year if needed to meet current policy guidance or to address the specifics of the new incident. The Recipient must incorporate the approved Administrative Plan into its State, Territorial, or Tribal emergency plan.<sup>47</sup>

### **E. Hazard Mitigation Plan**

Hazard mitigation is most effective when implemented under a comprehensive, long-term mitigation plan. SLTT governments engage in hazard mitigation planning to identify risks and

---

<sup>45</sup> 44 C.F.R. § 206.44(a).

<sup>46</sup> The Payment Management System Access Form and the SF-1199A are available at [pms.psc.gov/](https://pms.psc.gov/).

<sup>47</sup> 44 C.F.R. § 206.207(b). An administrative plan template is available [here](#).

vulnerabilities associated with natural disasters and develop long-term strategies for protecting people and property from future incidents. Recipients must have a FEMA-approved Hazard Mitigation Plan before FEMA can provide PA funding for any Permanent Work.<sup>48</sup> The Recipient must show in its plan how it intends to reduce risks from natural hazards and must update the plan every 5 years.

Tribal governments must meet the requirements of 44 C.F.R. § 201.7, *Tribal Mitigation Plans*. States and Territories must meet the requirements of 44 C.F.R. § 201.4, *Standard State Mitigation Plans* or have an Enhanced Mitigation Plan that meets the requirements of 44 C.F.R. § 201.5, *Enhanced State Mitigation Plans*.<sup>49</sup>

---

<sup>48</sup> 44 C.F.R. § 201.3(c)(1) and (e)(1).

<sup>49</sup> Additional information about the mitigation plan requirement is available [here](#).

## CHAPTER 2: OPERATIONAL COORDINATION

FEMA leads implementation of Stafford Act authorities and coordination of Federal assistance to impacted communities. FEMA's goal is to help communities recover by focusing on their desired goals and outcomes. FEMA refers to this as outcome-driven recovery. This is a problem-solving approach that promotes unity of effort among stakeholders to identify recovery needs, vision, and goals, and to resource holistic recovery solutions. It emphasizes the need for integration of all partners in recovery, appropriate and consistent coordination, and transparency to ensure that a community can set its own goals and priorities, identify strategies to access funding and other resources to meet its goals, and effectively implement projects. This chapter describes how Federal, State, Territorial, and Tribal leadership coordinate during response and recovery operations to ensure successful outcomes.

FEMA conducts incident operations based on the national comprehensive, systematic approach set forth by the *National Incident Management System* (NIMS).<sup>50</sup> NIMS is designed to ensure that local jurisdictions retain command, control, and authority over response and recovery activities for their jurisdictional areas. It establishes consistent structure, concepts, principles, processes, and language at a national level enabling efficient coordination of emergency management operations across all levels of government.

The *National Response Framework* (NRF) and *National Disaster Recovery Framework* (NDRF)<sup>51</sup> build upon NIMS by defining the core capabilities necessary for response and recovery and fostering a holistic, collaborative approach, emphasizing the need for the involvement of the whole community (individuals, families, households, communities, private and nonprofit sectors, faith-based organizations, and all levels of government). The NRF and NDRF detail Federal and SLTT government roles and responsibilities during response and recovery operations.

### Incident Command System

The Incident Command System (ICS) is a key component of NIMS and is the organizing principle for Federal response and recovery operations. Refer to the *Incident Management Handbook* for more information on how FEMA applies ICS.

Basic elements of ICS include:

- Establishes common terminology
- Allows organizational structures to be scalable based on the size, complexity, and needs of the operation.
- Establishes a common set of objectives to develop strategies, issue assignments, establish tactics, and document results.
- Utilizes a centralized, coordinated Incident Action Plan (IAP) to guide all activities and manage all resources including personnel, teams, equipment, supplies, and facilities.
- Promotes effective management by ensuring:
  - Unity-of-command;
  - Chain-of-command; and
  - Span-of-control.

<sup>50</sup> [www.fema.gov/emergency-managers/nims](http://www.fema.gov/emergency-managers/nims).

<sup>51</sup> [www.fema.gov/emergency-managers/national-preparedness/frameworks/recovery](http://www.fema.gov/emergency-managers/national-preparedness/frameworks/recovery).

## I. Operational Priorities

### A. Community Lifelines

Lifelines are the most fundamental services in the community, that, when stabilized, enable all other aspects of society. FEMA and other Emergency Management organizations use community lifelines to establish and track operational priorities during incident stabilization. The seven lifelines are:

- Safety and security;
- Food, water, and sheltering;
- Health and medical;
- Energy (power and fuel);
- Communications;
- Transportation; and
- Hazardous materials.

Lifelines provide indispensable service to enable the continuous operation of critical business and government services. Analyzing impacts to each of the lifelines allows decision-makers to:

- Rapidly determine whether an incident is large or complex;
- Prioritize and focus response efforts to maintain or restore the most critical services and infrastructure;
- Ensure limited resources can go toward a common goal that requires involvement across the whole community; and
- Promote a response that fosters better integration and communication across the whole community since lifeline management transcends public and private sector boundaries.

FEMA's *Community Lifelines Implementation Toolkit*<sup>52</sup> provides comprehensive information and resources for implementing lifelines during incident response.

### B. Incident Action Plan

The Incident Action Plan (IAP) is a written plan defining the objectives for managing the overall incident and addressing the operational priorities. FEMA and the State, Territory, or Tribe develop the IAP through a series of meetings which occur once during each Operational Period (O-Period). The O-Period is the timeframe designated to execute a specific set of actions. During the response phase, this is typically 12-24 hours and FEMA usually expands it to 48-96 hours or longer as the operation shifts into the recovery phase. The IAP is initially organized by lifeline stabilization priorities and shifts to recovery outcome priorities as the lifelines stabilize.

#### IAP Collaborative Meetings

FEMA and the State, Territorial, or Tribal government conduct a series of meetings throughout the IAP process to identify incident objectives and share situational awareness. The meetings include:

- Initial incident briefing
- Command and general staff meeting
- Operational tactics meeting
- Planning meeting
- Operations briefing

A meeting schedule (ICS Form 230) describes meeting locations and required attendees.

<sup>52</sup> [www.fema.gov/emergency-managers/practitioners/lifelines-toolkit](http://www.fema.gov/emergency-managers/practitioners/lifelines-toolkit).

The IAP provides the following information:

- Work assignments delineated by division and group;
- Resources required to complete work assignments;
- Operational facilities and reporting locations for plan execution; and
- Organization charts, contact information, and medical, safety, and communications plans.

The PA Group Supervisor (PAGS) ensures that PA Program work assignments, information, and contributions toward larger recovery outcomes are accurately reflected in the IAP. For additional information on the IAP process, see the *Incident Action Planning Guide*.<sup>53</sup>

## II. Response and Recovery Coordination

Federal, State, Territorial, and Tribal government coordination begins with response during the pre-award phase and continues through the completion of recovery operations and closeout of the award. Response operations begin to transition to recovery when immediate threats to health and safety begin to stabilize. This timeframe varies by entity depending on the level of impact and response capabilities.

### A. Response Coordination

FEMA operates 24-hour National and Regional Watch Centers that provide national and regional awareness on potential, developing, or ongoing situations that may require a coordinated Federal response. When warranted, based on situational awareness provided by the Watch Centers, FEMA activates its National and Regional Response Coordination Centers (NRCC/RRCC). These coordination centers function as multi-agency coordination facilities to prepare for and respond to the immediate needs of an incident, as identified by the State, Territorial, or Tribal government. The RA determines when to activate the RRCC. The FEMA Administrator may activate the NRCC when incidents cross regional borders, have broad geographic implications, or are nationally significant. The NRCC allocates and prioritizes national resource deployments and coordinates with the RRCC to provide additional support for immediate needs.

As described in the NRF various agencies that provide response capabilities are grouped into Emergency Support Functions (ESFs). During response, ESFs are a critical mechanism to coordinate functional capabilities and resources provided by Federal departments and agencies, along with certain private-sector and nongovernmental organizations. ESFs are activated selectively and may not be activated for all incidents. The NRF describes the composition and mission functions of each of the ESFs.<sup>54</sup>

When FEMA activates the RRCC or NRCC, it also activates representatives from the appropriate ESFs to deploy to the RRCC or NRCC to support incident objectives consistent with the purpose and scope defined in the NRF annex for each of the ESFs. PA typically staffs a position in the RRCC or NRCC to support incident objectives related to debris removal and critical infrastructure (facilities that provide transportation, energy, communications, water, or emergency services). This position coordinates activities of ESFs 1 (Transportation), 3 (U.S. Army Corps of Engineers), 10 (U.S. Environmental Protection Agency), and 12 (Energy).

---

<sup>53</sup> *The Incident Action Planning Guide* is available at [www.fema.gov/sites/default/files/2020-07/Incident\\_Action\\_Planning\\_Guide\\_Revision1\\_august2015.pdf](http://www.fema.gov/sites/default/files/2020-07/Incident_Action_Planning_Guide_Revision1_august2015.pdf).

<sup>54</sup> The NRF is available at [www.fema.gov/emergency-managers/national-preparedness/frameworks/response](http://www.fema.gov/emergency-managers/national-preparedness/frameworks/response).

FEMA’s National Incident Support Manual (NISM) provides additional information on NRCC operations.<sup>55</sup>

## **B. Recovery Coordination**

FEMA’s goal throughout the recovery phase is to assist communities and Applicants with achieving desired outcomes and building resilience. The National Preparedness Goal<sup>56</sup> identifies eight core capabilities that are critical for recovery. Various agencies that provide these recovery capabilities are grouped into the following six Recovery Support Functions (RSFs)<sup>57</sup>:

Community Planning and Capacity Building; Economic Recovery; Health and Social Services; Housing; Infrastructure Systems; and Natural and Cultural Resources. As ESF activities subside, RSF activities ramp up and require continued information sharing and coordination.

RSFs support SLTT recovery efforts by coordinating among Federal and SLTT agencies and nongovernmental and private organizations to problem-solve and improve access to needed resources. The NDRF further describes the composition and mission of each RSF.<sup>58</sup> Activation of each RSF depends on incident-specific recovery issues.

The Federal Interagency Operational Plan (FIOP)<sup>59</sup> describes how Federal recovery field leadership, RSFs, and related entities work in coordination with nongovernmental and private organizations to support SLTT recovery efforts. It provides a flexible structure for disaster recovery leaders to address the specific needs of the incident and enhance sustainability and resilience of communities in a unified and collaborative manner.

### **1. Field Operations**

Prior to a declaration, FEMA may deploy a Regional or National Incident Management Assistance Team (IMAT) to provide additional situation awareness and manage Federal response operations from the field in the initial days or weeks after an incident.

Once the President issues an Emergency or Major Disaster Declaration, the Regional Watch Center or RRCC deploys key personnel to set up the initial field operations structure and assume primary responsibility for response coordination. At this point, primary responsibility for infrastructure-related tasks conducted at the RRCC are transitioned to the Infrastructure Branch Director (IBD) or PAGS.

#### **Public Assistance Program Leadership**

In large-scale operations, the IBD is responsible for leading delivery of the PA Program and providing operational direction to FEMA PA staff and infrastructure-related ESFs. PAGS serve as deputies to the IBD. When ESFs are not activated, delivery of the PA Program is led by the PAGS. For simplicity, the PAPPG uses the term PAGS for functions that an IBD may also perform.

<sup>55</sup> The NISM is available [here](#).

<sup>56</sup> [www.fema.gov/emergency-managers/national-preparedness/goal](http://www.fema.gov/emergency-managers/national-preparedness/goal).

<sup>57</sup> Recovery Support Functions are teams of Federal and national partners with a Coordinating Agency, primary and supporting agencies, State and Territorial agencies, and other organizations. The Coordinating Agency is usually the entity that can bring in resources to address needs, whereas the support agencies provide technical and subject matter expertise along with additional information. Additional information is available [here](#).

<sup>58</sup> See Table 3 of The National Disaster Recovery Framework, which is available [here](#).

<sup>59</sup> [www.fema.gov/emergency-managers/national-preparedness/frameworks/federal-interagency-operational-plans](http://www.fema.gov/emergency-managers/national-preparedness/frameworks/federal-interagency-operational-plans).

The declaration identifies the FCO.<sup>60</sup> The FCO works in partnership with the State or Territorial Coordinating Officer (SCO)<sup>61</sup> and Governor's Authorized Representative (or for Tribal declarations, the Tribal Coordinating Officer (TCO) and TAR) to coordinate Federal resources and disaster assistance programs.<sup>62</sup> FEMA and the State, Territorial, or Tribal government may initially operate at an Initial Operating Facility (IOF) until a facility is identified and established as a Joint Field Office (JFO). The IOF is usually at the State, Territorial, or Tribal Emergency Operations Center (EOC). The JFO is a temporary facility in proximity to the area affected by the incident that becomes the central location for coordination of response and recovery activities. Staff at the IOF transition to the JFO once it is established, typically several days to two weeks. FEMA's *Incident Management Handbook*<sup>63</sup> provides additional information on field operating structures and functional responsibilities.

#### Virtual Joint Field Office

Virtual JFOs allow for the management and coordination of response and recovery operations from a FEMA Regional Office. During select incidents, a Virtual JFO may be a preferred alternative to a conventional JFO for managing field operations.

### C. Public Assistance Coordination and Planning

Primary responsibility for management and delivery of the PA Program rests with the PAGS. The PAGS coordinates with the Recipient to efficiently implement the PA Program. Additionally, the PAGS fosters collaboration and information sharing with other federal agencies (OFAs) and nongovernmental partners through participation in the RSFs and other operational task forces.

PA staff usually deliver the program from the JFO and receive project development and processing support from the designated Consolidated Resource Center (CRC). CRCs are permanent FEMA offices where subject matter experts and specialized resources provide support to all PA operations. The PAGS coordinates with the CRC Director to provide situational awareness and ensure efficient, synchronized operations. CRC responsibilities include project scoping, costing, validation, and compliance reviews.

PA staff at the JFO are responsible for providing customer service to each Applicant, conducting site inspections, obtaining project information and documentation, determining eligibility, and awarding projects. PA staff at the JFO receive policy support from the respective FEMA regional office. When necessary, the FEMA regional office engages FEMA Headquarters on complex policy matters.

FEMA and the Recipient coordinate closely on various operational planning elements. FEMA uses both PDA and Recipient-provided information to determine the initial needs of the operation. This information enables the PAGS and Recipient to determine initial staffing and training requirements, organizational structure, and logistical needs. Additionally, it provides awareness on various operational aspects such as potential policy issues or the need for task forces or specialized personnel for specific types of infrastructure.

<sup>60</sup> Stafford Act §§ 302(a) and (d), 42 U.S.C. § 5143; 44 C.F.R. §§ 206.2(a)(11) and 206.41(a).

<sup>61</sup> Stafford Act § 302(c), 42 U.S.C. § 5143; 44 C.F.R. §§ 206.2(a)(23) and 206.41(c).

<sup>62</sup> Stafford Act § 302(b), 42 U.S.C. § 5143; 44 C.F.R. § 206.42.

<sup>63</sup> [www.fema.gov/emergency-managers/nims](http://www.fema.gov/emergency-managers/nims).

The PA Program is only one of many programs across numerous agencies that contribute to recovery projects in communities. Various agencies require incident impact information to focus their support appropriately and PA staff require assistance from other agencies to provide the best customer service possible to Applicants. Therefore, it is crucial for PA staff to foster partnerships and keep open lines of communication.

## CHAPTER 3: APPLICANT COORDINATION AND ELIGIBILITY

FEMA and the Recipient work in partnership to administer the PA Program and provide customer service to each Applicant. The Recipient sets operational priorities for the incident and each Applicant identifies its priorities. This chapter describes the PA activities that occur throughout Phase I of the PA Program delivery process, *Operational Planning and Applicant Coordination*, which includes the initial stages of Applicant coordination and Applicant eligibility determinations. Key milestones include conducting all Applicant Briefings, receiving and processing all Requests for Public Assistance (RPAs), and completing all Recovery Scoping Meetings. This chapter defines RPA requirements and PA policy on Applicant eligibility. It describes the web-based systems that FEMA, Recipients, and Applicants need to use for PA award processing, including submittal of information. This chapter also defines correspondence requirements and how FEMA documents its eligibility determinations.

### I. Public Assistance Web-based Systems

FEMA uses web-based systems to provide transparency to all stakeholders throughout the PA Program delivery process. FEMA uses PA Grants Manager to review RPAs, develop and review all aspects of a project application, track the status of project application development, and receive information from Recipients and Applicants. Recipients and Applicants use PA Grants Portal to submit all documentation and information to FEMA, review all aspects of PA project applications, and track the status of PA project applications. PA Grants Manager and Grants Portal interface and are updated on an ongoing basis for continuous improvement.<sup>64</sup>

#### Technical Assistance for PA Grants Manager and Grants Portal

FEMA provides technical assistance to individuals using PA Grants Manager and Grants Portal via a Help Line at 1-866-337-8448 and email correspondence at [FEMA-Recovery-PA-Grants@fema.dhs.gov](mailto:FEMA-Recovery-PA-Grants@fema.dhs.gov).

Applicants upload documentation and information to different areas within Grants Portal.<sup>65</sup> Once an entity has an Organizational Profile in PA Grants Portal, it can upload documents to its Organizational Profile anytime regardless of whether it has a current disaster. This section of the portal is not incident-specific. Therefore, Applicants should upload documents that may apply across multiple incidents, such as labor or insurance policies, to this location. Applicants upload any documents that pertain to a specific disaster, but not a specific project to the Applicant Profile. If the documentation is specific to one project, Applicants upload it to the project section. If it pertains to a specific damage line item, Applicants upload it to the damage section.

<sup>64</sup> FEMA staff may submit change requests through the PA Change Control Tool at [usfema.sharepoint.com/teams/ORRApps/NewPA/Pages/SubmitRequest-CCT-P3.aspx](https://usfema.sharepoint.com/teams/ORRApps/NewPA/Pages/SubmitRequest-CCT-P3.aspx). Recipients and Applicants may request changes via email at [FEMA-Recovery-PA-Grants@fema.dhs.gov](mailto:FEMA-Recovery-PA-Grants@fema.dhs.gov).

<sup>65</sup> PA Grants Portal user manuals are available in the resource tab in the portal.

## II. Applicant Briefing

As soon as possible following the President’s declaration, the Recipient conducts briefings for all potential Applicants (i.e., SLTT government entities and PNPs).<sup>66</sup> The Recipient is responsible for notifying potential Applicants of the date, time, and location of the Applicant Briefing. FEMA attends the Applicant Briefing to support the Recipient. During these briefings, the Recipient provides high-level information regarding the PA Program, such as:

- Overview of the PA Program delivery process (e.g., PA Grants Portal, application procedures);
- Program deadlines;
- General eligibility criteria;
- Project funding;
- Hazard mitigation;
- Alternative Procedures;
- Compliance requirements (procurement, EHP, and insurance); and
- Administrative requirements, including documentation and recordkeeping.

To obtain maximum benefit from the information presented at the briefing, a potential Applicant should send representatives from its management, emergency response, public works, and finance department and designate a primary point of contact to interact with the Recipient and FEMA.

## III. Request for Public Assistance

The RPA<sup>67</sup> is an application for the PA Program. If a SLTT government entity or PNP wishes to seek PA funding, it must first submit an RPA to FEMA, through the Recipient. FEMA accepts RPAs through PA Grants Portal. If a Tribal government is its own Recipient, it submits its RPA directly to FEMA via PA Grants Portal. Prior to submitting RPAs to FEMA, the Recipient must review and approve each RPA and provide its assessment of the Applicant’s risk of noncompliance as required by 2 C.F.R. § 200.331(b).

Using the RPA, the Applicant provides general information about its organization, including physical location and point of contact. Given the necessity to collaborate with each Applicant early in the PA Program implementation process, FEMA’s expectation is that the Recipient collect RPAs as soon as possible after the respective area is designated in the declaration. However, FEMA accepts RPAs up to 30 days from the date the respective area was designated.<sup>68</sup> FEMA may extend the deadline for submitting an RPA if the Recipient submits a request in writing with justification based on extenuating circumstances beyond the Applicant’s or Recipient’s control.<sup>69</sup>

Only certain PNPs are eligible Applicants. Therefore, FEMA requires additional documentation and information with PNP RPAs to evaluate eligibility. PNP Applicants must also submit its

---

<sup>66</sup> 44 C.F.R. § 206.207(b)(1)(iii)(B).

<sup>67</sup> [www.fema.gov/assistance/public/apply](http://www.fema.gov/assistance/public/apply).

<sup>68</sup> 44 C.F.R. § 206.202(c).

<sup>69</sup> 44 C.F.R. § 206.202(f)(2).

facility-specific information in Grants Portal with all applicable documentation listed in [Chapter 3:VI.D.4, Private Nonprofit Application Documentation Requirements](#).

## IV. Written Correspondence

Throughout this document, FEMA notes specific instances in which the Applicant must obtain FEMA approval. All requests for FEMA approval must be submitted in writing through the Recipient. The Recipient must forward the correspondence to FEMA with its recommendation. One exception is Request for Information (RFI) responses. When the Applicant submits a response to an RFI, it may submit the response simultaneously to the Recipient and FEMA for expediency. Unless otherwise noted, FEMA calculates all deadlines based on calendar days. The RA has the authority to respond to all written correspondence unless otherwise noted. The RA usually delegates this authority to the FCO upon a Presidential declaration.<sup>70</sup> The RA or FCO may further delegate authorities as appropriate. FEMA usually provides its response to the Recipient, which subsequently forwards FEMA's determination to the Applicant (in some instances FEMA may send correspondence simultaneously to the Recipient and the Applicant, such as with notifications of ineligibility determinations, appeal responses, and RFIs). See Figure 2. *Map of FEMA Regions* for the geographical responsibilities of each FEMA Region.

Figure 2. Map of FEMA Regions

<sup>70</sup> 44 C.F.R. § 206.41(b).

## V. Eligibility Determinations

The four basic components of PA eligibility are:

- Applicant;
- Facility;
- Work; and
- Cost.

FEMA refers to these components as the building blocks of an eligibility pyramid. FEMA evaluates each building block to determine eligibility, starting at the foundation (Applicant) and working up to cost at the top of the pyramid (see Figure 3. *PA Eligibility Pyramid*). There are two exceptions to the standard eligibility pyramid.

For PNPs, FEMA must determine whether the PNP owns or operates a facility that provides an eligible service in order to determine whether the Applicant is eligible (see [Chapter 3:VI.D. Private Nonprofit Organizations](#), for additional information and a pyramid specific to PNP eligibility). Secondly, for SLTT government Applicants, evaluating facility eligibility is not a necessary step for most Emergency Work, as described in [Chapter 7. Emergency Work Eligibility](#).

**Figure 3. PA Eligibility Pyramid**

### A. Requests for Information

FEMA may require additional information or documentation to evaluate eligibility. In these cases, FEMA requests the information or documentation by submitting an RFI. Responses to RFIs are due by the deadline specified in the RFI. FEMA usually requires responses within 15 days of the Applicant's receipt of the RFI. FEMA establishes the deadline based on the nature of the request and consideration of the type and volume of information or documentation requested. Therefore, the amount of time allowed may vary.

### B. Notification of an Ineligibility Determination

The Program Delivery Task Force Leader (PDTFL) coordinates with the PAGS to address eligibility issues as projects are developed.

When determining that the Applicant, facility, work, or cost is ineligible, FEMA provides written notice via a Determination Memorandum (DM) or a letter that includes:

- Explanation of what assistance FEMA denied and, as applicable, the amount of assistance denied for each item;
- The basis for FEMA's denial, including the provisions of law, regulation, or policy that support the determination;
- A complete list of all documents reviewed (clearly titled for future reference); and
- Information regarding the Applicant's rights and procedures to appeal.

#### Complex Eligibility Issues

For complex eligibility issues, the PAGS in coordination with the FCO and the Region consults the PA Policy and Regulations Branch at FEMA Headquarters.

When FEMA approves funding for an item with complex eligibility, it documents its decision-making in a DM.

FEMA transmits the letter or DM simultaneously to the Recipient and Applicant via a method that confirms receipt.<sup>71</sup> This serves as the formal notification of FEMA's determination setting forth the Applicant's appeal rights.

The PDTFL is responsible for ensuring all information and documentation directly or indirectly considered in FEMA's eligibility determination is in PA Grants Manager. This may include, but is not limited to:

- Projects and project amendments;
- Notifications of eligibility determinations;
- Supporting backup documentation;
- Correspondence;
- Photographs;
- Technical reports; and
- Other relevant information.

FEMA considers this the Administrative Record.

### **C. Appeal Rights and Requirements**

The Applicant may appeal any FEMA determination related to an application for, or the provision of, assistance under the PA Program.<sup>72</sup> This includes, but is not limited to, Applicant eligibility denials, nonconcurrence on eligible damage or scopes of work (SOWs), denial of time extensions, closeout determinations, and deobligations resulting from an audit.

FEMA provides the Applicant with two opportunities to appeal a determination:

- The first appeal is to the RA.<sup>73</sup>
- If the Applicant disagrees with the first appeal determination, it may submit a second appeal to the Assistant Administrator of the Recovery Directorate at FEMA Headquarters<sup>74</sup>

At any point in the appeal process, the Applicant may withdraw its appeal by submitting a written request simultaneously to the Recipient and FEMA. FEMA sends a written acknowledgment simultaneously to the Recipient and Applicant.

All second appeal decisions represent the agency's final administrative decision on the matter.

#### **1. Appeal Deadlines**

The Applicant must submit a written appeal to the Recipient within 60 days of receiving FEMA's written notification of its determination (FEMA's eligibility determination or first appeal decision).<sup>75</sup> The Recipient must forward the appeal with its written recommendation to

---

<sup>71</sup> FEMA may transmit the document via any method that confirms receipt such as PA Grants Manager, certified or return receipt mail, or an email with read-receipt acknowledgement.

<sup>72</sup> Stafford Act § 423, 42 U.S.C. § 5189a; 44 C.F.R. § 206.206. FEMA requires Applicants to waive appeal rights on Permanent Work Alternative Procedures Projects unless it is related to a cost adjustment made by FEMA after the Fixed-Cost Offer is accepted.

<sup>73</sup> 44 C.F.R. § 206.206(b)(1).

<sup>74</sup> 44 C.F.R. § 206.206(b)(2).

<sup>75</sup> 44 C.F.R. § 206.206(c)(1).

FEMA within 60 days of its receipt of the appeal.<sup>76</sup> If either the Applicant or Recipient does not meet the respective 60-day deadlines, FEMA will deny the appeal as untimely.

## 2. Appeal Content

The Applicant must include:

- All relevant documentation supporting its position;
- The specific funding amount (or amounts if there are multiple issues on appeal) in dispute, as applicable; and
- Citations to the provisions of law, regulation, or policy (applicable to the respective disaster) with which the Applicant believes FEMA's determination was inconsistent.<sup>77</sup>

## 3. Appeal Review

Upon receipt of the appeal, FEMA reviews the appeal content and uses the Administrative Record and the laws, regulations, and policies applicable to the respective incident to analyze the appeal. FEMA may request additional information via an RFI to adequately adjudicate the appeal or it may make its decision based on the documentation and information provided at the time of appeal submission. Within 90 days of receiving the appeal, FEMA takes one of the following three actions:

- Requests additional information specifying the date FEMA must receive the information (usually 30 days). Within 90 days of receiving the information (or within 90 days of the expiration of the deadline to respond), FEMA provides its appeal decision simultaneously to the Recipient and Applicant;<sup>78</sup>
- Submits the appeal to an independent expert, or experts, for technical review and recommendations. Within 90 days of receiving the technical review recommendations, FEMA provides its appeal decision simultaneously to the Recipient and Applicant;<sup>79</sup> or
- Provides its written decision simultaneously to the Recipient and Applicant using a method that confirms receipt.<sup>80</sup>

### (a) *Requests for Information on Appeals*

When FEMA issues an RFI, it includes a deadline for the Applicant to submit the information, usually 30 days.<sup>81</sup> FEMA issues the RFI simultaneously to the Recipient and Applicant via a method that confirms receipt.

FEMA generally issues an RFI when:

- It identifies specific documentation or information that, if provided, might impact the outcome of the appeal or assist FEMA in adequately responding to the appeal; or

---

<sup>76</sup> 44 C.F.R. § 206.206(c)(2).

<sup>77</sup> 44 C.F.R. § 206.206(a).

<sup>78</sup> 44 C.F.R. § 206.206(c)(3).

<sup>79</sup> 44 C.F.R. § 206.206(d).

<sup>80</sup> FEMA may transmit notification via PA Grants Manager, certified or return receipt mail, email with read-receipt acknowledgement, or other methods that confirm receipt.

<sup>81</sup> FEMA establishes the deadline based on the nature of the request and consideration of the type and volume of information or documentation requested.

- The original eligibility determination is incorrect based on applicable law, regulation, or policy, but FEMA has identified a new basis for denying all, or a portion of, the appeal.

On first appeal, if FEMA identifies potentially ineligible SOW or costs that were not previously denied it issues an RFI that includes an explanation of the:

- New eligibility issue(s);
- Basis for the determination including an explanation of the applicable provisions of law, regulation, or policy justifying the decision;
- Amount of funding subject to denial and deobligation; and
- Specific information or documentation required to justify or further evaluate the eligibility issue(s).

FEMA proceeds with its review upon receipt of the Applicant's response to the RFI or expiration of the deadline to respond.

*(b) Remanding a Second Appeal*

When reviewing a second appeal, the Assistant Administrator of the Recovery Directorate at FEMA headquarters, or designee, may identify an issue that necessitates sending the appeal back to the RA. This should be reserved for cases when there is no other acceptable way to resolve the issue.

**4. Appeals for Alternative Procedures Projects**

FEMA is piloting Alternative Procedures on Permanent Work Projects. Due to the goals, intent, and benefits of the Alternative Procedures, FEMA does not consider appeals on Alternative Procedures Permanent Work Projects (see [Chapter 8:VIII. Capped Projects](#)) unless it is related to a cost adjustment made by FEMA after the Fixed-Cost Offer is accepted (i.e., related to insurance, noncompliance, or an audit). Any disagreement on damage, SOW, or cost must be resolved prior to accepting the fixed-cost offer. Additionally, FEMA does not consider appeals on time extension denials for Alternative Procedures Projects.

**D. Arbitration**

Under certain circumstances, an Applicant that disputes a FEMA determination related to its PA application, including eligibility for assistance or repayment of assistance, have a right of arbitration.<sup>82</sup> Additional information is provided in FEMA's Fact Sheet *Public Assistance Appeals and Arbitration under the Disaster Recovery Reform Act* at [www.fema.gov/sites/default/files/2020-07/fema\\_DRRRA-1219-public-assistance-arbitration-right\\_fact-sheet.pdf](http://www.fema.gov/sites/default/files/2020-07/fema_DRRRA-1219-public-assistance-arbitration-right_fact-sheet.pdf).

---

<sup>82</sup> Stafford Act § 423(d), 42 U.S.C. § 5189a, as amended by the Disaster Recovery Reform Act § 1219.

## VI. Applicant Eligibility

FEMA provides assistance to eligible Applicants, which are defined below.<sup>83</sup> As shown in Figure 4. *Applicant Eligibility*, FEMA must first determine whether the Applicant is eligible before evaluating the Applicant's claim. FEMA and the Recipient review the RPA to determine whether the Applicant is eligible for assistance.<sup>84</sup> This section provides FEMA's policy on Applicant eligibility.

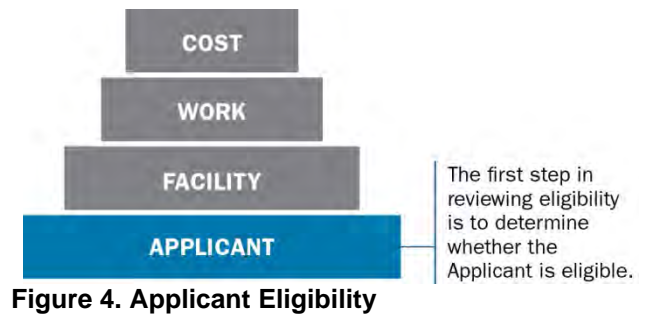

Figure 4. Applicant Eligibility

### A. State and Territorial Governments

State and Territorial governments, including the District of Columbia, American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, and the U.S. Virgin Islands, are eligible Applicants. This includes any agency or instrumentality thereof, exclusive of local governments.<sup>85</sup> The State or Territorial government designates one of the agencies (usually the emergency management agency) as the Recipient. The Recipient serves as the pass-through entity to the other agencies, which are Subrecipients.

### B. Tribal Governments

Federally recognized Indian Tribal governments, including Alaska Native villages and organizations, are eligible Applicants. Alaska Native Corporations are ineligible as they are privately owned.<sup>86</sup>

### C. Local Governments

The following types of local governments are eligible Applicants:<sup>87</sup>

- Counties and parishes;
- Municipalities, cities, towns, boroughs, and townships;
- Local public authorities;
- School districts;
- Intrastate districts;
- Councils of governments (regardless of whether incorporated as nonprofit corporations under State law);
- Regional and interstate government entities;
- Agencies or instrumentalities of local governments;
- State recognized Tribes; and
- Special districts established under State law.

<sup>83</sup> 44 C.F.R. § 206.222.

<sup>84</sup> 44 C.F.R. § 206.207(b)(1)(iii)(C).

<sup>85</sup> Stafford Act § 102(4), 42 U.S.C. § 5122; 44 C.F.R. §§ 206.2(a)(22) and 206.222(a); and 2 C.F.R. § 200.90.

<sup>86</sup> Stafford Act § 102(6), 42 U.S.C. § 5122; 44 C.F.R. §§ 206.201(i) and 206.222(c); and 2 C.F.R. § 200.54.

<sup>87</sup> Stafford Act § 102(8), 42 U.S.C. § 5122; 44 C.F.R. §§ 206.2(a)(16) and 206.222(a); and 2 C.F.R. § 200.64.

- Community Development Districts are special districts that finance, plan, establish, acquire, construct or reconstruct, operate, and maintain systems, facilities, and basic infrastructure within their respective jurisdictions. To be eligible, a Community Development District must own and be legally responsible for maintenance, and operation of an eligible facility that is open to and serves the general public.<sup>88</sup>

The State or a political subdivision of the State may submit applications on behalf of rural communities, unincorporated towns or villages, and other public entities not listed above.<sup>89</sup>

#### D. Private Nonprofit Organizations

Only certain PNPs are eligible Applicants. To be an eligible PNP Applicant, the PNP must show that it has:

Figure 5. PNP Eligibility

- A ruling letter from the U.S. Internal Revenue Service that was in effect as of the declaration date and granted tax exemption under sections 501(c), (d), or (e) of the Internal Revenue Code; or
- Documentation from the State substantiating it is a non-revenue producing, nonprofit entity organized or doing business under State law.<sup>90</sup>

If the organization is not required to obtain 501(c)(3) status or tax-exempt status under applicable State law, the organization must provide articles of association, bylaws, or other documents indicating that it is an organized entity, and a certification that it is compliant with Internal Revenue Code section 501(c)(3) and State law requirements.

Additionally, as shown in Figure 5. *PNP Eligibility*, prior to determining whether the PNP is eligible, FEMA must first determine whether the PNP owns or operates an eligible facility.<sup>91</sup> For PNPs, an eligible facility is one that provides one of the services listed below (the declared incident must have damaged the facility):

- A facility that provides a critical service, which is defined as education, utility, emergency, or medical (see [Table 1. PNP Eligible Critical Services](#));<sup>92</sup> or
- A facility that provides a noncritical, but essential social service AND provides those services to the general public (see [Table 2. PNP Eligible Noncritical, Essential Social Services](#)).<sup>93</sup> PNP facilities generally meet the requirement of serving the general public if ALL of the following conditions are met.<sup>94</sup>

<sup>88</sup> Community Development Districts generally meet the requirement of serving the public based on the same criteria used for PNPs in [Chapter 3:VI.D. Private Nonprofit Organizations](#).

<sup>89</sup> Stafford Act § 102(8)(c), 42 U.S.C. § 5122; 44 C.F.R. § 206.2(a)(16)(iii).

<sup>90</sup> 44 C.F.R. § 206.221(f).

<sup>91</sup> 44 C.F.R. § 206.222(b).

<sup>92</sup> Stafford Act § 406(a)(3)(B), 42 U.S.C. § 5172; 44 C.F.R. § 206.221(e).

<sup>93</sup> 44 C.F.R. § 206.221(e)(7).

<sup>94</sup> FEMA also uses this criteria to determine whether a Community Development District serves the public.

- Facility use is not limited to any of the following:
  - A certain number of individuals;
  - A defined group of individuals who have a financial interest in the facility, such as a condominium association;
  - Certain classes of individuals; or
  - An unreasonably restrictive geographical area, such as a neighborhood within a community;
- Facility access is not limited to a specific population (such as those with gates or other security systems intended to restrict public access); and
- Any membership fees meet all of the following criteria:
  - Are nominal;<sup>95</sup>
  - Are waived when an individual can show inability to pay the fee;
  - Are not of such magnitude to preclude use by a significant portion of the community; and
  - Do not exceed what is appropriate based on other facilities used for similar services.
- Certain types of facilities, such as senior centers, that restrict access in a manner clearly related to the nature of the facility, are still considered to provide essential social services to the general public.<sup>96</sup>

In cases where the facility provides multiple services, such as a community center, FEMA reviews additional items to determine the primary service that facility provides. Facilities established or primarily used for political, athletic, recreational, vocational, or academic training, conferences, or similar activities are ineligible (see [Table 3. PNP Ineligible Services](#)).

---

<sup>95</sup> FEMA considers the provision of services with a high membership initiation fee or high annual dues to be restrictive to certain populations. FEMA may consider the provision of services with a low fee that only covers administrative processing costs or a fee that can be waived upon demonstration of need to be accessible to the general public.

<sup>96</sup> Per Stafford Act §§ 102(11)(B) and 406(a)(3)(C), 42 U.S.C. §§ 5122 and 5172, organizations operating houses of worship that limit leadership or membership to persons who share a religious faith or practice still provide essential social services to the general public.

With exception of custodial care facilities and museums, administrative and support facilities essential to the provision of PNP noncritical service are ineligible facilities.

### 3. Private Nonprofit Ineligible Services

**Table 3. PNP Ineligible Services**

| PNP INELIGIBLE SERVICES  |   |
|--|---|
| <p style="text-align: center;"><b>COMMUNITY CENTER SERVICES</b></p> <ul style="list-style-type: none"> <li>• Training individuals to pursue the same activities as full-time paying careers (for example, vocational, academic, or professional training)</li> <li>• Meetings or activities for only a brief period, or at irregular intervals</li> <li>• Other education or training including:               <ul style="list-style-type: none"> <li>○ Athletic, vocational, academic training, or similar activities</li> <li>○ Political education</li> </ul> </li> </ul> | <p style="text-align: center;"><b>OTHER COMMUNITY SERVICES</b></p> <ul style="list-style-type: none"> <li>• Advocacy or lobbying groups not directly providing health services</li> <li>• Cemeteries</li> <li>• Conferences</li> <li>• Day care services not included in previous table of eligible services</li> <li>• Flood control (e.g., levees, berms, dunes)</li> <li>• Land reclamation facilities</li> <li>• Irrigation solely for agricultural purposes<sup>97</sup></li> <li>• Job counseling</li> <li>• Property owner associations with facilities such as roads, bridges, and recreational facilities (except utilities or emergency facilities)</li> <li>• Public housing, other than low-income housing</li> <li>• Recreation</li> <li>• Parking not in direct support of eligible facility</li> </ul> |

### 4. Private Nonprofit Application Documentation Requirements

**Table 4. PNP RPA Documentation and Information Requirements**

| All PNP Applicants   |
|--|
| <input type="checkbox"/> A ruling letter from the Internal Revenue Service that was in effect on the declaration date and granted tax exemption under sections 501(c), (d), or (e) of the Internal Revenue Code; OR documentation from the State substantiating it is a non-revenue producing, nonprofit entity organized or doing business under State law. If exempt from both the requirement to apply for 501(c)(3) status and tax-exempt status under State law, the organization must provide articles of association, bylaws, or other documents indicating that it is an organized entity and a certification that it is compliant with Internal Revenue Code section 501(c)(3) and State law requirements. (required) |
| <input type="checkbox"/> If the Applicant owns the damaged facility, proof of ownership (required)   |
| <input type="checkbox"/> If the Applicant leases the damaged facility, provide lease or other proof of legal responsibility to repair the incident-related damage (required)   |
| <input type="checkbox"/> List of services provided in the damaged facility, when, and to whom (required)   |
| Membership Organization  |
| <input type="checkbox"/> Who is allowed membership (required)  |
| <input type="checkbox"/> What fees are charged (required)  |
| <input type="checkbox"/> Policy regarding waiving memberships (required)   |

<sup>97</sup> 44 C.F.R. § 206.221(e)(3).

|  |
|--|
| <b>Child Care Facility</b>   |
| <input type="checkbox"/> Proof that the State Department of Children and Family Services, Department of Human Services, or similar agency, recognizes it as a licensed childcare facility (required)   |
| <b>Education</b>   |
| <input type="checkbox"/> Proof that the school is accredited or recognized by the State Department of Education (required). State regulations for private schools vary and some states do not require accreditation. A PNP school must demonstrate that it is recognized by the state as providing elementary or secondary education. Depending on state requirements, documentation may include, but is not limited to, the following (must have been in existence at the time of the incident): <ul style="list-style-type: none"> <li><input type="checkbox"/> Accreditation documents</li> <li><input type="checkbox"/> Certification from the State Department of Education that the Applicant operated the facility as a PNP school at the time of the incident</li> <li><input type="checkbox"/> Documentation demonstrating compliance with the State’s compulsory attendance laws</li> <li><input type="checkbox"/> School-year calendar</li> <li><input type="checkbox"/> School budget</li> <li><input type="checkbox"/> Complete list of students and teachers</li> <li><input type="checkbox"/> Educational instruction property and equipment owned by the PNP</li> <li><input type="checkbox"/> Tax records for the school</li> <li><input type="checkbox"/> Documents reflecting school curriculum, transcripts, health and safety, disciplinary, or other records kept for students</li> <li><input type="checkbox"/> Tuition receipts</li> <li><input type="checkbox"/> Financial statements</li> <li><input type="checkbox"/> Commencement documents</li> <li><input type="checkbox"/> Inclusion in the U.S. Department of Education’s National Center for Education Statistics Private School Universe Survey data<sup>98</sup></li> <li><input type="checkbox"/> State Department of Education electronic and paper homeschool declaration or registration forms</li> </ul> |
| <b>Mixed-Use Facility (See <a href="#">Chapter 4:II.B.1, Mixed-Use Facility</a>)</b>   |
| <input type="checkbox"/> Proof of the established purpose of the facility with documentation (required), such as: <ul style="list-style-type: none"> <li><input type="checkbox"/> U.S. Internal Revenue Service documentation;</li> <li><input type="checkbox"/> Pre-incident charter, bylaws, and amendments; or</li> <li><input type="checkbox"/> Evidence of longstanding, routine (day-to-day) use (e.g., a calendar of activities).</li> </ul>  |

Once FEMA approves the RPA, the PAGS in coordination with the PDTFL assigns a Program Delivery Manager (PDMG) to the Applicant (usually within 5 working days of RPA approval). The PDMG serves as the primary point of contact for the Applicant, providing customer service and programmatic guidance throughout phases I through V of the PA Program delivery process.

## VII. Exploratory Call

The PDMG conducts the Exploratory Call with the Applicant (usually within 7 working days of Applicant assignment). The Exploratory Call is an introductory discussion conducted by the PDMG via a conference call. The PDMG reviews the Applicant Profile prior to the Exploratory

<sup>98</sup> The Private School Universe Survey electronic search tool is available at [nces.ed.gov/surveys/pss/privateschoolsearch/](https://nces.ed.gov/surveys/pss/privateschoolsearch/).

Call. The objective for the call is to begin developing a relationship with the Applicant and prepare for the Recovery Scoping Meeting as follows:

- Understand the Applicant’s incident impacts by gathering information about the type and level of damage and priority needs for assistance;
- Ensure the Applicant understands the general requirements for a list of impacts;
- Provide key information on documentation, procurement, and EHP requirements; and
- Schedule the Recovery Scoping Meeting and define appropriate attendees.

After the Exploratory Call and prior to the Recovery Scoping Meeting, the Applicant needs to begin compiling its list of impacts to formally document its claim. [Chapter 5:I. List of Impacts](#), provides details on how to list the impacts. It is critical that the Applicant work with its PDMG to submit all impact information early in the process to enable efficient and accurate project development. FEMA and the Recipient use this information to deploy the appropriate number and type of resources and need the information as soon as possible to assist Applicants expeditiously.

## VIII. Recovery Scoping Meeting

FEMA and the Recipient should conduct the Recovery Scoping Meeting within 21 working days of assigning a PDMG to the Applicant.

While the Applicant Briefing provides high-level information for all potential Applicants, the Recovery Scoping Meeting addresses the specific needs of each eligible Applicant. At the Recovery Scoping Meeting, FEMA, the Recipient, and the Applicant review and refine the list of impacts and discuss:

- PA delivery process;
- Details of the Applicant’s impacts from the incident;
- Hazard mitigation opportunities;
- Eligibility criteria for facilities, work and costs;
- Logical grouping of damage;
- Procurement requirements;
- Insurance reductions and requirements;
- EHP compliance requirements;
- Documentation requirements;
- Interagency Recovery Coordination;
- Deadlines; and
- Appeal process.

The Applicant should ensure staff with knowledge of the incident-related damage, emergency activities performed, and related costs attend the meeting (e.g., public works official, finance staff, risk manager).

Additionally, the Applicant and PDMG develop the Project Development Plan, which is a 45 to 60-day plan that includes a schedule of key steps to complete the project application development process. FEMA uses the Project Development Plan to track project application progress. In creating the plan, the PDMG and Applicant discuss:

- Weekly Applicant Status Meeting schedule;
- Site inspection schedule;
- Applicant's role in approving the Damage Descriptions and Dimensions;
- Timeline to gather and submit documentation; and
- Timeline to develop SOWs and cost estimates.

# CHAPTER 4: GENERAL WORK AND FACILITY ELIGIBILITY

This chapter provides the general requirements for work to be eligible and provides PA policy on facility eligibility. Although eligibility determinations may occur later in the process, FEMA conducts much of its eligibility evaluation of facilities and work throughout Phase II: *Impacts and Eligibility*.

## I. General Work Eligibility

Through the PA Program, FEMA provides grant funding for:

- Emergency protective measures and debris removal (Emergency Work); and
- Permanent restoration of damaged facilities, including cost-effective hazard mitigation to protect the facilities from future damage (Permanent Work).

If an entity does not comply with all applicable statutes, EOs, regulations, and policies, FEMA may take one of several actions including disallowing all or part of the cost of the project not in compliance.<sup>99</sup>

### A. Categories of Work

To facilitate the processing of PA funding, FEMA separates Emergency Work into two categories and Permanent Work into five categories based on general types of facilities. These categories are shown in Figure 6. *Categories of Work*.

### B. Minimum Work Eligibility Criteria

At a minimum, work must meet each of the following three general criteria to be eligible:

- Be required as a result of the declared incident;
- Be located within the designated area; and
- Be the legal responsibility of an eligible Applicant.<sup>100</sup>

| Emergency Work                         | Permanent Work                                     |
|--|--|
| Address an immediate threat:           | Restoration of:                                    |
| <b>A</b> Debris removal                | <b>C</b> Roads/bridges                             |
| <b>B</b> Emergency protective measures | <b>D</b> Water control facilities                  |
|  | <b>E</b> Buildings/equipment                       |
|  | <b>F</b> Utilities                                 |
|  | <b>G</b> Parks, recreational, and other facilities |

Figure 6. Categories of Work

Work eligibility is discussed in detail in Chapters [7. Emergency Work Eligibility](#) and [8. Permanent Work Eligibility](#).

### 1. Result of Declared Incident

The Applicant is responsible for showing that work is required:

- Due to an immediate threat resulting from the declared incident (Emergency Work); or

<sup>99</sup> 2 C.F.R. § 200.338.

<sup>100</sup> 44 C.F.R. § 206.223(a).

- To address damage caused by the declared incident (Permanent Work, temporary repairs, and mold remediation).

The Applicant must demonstrate that the debris causing an immediate threat was generated by the declared incident during the declared incident period.

The Applicant must demonstrate that damage was caused directly by the declared incident. FEMA does not provide PA funding for repair of damage caused by:

- Deterioration;
- Deferred maintenance;
- The Applicant’s failure to take measures to protect a facility from further damage; or
- Negligence.<sup>101</sup>

When necessary to validate damage, the Applicant may be required to provide:

- Pre-incident photographs of the impacted site or facility; and/or
- Documentation supporting pre-disaster condition of the facility (e.g., facility maintenance records, inspection/safety reports).

If a facility was functioning prior to the disaster and the disaster caused damage that rendered the facility non-functional, the facility may be eligible provided the pre-disaster condition was not a significant contributing factor in the cause of failure.

## **2. Within Designated Area**

To be eligible, the facility must be located, and work must be performed, in the designated area defined in the declaration [except for sheltering, evacuation, and EOC activities]. The sheltering, evacuation and EOC activities must be used for a declared area.<sup>102</sup> Emergency Work or Permanent Work performed on a facility located outside of the designated area is ineligible. This is true even if an eligible Applicant is legally responsible for the work, including work performed outside the designated area to protect a facility within the designated area.

Tribal governments do not always have geographical boundaries, and some have boundaries that cross State lines. Therefore, declarations do not usually define specific designated geographical areas for Tribal governments. For Tribal governments, FEMA determines eligibility based on legal responsibility and whether the work is directly related to the declared incident.

## **3. Legal Responsibility**

To be eligible, work must be the legal responsibility of the Applicant requesting assistance.<sup>103</sup>

To determine legal responsibility for Emergency Work, FEMA evaluates whether the Applicant requesting the assistance either had jurisdiction over the area or the legal authority to conduct the work related to the request at the time of the incident.

To determine legal responsibility for Permanent Work, FEMA evaluates whether the Applicant claiming the costs had legal responsibility for disaster-related restoration of the facility at the time of the incident based on ownership and the terms of any written agreements (such as for facilities under construction, leased facilities, and facilities owned by a Federal agency).

---

<sup>101</sup> 44 C.F.R. § 206.223(e).

<sup>102</sup> 44 C.F.R. § 206.223(a)(2).

<sup>103</sup> 44 C.F.R. § 206.223(a)(3).

(a) *Documentation to Support Legal Responsibility*

Documents that support legal responsibility include:

- Deeds;
- Titles;
- Lease agreements (required for leased facilities); and
- Contract (required for facilities under construction at the time of the incident).

(b) *Facility Ownership*

When the Applicant requests PA funding to restore a facility, it is the Applicant's responsibility to provide proof that it owns the facility. To determine ownership, FEMA may review deeds, title documents, and local government tax records.

Ownership of a facility is usually sufficient to establish the Applicant's legal responsibility to restore the facility, provided it is not under construction by a contractor or leased to another entity at the time of the incident.

(c) *Facilities under Construction*

If the facility is under construction by a contractor at the time of the incident, FEMA reviews the contract to determine whether the Applicant is legally responsible for the repair of damage caused by the incident.<sup>104</sup> At a minimum, FEMA evaluates the contract to determine if it:

- Identifies the contractor or owner as being responsible for disaster-related repairs;
- Requires a builder's risk policy for losses that occur while the contractor has control of the facility;
- Has a Force Majeure provision, which is a clause that relieves the contractor from responsibility for damage beyond its reasonable control, such as natural disasters (often referred to "acts of God") or acts of war; or
- Has a provision that identifies the point at which the contractor transfers legal responsibility for the facility, or portions of the facility, back to the owner.

(d) *Leased Facilities*

The Applicant may own a facility and lease it to a tenant, or the Applicant may lease a facility owned by another party. In either case, FEMA reviews the lease agreement to determine legal responsibility for repair of damage caused by the incident. If the lease does not specify either party as responsible, FEMA considers the owner of the facility legally responsible for the costs to restore the facility.

If the lease is between two eligible Applicants, FEMA provides PA funding to the Applicant legally responsible for the restoration.

(e) *Federal Facilities*

Facilities owned and maintained by Federal agencies are ineligible. If a Federal agency constructed a facility and formally designated the Applicant as the legally responsible entity for

---

<sup>104</sup> Stafford Act § 406(e)(2), 42 U.S.C. § 5172.

facility operation, maintenance, and repairs, then the facility may be eligible. FEMA reviews the other Federal agency's authority and agreement between the Federal agency and the Applicant to confirm the legally responsible entity.

*(f) Jurisdiction over an Area*

In general, the Applicant only has legal responsibility to conduct Emergency Work activities within its jurisdiction. If the Applicant conducts Emergency Work activities outside its jurisdiction, it must demonstrate its legal basis and responsibility to conduct those activities.

*(g) Conducting Activities on Private Property*

Work on private property is the legal responsibility of the property owner and generally ineligible for PA funding. In rare cases, FEMA may provide PA funding for specific, limited activities. In such cases, at a minimum, the Applicant must have legal authority to conduct the activity. To determine whether a SLTT government has legal authority to conduct activities on private property, FEMA reviews the Applicant's legal basis and specific authority to conduct the activities. See [Chapter 7:I.E. Debris Removal from Private Property](#) and [7:II.C. Emergency Protective Measures on Private Property](#) for additional eligibility requirements.

*(h) Work Under the Authority of Other Federal Agencies*

OFA's have authority to conduct work that may overlap with FEMA's authority. FEMA's authority is broad and most OFA authorities are more specific than FEMA's authorities.

FEMA evaluates its authorities against OFA authorities. Some of the Factors that FEMA considers when evaluating whether an OFA has more specific authority are whether the OFA's authority is specifically and exclusively:

- Available for a particular type of facility, work, or activity;
- Applicable to a Presidential Declaration under the Stafford Act;
- Specific to an incident or type of incident; or
- Delineated under direction by Congress.

In such cases, FEMA does not provide assistance for the facilities or work even if that OFA does not provide funding for the facility or work.<sup>105</sup> This restriction includes any activities or costs related to the work that falls under OFA authorities as the costs are not related to eligible work. The Applicant should apply to the respective agency for assistance with a facility or work under that agency's authority.

### **C. Environmental and Historic Preservation Requirements**

Several statutes, EOs, and regulations establish requirements to protect the environment and preserve the Nation's historic and archaeological resources. FEMA reviews each PA project to ensure the work complies with applicable Federal EHP laws and implementing regulations, and applicable EOs.<sup>106</sup> The Applicant is responsible for complying with applicable Federal, State, Territorial, or Tribal EHP laws even if FEMA is not providing PA funding for all of the work.

---

<sup>105</sup> 44 C.F.R. § 206.226(a).

<sup>106</sup> 2 C.F.R. § 200.300.

See [Appendix A: Environmental and Historic Preservation Compliance](#) for a description of frequently encountered EHP statutes, EOs, and regulations.

FEMA provides technical support to Applicants throughout the recovery process to help ensure compliance with all EHP laws, regulations, and EOs, as well as to identify opportunities to incorporate conservation measures in the project area for the protection and preservation of environmental or historic resources.

## II. Facility Eligibility

In general, a facility must be determined eligible for work to be eligible. There are exceptions for some emergency work activities as shown in Figure 7. *Facility Eligibility* and discussed in [Chapter 7. Emergency Work Eligibility](#).

A facility is a building, system, or equipment, built or manufactured, or an improved and maintained natural feature.<sup>107</sup>

An example of a system that qualifies as a facility is a water distribution system. Mechanical, electrical, plumbing, and other systems that are components of a facility in which they operate are considered part of that facility.

A natural feature is improved and maintained if it meets all of the following conditions:

- The natural feature has a designed and constructed improvement to its natural characteristics, such as a terraced slope or realigned channel;
- The constructed improvement enhances the function of the unimproved natural feature; and
- The Applicant maintains the improvement on a regular schedule to ensure that the improvement performs as designed.

Only the section of a natural feature that meets the criteria above is eligible. For example, if only 150 linear feet of a natural channel bank is armored with rip rap and maintained, the eligible facility would be limited to that 150-linear-foot section.

The following are ineligible facilities:

- Unimproved property (e.g., a hillside or slope, forest, natural channel bank); and
- Land used for agricultural purposes.<sup>108</sup>

**Figure 7. Facility Eligibility**

For PNPs, the facility must be eligible in order for the work to be eligible.

For State, Territorial, Tribal, and local governments, the facility must be eligible in order for Permanent Work, temporary repairs, or mold remediation to be eligible. Facility eligibility is not applicable to other Emergency Work.

<sup>107</sup> 44 C.F.R. § 206.201(c).

<sup>108</sup> Ibid.

## A. Public Facility

An eligible public facility is one that a SLTT government owns or has legal responsibility for maintaining, including any:

- Flood control, navigation, irrigation, reclamation, public power, sewage treatment and collection, water supply and distribution, watershed development, or airport facility;
- Non-Federal-aid street, road, or highway;
- Other public building, structure, or system, including those used for educational, recreational, or cultural purposes; or
- Park.<sup>109</sup>

When a facility maintained by a Community Development District is not open to the general public or does not provide a service to the general public, the facility is ineligible.

## B. Private Nonprofit Facility

An eligible PNP facility is one that provides educational, utility, emergency, medical, or custodial care, including for senior citizens or individuals with disabilities, and other essential social-type services to the general public (see [Table 1. PNP Eligible Critical Services](#) and [Table 2. PNP Eligible Noncritical, Essential Social Services](#)).<sup>110</sup>

If a PNP operates multiple facilities, or a single facility composed of more than one building, FEMA must evaluate each building independently, even if all are located on the same grounds. Buildings that are part of a complex that includes outdoor facilities (e.g., swimming pools, athletic fields, or tennis courts) are not evaluated separately from the rest of the complex when determining eligibility of the building. For example, an outdoor pool usually has a building for bathrooms and controlling entry. In such cases, FEMA does not evaluate the building for eligibility separately because it is an intrinsic part of the pool complex.

See [Appendix B: Private Nonprofit Facility Eligibility Examples](#), for examples of PNP facilities and corresponding eligibility determinations.

### 1. Mixed-Use Facility

PNP facilities that provide both eligible and ineligible services are considered mixed-use facilities. Eligibility of mixed-use PNP facilities is dependent on the *primary* use of the facility, which is determined by the amount of physical space dedicated to eligible and ineligible services. “Primary use” is the use for which *more* than 50 percent of the physical space in the facility is dedicated. FEMA evaluates the entire structure when determining primary use; it does not separately address individual areas, such as floors, basements, or wings. Common space, such as bathrooms, hallways, lobbies, closets, stairways, and elevators, is not included when calculating mixed-use space.

If FEMA determines that 50 percent or more of physical space is dedicated to ineligible services, the entire facility is ineligible. If the facility is eligible, FEMA prorates Permanent Work funding based on the percentage of physical space dedicated to eligible services. Depending on the specifics of the scenario, FEMA either prorates Emergency Work funding or limits Emergency

---

<sup>109</sup> Stafford Act § 102(10), 42 U.S.C. § 5122; 44 C.F.R. § 206.221(h).

<sup>110</sup> Stafford Act § 102(11), 42 U.S.C. § 5122; 44 C.F.R. § 206.221(e).

Work funding to what is eligible, necessary, and reasonable. The Applicant is responsible for the balance of costs to restore the facility and must restore the entire facility to receive funding for repairs to the eligible-use portions of the facility.

Eligible PNP irrigation and eligible PNP public broadcasting facilities are exempt from primary use requirements. However, in consideration of irrigation, FEMA will evaluate whether the facility was designed to provide eligible irrigation and whether it has ever been used for that purpose. If the facility was not designed for an eligible irrigation purpose, and has never been utilized for that purpose, it is not eligible.

*(a) Mixed-Use Space*

In cases where the same physical space is used for both eligible and ineligible services, the primary use is the use for which more than 50 percent of the operating time is dedicated in that shared physical space. If space is available for use, but the Applicant cannot support that it is used for eligible services for more than 50 of the percent of operating time, this criterion is not met.

If FEMA determines that 50 percent or more of the operating time in the shared physical space is dedicated to ineligible services, then FEMA does not include that physical space when evaluating primary use.

*(b) Use by Multiple Entities*

In cases where a PNP Applicant shares use of a facility, it is only eligible if the facility is primarily owned by the PNP Applicant and meets the primary use requirement. FEMA prorates funding for these facilities based on the percentage of physical space that the Applicant owns and dedicates to eligible services. The following guidelines are used to determine the eligibility of such facilities:

- If the eligible PNP owns the entire facility and leases a portion of it to another entity, the facility is eligible provided that the PNP dedicates more than 50 percent of the facility for eligible services. If the PNP leases 50 percent or more of the facility to an ineligible Applicant, or for ineligible services, then the facility is ineligible.
- If the eligible PNP only owns a portion of the facility, it is eligible provided that the PNP owns more than 50 percent of the facility and dedicates more than 50 percent of physical space for eligible services.

## **2. Small Business Administration Loan Requirement**

Following a Major Disaster Declaration, the U.S. Small Business Administration (SBA) can provide loans to individuals and businesses for facility restoration. For PNPs with facilities that provide noncritical, essential social services, FEMA only provides PA funding for eligible Permanent Work costs that an SBA loan will not cover for those facilities. Therefore, noncritical PNPs must also apply for a disaster loan from the SBA and receive a determination for Permanent Work on facilities that:<sup>111</sup>

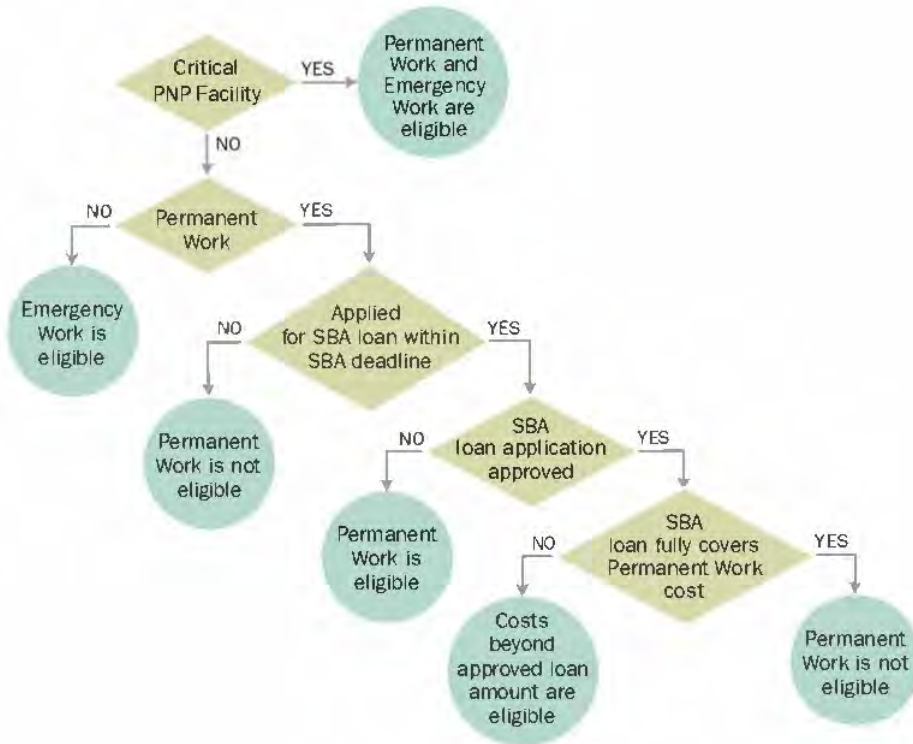

- Provide noncritical services; or

---

<sup>111</sup> Stafford Act § 406(a)(3)(A)(ii), 42 U.S.C. § 5172; 44 C.F.R. § 206.226(c). For online applications to SBA, The Applicant should visit the SBA website at [disasterloan.sba.gov/ela/](https://disasterloan.sba.gov/ela/). For additional assistance with the application process, the Applicant should contact the SBA Disaster Customer Service Center at 1-800-659-2955.

- Are mixed-use facilities and the eligible portion of the facility is used to provide services that are entirely noncritical.

If the PNP misses the SBA application deadline, including any SBA approved extension, the Permanent Work is ineligible for FEMA PA funding. If the PNP declines an SBA loan, PA funding is limited to the costs that the loan would not have otherwise covered. This applies even when the PNP cannot accept the terms of the loan, and SBA therefore denies the loan, which may occur when the entity does not meet a collateral requirement. Possible outcomes are shown in Figure 8. *SBA Loan Outcomes*.

**Figure 8. SBA Loan Outcomes**

PNPs do not need to apply for a disaster loan from the SBA for facilities that:

- Provide critical services; or
- Are mixed-use and the eligible portion is either entirely or partially used to provide critical services.

**C. Inactive or Partially Inactive Facility**

To be eligible, a facility must have been in active use at the start of the incident period. Inactive facilities are ineligible, unless one of the following conditions is met:

- The facility was only temporarily inactive for repairs or remodeling (provided a contractor is not responsible for repair of disaster-related damage);
- The Applicant firmly established future active use in an approved budget; or

- The Applicant can clearly demonstrate its intent to begin use within a reasonable amount of time.<sup>112</sup>

The above criteria also apply to facilities that are partially inactive at the start of the incident period. Inactive portions are ineligible unless one of the exceptions noted above applies.

When eligible repairs benefit an area that was not in active use, FEMA prorates funding based on the percentage of the facility that was in active use. For example, if the roof of a partially used building is destroyed, FEMA limits the eligible cost to a prorated amount of the total cost to replace the roof based on the percentage of the building that was in active use.

For PNP mixed-use facilities to be eligible, more than 50 percent of the facility had to be in active use for an eligible purpose at the time of the incident.

#### **D. Facility Scheduled for Repair or Replacement**

Facilities that are not yet under contract but are scheduled for repair or replacement using non-Federal funds are eligible provided that the claimed damage did not exist prior to the incident (FEMA may review procurement and contract documents to validate). If damage existed prior to the incident, only the repair of damage caused by the incident is eligible.

A facility scheduled for replacement within 12 months of the start of the incident period using Federal funds is ineligible. In such a case, the Applicant should coordinate with the agency funding the project to expedite replacement, if possible.

---

<sup>112</sup> 44 C.F.R. § 206.226(k)(2).

# CHAPTER 5: DAMAGE AND IMPACT INFORMATION

This chapter provides information on procedures conducted during Phase II, *Impacts and Eligibility*, which include finalizing the list of impacts, logically grouping the impacts and associated damage and work into project applications;<sup>113</sup> conducting site inspections to develop a detailed description of the incident-related damage and dimensions; and collecting project information and documentation.

## I. List of Impacts

The Applicant is required to identify and report all of its incident-related impacts to FEMA within 60 days of the Recovery Scoping Meeting.<sup>114</sup> FEMA may extend the deadline to identify and report the impacts if the Applicant submits a request with justification based on extenuating circumstances beyond the Recipient's or Applicant's control.<sup>115</sup> For example, if a site is inaccessible, FEMA may extend the deadline for that site.

The Applicant needs to submit this identification in the form of a list of impacts that includes all facility damage, debris quantities, and emergency protective measures to address immediate threats that the Applicant is claiming for PA funding. The Applicant lists the information by location with a rough estimate of the associated cost. The list does not include detailed descriptions of impacts, damaged components within a facility, or a final estimate of costs.

Each line item in the list needs to include the following:

- Unique Identifier (e.g., facility name and site) (required);
- Specific location of debris impacts or facility damage (required);
- General description of damage, emergency protective measures, or approximate quantities of debris;
- Approximate cost (required)
- Status of work; and
- Project priority level.

### Terminology

A **site** is defined as an individual building, structure, location, or system section. Examples include each:

- Individual building or structure inclusive of its contents and supplies
- Beach or park inclusive of equipment and other items within the area that are not structures or buildings, such as benches or playground equipment
- Lift or pump station
- Dam
- Section of roadway that has damage within a reasonable distance throughout that section

<sup>113</sup> 44 C.F.R. § 206.201(l).

<sup>114</sup> 44 C.F.R. § 206.202 (d)(1)(ii).

<sup>115</sup> 44 C.F.R. § 206.202 (f)(2).

## II. Grouping Impacts into Projects

This section defines logical grouping of work and damage.<sup>116</sup>

The PDMG works with the Applicant and PDTFL to identify sites and facilities that can be combined into one project. This is a two-step process: 1) Create groups based on categories of work and facility types. 2) Identify sites or facilities that should be formulated into separate projects.

Before grouping work or damage, the PDMG must identify and remove any damaged sites or facilities that are under the authority of another Federal agency. The PDMG must also identify and remove any facilities that were not in use at the time of incident in accordance with [Chapter 4:II.C. Inactive or Partially Inactive Facility](#). The Applicant must either withdraw these sites and facilities from its list of impacts or FEMA will issue a Determination Memorandum.

### A. Initial Emergency Work Grouping

The bullets below identify emergency work that FEMA usually groups together (each bullet stands for one initial grouping):

- All debris removal from public property (Category A);
- All debris removal from waterways (Category A);
- All debris removal from private residential property (Category A);
- All debris removal from commercial property (Category A);
- All private property demolition (Category B);
- All emergency response activities (except those conducted on private property) (Category B);
- Any emergency protective measures performed on private property (Category B);
- All emergency protective measures that involve facility construction or repairs (Category B);
- Each individual temporary facility (Category B); and
- All donated resources for Emergency Work (Category B).

### B. Initial Permanent Work Grouping

The bullets below identify damaged facilities that FEMA considers initially grouping together (each bullet stands for one initial grouping). The list is based on infrastructure categories.

Transportation:

- All roads, bridges, low water crossings, and culverts (Category C);
- All mass transit facilities such as subways and railways (Category G);
- All airports (Category G); and
- All ports and harbors (Category G).

Flood Control:

- All dams and reservoirs (Category D);

---

<sup>116</sup> 44 C.F.R. § 206.201(k).

- All canals, drainage channels, and aqueducts (Category D);
- All stormwater retention and detention basins (Category D); and
- All coastal shoreline protection facilities (levees, berms, seawalls, sand revetments, etc.) (Category D).

Education:

- All school campuses (Category E).

Housing:

- All public housing campuses (Category E).

Health:

- All hospital campuses (Category E).

Emergency Service Facilities:

- All police, fire, emergency operation centers, prisons, etc. (Category E).

Other Government Facilities:

- All courthouses, administrative buildings, and other non-emergency buildings (Category E).

Energy:

- All power generation facilities and plants - Include all wind turbines, generators, substations, and other facilities within the confines of the plant. (Category F);
- Entire power transmission and distribution system (Category F); and
- Entire natural gas transmission and distribution system (Category F).

Water/Waste-water:

- All water and wastewater treatment plants (Category F);
- Entire water distribution system (Category F);
- Entire wastewater collection system (Category F); and
- Entire irrigation system (Category F).

Communications/Information Technology:

- All communication systems (Category F).

Natural and Cultural Resources:

- All parks, golf courses, and fish hatcheries (Category G);
- All beaches (Category G); and
- All cemeteries (Category G).

FEMA includes ancillary (support) facilities at a site in the same project as the primary facility at that site. Ancillary facilities may include but are not limited to: buildings, outside structures (e.g. maintenance and storage sheds, restroom facilities, bath houses, pumping stations, etc.), communication towers and antennas, contents, supplies, equipment, vehicles, fences, parking

lots, stairs, ramps, access roads, runways, signage, lighting, sidewalks, gutters, ditches, guard rails, integral ground, catch basins, outfall structures, piers, docks, trails, benches, picnic tables, swimming pools, golf courses, ball fields, etc. Any donated resources for Permanent Work must also be included in the Permanent Work Project.

### **C. Final Grouping**

After initially grouping sites and facilities into one project, identify sites or facilities that need to be separated from the initial grouping and formulated into separate projects. Sites or facilities that need to be separated include those that:

- Are anticipated to require extensive EHP reviews. The PDMG works with EHP staff to identify these sites and facilities;
- Are in a Special Flood Hazard Area;
- Need Architectural/Engineering design funding prior to determining SOW and cost;
- Have 100% of the work completed;
- Are complex and require specialized technical support for project formulation, such as significantly damaged waste water treatment plants, dams, hospitals, or schools;
- Have ineligible work;
- Would make a project too unwieldy to review due to the number of sites and facilities combined (consider separating into two projects or creating separate projects based on geographical locations); and/or
- The Applicant and PDTFL agree have specific circumstances that make it illogical to combine.

PNP Applicants should also separate critical service facilities into separate projects from noncritical service facilities so that projects with critical service facilities are not delayed pending the Small Business Administration determination described in [Chapter 4:II.B.2. \*Small Business Administration Loan Requirement\*](#).

## **III. Site Inspections and Obtaining Damage Information**

FEMA gathers project-specific information by conducting site inspections and obtaining documentation. These activities occur concurrently.

### **A. Damage Information**

FEMA requests information and documentation required to substantiate the eligibility of a project. The Applicant is responsible for providing this information and documentation to support that its facilities, work, and costs are eligible based on the applicable laws, regulations, EOs, and policies. At a minimum, FEMA usually requires the “who, what, when, where, why, and how much” for each item claimed.

The Applicant answers questions for each project, which trigger information and documentation that the Applicant needs to provide. Various documents may provide the information required; therefore, FEMA usually accepts a variety of documentation to substantiate eligibility. If FEMA requires specific information or documentation to support eligibility, FEMA specifies the requirement in checklists throughout the PAPPG; however, these checklists are not all-inclusive lists. FEMA and the Recipient work with the Applicant to evaluate submitted documentation and

determine whether it supports eligibility. If the Applicant does not provide sufficient documentation to support its claim as eligible, FEMA cannot provide PA funding for the work.

## **B. Site Inspections**

Damage information is the foundation of the overall project award (i.e., SOW and cost eligibility are tied to the eligible damage). Therefore, FEMA and the Applicant need to reach agreement on the disaster-related damage description and dimensions, emergency protective measures, and debris impacts before proceeding with SOW development. If there are unresolved issues, FEMA documents the decision in a DM. Applicants should still concur on the portion of the damage that is agreed-upon so that the process can move forward.

FEMA conducts inspections at sites with work to be completed. The purpose of the inspection is to validate, quantify, and document the cause, location, and details of the reported damage and debris impacts. FEMA may also identify EHP issues, project-related conservation opportunities, and PA mitigation opportunities during the site inspection.

To expedite the process, in lieu of FEMA inspections at all sites, the Applicant may submit damage information and documentation for FEMA to review and validate using a sampling methodology. FEMA works with the Recipient and Applicant to determine when sampling and validation is appropriate. Sampling may not be appropriate for some damage sites.

## CHAPTER 6: COST ELIGIBILITY

This chapter provides PA policy on cost eligibility. Although costs are the final component evaluated for eligibility, as shown in Figure 9. *Cost Eligibility*, this criterion applies to all costs claimed. Not all costs incurred as a result of the incident are eligible. To be eligible, costs must be:

- Directly tied to the performance of eligible work;
- Adequately documented;<sup>117</sup>
- Reduced by all applicable credits, such as insurance proceeds and salvage values;<sup>118</sup>
- Authorized and not prohibited under Federal or SLTT government laws or regulations;
- Consistent with the Applicant's internal policies, regulations, and procedures that apply uniformly to both Federal awards and other activities of the Applicant; and
- Necessary and reasonable to accomplish the work properly and efficiently.<sup>119</sup>

Figure 9. Cost Eligibility

### I. Reasonable Costs

A cost is reasonable if, in its nature and amount, it does not exceed that which would be incurred by a prudent person under the circumstances prevailing at the time the Applicant makes the decision to incur the cost.<sup>120</sup>

#### A. Analysis

In conducting a reasonable cost analysis, FEMA performs a preliminary review of the documentation to assess the complexity of the project and expertise required to complete the analysis. If specialized expertise is required, a subject matter expert with the appropriate specialized skills, knowledge, experience, or capability in the appropriate field such as engineering, architecture, or cost estimating conducts the analysis.

FEMA determines reasonableness by evaluating whether the:

- Cost is of a type generally recognized as ordinary and necessary for the type of facility or work.<sup>121</sup> FEMA evaluates the skill level and level of effort necessary to complete the required activity. If the type of employee or skill level is not appropriate for the specific task, FEMA limits PA funding to a rate based on the appropriate employee type or skill level. For complex projects, staff with a higher level of technical proficiency and experience may be appropriate.

<sup>117</sup> 2 C.F.R. § 200.403(g).

<sup>118</sup> Stafford Act § 312, 42 U.S.C. § 5155, and 2 C.F.R. § 200.406.

<sup>119</sup> 2 C.F.R. § 200.403.

<sup>120</sup> 2 C.F.R. § 200.404.

<sup>121</sup> 2 C.F.R. § 200.404(a).

- Applicant participated in ethical business practices, ensuring parties to a transaction are independent of each other, without familial ties or shared interests and on equal footing without one party having control of the other.<sup>122</sup>
- Individuals concerned acted with prudence under the circumstances considering their responsibility to the Applicant, its employees, its students or membership, the public, and the Federal government.<sup>123</sup> If exigent or emergency circumstances existed, FEMA evaluates the length of time the circumstances existed compared to the length of time costs were incurred.
- Applicant deviated from its established practices and policies.<sup>124</sup> FEMA generally considers the Applicant's own labor, equipment, and supply costs reasonable provided the costs are consistent with the entity's policies including, but not limited to, pay rates, labor policies, and cost schedules utilized during its normal operations.
- Applicant complied with procurement requirements (see [Chapter 6:VIII. Procurement and Contracting Requirements](#)). FEMA generally considers contract costs reasonable when the Applicant adheres to full and open competition under applicable Federal procurement requirements, and the scope of services or work in the contract and level of effort is consistent with respect to the eligible SOW. FEMA evaluates reasonableness when price competition is lacking or when the selection was noncompliant with the applicable procurement under grant requirements even though there may have been price competition.
  - Cost or Price Analysis: The cost or price analysis is one component of documentation that FEMA may review as part of its evaluation of reasonable costs. If the Applicant does not submit a cost or price analysis, FEMA may evaluate the elements that would have been part of such analysis.<sup>125</sup> The Applicant may need to provide this information if it is not included in the documentation submitted.
  - Selection Criteria: FEMA evaluates whether the Applicant selected the lowest responsible bidder based on the selection criteria. If the Applicant selected a contractor with a higher bid than others, it must substantiate its selection based on the selection criteria set forth in its Request for Proposal.
- Cost is comparable to the current market price<sup>126</sup> for similar goods or services in the same geographical area. FEMA makes its determination based on one or more of the following:
  - Historical documentation (previous contracts, invoices, or other documentation).
    - FEMA may compare costs to the Applicant's historical costs for similar SOW or items. FEMA considers inflation and other factors such as code or standard changes, availability of in-kind construction material, quantity, delivery schedules, and the economy. FEMA's Cost Estimating Format (CEF) employs a nationally recognized economic inflation factor. Some types of work may have a different inflation rate than others.

---

<sup>122</sup> 2 C.F.R. § 200.404(b).

<sup>123</sup> 2 C.F.R. § 200.404(d).

<sup>124</sup> 2 C.F.R. § 200.404(e).

<sup>125</sup> FEMA's *Procurement Guidance for Recipients and Subrecipients Under 2 C.F.R. Part 200* provides information on how to conduct a cost or price analysis ([www.fema.gov/sites/default/files/2020-07/fema\\_procurement-disaster-assistance-PDAT\\_field-manual.pdf](http://www.fema.gov/sites/default/files/2020-07/fema_procurement-disaster-assistance-PDAT_field-manual.pdf)).

<sup>126</sup> 2 C.F.R. § 200.404(c).

- Average costs in the area.
  - Weighted average unit pricing: FEMA may determine the average costs in the area using weighted average unit prices. These are comprised of the average costs of historical bid tabulations and related specifications from competitive bid pricing solicitations respective to the area and usually includes all factors required to bid public works projects, such as performance bonds, bid bonds, overhead and profit, and general conditions. The Applicant or respective State, Territorial, or regional agency, such as the State's Department of Transportation may provide weighted average unit pricing and related specifications for FEMA's review.
  - Other Applicant's project costs: FEMA may compare the costs with other Applicant's projects of similar SOW and similar circumstances such as event impacts, magnitude, comparable shortages, market factors, and any other unique circumstances that may impact either of the costs.
- Published unit costs from national cost estimating databases. When using this method, FEMA confirms that the cost publication is current and prepares the estimate using its CEF and the appropriate locality adjustment factor.
  - Industry cost estimating resources: When appropriate local data cannot be developed or obtained, FEMA uses industry standard construction cost estimating resources to prepare an estimate against which to evaluate reasonableness of the Applicant's actual costs. These costing methods include, but may not be limited to, RSMeans, BNi Costbooks, Marshall and Swift, and Sweet's Unit Cost Guide, which are widely accepted in the industry and available for nationwide use.
  - Federal, State, or Territorial unit costs: When industry standard construction cost estimating resources do not provide work items that are appropriate or applicable to the construction activities required to complete the project, FEMA considers local cost data from OFAs or State or Territorial agencies responsible for construction of similar facilities in or near the locality.
  - FEMA Cost Codes: FEMA maintains regional and national unit prices (cost codes). FEMA cost codes may be used when a cost is not found in other published unit costs or if the cost codes are otherwise more applicable than other published costs, such as for force account equipment.
- Following factors or other extenuating circumstances existed and caused escalation in costs:
  - Shortages in equipment, materials, supplies, labor, or contractors. When escalating costs are due to shortages, FEMA considers whether the Applicant's work continued beyond the period of shortages and whether there was an opportunity for the Applicant to obtain more reasonable pricing.
  - Project-specific complexities: Complexities may include environmental or historic issues, remote access or location, provision of a unique service with few providers, or elements requiring an extraordinary level of effort.
  - Economy of Scale: FEMA considers the amount of work that may impact the unit price (for example, smaller projects may have higher rates and larger projects may have lower rates due to various efficiencies that are realized with larger projects. Additionally, when hauling is involved, such as with debris projects, some projects may have longer haul routes due to landfill locations or road blockages).

- Applicant's Justification: When a reasonable cost analysis has been conducted and costs appear high for a project, FEMA reviews the Applicant's justification to determine whether there are any additional factors that justify the higher cost as a reasonable amount.

The Applicant is responsible for providing documentation to demonstrate its claimed costs are reasonable. Documentation may include, but is not limited to:

- Documentation showing current market price for similar goods or services, such as:
  - Historical documentation;
  - Average costs in the area; or
  - Published unit costs from national cost estimating databases.
- Documentation supporting necessity of unique services or extraordinary level of effort
- Documentation supporting shortages, challenging procurement circumstances, and length of time shortages or procurement challenges existed, such as news stories or supply chain vendor reports

[Appendix L: Validation of Applicant-Provided Cost Estimates](#) includes a checklist that FEMA staff use when evaluating the reasonableness of costs claimed. After completing the evaluation and ensuring that all appropriate costs and factors are included as described above, if FEMA determines any of the costs to be unreasonable based on its evaluation, FEMA may disallow all or part of the costs by adjusting eligible funding to an amount it determines to be reasonable. When determining the reasonable amount, FEMA may use the least-cost alternative, the lowest bid received by the Applicant, or the pricing of another Applicant's properly procured and selected contractor.

## II. Applicant (Force Account) Labor

FEMA refers to the Applicant's personnel as "force account." FEMA reimburses force account labor based on actual hourly rates plus the cost of the employee's actual fringe benefits. FEMA calculates the fringe benefit cost based on a percentage of the hourly pay rate. Because certain items in a benefit package are not dependent on hours worked (e.g., health insurance), the percentage for overtime is usually different than the percentage for straight-time. Fringe benefits may include:

- Holiday leave;
- Accrued vacation leave;
- Sick leave;
- Social security matching;
- Medicare matching;
- Unemployment insurance;
- Workers compensation;
- Retirement;
- Health insurance;
- Life and disability insurance; and/or
- Administrative leave.

The Applicant needs to submit the following to support labor costs claimed (not an all-inclusive list):

- Summary of actual costs for completed work (required)
- For each individual:
  - Name (required);
  - Job title and function (required);
  - Type of employee (i.e., full-time exempt, full-time non-exempt, part-time, temporary, etc.) (required);
  - Days and hours worked (required);
  - Pay rates and fringe benefit rate (required); and
  - Description of work performed (required) with representative sample of daily logs/activity reports, if available
- Timesheets (representative sample required when requested)
- Fringe benefit calculations (required)
- Pay policy (required)

#### **A. Labor Policies**

FEMA determines the eligibility of overtime, premium pay, and compensatory time costs based on the Applicant's pre-disaster written labor policy, provided the policy:

- Does not include a contingency clause that payment is subject to Federal funding;
- Is applied uniformly regardless of a Presidential declaration; and
- Has set non-discretionary criteria for when the Applicant activates various pay types.

If these requirements are not met, FEMA limits PA funding to the Applicant's non-discretionary, uniformly applied pay rates.

All costs must be reasonable and equitable for the type of work being performed.

FEMA determines whether the number of hours claimed are reasonable and necessary by evaluating:

- The severity of the incident;
- Whether the work was performed at a time when it was necessary to work extraordinary hours based on the circumstances of the incident;
- The function of the employee for which the hours are claimed; and
- The number of consecutive hours the employee worked.

#### **B. Eligibility Criteria Based on Type of Employee and Work Performed**

FEMA's criteria for reimbursing straight-time labor costs differ depending on the type of employee and whether that employee is performing Emergency Work or Permanent Work.

For Permanent Work, both straight-time and overtime labor costs are eligible for both budgeted and unbudgeted employee hours.<sup>127</sup> For Emergency Work, only overtime labor is eligible for budgeted employee hours.<sup>128</sup> For unbudgeted employees performing Emergency Work, both

---

<sup>127</sup> Stafford Act § 406(a)(2)(C), 42 U.S.C. § 5172; 44 C.F.R. § 206.228(a)(2)(i).

<sup>128</sup> 44 C.F.R. § 206.228(a)(2)(iii).

straight-time and overtime labor are eligible. Table 5. *Emergency Work Labor Eligibility*, indicates different types of budgeted and unbudgeted employees. Overtime is time worked beyond an employee’s scheduled working hours as defined by the Applicant’s pre-disaster pay policy.

Under the Alternative Procedures authorized by Section 428 of the Stafford Act, straight-time labor costs are eligible for budgeted employees conducting eligible debris removal (Category A) activities.

**Table 5. Emergency Work Labor Eligibility**

| <b>Emergency Work Labor Eligibility</b>   |                 |                      |
|---|-----------------|----------------------|
| <b>Budgeted Employee Hours</b>  | <b>Overtime</b> | <b>Straight-Time</b> |
| Permanent employee  | ☑               |                      |
| Part-time or seasonal employee working during normal hours or season of employment  | ☑               |                      |
| <b>Unbudgeted Employee Hours</b>  | <b>Overtime</b> | <b>Straight-Time</b> |
| Reassigned employee funded from external source                                     | ☑               | ☑                    |
| Essential employee called back from furlough  | ☑               | ☑                    |
| Temporary employee hired to perform eligible work                                   | ☑               | ☑                    |
| Part-time or seasonal employee working outside normal hours or season of employment | ☑               | ☑                    |

**1. Reassigned Employees**

The Applicant may assign an employee to perform work that is not part of the employee’s normal job. For example, a police officer may clear debris. FEMA provides PA funding based on the reassigned employee’s normal pay rate, not the pay level appropriate to the work, because the Applicant’s incurred cost is the employee’s normal pay rate.

**2. Reassigned Employees Funded from an External Source**

Straight-time of a permanent employee funded from an external source (such as a grant from a Federal agency or statutorily dedicated funds) is eligible if the employee is reassigned to perform eligible Emergency Work that the external source does not fund. FEMA must confirm that no duplication of funding exists prior to approval.

**3. Backfill Employees**

The Applicant may need to temporarily replace an employee who is responding to the incident. Overtime costs for the backfill employee are eligible even if the backfill employee is not performing eligible work as long as the employee that he/she is replacing is performing eligible Emergency Work.

FEMA also provides PA funding for straight-time if the backfill employee is a:

- Contracted or temporary employee; or
- Permanent employee called in on a normally scheduled day off (weekend or other off day).

If the backfill employee is called in from scheduled leave, only overtime is eligible.

#### **4. Essential Employees Called Back from Furlough**

Straight-time of essential employees called back to work from a budget-related furlough due to the declared incident is eligible if the costs are not budgeted.

#### **5. Supervisors**

Second-level supervisors and above (e.g., commissioners, mayors, department directors, police and fire chiefs) are usually exempt employees.<sup>129</sup> Therefore, overtime costs related to these types of employees are ineligible, unless the Applicant:

- Demonstrates that the employee was directly involved with a specific project;
- Normally charges that individual's time to specific projects regardless of Federal funding; and
- Incurs overtime costs for the employee in accordance with a labor policy that meets the criteria in [Chapter 6:II.A. Labor Policies](#).

#### **6. Other**

Extraordinary costs (such as call-back pay, night-time and weekend differential pay, and hazardous duty pay) for essential employees who are called back to duty during administrative leave to perform eligible Emergency Work are eligible if costs are paid in accordance with a labor policy that meets the criteria above.

Administrative leave or similar labor costs incurred for employees sent home or told not to report due to emergency conditions are ineligible.

#### **7. Standby Time**

FEMA may provide PA funding for labor costs related to intermittent standby time for staff conducting eligible evacuation or sheltering, search and rescue, or emergency medical care. All of the following criteria must be met:

- Standby use and pay are consistent with the Applicant's labor policy (or contractual obligation based on a labor agreement) and consistent with its practice in non-federally declared incidents;
- The standby time occurred when it was necessary to have resources available to conduct the respective life-saving action;
- The number of hours and individuals were reasonable and necessary based on the number of resources required;
- The employee was conducting the respective life-saving action; and
- All other labor cost eligibility criteria were met.

Examples of when FEMA may reimburse labor costs for standby time include, but are not limited to:

- When bus drivers are deployed to transport evacuees;
- When first responders are deployed for the purpose of evacuating or providing emergency medical care to survivors in order to save lives; and
- When a contract or union agreement requires payment for standby time.

---

<sup>129</sup> These employees are exempt from the overtime pay requirements set forth in the Fair Labor Standards Act.

Additionally, the Applicant may be required to pay firefighter costs from portal-to-portal, which may result in paying for 24-hour shifts with periods of rest. FEMA will reimburse costs based on such requirements. In these instances, FEMA limits its reimbursement to costs and timeframes that are reasonable and necessary, not to exceed 14 calendar days from the start of the incident period. The Applicant must provide the data that led to its decisions and actions.

Standby time is separate and distinct from pre-positioning resources, which is addressed in [Chapter 7:II.E. Pre-positioning Resources](#).

### III. Applicant-Owned and Purchased Equipment

FEMA provides PA funding for the use of Applicant-owned (force account) equipment, including permanently mounted generators, based on hourly rates.<sup>130</sup> FEMA may provide PA funding based on mileage for vehicles, if the mileage is documented and is less costly than hourly rates.

There are instances when the Applicant does not have sufficient equipment to effectively respond to an incident. If the Applicant purchases equipment that it justifiably needs to respond effectively to the incident, FEMA provides PA funding for both the purchase price and either:

- The use of the equipment based on equipment rates (without the ownership and depreciation components); or
- The actual fuel and maintenance costs.

FEMA only applies equipment rates to the time the Applicant is actually operating equipment. Although costs associated with transporting equipment (e.g., labor and equipment costs used to transport equipment) to an eligible site are eligible, costs for standby time (time spent on hold or in reserve) are ineligible unless the equipment operator uses the equipment intermittently for more than half of the working hours for a given day. In this case the intermittent standby time is eligible.

The Applicant should submit the following to support Applicant-owned or purchased equipment costs claimed (not an all-inclusive list):

For each piece of equipment:

- Type of equipment and attachments used, including year, make, and model (required);
- Size/capacity (e.g., horsepower, wattage) (required);
- Locations and days and hours used (required) should include usage logs
- Operator name (required when requested); and
- Schedule of rates, including rate components (required if not using FEMA rates)

Purchased Equipment:

- Invoices or receipts (required); and
- Locations and days and hours used (required)

---

<sup>130</sup> 44 C.F.R. § 206.228(a)(1).

FEMA provides PA funding for force account equipment usage based on FEMA or SLTT equipment rates in accordance with the specific criteria noted below.

#### **A. FEMA Rates**

FEMA publishes equipment rates applicable on a national basis.<sup>131</sup> FEMA's rate schedule includes any item powered by fuel or attached to any item powered by fuel. FEMA develops equipment rates based on all costs associated with ownership and operation of equipment (except for operator labor). FEMA equipment rate components include depreciation, overhead, equipment overhaul (labor, parts, and supplies), maintenance (labor, parts, and supplies), lubrication, tires, ground engaging component (if applicable), and fuel. Because the rates include maintenance costs, a mechanic's labor costs to maintain Applicant-owned equipment are ineligible.

#### **B. State, Territorial, or Tribal Rates**

State, Territorial, or Tribal rates are those established under State, Territorial, or Tribal guidelines for use in normal day-to-day operations. FEMA provides PA funding based on State, Territorial, or Tribal rates up to \$75 per hour.<sup>132</sup> FEMA only provides PA funding for a rate above \$75 per hour if the Applicant demonstrates that each of the components of the rate is comparable to current market prices.<sup>133</sup>

#### **C. Local Rates**

Local rates are those developed under local government guidelines for use in normal day-to-day operations. FEMA generally provides PA funding for equipment usage based on the lower of either the local rate or the FEMA rate. However, if the local rate is lower, but it does not reflect all of the costs associated with operating the equipment, FEMA may provide PA funding based on the higher FEMA rate. Additionally, if the local rate is higher, the Applicant must document the basis for that rate and obtain approval from FEMA for the higher rate.<sup>134</sup>

If determining the lowest rate for each piece of equipment is overly burdensome because of the number of different types of equipment used, or if the Applicant prefers, FEMA will reimburse all equipment use based on the lower of the two rate schedules, rather than based on a comparison of each individual rate. In these cases, the PA Division at FEMA Headquarters determines which schedule of rates is lower.

#### **D. Equipment with No Established Rate**

If the Applicant uses equipment that has no established SLTT rate, FEMA reimburses that equipment based on the FEMA rate.<sup>135</sup> If FEMA does not have a rate established for the equipment, the Applicant may either submit a rate for approval or request that FEMA provide a rate. If the Applicant submits a rate, it must include documentation demonstrating that each component of the rate is comparable to current market prices. The rate cannot be based on rental

---

<sup>131</sup> [www.fema.gov/schedule-equipment-rates](http://www.fema.gov/schedule-equipment-rates).

<sup>132</sup> 44 C.F.R. § 206.228(a)(1)(i).

<sup>133</sup> Per 44 C.F.R. § 206.228(a)(1)(i), reimbursement of rates in excess of \$75 is determined on a case-by-case basis by FEMA. FEMA evaluates the rate for approval based on current market prices.

<sup>134</sup> Ibid.

<sup>135</sup> 44 C.F.R. § 206.228(a)(1)(iii).

rates as such rates include cost components, such as profit, that are above and beyond what is necessary to operate and maintain force account equipment.

## IV. Leased Equipment

When the Applicant leases equipment, FEMA provides PA funding based on the terms of the lease. Leasing costs are eligible if:

- The Applicant performed an analysis of the cost of leasing versus purchasing the equipment;<sup>136</sup> and
- The total leasing costs do not exceed the cost of purchasing and maintaining equipment during the life of the eligible project.

If the leasing costs exceed the cost of purchasing and maintaining the equipment, FEMA determines the amount of eligible costs based on an evaluation of the reasonableness of the costs claimed, including whether the Applicant acted with prudence under the circumstances at the time it leased the equipment.

If the Applicant has a lease-purchase agreement and obtains ownership during completion of eligible work, FEMA provides PA funding for the equipment use based on the hourly equipment rate, as described in [Chapter 6:III. Applicant-Owned Equipment and Purchased Equipment](#).

If the Applicant has a lease-purchase agreement and completes the eligible work prior to obtaining ownership, FEMA provides PA funding based on the cost to lease the equipment.

The Applicant needs to submit the following to support leased equipment costs claimed (not an all-inclusive list):

- Lease agreements (required);
- Invoices or receipts (required);
- Locations and days used (required);
- Hours used (required if lease agreement charges hourly rates); and
- Amount of fuel used, if not included in rental cost (required)

## V. Supplies

The cost of supplies, including materials, is eligible if:

- Purchased and justifiably needed to effectively respond to and/or recover from the incident; or
- Taken from the Applicant's stock and used for the incident.

The Applicant must track items taken from stock with inventory withdrawal and usage records.

FEMA provides PA funding for these items based on invoices, if available. If invoices are not available for items used from stock, FEMA provides PA funding based on the Applicant's established method of pricing inventory.<sup>137</sup> If the Applicant does not have an established method, FEMA provides PA funding based on historical data or prices from area vendors.

---

<sup>136</sup> 2 C.F.R. § 200.318(d).

<sup>137</sup> 2 C.F.R. § 200.453(b).

FEMA consults with the U.S. Department of Homeland Security Office of Inspector General Emergency Management Oversight Team in cases where it has difficulty determining a reasonable value.

The Applicant must submit the following to support costs claimed for supplies (not an all-inclusive list):

Supplies from Stock:

- Cost documentation such as original invoices or other historical cost records (required);
- Inventory records (required);
- Type of supplies and quantities used (required – should include support documentation such as daily logs); and
- Location used (required)

Purchased Supplies:

- Receipts or invoices (required);
- Quantities used (required); and
- Justification (required if supplies were not used)

## VI. Disposition of Purchased Equipment and Supplies

The discussion below describes disposition requirements when purchased equipment or supplies (including materials) are no longer needed for federally funded projects.

In the context of disposition, equipment is any tangible personal property (including information technology systems) having a useful life of more than 1 year and a per-unit acquisition cost that equals or exceeds the lesser of the capitalization level established by the Applicant for financial statement purposes, or \$5,000.<sup>138</sup> Tangible personal property that does not fall under this definition of equipment is a supply.<sup>139</sup>

### Terminology

**Personal property** means property other than real property.

**Real property** means land, including land improvements, structures, and appurtenances thereto, but excludes moveable machinery and equipment.

### A. Disposition of Purchased Equipment

In accordance with Federal regulations, State and Territorial government Applicants dispose of equipment in accordance with State and Territorial laws and procedures.<sup>140</sup>

When equipment purchased with PA funding are no longer needed for response to or recovery from the incident, Tribal and local governments and PNP Applicants may use the items for other federally funded programs or projects.<sup>141</sup>

---

<sup>138</sup> 2 C.F.R. § 200.33.

<sup>139</sup> 2 C.F.R. § 200.94.

<sup>140</sup> 2 C.F.R. § 200.313(b).

<sup>141</sup> 2 C.F.R. § 200.313(c).

When an individual item of equipment is no longer needed for federally funded programs or projects, Tribal and local governments and PNP Applicants must calculate the current fair market value of the individual item of equipment. The Applicant must provide the current fair market value for items that have a current fair market value of \$5,000 or more. FEMA reduces eligible funding by this amount.<sup>142</sup> If the individual item of equipment has a current fair market value less than \$5,000, FEMA does not reduce the eligible funding.<sup>143</sup>

#### Terminology

**Fair market value** is either the selling price or the advertised price for a similar item in a competitive market.

Tribal and local governments and PNP Applicants must comply with all disposition requirements described in 2 C.F.R. 200.313(e), *Disposition*.

### **B. Disposition of Purchased Supplies**

When supplies are no longer needed for federally funded programs or projects, all Applicants, including State and Territorial government Applicants, must calculate the current fair market value of any unused residual supplies (including materials) that FEMA funded for any of its projects and determine the aggregate total.

The Applicant must provide the current fair market value if the aggregate total of unused residual supplies is greater than \$5,000. FEMA reduces eligible funding by this amount.<sup>144</sup> If the aggregate total of unused residual supplies is less than \$5,000, FEMA does not reduce the eligible funding.

## VII. Disposition of Real Property

If the Applicant acquires or improves real property with PA funds, disposition and reporting requirements apply when acquired or improved real property is no longer needed for the originally authorized purpose.<sup>145</sup> The PA Division at FEMA Headquarters provides disposition instructions.<sup>146</sup>

## VIII. Procurement and Contracting Requirements

FEMA provides PA funding for contract costs based on the terms of the contract if the Applicant meets Federal procurement and contracting requirements. Federal procurement and contracting requirements for State and Territorial government agencies are different than those for Tribal and local government agencies and PNPs. This section provides information on Federal procurement and contracting requirements.

FEMA PA staff coordinate with FEMA's Office of Chief Counsel when evaluating whether the Applicant complied with Federal procurement requirements. In the case of noncompliance, FEMA applies an appropriate remedy in accordance with its authorities.<sup>147</sup> FEMA has determined an appropriate remedy under these circumstances is to either deny all costs

---

<sup>142</sup> 2 C.F.R. § 200.313(e)(2).

<sup>143</sup> 2 C.F.R. § 200.313(e)(1).

<sup>144</sup> 2 C.F.R. § 200.314(a).

<sup>145</sup> 2 C.F.R. §§ 200.311 and 200.329.

<sup>146</sup> 2 C.F.R. § 200.311(c). Recipients and Applicants must obtain specific disposition instructions from FEMA.

<sup>147</sup> 2 C.F.R. § 200.338.

associated with the contract or, if sufficient information is provided to substantiate a reasonable amount for the eligible work completed, FEMA may reimburse the portion of the costs it determines are reasonable and allowable based on all available information and documentation provided. In addition to monetary remedies, FEMA may also take non-monetary actions against the Applicant as authorized by 2 C.F.R. §§ 200.207 and 200.338.

FEMA's *Procurement Guidance for Recipients and Subrecipients Under 2 C.F.R. Part 200 (Uniform Rules)* provides additional details regarding Federal procurement and contracting requirements.<sup>148</sup>

## **A. Procurement and Contracting Requirements for State and Territorial Government Entities**

Applicants must comply with Federal procurement requirements as a condition of receiving PA funding for contract costs for eligible work.

### **1. Procurement**

State and Territorial government Applicants<sup>149</sup> must comply with Federal procurement procedures at 2 C.F.R. § 200.317, which include:

- Following the same policies and procedures they would use for procurements with non-Federal funds; and
- Complying with the Environmental Protection Agency (EPA) guidelines in 2 C.F.R. § 200.322, Procurement of recovered materials.

FEMA does not typically review State or Territorial procurement policies or procedures. In certain circumstances, FEMA may review State or Territorial procurement policies or procedures or request that a State or Territorial attorney certify in writing whether the Applicant complied with the State's or Territorial's procurement policies and procedures.

### **2. Contracting**

State and Territorial government Applicants must include required provisions detailed in 2 C.F.R. § 200.326 in all contracts awarded.<sup>150</sup> Some provisions are based on sound contracting practices while others are required by Federal law, EO, and regulations. Some provisions do not apply under the PA Program (e.g. Davis Bacon Act<sup>151</sup> and Rights to Inventions Clause) while others require verbatim language.

Although time and material (T&M) contracts without a ceiling price and cost-plus-percentage-of-cost or percentage-of-construction contracts may be allowed under State or Territorial government standards, the use of these contracts has a high risk of noncompliance with the requirement that all costs be reasonable.<sup>152</sup>

---

<sup>148</sup> [www.fema.gov/sites/default/files/2020-07/fema\\_procurement-under-grants-field-manual-supplement\\_1.pdf](http://www.fema.gov/sites/default/files/2020-07/fema_procurement-under-grants-field-manual-supplement_1.pdf).

<sup>149</sup> See [Chapter 3:VI.A. State and Territorial Governments](#) for a description of which Applicants are State or Territorial government entities.

<sup>150</sup> 2 C.F.R. § 200.326.

<sup>151</sup> The Davis Bacon Act requires "prevailing wage" payment to contracted workers based on the local union wage scale defined by the U.S. Department of Labor. If the Applicant incorporates prevailing wage rates as part of its normal practice for all contracts regardless of the funding source, then those rates are eligible.

<sup>152</sup> 2 C.F.R. § 200.403(a).

## **B. Procurement and Contracting Requirements for Tribal and Local Government Agencies and Private Nonprofits**

Tribal and local governments, including Tribal Recipients, and PNPs<sup>153</sup> must comply with:

- Their own documented procurement procedures;
- Applicable SLTT government laws and regulations; and
- Applicable Federal laws and regulations.<sup>154</sup>

If a Federal requirement is different than the SLTT requirement, or the Applicant's own requirements, it must use the more restrictive requirement. Additionally, Territorial governments should consult their legal counsel when a project involves a public building or public works facility as the Buy American Act may apply to the procurement process.

### **1. Pre-procurement Considerations**

Tribal and local governments and PNPs must:

- Establish or update written procurement procedures that reflect applicable SLTT laws and regulations;<sup>155</sup> and
- Maintain required written standards of conduct covering conflicts of interest and governing the performance of employees who engage in the selection, award, and administration of contracts.<sup>156</sup>

Tribal and local governments and PNPs should also create a prequalified list of responsible contractors identified to possess the qualifications and technical abilities to satisfy the Applicant's potential requirement.<sup>157</sup> Although not a contract, many entities have prequalified lists that serve as contract research.

A prequalified contractor is one that the Applicant evaluated and determined to be qualified to perform the work based on capabilities, such as technical and management skills, prior experience, past performance, and availability. A prequalified contractor is not entitled to a "standby" contract. The Applicant must still conduct full and open competition. The Applicant cannot exclude potential bidders or offerors from qualifying during the solicitation period, even if they were not on the prequalified list.

### **2. General Federal Procurement Requirements**

Federal procurement requirements for Tribal and local governments and PNPs are found at 2 C.F.R. § 200.318 through 200.326. The requirements include, but are not limited to:

- Providing full and open competition<sup>158</sup> (Tribal government Applicants may provide preference to Indian organizations or Indian-owned economic enterprises<sup>159</sup> if the

---

<sup>153</sup> See [Chapter 3:VI. Applicant Eligibility](#) for a description of which Applicants are Tribal or local governments or PNPs.

<sup>154</sup> 2 C.F.R. § 200.318(a).

<sup>155</sup> Ibid.

<sup>156</sup> 2 C.F.R. § 200.318(c)(1).

<sup>157</sup> 2 C.F.R. § 200.319(d).

<sup>158</sup> 2 C.F.R. § 200.319(a).

<sup>159</sup> Per the Indian Financing Act of 1974, Pub. L. No. 93-262, § 2(e), 88 Stat 77 (codified as amended at 25 U.S.C. § 1452(f)), an Indian organization is the governing body of any federally recognized Tribe or an entity established or

Applicant substantiates that it met the Indian Self-Determination and Education Act requirements).

- Conducting the following steps to ensure the use of small and minority businesses, women's business enterprises, and labor surplus area firms when possible:<sup>160</sup>
  - Place such organizations that are qualified on solicitation lists;
  - Ensure such organizations are solicited whenever they are potential sources;
  - Divide total requirements, when economically feasible, into smaller tasks or quantities;
  - Establish delivery schedules, where the requirement permits, which encourage their participation;
  - Use the services and assistance, as appropriate, of the Small Business Administration and the Minority Business Development Agency of the Department of Commerce; and
  - Require prime contractor to conduct the above steps if subcontracting.

Note that Tribal government Applicants using the Indian Self-Determination and Education Assistance Act preference do not need to separately follow the six socioeconomic steps outlined above.

- Performing a cost or price analysis in connection with every procurement action above the simplified acquisition threshold,<sup>161</sup> including contract modifications. The Applicant must make independent estimates before receiving bids or proposals.<sup>162</sup> Additionally, the Applicant must negotiate profit as a separate element of the price when it performs a cost analysis and for each contract in which there is no price competition.<sup>163</sup>
- Evaluating and documenting the contractor's integrity, compliance with public policy, record of past performance, and financial and technical resources.<sup>164</sup>
- Ensuring that the contractor was not suspended or debarred.<sup>165</sup>
- Prohibiting the use of statutorily or administratively imposed SLTT geographic preferences in evaluating bids or proposals except where expressly encouraged by applicable Federal law.<sup>166</sup>
- Excluding contractors that develop or draft specifications, requirements, statements of work, or invitations for bids or requests for proposals from competing for such procurements to ensure objective contractor performance and eliminate unfair competitive advantage.<sup>167</sup>

---

recognized by the governing body. An Indian-owned economic enterprise is any commercial, industrial, or business activity established or organized by a member of a Federal recognized Tribe for the purpose of profit, provided that such Indian ownership constitutes 51 percent or more of the enterprise.

<sup>160</sup> 2 C.F.R. § 200.321.

<sup>161</sup> The simplified acquisition threshold is set by the Federal Acquisition Regulation at 48 C.F.R. § 2.101. The threshold is adjusted periodically for inflation.

<sup>162</sup> 2 C.F.R. § 200.323(a).

<sup>163</sup> 2 C.F.R. § 200.323(b).

<sup>164</sup> 2 C.F.R. § 200.318(h).

<sup>165</sup> 2 C.F.R. § 200.213.

<sup>166</sup> 2 C.F.R. § 200.319(b).

<sup>167</sup> 2 C.F.R. § 200.319(a).

- Maintaining records to detail the history of the procurement including, but are not limited to:
  - Rationale for the method of procurement;
  - Selection of contract type;
  - Contractor selection or rejection; and
  - The basis for the contract price.<sup>168</sup>

### 3. Procurement Methods

Tribal and local governments and PNPs must use one of the following procurement methods:<sup>169</sup>

- Micro-purchase;
- Small purchase procedure;
- Sealed bid (formal advertising);
- Competitive proposal; or
- Noncompetitive proposal (sole-sourcing).

#### (a) *Noncompetitive Procurement*

FEMA may reimburse costs incurred under a contract procured through a noncompetitive proposal, also referred to as sole-source, only when one or more of the following circumstances apply:

- The item is only available from one source;
- The public exigency or emergency for the requirement will not permit a delay resulting from competitive solicitation (this exception to competitive procurement is only for work specifically related to the circumstance and only while the circumstances exists. Therefore, Applicants need to immediately begin the process of competitively procuring similar goods and services and transition to a competitively procured contract as soon as the circumstances cease to exist);
- FEMA or the Recipient expressly authorizes a noncompetitive proposal in response to a written request from the Applicant; or
- After solicitation of several sources, competition is determined inadequate.<sup>170</sup>

#### Terminology: Procurement Methods

**Micro-purchase:** purchase of supplies or services where the total cost does not exceed the micro-purchase threshold set by the Federal Acquisition Regulation at 48 C.F.R. Subpart 2.1.

**Small purchase procedure:** relatively simple and informal procurement method for securing services, supplies, or other property that do not cost more than the simplified acquisition threshold set by the Federal Acquisition Regulation at 48 C.F.R. Subpart 2.1.

**Sealed bid:** publicly solicited bid awarded via a firm fixed price contract to the lowest responsive and responsible bidder.

**Competitive proposal:** normally conducted with more than one source submitting an offer and generally used when conditions are not appropriate for the use of sealed bids.

**Noncompetitive proposal:** solicitation of a proposal from only one source.

See 2 C.F.R. § 200.320 for Federal rules that apply to each individual method.

#### Terminology

**Exigency:** The existence of a need to avoid, prevent or alleviate serious harm or injury, financial or otherwise, to the Applicant.

**Emergency:** The existence of a threat to life, public health or safety, or improved property requiring immediate action to alleviate the threat.

<sup>168</sup> 2 C.F.R. § 200.318(i).

<sup>169</sup> 2 C.F.R. § 200.320.

<sup>170</sup> 2 C.F.R. § 200.320(f).

For each noncompetitive procurement, the Applicant must identify which of the four circumstances listed above apply and provide all of the following information, documentation, and justification:

- A brief description of the product or service being procured, including the expected amount of the procurement;
- Explanation of why a noncompetitive procurement is necessary. If there was a public exigency or emergency, the justification should explain the specific conditions and circumstances that clearly illustrate why competitive procurement would cause unacceptable delay in addressing the public exigency or emergency. (Failure to plan for transition to competitive procurement cannot be the basis for continued use of noncompetitive procurement based on public exigency or emergency);
- Length of time the noncompetitive contract will be used for the defined SOW, and the impact on that SOW should the noncompetitively procured contract not be available for that amount of time (e.g., how long does the Applicant anticipate the exigency or emergency circumstances to continue; how long it will take to identify requirements and award a contract that complies with all procurement requirements; or how long it would take another contractor to reach the same level of competence);
- The specific steps taken to determine that the Applicant could not have used, or did not use, full and open competition for the SOW (e.g., research conducted to determine that there were limited qualified resources available that could meet the contract provisions);
- Any known conflicts of interest and any efforts that the Applicant made to identify potential conflicts of interest before the noncompetitive procurement occurred. If the Applicant made no efforts, explain why; and
- Any other justification.

#### **Procurement of Real Property**

The purchase or lease of real property is a unique transaction that might not readily allow use of one of the competitive methods of procurement. If the Applicant is unable to conduct a competitive procurement, it may use a noncompetitive method in accordance with the requirements in this section. The appropriate method will depend on the facts and circumstances of each procurement.

#### Example of an Exigent Situation

A tornado impacts a city in June and causes widespread and catastrophic damage, including damage to a city school. The city wants to repair the school and have it ready for use by the beginning of the school year in September. The city estimates, based on experience, that awarding a contract using a sealed bidding process would require at least 90 days, and the city’s engineer estimates that the repair work would last another 60 days. This would extend the project beyond the beginning of the school year. Rather than conducting a sealed bidding process, the city—in compliance with State and local law—wants to sole source with a contractor it has contracted with previously.

#### Example of an Emergency Situation

Severe weather impacts a city and causes widespread and catastrophic damage, including loss of life, widespread flooding, loss of power, damage to public and private structures, and millions of cubic yards of debris across the city, leaving majority of the jurisdiction inaccessible. The city needs to begin debris removal activities immediately to restore access to the community, support search and rescue operations, power restoration, and address health and safety concerns.

If FEMA determines that none of the allowable circumstances existed or did not preclude the Applicant from adhering to competitive procurement requirements, FEMA may disallow all or part of the associated costs.<sup>171</sup>

#### 4. Contract Types

FEMA reimburses costs incurred by Tribal and local governments and PNPs using three types of contract payment obligations: fixed price, cost-reimbursement, and, to a limited extent, T&M. The specific contract types related to each of these are described in FEMA’s *Procurement Guidance for Recipients and Subrecipients Under 2 C.F.R. Part 200 (Uniform Rules)*.<sup>172</sup>

Tribal and local governments and PNPs must maintain oversight on all contracts to ensure contractors perform according to the conditions and specifications of the contract and any purchase orders.<sup>173</sup>

##### (a) Time and Material Contracts

T&M contracts do not provide incentives to the contractor for cost control or labor efficiency. Therefore, use of T&M contracts are only allowed if all of the following apply:

- No other contract type was suitable;
- The contract has a ceiling price that the contractor exceeds at its own risk; and
- The Applicant maintains a high degree of oversight to obtain reasonable assurance that the contractor is using efficient methods and effective cost controls.<sup>174</sup>

<sup>171</sup> 2 C.F.R. § 200.338.

<sup>172</sup> [www.fema.gov/sites/default/files/2020-07/fema\\_procurement-under-grants-field-manual-supplement\\_1.pdf](http://www.fema.gov/sites/default/files/2020-07/fema_procurement-under-grants-field-manual-supplement_1.pdf).

<sup>173</sup> 2 C.F.R. § 200.318(b).

<sup>174</sup> 2 C.F.R. § 200.318(j).

FEMA generally limits the use of T&M contracts to a reasonable timeframe based on the circumstances during which the Applicant could not define a clear SOW. Therefore, the Applicant should define the SOW as soon as possible to enable procurement of a more acceptable type of contract.

Some entities, such as Rural Electrical Cooperatives, provide the materials necessary to restore the facilities and refer to such contracts as Time and Equipment (T&E) contracts. The limitations and requirements that apply to T&M contracts also apply to T&E contracts.

*(b) Cost-Plus-Percentage-of-Cost or Percentage-of-Construction*

In addition to limiting reimbursement to costs that can be determined to be reasonable, FEMA does not reimburse the increased cost associated with the percentage on a cost-plus-percentage-of-cost calculation or percentage-of-construction cost method.<sup>175</sup> This type of contract billing is prohibited as it does not provide incentive to contractors to control costs because the contractor's profit increases as the costs of performance increase. Instead, it provides a financial interest to the contractor to increase costs so that its profit increases. FEMA identifies these cost methods by determining whether:

- Payment is on a predetermined percentage rate;
- The predetermined percentage rate is applied to actual performance costs;
- The contractor's total payment amount is uncertain at the time of contracting; and
- The contractor's payment increases commensurately with increased performance costs.<sup>176</sup>

## **5. Additional Contracting Considerations**

*(a) Pre-Positioned Contracts*

Some Applicants have pre-positioned contracts, which are contracts awarded before an incident occurs for the potential performance of work. These contracts are also referred to as advance or standby contracts. FEMA may reimburse reasonable costs under a pre-positioned contract if:

- It was originally procured in compliance with Federal procurement requirements;
- The scope of work was adequate to cover the work performed;
- The work performed was eligible; and
- The contract term covers time when work was performed.

*(b) Cooperative Purchasing*

A cooperative purchasing program is a cooperative arrangement for acquiring goods or services that involves aggregating the demand of two or more entities to obtain a more economical purchase.<sup>177</sup> Program membership may provide entities with access to lists of agreements or contracts for goods and services at pre-negotiated rates or prices. Typically, the member then purchases the goods or

---

<sup>175</sup> 2 C.F.R. § 200.323(d).

<sup>176</sup> See *Federation Aviation Administration -Request for Advance Decision*, 58 Comp.Gen. 654, 655 (1979), 79-2 CPD 34; *Marketing Consultants International Limited*, 55 Comp.Gen. 554, 562 (1975), 75-2 CPD 384.

<sup>177</sup> Cooperative purchasing programs are distinguishable from joint procurements. A joint procurement is a method of contracting in which two or more purchasers agree from the outset to use a single solicitation and enter into a single contract with a vendor for the delivery of goods or services. Joint procurements must still comply with Federal procurement requirements. However, FEMA sees fewer compliance issues with joint procurements.

services by negotiating with participating vendors and placing purchase orders or entering into contracts based on the pre-negotiated rates or prices. FEMA advises against the use of cooperative purchasing programs due to frequent compliance issues with Federal procurement requirements. [Appendix D: Frequent Compliance Issues with Cooperative Purchasing Programs](#) provides a list of frequent compliance issues with cooperative purchasing programs for procurements above the simplified acquisition threshold. Applicants must document and explain how its use of the program complied with all procurement requirements.

Piggyback contracting is a type of cooperative purchasing and occurs when one entity assigns the contractual rights it has in a contract to another entity. FEMA advises against the use of piggyback contracts. Piggyback contracts are usually not compliant with Federal requirements as the scope of work pertains to the needs of a different entity.

### C. Required Contract Clauses

Applicants must include required provisions detailed in 2 C.F.R. § 200.326 in all contracts awarded.<sup>178</sup> Some provisions are based on sound contracting practices while others are required by Federal law, EO, and regulations.

Required contract provisions include:

- Remedies Clause;
- Termination for Cause;
- Termination for Convenience;
- Equal Employment Opportunity;
- Contract Work Hours and Safety Standards Act;
- Homeland Security Acquisition Regulation Class Deviation 15-01 clauses; “Safeguarding of Sensitive Information” and “Information Technology Security and Privacy Training” for existing and new contracts and solicitations that have a high risk of unauthorized access to or disclosure of sensitive information;<sup>179</sup>
- Clean Air Act;
- Federal Water Pollution Control Act;
- Debarment and Suspension;
- Byrd Anti-Lobbying Amendment Clause;
- Byrd Anti-Lobbying Amendment Certification; and
- Procurement of Recovered Materials.

In addition to the required provisions, FEMA also recommends the following contract provisions be included in all contract awards:

- Changes Clause;

---

<sup>178</sup> 2 C.F.R. § 200.326.

<sup>179</sup> “Sensitive Information” is defined in Homeland Security Acquisition Regulation clause 3052 204-71, *Contractor Employee Access*, as any information, which if lost, misused, disclosed, or without authorization is accessed, or modified, could adversely affect the national or homeland security interest, the conduct of Federal programs, or the privacy to which individuals are entitled under 5 U.S.C. § 552a (the Privacy Act), but which has not been specifically authorized under criteria established by an Executive Order or an Act of Congress to be kept secret in the interest of national defense, homeland security or foreign policy.

- Access to Records;
- Department of Homeland Security Seal, Logo, and Flags;
- Compliance with Federal Law, Regulations, and EOs Clause;
- No Obligation by Federal Government; and
- Program Fraud and False or Fraudulent Statements or Related Acts.

Some provisions do not apply under the PA Program (e.g. Davis Bacon Act<sup>180</sup> and Rights to Inventions Clause) while others require verbatim language. [Appendix K: Contract Provisions](#) provides the exact language for the provisions that require verbatim language and provides sample language for some of the other provisions.

#### **D. Documentation Requirements**

The Applicant should submit the following to support contract costs claimed (not an all-inclusive list):

- Procurement policy (required when requested);
- Procurement documents (i.e., requests for proposals, bids, selection process, etc.) (required when requested);
- A cost or price analysis (required for contracts above the simplified acquisition threshold)
- Contracts, change orders, and summary of invoices (required);
- Dates worked (required when requested);<sup>181</sup> and
- Documentation that substantiates a high degree of contractor oversight, such as daily or weekly logs, records of performance meetings (required for T&M contracts when requested).

## **IX. Mutual Aid**

When the Applicant does not have enough resources to respond to an incident, it may request resources from another jurisdiction through a “mutual aid” agreement. FEMA refers to the entity requesting resources as the Requesting Entity. FEMA refers to the entity providing the requested resource as the Providing Entity.

FEMA provides PA funding to the Requesting Entity as it is legally responsible for the work. FEMA does not provide PA funding directly to the Providing Entity. For the work to be eligible, the Requesting Entity must have requested the resources provided.

Some States have a statewide mutual aid agreement that designates the State as being responsible for reimbursing mutual aid costs. In these States, the Providing Entity may request funding directly from the State, with prior consent of the Requesting Entity, in accordance with applicable State laws and procedures. If the Requesting entity and the State approve the request and the State pays the Providing Entity, FEMA provides PA funding to the State. The

---

<sup>180</sup> The Davis Bacon Act requires “prevailing wage” payment to contracted workers based on the local union wage scale defined by the U.S. Department of Labors. If the Applicant incorporates prevailing wage rates as part of its normal practice for all contracts regardless of the funding source, then those rates are eligible.

<sup>181</sup> FEMA may request this information to validate work was completed within the project’s approved period of performance and when applicable for Emergency Work, to determine cost share application per [Chapter 6:XIII. Increased Federal Cost Share for a Limited Timeframe](#))

Requesting Entity may be responsible for reimbursing the State for any non-Federal local cost share, depending on specific State requirements.

The Requesting Entity or State, if applicable, must provide a description of the services requested and received, along with documentation of associated costs (e.g., labor, equipment, supplies, or materials) to FEMA in support of a request for PA funding.

#### **A. Post-Incident Agreements**

When the Requesting and Providing Entities do not have a written agreement, OR where such an agreement exists but is silent on reimbursement, the entities may verbally agree on the resources to be provided and on the terms, conditions, and costs of such assistance.

The agreement should be consistent with past practices for mutual aid between the entities. For example, if the Requesting Entity does not normally reimburse a Providing Entity for its costs, it should not agree to do so specifically for the declared incident.

Prior to funding, the Requesting Entity must document the verbal agreement in writing, have it executed by an official of each entity with the authority to request and provide assistance, and submit it to FEMA (preferably within 30 days of the Applicant's Briefing).<sup>182</sup>

#### **B. Eligibility**

Mutual aid resources are eligible when used for Emergency Work, emergency utility restoration (regardless of whether it is deemed Category B or F) or grant management activities [subject to the criteria in FEMA Recovery Policy FP 104-11-2, *Public Assistance Management Costs (Interim)*]. Mutual aid work is subject to the same eligibility criteria as contract work. Costs to transport the Providing Entity's equipment and personnel to the declared area are eligible.

Ineligible work performed by a Providing Entity includes, but is not limited to:

- Preparing to deploy;
- Dispatch operations outside the receiving State, Territory, or Tribe;
- Training and exercises; and
- Support for long-term recovery and mitigation operations.

The Emergency Management Assistance Compact (EMAC) is a national interstate mutual aid agreement that enables States and Territories to share resources in response to an incident. Work performed outside the receiving State or Territory that is associated with the operation of EMAC, including tracking of resources, is ineligible unless the work is associated with the receiving State's or Territory's emergency operations for the incident.

The Providing Entity's straight-time and overtime labor are eligible, including fringe benefits. When the Requesting Entity is a SLTT government and the Providing Entity is another division within the same SLTT government, straight-time for budgeted employees of the Providing Entity is ineligible.

---

<sup>182</sup> The Recipient conducts Applicant Briefings to provide PA Program information to potential Applicants. This briefing is described in [Chapter 3:II. Applicant Briefing](#).

If the Providing Entity backfills deployed personnel, overtime for backfill personnel is eligible even if they are not performing eligible work. However, straight-time for backfill personnel is ineligible.

FEMA reimburses the use of equipment provided to a Requesting Entity based on either the terms of the agreement or equipment rates (detailed in [Chapter 6:III. Applicant-Owned Equipment and Purchased Equipment](#)). FEMA provides PA funding to repair damage to this equipment the same way as it provides PA funding to repair damage to Applicant-owned equipment (detailed in [Chapter 7:IV. Damage Caused During Performance of Emergency Work](#)).

The Applicant needs to submit the following to support mutual aid costs claimed (not an all-inclusive list):

- Written agreement (required);
- Services requested and received (required);
- Same information listed for labor, equipment, and supplies (required as applicable); and
- Invoices (representative sample required when requested).

## X. Prisoners

FEMA provides PA funding for prisoner labor costs based on the rate that the Applicant normally pays prisoners. FEMA also provides PA funding for prisoner transportation to the worksite and extraordinary costs of security guards, food, and lodging.<sup>183</sup>

The Applicant should submit the following to support prison labor costs claimed (not an all-inclusive list):

- Estimated hours and rates for work to be completed;
- Prison labor pay policy and pay rate (required); and
- For each individual:
  - Name (required);
  - Days and hours worked (required);
  - Description of work performed (required) should include a representative sample of daily logs or activity reports; and
  - Locations worked (required).

## XI. National Guard

The Governor may activate National Guard personnel to State Active Duty in response to an incident. Labor costs and per diem, if applicable, are eligible for State Active Duty personnel performing eligible work. Both straight-time and overtime are eligible, including fringe benefits.

The U.S. Department of Defense funds National Guard personnel activated under Full-Time National Guard Duty (Title 32) or Active Duty (Title 10). Therefore, Title 32 and Title 10 personnel costs, and any other costs funded by the U.S. Department of Defense, such as training, are ineligible.

---

<sup>183</sup> Stafford Act § 406(a)(2)(B), 42 U.S.C. § 5172.

## XII. Direct Federal Assistance

When the impact of an incident is so severe that the SLTT governments lack the capability to perform or contract eligible Emergency Work, the Recipient may request that the Federal government provide this assistance directly. FEMA may task another Federal agency to perform or contract the work provided it is an eligible activity under [Chapter 7. Emergency Work Eligibility](#)<sup>184</sup> unless the work falls under the authority of another Federal agency.<sup>185</sup> FEMA issues a “Mission Assignment” to task the work and refers to it as Direct Federal Assistance (DFA).<sup>186</sup> DFA has the same cost-share provisions applicable to the declaration (as described in [Chapter 1:IV.E. Federal Cost Share](#)).

## XIII. Increased Federal Cost Share for a Limited Timeframe

When the president authorizes an increased Federal cost share for a limited timeframe, FEMA applies it to all eligible costs related to work performed through 11:59 p.m. on the date of expiration. Therefore, the Applicant needs to delineate costs for work performed prior to the deadline versus costs for work performed after the deadline. The following bullets further define how FEMA applies the increased Federal cost share:

- Employees: Costs for hours worked up to the date and time of expiration.
- Purchased Material and Equipment: Cost to purchase each item that the Applicant needed and used to perform eligible work during the increased funding period. In this case, FEMA also applies the increased Federal cost share to the usage cost up to the date and time of expiration.
- Leased Equipment and Facilities: Lease costs up to date and time of expiration. FEMA may calculate the cost based on a proration of time (i.e., if a facility is leased for six months based on a monthly rate and the period for the increased Federal cost share expired 45 days from the start of the lease, FEMA applies the increased Federal cost share to the cost to lease the facility for 45 days based on a proration of the monthly rate).
- Contract Costs: Costs for work performed up to the date and time of expiration. If costs cannot be distinguished by date performed, FEMA may prorate costs based on the percentage of work completed prior to the deadline versus the percentage of work remaining. However, Applicants should work with contractors to delineate dates associated with work.

## XIV. Donated Resources

Individuals and organizations often donate resources to assist with response activities. FEMA does not provide PA funding for donated resources. However, FEMA allows the Applicant to use the value of donated resources (non-cash contributions of property or services)<sup>187</sup> related to eligible Emergency Work to offset the non-Federal cost share of its eligible Emergency Work projects and DFA; and to use the value of donated resources related to eligible work on a Permanent Work Project to offset the non-Federal cost share of that specific Permanent Work

---

<sup>184</sup> 44 C.F.R. § 206.208(a).

<sup>185</sup> 44 C.F.R. § 206.208(c)(2).

<sup>186</sup> 44 C.F.R. § 206.208(c)(1).

<sup>187</sup> 2 C.F.R. § 200.96.

Project. FEMA applies the offsets regardless of the cost share arrangements between the Recipient and its Subrecipients.

For Emergency Work specifically, if there is a time-limited 100 percent Federal cost share period (see [Chapter 6:XIII. Increased Federal Cost Share for a Limited Timeframe](#)) and the Applicant uses resources donated during this time period, it may use the value of those donated resources to offset the non-Federal cost share incurred after the 100 percent Federal cost share period expires. If the Applicant uses resources from its stock that were donated during a previous incident or timeframe, it may use the value of those donated resources to offset its non-Federal cost share if the Applicant has not claimed the resources as an offset in a previous incident.

The Applicant may apply the offset if all of the following conditions are met:

- The donated resource is from a third party. A third party includes private entities or individuals, including individuals that are normally paid employees of the Applicant or Federal, State, Territorial, or Tribal government, but are volunteering as unpaid individuals and not on behalf of the employer);
- The donated resource is necessary and reasonable;<sup>188</sup>
- The Applicant uses the resource in the performance of eligible work<sup>189</sup> and within the respective Project's period of performance;<sup>190</sup> and
- The Applicant or volunteer organization tracks the resources and work performed, including description, specific locations, and hours.<sup>191</sup> The Applicant must track the donated resources for Permanent Work to the specific Project for which it is associated.

FEMA considers unpaid individuals who volunteer their labor to the Applicant to be third-party even if they are officially members or employees of the Applicant organization (e.g. volunteer fire fighters at a PNP volunteer fire department performing eligible Emergency Work).

Resources donated to the Applicant by an organization that would normally provide the same resources under its mission, such as the American Red Cross, are eligible as an offset provided the organization is not federally funded. Additionally, if a mutual aid agreement provides for assistance at no cost to the Applicant, the Applicant may use the value of that assistance to offset its non-Federal cost share.

The value of a donated resource is ineligible as an offset toward the non-Federal cost share if the resource is:

- Donated by a Federal agency;
- Donated by another federally funded source;
- Funded through a Federal award;<sup>192</sup>
- Used as an offset to any other Federal award;<sup>193</sup> or
- Used for ineligible work.

---

<sup>188</sup> 2 C.F.R. § 200.306(b)(3).

<sup>189</sup> Applicants may not use the value of standby time as a donated resource as no work is being performed.

<sup>190</sup> 2 C.F.R. § 200.309. For Emergency Work, the end of the period of performance is equal to the latest Emergency Work Project's period of performance.

<sup>191</sup> 2 C.F.R. §§ 200.434(d) and 306(b)(1).

<sup>192</sup> 2 C.F.R. § 200.306(b)(5).

<sup>193</sup> 2 C.F.R. § 200.306(b)(2).

Requesting donated resources from contractors during the solicitation phase of a procurement may violate Federal procurement rules as it may be considered overly burdensome or restrictive of competition.<sup>194</sup> To remain compliant, the Applicant can do the following:

- Accept unsolicited donated resources from contractors;
- Maintain a list of donors; and
- Ask contractors that are donating resources to work with other organizations.

If the Applicant accepts donated resources from contractors, it must not do any of the following:

- Solicit donations in its requests for proposals or solicitations for bids;
- Directly solicit donations or requests for proposals from contractors who are actively bidding on its contracts;
- Grant an award to a contractor which has donated resources for the specific work covered by the contract;
- Show favoritism or give the appearance of showing favoritism to a contractor who has donated resources; and
- Limit competition among contractors based on donated resources, especially for smaller contractors (including women or minority owned businesses) that might not be able to afford to donate resources.

#### **A. Offset Amounts**

FEMA applies values to donated resources as follows:

- **Volunteer Labor:** The offset is based on the same straight-time hourly labor rate, and fringe benefits, as a similarly qualified person in the Applicant's organization who normally performs similar work. FEMA does not offset volunteer labor based on overtime or premium rates. If the Applicant does not have employees performing similar work, FEMA credits the non-Federal share based on a rate consistent with those ordinarily performing the work in the same labor market that the Applicant would otherwise compete for that type of work.<sup>195</sup>
- **Equipment:** The offset is based on equipment rates and must not exceed the fair rental value (if loaned) or the fair market value of equipment that is in similar age and condition at the time of donation (if donated with a transfer of title). See [Chapter 6:III. Applicant-Owned Equipment and Purchased Equipment](#) for information on equipment rates.<sup>196</sup>
- **Supplies or Materials:** The offset is based on current commercial rates; which FEMA validates based on invoices from previous purchases or information available from vendors in the area. The amount must not exceed the fair market value at the time of donation.<sup>197</sup>
- **Buildings or Land:** For buildings or land donated permanently (i.e., with a transfer of ownership), the offset is based on the fair market value at the time of donation as established by an independent appraisal and certified by the Applicant.

---

<sup>194</sup> 2 C.F.R. § 200.319.

<sup>195</sup> 2 C.F.R. § 200.306(e) and (f).

<sup>196</sup> 2 C.F.R. § 200.306(g), (h), and (i).

<sup>197</sup> 2 C.F.R. § 200.306(g).

- Space: For building or land space donated for temporary use, the offset is based on the fair rental value of comparable privately-owned space in the same locality as established by an independent appraisal.<sup>198</sup>
- Logistical Support: Reasonable logistical support for volunteers doing eligible work, such as donations warehousing and management related to eligible work, may be eligible either for funding (if the Applicant provides the logistical support) or as a donated resource offset (if a third party provides the logistical support), subject to approval by FEMA.

For Emergency Work, FEMA applies the donated resource offset against the combined non-Federal cost share for all the Applicant’s Emergency Work Projects (Category A and B) under the declared incident. The offset may not exceed the total out-of-pocket costs and is capped at the total non-Federal cost share of these projects. FEMA prepares the Emergency Work donated resource project as a Category B Project separate from Emergency Work Projects for the Applicant’s incurred costs. FEMA does not obligate the donated resource Project until after it obligates all Emergency Work Projects for the Applicant.

For Permanent Work, FEMA applies the donated resource offset against the non-Federal cost share of the specific Permanent Work Project for which the resources were donated. The offset may not exceed the total out-of-pocket costs. FEMA caps the offset at the non-Federal cost share of that specific Permanent Work Project. The type and amount of resources donated must directly correlate to, and may not exceed, the type and amount approved in the scope of work of the Permanent Work Project (e.g., if the approved scope of work includes replacement of 10 chairs and 15 chairs are donated, the donated resource offset is limited to 10 chairs). FEMA adjusts the Permanent Work Project to capture any donated resource offsets related to the Project upon receipt of the donated resource information and no later than closeout.

## **B. Documentation Requirements**

The Applicant needs to submit the following to support donated resources (not an all-inclusive list):

For each individual:

- Sign-in sheet (required);
- Name (required);
- Title and function (required for professional services);
- Days and hours worked (required); and
- Location of work and work performed (required).

Equipment:

- Same information listed under [Chapter 6:III. Applicant-Owned Equipment and Purchased Equipment](#) (required); and
- Who donated each piece of equipment (required).

Supplies or materials:

---

<sup>198</sup> 2 C.F.R. § 200.306(i)(3).

- Quantity used (required);
- Who donated (required);
- Location(s) used (required); and
- Invoices or other documentation to validate claimed value (required).

## XV. Project Management and Design Services

FEMA provides PA funding for costs related to project management and design activities as part of the project. Project management includes activities performed to manage the actual project. These are activities that would be required regardless of whether the entity is receiving PA funding and differ from management costs, which are costs for activities related to the receipt and administration of PA funding.

Project management activities may include procurement actions, legal review of contracts, monitoring contractor work, construction oversight and inspections, environmental and historic preservation permitting actions, completing load tickets for debris operations. These activities are eligible provided they are tracked and directly related to a specific, eligible project.

Architectural, engineering, and design services for the approved scope of work, including hazard mitigation, are also eligible provided the services are reasonable. Some projects do not need these services or require only basic services, while others require specialized engineering and design.

When evaluating the eligibility of project management and design services, FEMA considers whether the project includes improvements that are ineligible for funding (costs for management and design services associated with improvements or other ineligible work are not eligible).

## XVI. Grant Management and Administration

FEMA provides contributions for management costs that a Recipient or Subrecipient incurs in administering and managing PA awards. For Recipients, FEMA provides PA funding for management costs based on actual costs incurred up to 7 percent of the total award amount. For Subrecipients, FEMA provides PA funding for management costs based on actual costs incurred up to 5 percent of the Subrecipient's total award amount.<sup>199</sup> Additional information is available in FEMA's interim policy, FEMA Recovery Policy FP 104-11-2, *Public Assistance Management Costs (Interim)* and FEMA's *Public Assistance Management Costs Standard Operating Procedures*.<sup>200</sup>

## XVII. Surveys to Assess or Locate Damage or Debris Impacts

The Applicant is responsible for identifying locations of incident-related damage or debris impacts. Costs related to assessing overall impacts of an incident, locating damage or debris impacts, and conducting PDAs are not eligible project costs, but may be eligible as management costs (see [Chapter 6:XVI. Public Assistance Grant Management and Administration](#)).

<sup>199</sup> Stafford Act § 324(a), 42 U.S.C. § 5165b as amended by the Disaster Recovery Reform Act; and 2 C.F.R. §§ 200.56 and 200.412.

<sup>200</sup> [www.fema.gov/sites/default/files/2020-07/pa\\_mgmt\\_costs\\_sop\\_final.pdf](http://www.fema.gov/sites/default/files/2020-07/pa_mgmt_costs_sop_final.pdf).

If, during a survey after the declaration, the Applicant identifies incident-related damage to a facility, the costs related to the inspection of that facility are eligible as management costs provided the facility is eligible.

Further detailed inspections of that damage to determine the extent of damage or quantity of debris and method of repair or removal, including professional evaluations, are eligible as part of the work to restore the facility or work to remove the debris. If the Applicant performs a detailed inspection of a partially damaged system, eligible costs are based on the percentage of the system that was damaged. For example, if after inspecting 500 linear feet of sewer line, the Applicant identified 100 linear feet of line damaged by the incident, only one-fifth of the inspection costs are eligible.

FEMA has specific eligibility criteria for inspecting earthquake damage to buildings constructed with welded steel-moment frames. FEMA bases the eligibility criteria on *Recommended Post Earthquake Evaluation and Repair Criteria for Welded Steel Moment Frame Buildings* (FEMA 352).<sup>201</sup> The criteria are summarized in [Appendix C: Welded Steel Moment Frame](#). Safety inspections are discussed in [Chapter 7:II.S. Safety Inspections](#).

## XVIII. Duplication of Benefits

FEMA is legally prohibited from duplicating benefits from other sources. If the Applicant receives funding from another source for the same work that FEMA funded, FEMA reduces the eligible cost or de-obligates funding to prevent a duplication of benefits.<sup>202</sup>

### A. Insurance Proceeds

FEMA cannot provide PA funding that duplicates insurance proceeds.<sup>203</sup> Consequently, FEMA reduces eligible costs by the amount of:

- Actual insurance proceeds, if known;<sup>204</sup> or
- Anticipated insurance proceeds based on the Applicant's insurance policy, if the amount of actual insurance proceeds is unknown. FEMA subsequently adjusts the eligible costs based on the actual amount of insurance proceeds the Applicant receives.

FEMA requires the Applicant to take reasonable efforts to pursue claims to recover insurance proceeds that it is entitled to receive from its insurer(s). FEMA may limit funding if the insurance policy provides coverage that should be pursued. If the Applicant expends costs to pursue its insurance claim, FEMA offsets the insurance reduction with the Applicant's reasonable costs to pursue the claim if:

- The incurred cost resulted from pursuing insurance proceeds for FEMA-eligible work; and
- The Applicant can provide documentation to show that the incurred cost was attributed to pursuing more insurance proceeds than the initial settlement amount.

---

<sup>201</sup> [www.nehrp.gov/pdf/fema352.pdf](http://www.nehrp.gov/pdf/fema352.pdf).

<sup>202</sup> Stafford Act § 312, 42 U.S.C. § 5155, and 2 C.F.R. § 200.406.

<sup>203</sup> Ibid.

<sup>204</sup> 44 C.F.R. §§ 206.252(c) and 253(a).

If the Applicant receives insurance proceeds for ineligible losses (e.g., business interruption), FEMA calculates a relative apportionment of insurance proceeds to determine the insurance reduction based on:

- The proceeds received per type of loss as specified by the insurance policy or settlement documentation;
- Policy limits for categories of loss as specified in the insurance policy; or
- The ratio of total eligible losses to total ineligible losses.

FEMA Recovery Policy (FP) 206-086-1, *Public Assistance Policy on Insurance*, describes insurance reductions in detail.<sup>205</sup>

The Applicant should upload the following documentation in PA Grants Portal at the Applicant Level (not an all-inclusive list):

- Summary of insurance coverage
- Actual insurance proceeds, if available (required before project is closed)
- General Property Insurance Policy (required if applicable):
  - Property policy declaration pages;
  - Schedule of covered locations;
  - Property policy forms and endorsements;
  - Inland marine coverage section; and
  - Equipment breakdown section
- Flood insurance policy (required for flood loss)
- Wind policy, which may include a separate wind only insurance policy issued by a state Wind Pool or Association [required for wind-related loss (hurricane, tornado, severe weather incident)]
- Auto insurance policy (required for vehicle damage)
- Insurance settlement information (required if available):
  - Final Statement of loss;
  - Adjuster's estimates;
  - Settlement checks;
  - Correspondence explaining the settlement amount and allocation; and
  - Letter of denial

## **B. Non-Federal Grants and Cash Donations**

Grants and cash donations from non-Federal sources are subject to the following criteria based on whether the funds are provided toward a specific purpose and whether that specific purpose is otherwise eligible for PA funding.

- If the funds are designated for the same purpose as eligible work, the following apply:
  - The Applicant may use the funds toward its non-Federal cost share.

---

<sup>205</sup> [www.fema.gov/sites/default/files/2020-05/FP206-086-1\\_PublicAssistancePolicyInsurance\\_062915.pdf](http://www.fema.gov/sites/default/files/2020-05/FP206-086-1_PublicAssistancePolicyInsurance_062915.pdf).

- If the funds are not used toward the non-Federal cost share, FEMA considers the donation or non-Federal grant a duplication of benefits and reduces eligible costs by the duplicated amount.
- If the funds exceed the amount of the non-Federal cost share, FEMA reduces eligible costs by the excess amount.
- If the funds are designated for non-specific purposes, FEMA does not consider the funds a duplication of benefits. The Applicant may use the funds toward its non-Federal cost share. If the funds exceed the amount of the non-Federal share, the Applicant can apply the excess amount toward ineligible work.
- If the funds are designated for a specific purpose that is ineligible, FEMA does not allow the Applicant to apply the funds toward its non-Federal cost share.

### **C. Third-Party Liability**

When a third party<sup>206</sup> causes damage (e.g., an oil spill) or increases the cost of repair or cleanup and the Applicant requests FEMA funding for the costs, FEMA requires the Applicant to make reasonable efforts to pursue claims to recover costs it is entitled to receive from the third party.

If the costs recovered are not adequate despite the Applicant's good faith effort, FEMA reduces eligible costs based on the recovered amount. If the Applicant receives funds from the third party for eligible and ineligible work or losses, FEMA determines the offset amount based on:

- The proceeds received for eligible losses as specified by the settlement documentation; or
- The ratio of total eligible losses to total ineligible losses.

### **D. Other Federal Awards**

If the Applicant receives funds from another Federal agency for the same purpose as PA funding, it is a duplication of benefits. FEMA cannot duplicate funds provided by another Federal agency.

## **XIX. Duplication of Funding Between FEMA Programs**

FEMA provides assistance under other Programs, such as its IA programs and Hazard Mitigation Grant Program (HMGP), that could duplicate assistance that is available under the PA Program. FEMA must ensure it does not duplicate funds in areas where its programs overlap.

For IA, individuals may receive assistance for work that, under certain circumstances, is also eligible under PA when a SLTT government has legal authority to perform the work. For example, a homeowner may receive IHP assistance for debris clearance from a privately-owned road and the local government may request PA funding for debris clearance from the same road for emergency vehicle access. FEMA must ensure it does not provide PA funding for the same work to two different entities.

For HMGP, FEMA can provide funding for a wide range of mitigation measures, including measures that may also be eligible under the PA Program. FEMA must ensure that PA funds do not duplicate HMGP funds.

---

<sup>206</sup> A third party is a private entity or individual that is not involved in the Federal award, i.e., not the Applicant or Federal, State, Territorial, or Tribal Government.

## XX. Interest on Loans

Applicants may need to obtain a loan to complete work. Financing costs for a loan is only eligible when it meets the conditions established in 2 C.F.R. § 200.449.

## XXI. Ineligible Costs

The Stafford Act authorizes FEMA to provide PA funding for specific work performed as a result of the incident. It does not authorize FEMA to provide PA funding for all losses or costs resulting from the incident. The following costs are ineligible because the Stafford Act does not authorize FEMA to provide PA funding for these items.

### A. Loss of Revenue

FEMA cannot provide PA funding for revenue lost due to the incident. The following are examples of when loss of revenue may occur because of an incident:

- Hospitals release noncritical patients to make room for survivors;
- Hospitals sustain damage that reduces pre-existing capacity;
- Waiving toll fees on a toll road, even if for evacuation purposes;
- Waiving the normal fee for ferry service to encourage alternate transportation;
- Waiving tipping fees;
- A utility system is shut down; and
- Events are cancelled due to an entity using a venue for incident-related activities, such as sheltering.

### B. Loss of Useful Service Life

FEMA cannot provide PA funding for the projected loss of useful service life of a facility. For example, if a road has been inundated by flood waters for an extended timeframe, FEMA cannot provide PA funding for the value of the projected loss of useful life of the road due to the long-term effects the inundation might have on the road. Similarly, FEMA cannot fund the value of the loss of landfill capacity due to incident-related debris.

### C. Tax Assessments

SLTT governments may conduct tax assessments to re-assess real property values after an incident. Costs related to conducting these assessments are ineligible because the assessments are neither essential to addressing an immediate threat to life or improved property, nor connected with the permanent restoration of eligible facilities.

### D. Increased Operating Costs

Increased costs of operating a facility or providing a service are generally ineligible, even when directly related to the incident. However, short-term increased costs that are directly related to accomplishing specific emergency health and safety tasks as part of emergency protective measures may be eligible, as discussed in [Chapter 7:II.F. Expenses Related to Operating a Facility or Providing a Service](#).

# CHAPTER 7: EMERGENCY WORK ELIGIBILITY

FEMA is authorized to provide PA funding for Emergency Work,<sup>207</sup> including emergency protective measures and debris removal. This chapter includes PA policy for Emergency Work, which is work that must be done immediately to:

- Save lives;
- Protect public health and safety;
- Protect improved property; or
- Eliminate<sup>208</sup> or lessen an immediate threat of additional damage.<sup>209</sup>

“Immediate threat” is the threat of additional damage or destruction from an incident that can reasonably be expected to occur within 5 years of the declared incident.<sup>210</sup>

**Figure 10. Emergency Work Eligibility**

For flood incidents specifically, an immediate threat is a threat from a 5-year flood (a flood that has a 20 percent chance of occurring in any given year). For other incidents, an immediate threat means imminent danger from an incident that can reasonably be expected to occur within 5 years of the declared incident. The declared incident must have caused the immediate threat to exist. However, the threat itself can be from any type of incident; it is not limited to the type of incident that caused the initial damage or threat.

The deadline to complete Emergency Work is 6 months from the declaration date unless the Recipient or FEMA authorize an extension.<sup>211</sup> Although regulations allow 6 months to complete Emergency Work, eligible Emergency Work is that which is necessary to address an immediate threat (as shown in Figure 10. *Emergency Work Eligibility*). FEMA considers the urgency with which the Applicant proceeds with work when evaluating eligibility. The Applicant should not delay in following its normal policies and procedures when taking actions to address threats to life, public health and safety, and improved property.

For PNP Applicants, eligible Emergency Work is generally limited to that associated with an eligible PNP facility as follows:

- Debris removal from the facility property; and

<sup>207</sup> 44 C.F.R. § 206.201(b).

<sup>208</sup> While the regulatory definition of the term “Emergency Work” includes the term “avert,” the regulatory language used for the specific eligibility criteria for debris removal and emergency protective measures includes the term “eliminate,” not “avert.”

<sup>209</sup> In addition to addressing immediate threats to life, health and safety, and improved property, debris removal may be authorized to ensure economic recovery of the affected community.

<sup>210</sup> 44 C.F.R. § 206.221(c).

<sup>211</sup> 44 C.F.R. §§ 206.204(c) and (d).

- Emergency protective measures to prevent damage to the facility and its contents.

In limited circumstances, PNPs may be eligible for other types of Emergency Work when essential components of a facility are urgently needed to save lives or protect health and safety (see [Chapter 7:II.D. Emergency Protective Measures Conducted by Private Nonprofit Organizations](#) for details).

For SLTT Applicants, evaluating facility eligibility is not necessary for most Emergency Work. For these Applicants, eligibility of Emergency Work is primarily based on evaluation of an immediate threat and legal authority to perform the work. The Applicant must provide the following:

- Detailed description of work performed (required);
- Description of immediate threat (required if requested); and
- Records demonstrating presence of immediate threat (e.g., technical reports, safety inspector reports, photographs) (required if requested).

#### Environmental and Historic Preservation Considerations

The Applicant should make every effort to inform the Recipient and FEMA of necessary Emergency Work prior to performing the work, when appropriate, to afford FEMA the opportunity to perform EHP reviews and consultations. The Applicant is responsible for obtaining all required EHP permits from the appropriate agencies before proceeding with Emergency Work. FEMA EHP staff is available to assist the Applicant with ensuring the work is compliant with EHP laws, regulations, and EOs.

When performing Emergency Work, the Applicant should avoid new ground disturbance when possible. If the Applicant cannot avoid new ground disturbance, it must consider impacts to natural and cultural resources and obtain all necessary permits. To facilitate EHP review, the Applicant should provide:

- Site map (including geographical coordinates in latitude, longitude in decimal degrees) showing the location of all proposed areas where the Applicant will conduct site work or construction and the extent of ground disturbance (including any staging areas, access roads, parking, landscaping, grading, or utilities);
- Construction dates and photographs of all facilities in the project area;
- Any known environmental issues or historic preservation concerns, such as, but not limited to, threatened and endangered species including their critical habitat, location in floodplain or wetlands, presence of asbestos within the facility, or facility's location in an archaeologically sensitive area;
- Environmental assessments;
- Historic property designations or surveys, including archaeological surveys; and
- Copies of permits and correspondence with regulatory agencies, including but not limited to:
  - State, Territorial, or Tribal Historic Preservation Officer (SHPO/THPO) (historic properties);

- U.S. Army Corps of Engineers (work in navigable waters, work involving dredging or discharging dredged materials or fill in waterways or wetlands);
- U.S. Fish and Wildlife Service (federally listed threatened and endangered species, migratory birds, bald and golden eagles, work in Coastal Barrier Resource System areas, work in or near waterways or wetlands);
- National Oceanic and Atmospheric Administration (federally listed threatened and endangered species, work in essential fish habitat, work in National Marine Sanctuaries);
- EPA (work involving underground injection, work with the potential to increase contamination of sole source aquifers); and
- State, Territorial, or Tribal environmental agencies (permits for burning, staging, or disposing of debris).

## I. Debris Removal (Category A)

Debris removal activities, such as clearance, removal, and disposal, are eligible as Category A if the removal is in the public interest based on whether the work:

- Eliminates immediate threats to lives, public health, and safety;
- Eliminates immediate threats of significant damage to improved public or private property;
- Ensures economic recovery of the affected community to the benefit of the community at large;<sup>212</sup> or
- Mitigates risk to life and property by removing Substantially Damaged<sup>213</sup> structures and associated structures and appurtenances as needed to convert property acquired using HMGP funds to uses compatible with open space, recreation, or wetlands management practices. Such removal must be completed within 2 years of the declaration date unless extended by the FEMA Assistant Administrator of the Recovery Directorate.<sup>214</sup>

Debris includes, but is not limited to, vegetative debris, construction and demolition debris, sand, mud, silt, gravel, rocks, boulders, white goods, and vehicle and vessel wreckage.

For a PNP, eligible debris removal is limited to that associated with an eligible facility, including debris on the property of the eligible facility.

Removal of debris from improved public property and public rights-of-way (ROWs), including Federal-aid roads,<sup>215</sup> is eligible. If SLTT governments authorize residents to place incident-

---

<sup>212</sup> This condition is generally restricted to debris removal from large commercial areas when a significant percentage of the commercial sector of a community is impacted and coordinated debris removal is necessary to expedite restoration of the economic viability of the affected community.

<sup>213</sup> Substantial Damage is damage of any origin sustained by a structure whereby the cost of restoring the structure to its before-damaged condition would equal or exceed 50 percent of the market value of the structure before the damage occurred.

<sup>214</sup> Stafford Act § 407, 42 U.S.C. § 5173; 44 C.F.R. § 206.224(a).

<sup>215</sup> The term “Federal-aid roads” means the highways on the Federal-aid highway system and all other public roads not classified as local roads or rural minor collectors. The Federal-aid highway system means the National Highway System and the Dwight D. Eisenhower National System of Interstate and Defense Highways (the Interstate System).

related debris on public ROWs, FEMA provides PA funding to remove the debris from the ROWs for a limited timeframe.

The Applicant needs to provide:

- Estimated debris quantities by type (required for all uncompleted work);
- Photographs of debris impacts, if available;
- Location of temporary reduction sites and permanent disposal sites (required);
- Copies of permits for reduction and disposal sites (required);
- Quantities of debris removed, reduced, disposed, and recycled (by type) with load tickets to support quantities (required if contracted, FEMA reviews a representative sample);
- Tower logs (required if contracted, FEMA reviews a representative sample);
- Documentation to substantiate legal responsibility (required);
- The basis of the immediate threat determination (required);
- Location of debris (required); and
- Documentation to substantiate the debris was deposited by the incident and was not pre-existing (e.g., waterway soundings that show pre-and post-incident levels) (required).

Removal of debris placed on the public ROWs from commercial properties is ineligible unless it is pre-approved by FEMA (see [Chapter 7:I.F.2\(c\). Removal from Commercial Property \(Requires FEMA's Pre-approval\)](#)). Additionally, removal of materials related to the construction, repair, or renovation of either residential or commercial structures is ineligible.

Debris removal from the following is ineligible:

- Federally maintained navigable channels and waterways;
- Flood control works under the authority of the Natural Resources Conservation Service (NRCS). Flood control works under the specific authority of NRCS are those that are part of the Watershed and Flood Prevention Operations (WFPO) Program under PL 83-566;<sup>216</sup>
- Agricultural land; and
- Natural, unimproved land, such as heavily wooded areas and unused areas.<sup>217</sup>

#### Terminology

**Flood control works** are those structures such as levees, flood walls, flood control channels, and water control structures designed and constructed to have appreciable effects in preventing damage by irregular and unusual rises in water levels.

Removing debris to restore the pre-disaster capacity of engineered facilities may be eligible as Permanent Work if the Applicant can substantiate the pre-disaster capacity and maintenance of that facility as described in [Chapter 8:IX.B.1. Restoring the Capacity of Channels, Basins, and Reservoirs](#).

Removal and disposal of pollutants and hazardous substances are eligible as Category B work in accordance with [Chapter 7:II.K. Hazardous Materials](#).

<sup>216</sup> [www.nrcs.usda.gov/wps/portal/nrcs/main/national/programs/landscape/wfpo](http://www.nrcs.usda.gov/wps/portal/nrcs/main/national/programs/landscape/wfpo).

<sup>217</sup> 44 C.F.R. § 206.224(b).

## Environmental and Historic Preservation Considerations

Although debris removal is usually statutorily excluded from NEPA review,<sup>218</sup> FEMA must ensure compliance with other Federal laws, regulations, and EOs prior to funding the work. Accordingly, FEMA must ensure that the Applicant's debris removal operations avoid impacts to such resources as floodplains, wetlands, federally listed threatened and endangered species and their critical habitats, and historic properties (including maritime or underwater archaeological resources if waterways are impacted). The Applicant must stage debris at a safe distance from property boundaries, surface water, floodplains, wetlands, structures, wells, and septic tanks with leach fields. Additional coordination may be necessary for debris removal from waterways, stump removal, and use of fill.

The Applicant should contact applicable Federal, State, Territorial, and Tribal regulatory agencies to ensure compliance with requirements and permits for debris-related operations. Upon completion of debris removal and disposal, site remediation may be necessary at staging sites and other impacted areas. See more detailed discussion of EHP considerations above in Chapter 7, I.

### **A. Alternative Procedures for Debris Removal**

The Applicant may elect to participate in the Alternative Procedures for debris removal and receive reimbursement for straight-time for the Applicant's budgeted employees that conduct debris removal activities. The Applicant opts-in by including straight-time in their debris removal (Category A) project claims.

### **B. Hazardous Limbs, Trees, and Stumps**

Eligible vegetative debris may include tree limbs, branches, stumps, or trees that are still in place, but damaged to the extent they pose an immediate threat. These items are ineligible if the hazard existed prior to the incident, or if the item is in a natural area and does not extend over improved property or public-use areas, such as trails, sidewalks, or playgrounds.

Contractors typically charge debris removal based on a unit price for volume (cubic yards) or weight (tons). A hazardous tree or stump may be collected individually. When these items are collected individually, contractors often charge a price per tree or stump based on its size. FEMA encourages Applicants to procure branch or limb removal from trees on a one-time charge per tree basis as opposed to a unit price per limb or branch to facilitate more cost-effective operations. FEMA has specific eligibility criteria and documentation requirements for funding these items based on a price per each item instead of by volume or weight. If the Applicant does not provide sufficient documentation, it jeopardizes its PA funding.

Bracing a tree is eligible (as Category B) only when doing so is less costly than removal and disposal. If the Applicant chooses to brace a tree rather than remove it, the tree is ineligible for removal later if it dies.

Pruning, maintenance, trimming, and landscaping are ineligible.

---

<sup>218</sup> Stafford Act § 316, 41 U.S.C. § 5159.

## **1. Broken Limb or Branch Removal**

Removal of broken limbs or branches that are 2 inches or larger in diameter (measured at the point of break) that pose an immediate threat are eligible. An example is a broken limb or branch that is hanging over improved property or public-use areas, such as trails, sidewalks, or playgrounds if it could fall and cause injury or damage to improved property.

FEMA does not fund removal of broken limbs or branches located on private property unless:

- The limbs or branches extend over the public ROW;
- The limbs or branches pose an immediate threat; and
- The Applicant removes the hazard from the public ROW (without entering private property).

Only the minimum cut necessary to remove the hazard is eligible. For example, cutting a branch at the trunk is ineligible if the threat can be eliminated by cutting it at the closest main branch junction.

## **2. Tree Removal**

FEMA considers incident-damaged trees to be hazardous and eligible if the tree has a diameter of 6 inches or greater measured 4.5 feet above ground level, and the tree:

- Has a split trunk;
- Has a broken canopy; or
- Is leaning at an angle greater than 30 degrees.

For trees that have 50 percent or more of the root-ball exposed, removal of the tree and root-ball and filling the root-ball hole are eligible. For contracted removal of a tree with a root-ball, FEMA will not reimburse two separate unit costs to remove the tree and its root-ball.

For trees that have less than 50 percent of the root-ball exposed, FEMA only provides PA funding to flush cut the item at ground level and dispose of the cut portion based on volume or weight. Grinding any residual stump after cutting the tree is ineligible.

## **3. Stump Removal**

For stumps that have 50 percent or more of the root-ball exposed, removal of the stump and filling the root-ball hole are eligible. If grinding a stump in-place is less costly than extraction, grinding the stump in-place is eligible.

Stump removal in areas with known or high potential for archaeological resources usually requires that FEMA further evaluate and consult with SHPO or THPO. If the Applicant discovers any potential archeological resources during stump removal, the Applicant must immediately cease work and notify FEMA.

### *(a) Contracted Stump Removal*

FEMA only reimburses contracted costs charged on a per-stump basis if:

- The stump is 2 feet or larger in diameter measured 2 feet above the ground; and
- Extraction is required as part of the removal.

The Applicant needs to ensure the price for stump removal includes extraction, transport, disposal, and filling the root-ball hole.

For stumps that have less than 50 percent of the root-ball exposed, FEMA only provides PA funding to flush cut the item at ground level and dispose of the cut portion based on volume or weight. Grinding any residual stump is ineligible.

For stumps smaller than 2 feet in diameter, or for stumps of any size that do not require extraction, FEMA only provides PA funding based on volume or weight as removal of these stumps does not require special equipment. If the Applicant claims reimbursement of these stumps on a per stump basis, FEMA limits PA funding based on a unit price for volume or tons, calculated using [Appendix E: Stump Conversion Table](#).

If the Applicant incurs additional costs in picking up stumps 2 feet or larger in diameter that the contractor did not extract, it should complete [Appendix F: Hazardous Stump Worksheet](#) and present documentation to substantiate the costs as reasonable based on the equipment required to perform the work.

#### **4. Documentation Requirements for Hazardous Limbs, Trees, and Stumps**

The Applicant must retain, and provide when requested, all of the following documentation to support the eligibility of contracted work to remove tree limbs, branches, stumps, or trees that are still in place:

- Specifics of the immediate threat with the location (geographical coordinates in latitude, longitude) and photograph or video documentation that establishes the item is on public property (required, FEMA reviews a representative sample);
- Quantity removed (Note: If a contractor charged an individual price for each limb, tree, or stump removed, FEMA requires the diameter of each item removed. For stumps, the measurement must be 2 feet up the trunk from the ground. For trees, it must be 4.5 feet up from the ground.) (required);
- Quantity, location, and source of material to fill root-ball holes (required); and
- Equipment used to perform the work (required).

#### **C. Waterways**

Debris removal from waterways that is necessary to eliminate the immediate threat to life, public health and safety, or improved property is eligible. Removal of debris in a waterway that does not meet this criterion is ineligible, even if the debris is deposited by the incident.

The EPA and U.S. Coast Guard (USCG) have the specific authority to remove hazardous materials, as described in the previous section. EPA is responsible for removing such material from inland water zones and USCG is responsible for coastal water zones. Debris removal from waterways usually requires coordination with the U.S. Army Corps of Engineers (USACE) for the use of a Nationwide permit and with the National Marine Fishery Service (NMFS) and U.S. Fish and Wildlife Service (USFWS) to ensure compliance with Section 7 of the Endangered Species Act (ESA).

## 1. Navigable Waterways

If the Applicant has legal responsibility for maintenance of a navigable waterway, removal and disposal of debris that obstructs the passage of vessels is eligible to a maximum depth of 2 feet below the low-tide draft of the largest vessel that utilized the waterway prior to the incident. Any debris below this zone is ineligible unless it is necessary to remove debris extending upward into an eligible zone.

If a tree is still rooted to an embankment and is floating or submerged, the cost to cut the tree at the water's edge is eligible.

Debris removal from federally maintained navigable waterways is ineligible. USCG and the USACE have specific authorities for removal of hazardous substances, vessels, and other obstructions from federally maintained navigable waterways.

## 2. Non-navigable Waterways, Including Flood Control Works and Natural Waterways

Debris deposited by the incident may obstruct a natural waterway (that is, a waterway that is not improved or maintained) or a constructed channel, including flood control works. In these cases, removal of the debris from the channel is eligible if the debris poses an immediate threat, such as when the debris:

- Obstructs, or could obstruct, intake structures;
- Could cause damage to structures, such as bridges and culverts; or
- Is causing, or could cause, flooding to improved public or private property during the occurrence of a 5-year flood.

Removal of the obstruction is eligible in **streams** where debris removal might also be eligible under the NRCS Emergency Watershed Protection Program (EWP)<sup>219</sup> unless NRCS provides assistance for the debris removal. However, FEMA, the Recipient, and the Applicant need to coordinate with NRCS first to ensure that any work performed does not jeopardize other assistance that may be eligible under the EWP.

Debris removal from **flood control works** that are under the specific authority of NRCS is ineligible for PA funding, even if NRCS does not have sufficient funding or does not provide assistance. Flood control works under the specific authority of NRCS are those that are part of the WFPO Program under PL 83-566.<sup>220</sup>

For flood control works that are eligible for the USACE Rehabilitation and Inspection Program (RIP),<sup>221</sup> debris

### NRCS EWP and USACE RIP

The **NRCS EWP** is an emergency recovery program designed to relieve imminent hazards to life and property caused by floods, fires, windstorms, and other natural occurrences. Activities include, but are not limited to, providing financial and technical assistance to:

- Remove debris from stream channels, road culverts, and bridges
- Reshape and protect eroded banks
- Correct damaged drainage facilities
- Establish cover on critically eroding lands
- Repair levees and structures
- Repair conservation practices

The **USACE RIP** provides rehabilitation assistance for flood risk reduction structures.

<sup>219</sup> [www.nrcs.usda.gov/wps/portal/nrcs/main/national/programs/landscape/ewpp](http://www.nrcs.usda.gov/wps/portal/nrcs/main/national/programs/landscape/ewpp).

<sup>220</sup> [www.nrcs.usda.gov/wps/portal/nrcs/main/national/programs/landscape/wfpo](http://www.nrcs.usda.gov/wps/portal/nrcs/main/national/programs/landscape/wfpo).

<sup>221</sup> [www.usace.army.mil/Missions/CivilWorks/LeveeSafetyProgram/LeveeInspections.aspx](http://www.usace.army.mil/Missions/CivilWorks/LeveeSafetyProgram/LeveeInspections.aspx).

removal is eligible for PA funding. USACE does not reimburse Applicants for debris removal but conducts this activity directly when necessary.

### **3. Identifying Debris Impact Locations**

The Applicant is responsible for identifying debris deposited by the incident that poses an immediate threat. Random surveys to look for debris, including surveys performed using side scan sonar, are ineligible. However, if the Applicant identifies an area of debris impacts and demonstrates the need for a survey to identify specific immediate threat, FEMA may provide PA funding for the survey in that location, including the use of side scan sonar.

#### **D. Privately Owned Vehicles and Vessels on Public Property**

Removal of privately-owned vehicles and vessels from public property is eligible if all of the following conditions are met:

- The vehicle or vessel blocks access to a public-use area;
- The vehicle or vessel is abandoned;
- The Applicant follows applicable SLTT government ordinances or laws for private vehicle or vessel removal; and
- The Applicant documents the handling of the vehicle or vessel.

The Applicant needs to retain documentation to support it met these criteria.

A limited timeframe for vehicle and vessel storage is eligible if it is necessary to remove the item prior to being able to identify the owner. If the owner is identified, the Applicant should work with private property owners to pursue and recover storage and removal costs and credit FEMA the Federal share of any funds received.

#### **E. Disposal**

FEMA provides PA funding for various costs related to disposing of debris. The Applicant should dispose of debris in an efficient and cost-effective manner.

Vegetative debris is bulky and can consume a significant volume of landfill space. To minimize the use of landfill space, FEMA encourages the Applicant to reduce the volume of vegetative debris before burying. Costs to reduce vegetative debris using methods such as mulching, grinding, or burning are eligible.

When removing sand, disposal of sand spoils on a public beach may be eligible as part of the debris removal project when it is the most cost-effective method of disposal.

Certain types of construction and demolition debris are reusable or recyclable. The Applicant should conserve landfill space by separating materials for reuse or recycling.

#### **1. Recycling Revenue**

If the Applicant receives revenue for recycling debris, FEMA reduces PA funding by the amount of revenue received. The Applicant may deduct costs for administering and marketing the sale of the salvageable materials from the fair market value.

If a contract allows the contractor to take possession of salvageable material and benefit from its sale to lower bid prices, there is no salvage value to be recovered at the end of the project. Therefore, the Applicant has no further obligation to FEMA.

## 2. Temporary Staging Sites

Establishing and operating a temporary staging site necessary for debris separation and reduction is eligible. The cost to lease property is eligible. Additionally, if the terms of the lease require that the Applicant restore the leased property back to its condition prior to the Applicant's use, the costs related to that restoration are also eligible as part of the Category A project. If leased, the Applicant must provide the lease agreement.

## 3. Hand-Loaded Trucks and Trailers

FEMA has determined that, for vegetative debris, hand-loaded trucks and trailers achieve approximately half the compaction level of mechanically loaded trucks and trailers. Therefore, FEMA only provides PA funding for 50 percent of the vegetative debris in hand-loaded trucks and trailers.

Similarly, trucks without solid tailgates cannot be compacted to full capacity. Therefore, FEMA only funds up to a maximum of 85 percent of the debris in trucks without solid tailgates.

The Applicant must document the types and total quantity of hand-loaded debris, and the types and total quantity of debris hauled in trucks without solid tailgates and provide this information to FEMA to ensure appropriate reductions are taken for this debris.

## 4. Landfills and Tipping Fees

Landfill tipping fees usually include fixed and variable costs, along with special taxes or fees assessed by the jurisdiction in which the landfill is located. Eligible tipping fee costs are limited to the variable and fixed costs that are directly related to landfill operations, such as recycling tax. The components of tipping fees that are not directly related to landfill operations, such as special taxes or fees related to other government services or public infrastructure, are ineligible as part of the tipping fee. When providing PA funding for tipping fees, FEMA removes any ineligible components.

The Applicant may use a significant portion of the available capacity of a landfill to dispose of incident-related debris. Although FEMA provides PA funding for tipping fees, it cannot provide PA funding for the value of the loss of landfill capacity due to incident-related debris.

### Eligible Tipping Fee Components

#### Eligible fixed costs include:

- Equipment
- Construction
- Permits
- Landfill closure
- Post-closure activities
- Amortized costs for facilities that support the landfill

#### Eligible variable costs include:

- Labor
- Supplies
- Maintenance
- Operation of utilities
- Operation of gas recovery systems

## F. Monitoring Contracted Debris Removal Operations

FEMA requires the Applicant to monitor all contracted debris operations to ensure that the quantities and work claimed are accurate and eligible. This includes documenting debris quantities by types, quantities reduced, reduction methods, and pickup and disposal locations. If the Applicant does not monitor contracted debris removal operations, it jeopardizes its PA funding for that work.

The Applicant may use force account resources (including temporary hires), contractors, or a combination of these for monitoring. It is not necessary, or cost-effective, to have Professional Engineers or other certified professionals perform debris monitoring duties. FEMA considers costs unreasonable when associated with the use of staff that are more highly qualified than necessary for the associated work. If the Applicant uses staff with professional qualifications to conduct debris monitoring, it must document the reason it needed staff with those qualifications.

FEMA provides training to the Applicant's force account debris monitors (including its temporary hires) upon request.

Eligible activities associated with debris monitoring include, but are not limited to:

- Field supervisory oversight;
- Monitoring contracted debris removal at both the loading and disposal sites
- Compiling documentation, such as load tickets and monitor reports, to substantiate eligible debris; and
- Training debris monitors on debris removal operations, monitoring responsibilities and documentation processes, and FEMA debris eligibility criteria.

## G. Debris Removal from Private Property

Debris removal from private property (PPDR) is the responsibility of the property owner and is usually ineligible under the PA Program. In limited circumstances, based on the severity of the impact of an incident and whether debris on private property is so widespread that it threatens public health and safety or the economic recovery of the community, FEMA may determine that debris removal from private property is eligible under the PA Program. In such cases, FEMA works with the SLTT governments to designate specific areas where debris removal from private property, including private waterways, is eligible. The debris removal must be in the public interest, not merely benefiting an individual or a limited group of individuals. Figure 11. *Debris on Private Property* is an example of the level of debris impacts that may warrant FEMA assistance for PPDR.

**Figure 11. Debris on Private Property**

## 1. Approval Process

The Applicant must submit a written request to FEMA identifying the specific properties or areas of properties where private property debris removal activities will occur. Once FEMA receives the request, it engages with the Recipient and Applicant to review the request and conduct site inspections. With exception of debris removal from commercial property, the Applicant does not need to wait for FEMA approval to start work. However, for the Applicant to receive PA funding, FEMA must determine that the PPDR work at each property is eligible.

FEMA only approves PA funding for PPDR if the Applicant demonstrates all of the following with sufficient documentation:

### (a) *Legal Authority and Indemnification*

FEMA accepts a written statement from an authorized Applicant official that:

- Certifies the Applicant has legal authority and responsibility to remove debris from private property;
- Cites all applicable sources of authority (law, ordinance, code, contract, etc.); and
- Indemnifies the United States for any claim arising from the debris removal.

### (b) *Public Interest.*

The Applicant must demonstrate that the PPDR was in the public interest.<sup>222</sup> This includes:

- The basis for the determination that removing the debris from the private property locations requested was in the public interest. The determination must be made by the State, Territorial, Tribal, county, or municipal government's public health authority or other public entity that has legal authority to make a determination that disaster-generated debris on private property constitutes an immediate threat to life, public health, or safety, or to the economic recovery of the community at large.
- The established, specific legal requirements for declaring the existence of a threat to public health and safety.

FEMA evaluates the submission to determine if it concurs that PPDR is in the public interest and provides a written response specifying any properties or area of properties for which it approves funding for debris removal.

## 2. Removal from Private Roads

Private roads are those that are not owned or operated by or otherwise the legal responsibility of a Federal or SLTT entity (including orphan roads, roads in gated communities, homeowners' association roads, etc.). If the public has unrestricted access (no locks, gates, or guards) and

### Clarification of Demolition versus Debris

If more than one wall of a structure is standing and not in immediate danger of collapsing, FEMA considers the removal of that structure to be demolition and not debris removal. Demolition is subject to additional requirements and **must** comply with [Chapter 7:II.U. Demolition of Private Structures](#).

<sup>222</sup> Stafford Act § 407, 42 U.S.C. § 5173; 44 C.F.R. § 206.224(b).

frequently uses the private road, then removal and disposal of the debris, including debris placed at the curbside by residents, is in the public interest and the Applicant is not required to submit documentation demonstrating the debris removal is in the public interest. This does not include debris on private driveways or parking lots. It also does not include removal and disposal activities from private roads in areas with restricted access (roads behind locks, gates, or guards) or private roads that are unrestricted but rarely used by the public. The Applicant must provide further documentation to establish that removal is in the public interest in these areas and, though not required, Applicants should consider obtaining approval from FEMA prior to starting removal and disposal. Debris clearance (push or cut and toss) for emergency access may be eligible as Category B work if it meets the criteria in [Chapter 7:II.J. Emergency Access](#).

### **3. Removal from Private Residential Property**

Debris removal from residential property is usually not in the public interest because the debris does not typically present an immediate health and safety threat to the general public. If the incident generates debris quantities and/or types of debris on residential property that is so widespread or of such magnitude that it creates an immediate threat to public health and safety, debris removal may be in the public interest. To determine if removal of debris from private residential property is in the public interest, FEMA evaluates the public health determination (see [Chapter 7:I.E.1\(b\). Public Interest](#), and will consider:

- Whether the debris is located in open areas accessible to the public (e.g., in a yard with no fence barrier next to a public sidewalk), located in maintained areas, or creating a health and safety hazard (such as a rodent infestation);
- Volume of debris;
- Height of debris;
- Number of houses and blocks with large volumes of debris; and
- Amount of the public population affected.

Given these additional considerations, Applicants should consider obtaining approval from FEMA prior to starting work.

### **4. Removal from Commercial Property (Requires FEMA's Pre-approval)**

Removal of debris from commercial properties, such as industrial parks, golf courses, cemeteries, apartments, condominiums, and trailer parks is generally ineligible because commercial enterprises are expected to retain insurance that covers debris removal. In very limited, extraordinary circumstances, FEMA may provide an exception. In such cases, the Applicant must meet the requirements of [Chapter 7:I.E.1. Approval Process](#) and FEMA must approve the work prior to the Applicant removing the debris.

### **5. Duplication of Benefits**

The Applicant needs to work with private property owners to pursue and recover insurance proceeds and credit FEMA the Federal share of any insurance proceeds received. In some circumstances, FEMA may provide IA assistance to individuals for debris removal; consequently, FEMA PA staff coordinate closely with IA staff to ensure FEMA does not fund the same work under both programs.

## II. Emergency Protective Measures (Category B)

Emergency protective measures conducted before, during, and after an incident are eligible if the measures:

- Eliminate or lessen immediate threats to lives, public health, or safety; OR
- Eliminate or lessen immediate threats of significant additional damage to improved public or private property in a cost-effective manner.<sup>223</sup>

FEMA may require certification by Federal or SLTT government officials that a threat exists, including:

- Identification and evaluation of the threat; and
- Recommendations of the work necessary to cope with the threat.<sup>224</sup>

### Environmental and Historic Preservation Considerations

Although emergency protective measures are usually statutorily excluded from NEPA review, FEMA **must** ensure compliance with other Federal laws, regulations, and EOs prior to funding the work. Accordingly, FEMA **must** ensure that the Applicant's emergency protective measures avoid impacts to such resources as floodplains, wetlands, federally listed threatened and endangered species and their critical habitats, and historic properties. Additional coordination may be necessary for projects such as, but not limited to, new construction related to the temporary relocation of emergency services, mosquito abatement, disposal of contaminated sandbags, or the construction of temporary levees, roadways, or bridges. See more detailed discussion of EHP considerations above in Chapter 7:I.

#### **A. Saving Lives and Protecting Public Health and Safety**

Emergency protective measures save lives or protect public health or safety. Eligible emergency protective measures and costs include, but are not limited to:

- Transporting and pre-positioning equipment and other resources for response;
- Flood fighting;
- EOC-related costs;
- Emergency access;
- Supplies and commodities;
- Medical care and transport;
- Evacuation and sheltering, including that provided by another State or Tribal government;
- Childcare;
- Safety inspections;
- Animal carcass removal;<sup>225</sup>

---

<sup>223</sup> 44 C.F.R. § 206.225(a)(3).

<sup>224</sup> 44 C.F.R. § 206.225(a)(2).

<sup>225</sup> FEMA may fund the removal of animal carcasses as Category A if the removal is part of the Applicant's overall debris disposal operation as opposed to a separate and distinct operation.

- Demolition of structures<sup>226</sup>;
- Search and rescue to locate survivors, household pets, and service animals requiring assistance;
- Firefighting;
- Security, such as barricades, fencing, or law enforcement;
- Use or lease of temporary generators for facilities that provide essential community services;
- Dissemination of information to the public to provide warnings and guidance about health and safety hazards using various strategies, such as flyers, public service announcements, or newspaper campaigns;
- Searching to locate and recover human remains;
- Storage and interment of unidentified human remains; and
- Mass mortuary services.

The following are eligible under limited circumstances based on specific criteria described in each of the referenced sections:

- Expenses related to operating a facility or providing an emergency service (see [Chapter 7:II.F. Expenses Related Operating a Facility or Providing a Service](#));
- Mosquito abatement (see [Chapter 7:II.Q. Mosquito Abatement](#));
- Temporary relocation of essential services (see [Chapter 7:II.V. Temporary Relocation of Essential Services](#)); and
- Snow-related activities when specifically authorized in the declaration (see [Chapter 7:II.W. Snow-Related Activities](#)).

## **B. Protecting Improved Property**

Eligible emergency protective measures to protect improved property<sup>227</sup> include, but are not limited to:

- Constructing emergency berms or temporary levees to provide protection from floodwaters or landslides;
- Emergency repairs necessary to prevent further damage, such as covering a damaged roof to prevent infiltration of rainwater;
- Buttressing, shoring, or bracing facilities to stabilize them or prevent collapse;
- Emergency slope stabilization;
- Mold remediation;
- Removal and storage of contents from eligible facilities for the purpose of minimizing additional damage;
- Extracting water and clearing mud, silt, or other accumulated debris from eligible facilities if the work is conducted expeditiously for the purpose of addressing an immediate threat (if the work is only necessary to restore the facility, it is Permanent Work, not Emergency Work);

---

<sup>226</sup> FEMA usually reimburses demolition of a public structure as part of the Permanent Work project to replace the facility.

<sup>227</sup> 44 C.F.R. § 206.221(d). Improved property means a structure, facility or item of equipment which was built, constructed or manufactured. Land used for agricultural purposes is not improved property.

- Taking actions to save the lives of animals that are eligible for replacement (see [Chapter 8:IX.C.5. Animals](#)).

### **C. Emergency Protective Measures on Private Property**

In limited circumstances, FEMA may determine that emergency protective measures conducted on private property are eligible under the PA Program if:

- The immediate threat is widespread, affecting numerous homes and businesses such that it is a threat to the health and safety of the general public;
- The Applicant has legal authority to perform the work; and
- The Applicant obtained rights-of-entry and agreements to indemnify and hold harmless the Federal government.

Situations where this may occur are generally limited to:

- Demolition of unsafe private structures that endanger the public ([Chapter 7:II.U. Demolition of Private Structures](#));
- Installation of fiber-reinforced sheeting to cover damaged roofs, commonly referred to as Operation Blue Roof (DFA only) ([Chapter 7:II.X.1. Operation Blue Roof](#));
- Provision of emergency access ([Chapter 7:II.J. Emergency Access](#));
- Pumping of flooded basements;
- Pumping of septic tanks or decontamination of wells causing a pollution threat ([Chapter 7:II.K. Hazardous Materials](#));
- Residential electric meter repair ([Chapter 7:II.R. Residential Electrical Meter Repair](#));
- Safety inspections ([Chapter 7:II.S. Safety Inspections](#)); and
- Stabilizing a slope ([Chapter 7:II.X.2. Slope Stabilization](#)).

Upon submittal of its claim, the Applicant must include the following support documentation for the work to be eligible:

- A detailed explanation documenting the Applicant's legal authority and responsibility to enter private property;
- The basis for the determination that a threat exists to the general public; and
- Copies of the rights-of-entry and agreements to indemnify and hold harmless the Federal government.

If the above criteria are not met, the private property owner may be eligible for assistance under FEMA's IA Programs. FEMA PA and IA staff coordinate closely to ensure FEMA does not fund the same work under both programs.

### **D. Emergency Protective Measures Conducted by Private Nonprofit Organizations**

For PNPs, eligible emergency protective measures are generally limited to activities associated with preventing damage to an eligible facility and its contents.

Emergency services are usually the responsibility of SLTT governments. Therefore, PNPs are generally not legally responsible for those services and FEMA does not provide PA funding to PNPs for the costs associated with providing those services. When a PNP provides emergency services at the request of, and certified by, the legally responsible government entity, FEMA

provides PA funding through that government entity as the eligible Applicant. These services include:

- Fire and rescue activities;
- Animal control;
- Emergency ambulance service for evacuation;
- 211 call services, if tracked and related to eligible work; and
- Other similarly urgent governmental services.

PNPs that own or operate a medical or custodial care facility are eligible for direct reimbursement of costs related to patient evacuation. In limited circumstances, FEMA may also reimburse a PNP directly when essential components of a facility are urgently needed to save lives or protect health and safety, such as an emergency room of a PNP hospital or a PNP sewage or water treatment plant.

Additionally, if a PNP volunteer fire department operates based on established agreements with a SLTT government that designates the volunteer fire department as an official recognized entity legally authorized to provide emergency services in areas of coverage specifically designated by the SLTT government, FEMA may reimburse the volunteer fire department directly as an eligible Applicant.

#### **E. Pre-positioning Resources**

Costs related to pre-positioning resources specifically for the declared incident are eligible if the resources are used in the performance of eligible Emergency Work.

Additionally, costs related to pre-positioning resources outside of the declared area are eligible when related to conducting search and rescue, evacuation, sheltering, or providing emergency medical care during the evacuation period (such as ambulances, buses, and staff) provided the resources were ultimately used for the declared area.

#### **F. Expenses Related to Operating a Facility or Providing a Service**

The Applicant may incur increased costs related to operating a facility or providing a service as a result of the incident because of an increased demand for the services the facility provides.

These additional costs are only eligible if:

- The services are specifically related to eligible emergency actions to save lives or protect public health and safety or improved property;
- The costs are for a limited timeframe based on the emergency or exigency of the circumstances; and
- The Applicant tracks and documents the additional costs.

Increased operating costs that may be eligible for a limited time, include but are not limited to, costs for:

- Generators at a hospital or police station;
- Water testing and treatment, including supplies, in the immediate aftermath of the incident to counter a specific threat;
- Fuel for increased use of a pumping station; and
- EOC facility costs (e.g., utilities).

Increased operating costs that are ineligible, even for a limited time, include but are not limited to, costs for:

- Patient care, except as noted in [Chapter 7:II.N. Medical Care](#);
- Administrative activities;
- Provision of food, except as noted in [Chapter 7:II.L. Supplies and Commodities](#); and [M. Meals](#);
- Costs related to staff that were retained to work additional hours, but did not perform eligible Emergency Work (e.g., staff working additional shifts due to other staff's inability to get to work);
- Obtaining electrical power from an alternate source;
- Obtaining water from an alternate source;
- School make-up days, including contracted costs for bus service for make-up days;
- Provision of school bus service including fuel or mileage for transporting students from alternate locations or to alternate schools or temporary facilities; and
- Modification or construction of a new landfill to add landfill capacity.

For PNPs, operating costs are generally ineligible even if the services are emergency services, unless the PNP performs an emergency service at the request of and certified by the legally responsible government entity. In such case, FEMA provides PA funding through that government entity as the eligible Applicant.

#### **G. Emergency Public Transportation and Communication (DFA only)**

A SLTT government may provide emergency communication services and public transportation when existing systems are damaged to the extent vital functions of community life or incident response are disrupted. The costs of these services are ineligible for reimbursement.<sup>228</sup> However, FEMA may provide short-term DFA for these services.<sup>229</sup>

#### **H. Flood Fighting**

Flood fighting activities may include, but are not limited to, sandbagging, dewatering behind a levee by breaching or pumping, or increasing the height of a levee. These activities are eligible if necessary to reduce an immediate threat to life, public health and safety, or improved property. These activities are eligible even if they are associated with a facility that is eligible for the USACE RIP, as USACE cannot reimburse the Applicant for flood fighting. However, they are ineligible if associated with flood control works under the specific authority of NRCS.

The repair of deliberate breaches made by the Applicant to accomplish dewatering is eligible as part of the Emergency Work Project.

Dewatering agricultural and natural areas behind levees and other water control structures is ineligible.

---

<sup>228</sup> Transportation costs for the purpose of evacuation are eligible for reimbursement as described in [Chapter 7:II.O. Evacuation and Sheltering](#).

<sup>229</sup> Stafford Act §§ 418 and 419, 42 U.S.C. §§ 5185 and 5186; 44 C.F.R. §§ 206.225(c) and (d).

## I. Emergency Operations Centers

The Applicant may use its EOC to direct and coordinate resources and response activities for a period of time. Response activities conducted at EOCs are eligible provided they are associated with eligible work. Costs associated with operating the EOC are also eligible, including, but not limited to:

- Increased utility costs;
- Costs to lease a facility;
- Supply costs; and
- Meal costs, as described in [Chapter 7:II.M. Meals](#).

## J. Emergency Access

There are times when the incident causes damage or debris blockage to access routes to an essential community service, or to a community with survivors. If the extent of damage or blockage makes these areas inaccessible, work related to providing access is eligible. This includes clearing debris from or conducting emergency repairs to an access facility, such as a road or bridge. Eligible work is limited to that necessary for the access to remain passable. Any debris removal or additional debris clearance is Category A and funded based on the criteria in [Chapter 7:I. Debris Removal \(Category A\)](#).

### Debris Clearance versus Debris Removal

Debris Clearance is the clearance of debris to allow passage only. It does not include hauling or disposing of the debris. Debris clearance is often referred to as “cut and toss” or “push”.

Debris Removal includes hauling and disposing of debris at a temporary or final disposal site.

Private roads are those that are not owned or operated by or otherwise the legal responsibility of a local, county, Tribal, Territorial, State, or Federal entity. Clearance of debris from private roads—including orphan roads, roads in gated communities, homeowners’ association roads, etc. is in the public interest if the debris impairs emergency access by local emergency responders, ambulances, fire, and police. For example, downed trees may be cut and moved off the roadway. Eligible work is limited to that necessary for roads to remain passable but might include removal and disposal during the initial pass as necessary to ensure emergency access. The Applicant is not required to submit documentation demonstrating that debris clearance is in the public interest.

The Applicant must complete all necessary legal processes or obtains rights-of-entry and agreements to indemnify and hold harmless the Federal Government.

Emergency repairs to privately-owned roads, including those within gated communities, are eligible only when all of the following conditions are met:

- There is no other access point;
- Repair of the damage economically eliminates the need for temporary housing; and
- The Applicant completes all legal processes and obtains rights-of-entry and agreements to indemnify and hold harmless the Federal Government.

Upon submittal of its claim, the Applicant must include documentation supporting that it met the conditions above in order for the work to be eligible.

## **K. Hazardous Materials**

Removal and disposal of pollutants and hazardous substances are eligible. Eligible activities include:

- Separation of hazardous materials from other debris;
- Specialized procedures for handling and disposing of hazardous materials;
- Control or stabilization of the hazardous material;
- Pumping water contaminated with the hazardous material; and
- Clean-up and disposal of the hazardous material.

Testing for contaminants in water, air, or soil necessary to ensure elimination of the immediate threat is eligible in accordance with [Chapter 7:II.F. Expenses Related to Operating a Facility or Providing a Service](#). However, testing for the purpose of long-term cleanup actions is ineligible.

The Applicant must comply with Federal and SLTT government environmental requirements for handling hazardous materials. Before handling or disposing of hazardous materials, the Applicant should contact the appropriate Federal or SLTT agency to obtain required permits, notify proper agencies of hazardous materials storage, and to coordinate the creation of any required facility specific Emergency Response Plans for spills, safety and proper handling. Additionally, appropriate certified hazardous waste specialists should handle, capture, recycle, reuse, or dispose of hazardous materials. When providing PA funding for work involving the handling of hazardous materials, FEMA must ensure compliance with the Resource Conservation and Recovery Act (RCRA).

Additionally, the Comprehensive Environmental Response Compensation and Liability Act (CERCLA) authorizes the Federal Government to respond directly to releases or threatened releases of hazardous substances that may endanger public health or the environment. Under CERCLA and the Clean Water Act (CWA), EPA<sup>230</sup> and the USCG have the authority to respond to actual or potential discharges of oil, hazardous substances, pollutants, and contaminants that may present an imminent and substantial danger to public health or welfare. EPA has responsibility for responses in the inland zone<sup>231</sup> and the USCG has responsibility for responses in the coastal zone.<sup>232</sup> Response actions may include containment, stabilization, decontamination, collection (e.g., orphan tanks, drums), and disposal.

## **L. Supplies and Commodities**

The purchase of supplies and commodities required for emergency protective measures is eligible.

Costs related to the Applicant purchasing supplies or using its own stock to perform Emergency Work are eligible and reimbursed in accordance with [Chapter 6:III.5. Supplies](#). Examples

---

<sup>230</sup> See Recovery Policy 9523.8, *Mission Assignments for ESF#10*, for discussion on U.S. Environmental Protection Agency (EPA) and U.S. Coast Guard (USCG) authority with respect to removal of hazardous waste: [www.fema.gov/sites/default/files/2020-07/fema\\_ESF\\_10\\_Oil-Hazardous-Materials.pdf](http://www.fema.gov/sites/default/files/2020-07/fema_ESF_10_Oil-Hazardous-Materials.pdf).

<sup>231</sup> The inland zone is the environment inland of the coastal zone, excluding the Great Lakes and specified ports and harbors on inland rivers. Precise boundaries are identified in Federal regional contingency plans.

<sup>232</sup> The coastal zone includes coastal waters (including the lands therein and thereunder) and the adjacent shorelands (including the waters therein and thereunder), strongly influenced by each other and in proximity to the shorelines of coastal States, including islands, transitional and intertidal areas, salt marshes, wetlands, and beaches.

include, but are not limited to, safety equipment, personal protective equipment, radios, power tools, sand, and tarps.

Purchasing and packaging life-saving and life-sustaining commodities and providing them to the impacted community are eligible. Examples of such commodities include, but are not limited to, food, water, ice, personal hygiene items, cots, blankets, tarps, plastic sheeting for roof damage, and generators, as well as food and water for household pets and service animals. The cost of delivering these same commodities to unsheltered residents in communities where conditions constitute a level of severity such that these items are not easily accessible for purchase is also eligible. This includes food and water for household pets whose owners are in shelters.

The cost of leasing distribution and storage space for the commodities is also eligible.

### **M. Meals**

Applicants often provide meals for emergency workers. Provision of meals, including beverages and meal supplies, for employees and volunteers engaged in eligible Emergency Work, including those at EOCs, is eligible provided the individuals are not receiving per diem and one of the following circumstances apply:

- Meals are required based on a labor policy or written agreement that meets the requirements of [Chapter 6. Cost Eligibility](#);
- Conditions constitute a level of severity that requires employees to work abnormal, extended work hours without a reasonable amount of time to provide for their own meals; or
- Food or water is not reasonably available for employees to purchase.

FEMA only reimburses the cost of meals that are brought to the work location and purchased in a cost-effective and reasonable manner, such as bulk meals. FEMA does not reimburse costs related to group outings at restaurants or individual meals.<sup>233</sup>

### **N. Medical Care**

When the emergency medical delivery system within a declared area is destroyed, severely compromised or overwhelmed, FEMA may fund extraordinary costs associated with operating emergency rooms and with providing temporary facilities for emergency medical care of survivors. Costs associated with emergency medical care should be customary for the emergency medical services provided. Costs are eligible for up to 30 days from the declaration date unless extended by FEMA.

---

<sup>233</sup> FEMA reimburses meal costs as part of a contract in accordance with the contract terms provided it meets the requirements in [Chapter 4:VIII. Procurement and Contracting Requirements](#).

Eligible medical care includes, but is not limited to:

- Triage and medically necessary tests and diagnosis;
- Treatment, stabilization, and monitoring;
- First-aid assessment and provision of first aid;
- A one-time 30-day supply of prescriptions for acute conditions or to replace maintenance prescriptions;
- Vaccinations for survivors and emergency workers to prevent outbreaks of infectious and communicable diseases;
- Durable medical equipment;
- Consumable medical supplies;
- Temporary facilities, such as tents or portable buildings for treatment of survivors;
- Leased or purchased equipment for use in temporary medical care facilities;
- Security for temporary medical care facilities; and
- Use of ambulances for distributing immunizations and setting up mobile medical units.

### Terminology

**Durable medical equipment** is reusable medical equipment necessary for the treatment of an illness or injury or to prevent a patient's further deterioration. The equipment includes, but is not limited to:

- Oxygen equipment
- Wheelchairs
- Walkers
- Hospital beds
- Crutches
- Other medical equipment

**Consumable medical supplies** are medical supplies that are ingested, injected, or applied or are for one-time use only, including, but not limited to:

- Medical supplies
- Medications
- Diapers
- Adult incontinence briefs
- Bandages

Long-term medical treatment is ineligible. FEMA determines the reasonableness of these costs based on Medicare's cost-to-charge ratio (a ratio established by Medicare to estimate a medical service provider's actual costs in relation to its charges).

FEMA does not provide PA funding for these costs if underwritten by private insurance, Medicare, Medicaid, or a pre-existing private payment agreement.<sup>234</sup> The Applicant must take reasonable steps to provide documentation on a patient-by-patient basis verifying that insurance coverage or any other source funding including private insurance, Medicaid, or Medicare, has been pursued and does not exist for the costs associated with emergency medical care and emergency medical evacuations.

Ineligible costs include:

- Medical care costs incurred once a survivor is admitted to a medical facility on an inpatient basis;
- Costs associated with follow-on treatment of survivors beyond 30 days of the declaration; and
- Administrative costs associated with the treatment of survivors.

---

<sup>234</sup> Stafford Act § 312, 42 U.S.C. § 5155.

## O. Evacuation and Sheltering

Evacuation and sheltering of survivors are eligible activities. This includes household pets and service and assistance animals, but not exhibition or livestock animals.

### 1. Evacuation

Transportation to evacuate (and subsequently return) survivors, household pets, service animals, assistance animals, luggage, and durable medical equipment is eligible. This includes emergency medical transportation. The mode of transportation should be customary and appropriate for the work required.

Eligible activities include, but are not limited to:

- Transferring patients from inoperable, compromised, or overwhelmed eligible medical or custodial care facilities to another medical facility or to a shelter;
- Transferring patients back to original medical or custodial care facility, when appropriate;
- Transporting survivors, including shelterees, who require emergency medical care to and from the nearest existing or temporary medical care facility equipped to adequately treat the medical emergency. Transport may include emergency air, sea, or ground ambulance services if necessary;
- Use of equipment such as buses, trucks, or other vehicles (including accessible vehicles) to provide one-time transportation to evacuate survivors and their household pets and service and assistance animals to emergency shelters from pre-established pick-up locations. This includes standby time for drivers and contracted equipment while waiting to transport survivors;
- Paratransit transportation services, such as vans, minibuses, and buses, (including accessible vehicles) to transport senior citizens, individuals with disabilities (including mobility disabilities) or access and functional needs, individuals in nursing homes and assisted-living facilities, and homebound individuals impacted by the incident;
- Tracking of evacuees, household pets, service animals, luggage, and durable medical equipment. This includes the use of animal microchips for the purpose of tracking evacuated animals;
- Food and water provided during transport;
- Emergency medical care provided during transport, including emergency medical personnel and supply costs;
- Stabilization of individuals injured during evacuation; and

#### Terminology

**Household pets** are domesticated animals that:

- Are traditionally kept in the home for pleasure rather than for commercial purposes
- Can travel in commercial carriers
- Can be housed in temporary facilities

Examples are dogs, cats, birds, rabbits, rodents, and turtles.

Household pets do not include reptiles (except turtles), amphibians, fish, insects, arachnids, farm animals (including horses), or animals kept for racing purposes.

**Service animals** are dogs that are individually trained to do work or perform tasks for people with disabilities or access and functional needs.

**Assistance animals** are animals that work, provide assistance, or perform tasks for the benefit of a person with a disability, or provide emotional support that alleviates identified symptoms or effects of a person's disability.

Although dogs are the most common type of assistance animal, other animals can also be assistance animals.

- Costs incurred in advance of an incident necessary to prepare for evacuations in threatened areas. Costs may include mobilization of ambulances and other transport equipment. Contracts for staging ambulance services must be part of the State, Territorial, Tribal, or regional evacuation plan. Costs of staging ambulances are eligible even if the incident does not impact the area normally served by those ambulances. PA funding for activating, staging, and using ambulance services ends when any of the following occurs:

- FEMA, and the State, Territorial, or Tribal government, determines that the incident did not impact the area where it staged ambulances;
- Evacuation and return of medical patients and individuals with disabilities or access and functional needs is complete; or
- The immediate threat caused by the incident has been eliminated and the demand for services has returned to normal operation levels.

FEMA does not provide PA funding for ambulance services that are covered by private insurance, Medicare, Medicaid, or a pre-existing private payment agreement.<sup>235</sup>

## 2. Sheltering

FEMA provides PA funding to SLTT government Applicants for costs related to emergency sheltering for survivors. Typically, such sheltering occurs in facilities with large open spaces, such as schools, churches, community centers, armories, or other similar facilities. FEMA refers to these shelters as congregate shelters.

Eligible costs related to sheltering include, but are not limited to, the items listed below, as necessary based on the type of shelter and the specific needs of the shelterees. If any of the items listed are donated, including labor, the Applicant may offset the non-Federal share of its eligible Emergency Work Projects in accordance with [Chapter 6:XIV. Donated Resources](#). Sheltering and caring for household pets is only eligible while the pet owner is in an emergency shelter.

### (a) Shelter Facility Costs

Eligible shelter facility costs include, but are not limited to:

- Facility lease or rent, including space for food preparation;
- Utilities such as power, water, and telephone;
- Minor facility modifications if necessary to make the facility habitable, compliant with the Americans with Disabilities Act (ADA), functional as a childcare facility, or functional as an animal shelter;
- Restoration to return the facility to its condition prior to use;
- Generator costs; and
- Secure storage space for medical supplies.

If an eligible SLTT government Applicant owns or leases the shelter facility, and a volunteer agency operates the shelter, the facility costs described above are eligible. However, the labor

---

<sup>235</sup> Ibid.

costs for the volunteer agency's workers are ineligible (except as a donated resource in accordance with the criteria in [Chapter 6:XIV. Donated Resources](#)).

*(b) Shelter Staff Costs*

Eligible shelter staff costs include, but are not limited to:

- Medical staff;
- Personal assistance service staff;
- Veterinary and animal care staff;
- Public Information Officer;
- Social workers;
- Food service workers;
- Custodial and facilities staff; and
- National Guard personnel (See [Chapter 6:XI. National Guard](#)).

*(c) Shelter Supplies and Commodities*

Eligible shelter supplies and commodities include, but are not limited to:

- Hot and cold meals, snacks, beverages, and related supplies for survivors;
- Cooking and serving supplies;
- Food, water, and bowls for household pets and service and assistance animals;
- Durable medical equipment;
- Consumable medical supplies;
- Medication for animal decontamination and parasite control;
- Infant formula, baby food, and diapers;
- Refrigerators, microwaves, and crock pots;
- Cots, cribs, linens, blankets, pillows, tables, and chairs;
- Crates, cages, leashes, and animal transport carriers;
- Personal hygiene kits with items such as shampoo, soap, toothpaste, a toothbrush, towels, and washcloths;
- Animal cleaning tables and supplies;
- Televisions or radios – one per 50 shelterees;
- Basic cable service;
- Computers – one per 25 shelterees;
- Internet service, including Wi-Fi;
- Washers and dryers – one of each per 50 shelterees; and
- Toys and books.

*(d) Shelter Services*

Shelter services are only eligible for the time the facility is actively used to shelter survivors. Eligible shelter services include, but are not limited to:

- Shelter management;
- Supervision of paid and volunteer staff;
- Cleaning the shelter, linens, and animal crates;
- Shelter safety and security;

- Use of equipment, such as ambulances, buses, trucks, or other vehicles, to provide sheltering support;
- Phone banks for survivors;
- Care for survivors with disabilities or access and functional needs, including the provision of the following personal assistance services:
  - Grooming, eating, walking, bathing, toileting, dressing, and undressing;
  - Transferring (e.g., movement between a cot and wheelchair or wheelchair to restroom facilities);
  - Maintaining health and safety;
  - Assistance with self-administering medications; and
  - Communicating or accessing programs and services;
- Emergency medical and veterinary services for sheltered survivors, household pets, and service and assistance animals, including:
  - Emergency and immediate life stabilizing care, including necessary prescriptions (not to exceed 30-day supply);
  - Triage, medically necessary tests, diagnosis, treatment, stabilization, and monitoring;
  - First-aid assessment;
  - Provision of first aid and health information;
  - Care for evacuees with chronic conditions;
  - Administering vaccinations to shelterees and workers for transmissible or contagious diseases, including, but not limited to, tetanus and hepatitis;
  - Administering vaccinations to household pets, and service and assistance animals, for transmissible or contagious diseases, including, but not limited to, Bordetella (kennel cough). The vaccinations need to be effective while the animal is in the shelter;
  - Medical waste disposal;
  - Mental-health care;
  - Outpatient costs for sheltered survivors requiring emergency life-sustaining treatment not available at the shelter for the period of time that a survivor is housed in the shelter. Eligible outpatient services are limited to:
    - Physician services in a hospital outpatient department, urgent care center, or physician's office;
    - Related outpatient hospital services and supplies, including X-rays, laboratory and pathology services, and machine diagnostic tests; and
    - Local professional transport services to and from the nearest hospital equipped to adequately treat the emergency.
- Sheltering self-evacuees (self-evacuee transportation costs are ineligible); and
- Costs paid to the American Red Cross (ARC) or other Non-governmental Organizations (NGO) to operate shelters under a written agreement (costs that ARC or other NGOs incur under their own organizational mission – i.e., independent of any Federal or SLTT request – are ineligible for reimbursement).

(e) *Non-congregate Sheltering*

Generally, FEMA does not provide PA funding for emergency sheltering in non-congregate environments, which are locations where each individual or household has living space that offers some level of privacy (e.g., hotels, motels, casinos, dormitories, retreat camps, etc.). In limited circumstances, such as when congregate shelters are not available or sufficient, FEMA may reimburse costs related to emergency sheltering provided in non-congregate environments. FEMA's Assistant Administrator for Recovery has the authority to approve this policy exception. The Applicant must submit a request for PA funding for costs related to emergency, non-congregate sheltering and obtain FEMA approval prior to sheltering survivors in non-congregate facilities. At a minimum, the Applicant should include the following information in its request:

- Justification for the necessity of non-congregate sheltering;
- Whether the State, Territorial, or Tribal government has requested Transitional Sheltering Assistance;
- The type of non-congregate sheltering available and which type the Applicant intends to utilize;
- An analysis of the available options with the associated costs of each option; and
- The timeframe requested (i.e., date of activation and length of time).<sup>236</sup>

**Transitional Sheltering Assistance Program**

FEMA's Transitional Sheltering Assistance (TSA) is a type of short-term non-congregate sheltering assistance provided as Direct Federal Assistance. The intent of TSA is to provide temporary sheltering for survivors transitioning from emergency shelters to temporary or permanent housing solutions. Additional information is available in FEMA's Individual Assistance Program and Policy Guide at [www.fema.gov/assistance/individual/program-policy-guide](http://www.fema.gov/assistance/individual/program-policy-guide).

FEMA limits any approval to that which is reasonable and necessary to address the needs of the incident (usually no more than 30 days). FEMA determines the eligible costs based on the contractual agreement, including reimbursement for repairing damage if it is the Applicant's legal responsibility based on the agreement. The Applicant must obtain FEMA approval for any time extensions, which should include a detailed justification for the continued need and a revised analysis of options, including the costs for each option.

If FEMA approves the request, the Recipient must provide sufficient data and documentation to establish eligibility (including the need for non-congregate sheltering resulting from the disaster, reasonableness, and costs). Sufficient documentation includes:

- The number of non-congregate shelterees:
  - By age groups 0-2, 3-6, 7-12, 13-17, 18-21, 22-65, and 66+;
  - With disabilities or access and functional needs;
  - Registered for assistance from FEMA's IA Programs; and
  - Referred to State, Territorial, Tribal, or non-governmental organization programs for assistance;
- Number of household pets, and assistance and service animals sheltered, and the type of shelter provided (e.g., stand alone, co-located, or co-habitational);
- Length of stay per "household unit"; and

<sup>236</sup> 44 C.F.R. §§ 206.225(a)(2) and 206.202(c) and (d).

- Number of meals and other services provided.

As with any activity, lack of full documentation may result in FEMA determining that some or all of the costs are ineligible.

### 3. Childcare Services

FEMA reimburses SLTT governments for the cost of providing licensed childcare services to support sheltered populations. This includes the cost of the labor, facility, supplies, and commodities. Additionally, FEMA may provide PA funding for the cost of childcare services that the eligible Applicant provides to other survivors, and beyond the period of emergency sheltering, with certification that temporary childcare is necessary to meet immediate threats to life, public health and safety, or property.

Childcare includes services such as:

- Day care for children; and
- Before- and after-school care.

The Applicant may provide these services within a shelter facility or in a separate facility, as appropriate. FEMA PA and IA staff coordinate to ensure no duplication with IHP assistance.

### 4. Host-State or Host-Tribe Evacuation and Sheltering

If the impacted State or Tribe (Impact-State or Impact-Tribe)<sup>237</sup> has evacuation and sheltering needs beyond its ability to address within its jurisdictional area, it may request assistance either from another State or Tribal government (Host-State or Host-Tribe)<sup>238</sup> through mutual aid agreements such as EMAC, or from FEMA.

If the Impact-State/Tribe requests assistance directly from another State or Tribal government, FEMA reimburses costs based on the mutual aid agreement as described in [Chapter 6:IX. Mutual Aid](#). FEMA may also provide PA funding to the Host-State/Tribe directly, even if the Impact-State/Tribe already requested assistance directly from that Host-State/Tribe, provided that:

- The Impact-State/Tribe requested the assistance;
- The Host-State/Tribe agrees to accept evacuees based on need—without restriction;
- An authorized official from the Host-State/Tribe transmits a written agreement to FEMA; and

<sup>237</sup> Impact-State or Impact-Tribe means the State or Tribal Government for which the President declared an Emergency or Major Disaster and requested FEMA assistance because of a need to evacuate and/or shelter affected individuals outside the State.

<sup>238</sup> Host-State or Host-Tribe means a State or Tribal Government that by agreement with FEMA provides sheltering or evacuation support to evacuees from an Impact-State or Impact-Tribe.

- The Governor or Tribal Chief Executive of the Host-State/Tribe signs the FEMA/Host-State or FEMA/Host-Tribe Agreement pursuant to the terms and conditions in 44 C.F.R. § 206.44, FEMA-State Agreements, to establish the Host-State/Tribe as the Recipient.<sup>239</sup>

If the Impact-State/Tribe requests assistance from FEMA, FEMA determines whether potential Host-States/Tribes have sufficient capability to meet some or all of the sheltering and evacuation needs of the Impact-State/Tribe. If FEMA determines a Host-State/Tribe has sufficient capability and the Host-State/Tribe meets the three conditions described above, FEMA provides PA funding to the Host-State/Tribe directly.<sup>240</sup>

When FEMA provides PA funding directly to the Host-State/Tribe, FEMA reimburses 100 percent of the Host-State/Tribe's eligible costs, including straight-time and benefits of the Host-State/Tribe's permanent employees<sup>241</sup> so that it does not have any out-of-pocket costs. In these cases, the Impact-State/Tribe is responsible for the non-Federal cost share and must subsequently reimburse FEMA for the non-Federal cost share of the eligible costs incurred by the Host-State/Tribe. The non-Federal cost share is based on the Category B cost-share amount designated in the declaration. The Impact-State/Tribe cannot offset its non-federal cost share with the Host-State/Tribe's volunteer labor.

In addition to the other eligible evacuation and sheltering costs described in this chapter, FEMA also reimburses the Host-State/Tribe for the following:

- Straight-time and benefits of entities' employees that provide assistance under a mutual aid agreement or a contract with the Host-State/Tribe such as a local government or PNP;
- Costs to provide the requested shelter capacity, even if the shelter was underused or not used at all;
- Costs related to arrest and incarceration of evacuees who commit unlawful acts in the Host-State/Tribe congregate shelter, including costs incurred by on-duty law enforcement officers in order to detain, take into custody, or make an arrest (costs of chemical tests, processing, charging, booking, and holding such persons are ineligible costs). Costs to transport a detainee back to the shelter is eligible if the individual was not charged;
- When patients in hospitals in the Impact-State/Tribe are evacuated, transported, and admitted into hospitals in the Host-State/Tribe through mission assignment with HHS, and the patients are treated and discharged but require follow-on care while awaiting transport, and shelters are not available, the costs that the Host-State/Tribe's hospital incurs for hotel rooms during patients' follow-on care until the patients can be transported back to the Impact-State/Tribe, provided that Medicare, Medicaid, or private insurance does not cover these costs;
- Bus or shuttle transport to pick up evacuees at the airport, train station, or bus terminal when the expected plane, train, or bus is re-routed, canceled, or rescheduled;
- Ambulance costs for hospital-to-hospital transfers, provided it is a transfer within the Host-State/Tribe;
- When the Impact-State/Tribe determines that it is safe for re-entry, it coordinates with the Host-State/Tribe and FEMA to return evacuees, household pets, and service and

---

<sup>239</sup> 44 C.F.R. § 206.202(f)(1)(i).

<sup>240</sup> 44 C.F.R. § 206.208(c)(3).

<sup>241</sup> 44 C.F.R. § 206.202(f)(1)(ii).

assistance animals to the Impact-State/Tribe by air, rail, or bus. Return transportation costs are eligible along with food, water, and security during transport;

- Return transportation costs for family members of the Impact-State/Tribe evacuee who was admitted to a hospital after the congregate shelters close;
- When evacuees are discharged from a hospital after all congregate shelters have closed and transportation cannot be arranged for departure on the same day discharged, FEMA reimburses up to 5 nights of hotel lodging while awaiting return transport; and
- FEMA reimburses a State agency from the Impact-State/Tribe for transportation costs and related expenses to transport deceased evacuees and accompanying family members to the Impact-State/Tribe. The cost of the State/Tribe-mandated embalming or cremation of the body prior to return are also eligible.

The Host-State/Tribe must determine whether any ambulance or medical service costs are covered by a patient's private insurance, Medicare, Medicaid, or a pre-existing private payment agreement as FEMA deducts this amount from the Host-State/Tribe's eligible cost.

Fees that the Host-State/Tribe waives for the use of State parks by self-evacuees with recreational vehicles (RVs) are ineligible. Additionally, purchase and distribution of gas cards, bus passes, cash vouchers, debit cards, food vouchers, or direct payments to evacuees are ineligible.

#### **P. Infectious Disease Incident**

The HHS Centers for Disease Control and Prevention (CDC) has primary authority to enable support and assistance to SLTT governments in response to an infectious disease incident. FEMA may provide assistance for the rescue, evacuation, and movement of persons; movement of supplies; and care, shelter, and other essential needs of affected human populations. Any assistance provided by FEMA in response to an infectious disease incident is done in coordination with the CDC. The Office of Response and Recovery Fact Sheet FP 104-009-001, *Infectious Disease Event*, provides additional details.<sup>242</sup>

#### **Q. Mosquito Abatement**

Mosquito abatement measures may be eligible when a SLTT government public health official validates in writing that a mosquito population poses a specific health threat as discussed further in [Appendix G: Mosquito Abatement](#). FEMA consults with the CDC to determine the eligibility of mosquito abatement activities. FEMA only provides PA funding for the increased cost of mosquito abatement. This is the amount that exceeds the average amount based on the last 3 years of expenses for the same period.

#### **R. Residential Electrical Meter Repair**

In rare cases, to reduce the number of survivors needing shelter, FEMA may provide limited PA funding to a SLTT government to repair residential electrical meters. To receive PA funding, the SLTT government must:

- Issue a finding of an immediate threat to safety due to loss of power caused by damaged meters or weather heads;

---

<sup>242</sup> [www.fema.gov/sites/default/files/2020-10/fema\\_infectious-disease-fact-sheet\\_orr\\_05-13-2016.pdf](http://www.fema.gov/sites/default/files/2020-10/fema_infectious-disease-fact-sheet_orr_05-13-2016.pdf).

- Request participation in this program; and
- Receive FEMA approval for each identified property.

Only residential properties are eligible for this program. Commercial properties, including apartment complexes, are ineligible.

If approved, the applicable SLTT government must:

- Obtain a signed right-of-entry from each residential property owner;
- Take reasonable measures to document any known insurance proceeds;
- Contract with licensed electricians to perform electrical meter repair;
- Coordinate the work with the property owner, the power company, and the contracted electricians; and
- Be responsible for payment of the non-Federal share.

Eligible work is limited to that associated with repairing damage to items otherwise installed and maintained by a homeowner's electrician, including the weather head, service cable, and meter socket.

FEMA generally provides PA funding up to \$800 per meter per residential dwelling. This amount includes equipment, materials, labor, and inspection fees to restore the meter to current local codes. It is also inclusive of limited debris clearance when necessary to access the damaged meter or weather head. Removal and disposal of the debris is ineligible. Eligible work is limited to that completed within 30 days from the declaration date unless extended by FEMA.

FEMA does not provide PA funding for repair costs if it is not safe to restore power to the residence or if other impacts would restrict the dwelling from being habitable even after power restoration.

FEMA PA and IA staff coordinate closely to ensure FEMA does not fund the same work under both programs.

## **S. Safety Inspections**

Post-incident safety inspections for public and private facilities are eligible, as well as posting appropriate placards (e.g., "red-tagging" a building that is unsafe).

The specific purpose of the inspection must be to determine whether the facility is safe for entry, occupancy, and lawful use. The Applicant must clearly substantiate that the purpose of the inspection was for safety and not to assess damage. Building inspections are ineligible if the purpose of the inspection is to:

- Determine whether the building is Substantially Damaged for the purpose of compliance with the community's floodplain management ordinance;
- Determine whether the building needs to be elevated or relocated, in accordance with the community's floodplain management ordinance; or
- Ensure that repairs are completed in accordance with the community's building code or standard.

## **T. Animal Carcasses**

Removal and disposal of animal carcasses, including interim processing,<sup>243</sup> is eligible. If the removal and disposal is conducted as part of the overall debris removal operations, the work may be funded as Category A.

FEMA may require certification from the SLTT government health department, HHS, or the U.S. Department of Agriculture (USDA) that a threat to public health and safety exists.

When few in number, smaller animal carcasses (e.g., rodents, skunks, or possums) do not usually pose an immediate threat to public health or safety. Removal and disposal of these carcasses is ineligible.

FEMA does not provide PA funding when another Federal agency has authority to provide assistance for carcass removal and disposal. NRCS has authority to remove animal carcasses and to provide technical assistance to the Applicant under its EWP program. The USDA's Farm Service Agency may provide assistance for farmland debris cleanup. The EPA and USCG have authority to provide technical assistance and to remove animal carcasses contaminated with oil, hazardous substances, pollutants, or contaminants.<sup>244</sup>

## **U. Demolition of Private Structures**

Emergency demolition of structures located on private property may be eligible when partial or complete collapse is imminent, and that collapse poses an immediate threat to the general public.

In some instances, restricting public access to an unsafe structure and the surrounding area, such as securing the area with a fence, is sufficient to alleviate the immediate threat and is more cost-effective than demolition. In these cases, demolition is ineligible.

If a structure is condemned prior to the incident, emergency protective measures related to that structure are ineligible.

FEMA reviews the Applicant's demolition process for compliance with all applicable EHP laws, regulations, and EOs.

### **1. Conditions for Eligibility**

For demolition to be eligible, the Applicant must:

- Certify that the structures are unsafe and pose an immediate threat to lives or public health and safety;
- Provide documentation to confirm its legal authority and responsibility to enter private property and demolish privately-owned unsafe structures. This includes:
  - Citation of the law, ordinance, code, or emergency powers for which it is exercising its legal authority to demolish privately-owned unsafe structures. The authority cited must be applicable to the structural condition representing the immediate threat and not merely the Applicant's uniform level of services.

---

<sup>243</sup> Interim processing may include burning, incinerating, rendering, mounding, composting, or other pre-processing activities.

<sup>244</sup> See Recovery Policy 9523.8, *Mission Assignments for ESF#10*, for discussion on EPA and USCG authority with respect to removal of hazardous waste: [www.fema.gov/sites/default/files/2020-07/fema\\_ESF\\_10\\_Oil-Hazardous-Materials.pdf](http://www.fema.gov/sites/default/files/2020-07/fema_ESF_10_Oil-Hazardous-Materials.pdf).

- Confirmation that a legally authorized official of the Applicant has ordered the exercise of public emergency powers or other appropriate authority to enter onto private property in the designated area in order to demolish privately-owned unsafe structures and remove the resulting debris; and
- Indemnify the Federal Government and its employees, agents, and contractors from any claims arising from the demolition of privately-owned unsafe structures and removal of the resulting debris.

Before FEMA will provide PA funding, the Applicant must provide confirmation that it satisfied all legal processes and obtained permission requirements from the property owners (rights-of-entry) and agreements to indemnify and hold harmless the Federal Government. Additionally, the Applicant must provide documentation to support that it obtained all necessary permits and complied with EHP requirements.

## **2. Commercially Owned Structures**

Demolition of structures owned by commercial enterprises, including businesses, apartments, condominiums, and mobile homes in commercial trailer parks, are generally ineligible as it is expected that the commercial enterprises retain insurance that cover the cost of demolition. In very limited, extraordinary circumstances, FEMA may provide an exception. In such cases, the Applicant must meet the requirements of [Chapter 7:I.G. Debris Removal from Private Property](#).

## **3. Eligible Work**

If FEMA approves the demolition of private structures, eligible work associated with the demolition includes, but is not limited to:

- Capping wells;
- Pumping and capping septic tanks;
- Filling open below-grade structures, such as basements and swimming pools;
- Testing for hazardous materials;
- Securing utilities;
- Obtaining permits and licenses; and
- Performing title searches.

Fees for permits, licenses, and titles issued directly by the Applicant are ineligible unless the Applicant demonstrates that the fees are above and beyond its normal administrative costs. Overtime labor directly related to issuing these permits, licenses, and titles for facilities that are eligible for demolition is eligible.

The following work is also eligible and may be funded as Category A if the removal and disposal is conducted as part of the overall debris removal operations:

- Removing demolition debris, including personal effects; and
- Removing hazardous materials, such as asbestos and household hazardous waste.

The Applicant should work with the property owner to pursue and recover insurance proceeds and credit FEMA the Federal share of any insurance proceeds recovered. In some circumstances, the property owner may be eligible for IA funding. FEMA PA and IA staff coordinate closely to ensure FEMA does not fund the same work under both programs.

#### **4. Ineligible Work**

Ineligible work associated with the demolition of private structures includes, but is not limited to:

- Removal or covering of concrete pads and driveways except for structures in a FEMA-funded buyout program; and
- Removal of slabs or foundations that do not present a health or safety hazard, except for structures in a FEMA-funded buyout program through the HMGP (the removal of Substantially Damaged structures and associated facilities acquired through HMGP may be eligible as Category A, Debris Removal).

#### **V. Temporary Relocation of Essential Services**

If the Applicant provides essential community services at a facility that is unsafe, inaccessible, or destroyed as a result of the incident, temporary relocation of these services to another facility is eligible.<sup>245</sup> Essential community services are those services of a governmental nature that are necessary to save lives, protect property and the public, and preserve the proper function and health of the community at large. These services differ from the list of eligible PNP essential social services. FEMA evaluates the criticality of the service and safety of the facility to determine the need for temporary relocation. FEMA does not incorporate funds from temporary facilities into fixed cost projects.

##### **1. Eligible for Temporary Relocation:**

Essential community services provided by an eligible Applicant are eligible to be relocated. The following services are considered essential community services (these differ from the list of PNP essential social services):

- Education;
- Election and polling;
- Emergency, including police, fire, and rescue;
- Homeless and domestic violence shelters;
- Emergency medical care;
- Prison;
- Utility; and
- Other facilities that provide public health and safety services of a governmental nature.

Services provided in administrative and support facilities essential to the provision of the essential community service are also eligible for relocation. These include administration buildings, student housing, hospital and prison laundry and cooking facilities, parking, and storage if items are needed on-site. Athletic fields and student unions are not considered essential administrative or support services and are ineligible.

If the Applicant provides the service at a leased, private facility prior to the incident, the service is still eligible to be relocated.

---

<sup>245</sup> Stafford Act § 403(a)(3)(D), 42 U.S.C. § 5170b.

## **2. Ineligible for Temporary Relocation**

Facilities that do not provide essential community services are ineligible for temporary relocation. These include facilities and services such as museums, zoos, community centers, shelter workshops, performing arts centers, recreation and parking, athletic stadiums, houses of worship, housing and residential services, custodial care, assisted living, senior citizen centers, alcohol and drug rehabilitation, childcare, libraries, research and warehouse facilities, burial, vocational, academic, athletic, political training, and student union buildings.

## **3. Determining Eligibility of Temporary Relocation**

FEMA determines the eligibility of relocating services to another facility based on the safety of the damaged facility as follows:

- If the facility can be made usable with the performance of emergency protective measures or minor repairs, a temporary facility may not be eligible.
- If the damage is to the extent that it cannot be occupied safely, and restoration cannot be completed without suspending operations of the facility for an unacceptable period of time, then a temporary facility may be eligible.
- If the facility is not damaged but lacks a critical utility or operational item, such as potable water, electricity, or road access, and a temporary facility will restore services to the community before the restoration of the disrupted critical utility or operational item at the current site, then a temporary facility may be eligible.

The capacity of the temporary facility must not exceed the pre-disaster capacity of the facility that housed the displaced services. The Applicant must use the temporary facility to provide the eligible service to the same extent and manner as was provided prior to the incident.

Relocation to a site that requires ground disturbance or alteration of an existing property requires EHP review before the Applicant implements the action.

FEMA does not require the Applicant to obtain and maintain insurance for temporary facilities.

If the Applicant has a facility that does not meet eligibility requirements for temporary relocation and the facility's damage is to such an extent that the contents are at risk, FEMA may provide PA funding for temporary space to store the contents as an emergency protective measure if the space is:

- Limited to an area necessary to house the contents;
- Used solely for storage; and
- Not intended for public access, alternate office space, exhibits, or other purposes.

FEMA is not responsible for damage that may occur to contents in temporary storage.

## **4. Lease, Purchase, or Construct**

When deciding whether to rent or purchase space and equipment, the Applicant should choose the most economical option that meets its needs. The Applicant must provide FEMA with a cost analysis,<sup>246</sup> which should include at least three options with cost estimates based on the timeline to restore the original facility. Cost estimates for leasing a facility must account for the entire timeline of the project. FEMA generally reimburses the least costly option of leasing,

---

<sup>246</sup> 2 C.F.R. § 200.318(d).

purchasing, or constructing a temporary facility. However, FEMA also considers whether the least costly option is practical when determining eligibility (e.g., if the least costly option for a temporary school is to lease a building in another county, and the next least costly option is to install modular buildings on the current campus, FEMA may reimburse the cost of the modular buildings).

If the Applicant relocates a service from a facility it owns, the lease costs of a temporary facility are eligible if leasing is the least costly option. If the Applicant was leasing the damaged facility and had to temporarily relocate to another leased facility, the increase in rent is eligible.

Purchasing or constructing a temporary facility is eligible if FEMA confirms that it is the least costly option. With exception of modular or manufactured units, the Applicant must obtain FEMA approval prior to purchasing or constructing the facility.

## **5. Safe Rooms for Temporary School Facilities**

Funding for accessible safe rooms as part of a temporary school facility may be eligible if the damaged school contained a safe room or other space that served as a storm shelter and there are no other cost-effective, reasonable alternatives available to address the safety needs of the students and faculty. If approved, the safe room capacity is based on student population and the number of faculty who are expected to use the temporary school facility. The capacity of the safe room cannot exceed the pre-disaster capacity of the safe room in the damaged school. The safe room should be available no later than the opening day of classes at the temporary facility.

If the Applicant wishes to seek funding for a safe room as part of a temporary school facility, it must obtain prior approval from FEMA. The request needs to include:

- A description of the safe room or safe space that was used as a storm shelter prior to the incident;
- The population of students and faculty that need access to the safe room;
- Verification that no other cost-effective reasonable alternatives are within proximity that can be used as a safe space for the school population; and
- An indication that the Applicant will have the safe room installed and operational when school resumes and students occupy the temporary classroom space.

Safe rooms provided as part of a temporary school facility must comply with the requirements of *Safe Rooms for Tornadoes and Hurricanes, Guidance for Community and Residential Safe Rooms* (FEMA P-361).<sup>247</sup>

The timeframe for providing PA funding for the temporary safe room space coincides with the approved timeframe for providing PA funding for the temporary school facility.

## **6. Temporary Relocation Costs**

Eligible work or costs associated with the provision of temporary facilities include, but are not limited to:

- Rental or purchase of equipment necessary to continue the services in the temporary facility;
- Reasonable alterations of the temporary facility, if required to make the space functional based on the pre-disaster use of the damaged facility;

---

<sup>247</sup> [www.fema.gov/sites/default/files/2020-07/safe-rooms-tornadoes-hurricanes.pdf](http://www.fema.gov/sites/default/files/2020-07/safe-rooms-tornadoes-hurricanes.pdf).

- Restoration of the temporary facility to its pre-disaster condition when no longer needed
- Moving expenses to and from the temporary facility;
- Minimal life-safety or other building upgrades required by an applicable code or standard in effect at the time the temporary facility is purchased or leased; and
- Public outreach and messaging costs necessary to inform the public that the service will temporarily be provided at a different location.

FEMA does not provide PA funding for utility, maintenance, or operating costs in a temporary facility, even if these costs increase.

## 7. Time Limitations

The regulatory time limitation for temporary facilities (Emergency Work) is 6 months from the declaration date.<sup>248</sup>

Depending on the extent of damage to the facility, the Applicant may be unable to restore the facility to its pre-disaster design and function within 6 months. Normally, the Recipient has the authority to extend the deadline for Emergency Work for up to 6 additional months.<sup>249</sup> However, for temporary facilities, only FEMA has authority to approve any time extensions to the project deadline.

FEMA considers the timeframe necessary to restore the damaged facility when evaluating time extensions for temporary facilities. If the Applicant requests funding for a temporary facility and knows at that time that the restoration of the original facility will exceed 6 months, FEMA may approve additional time and funding up to 12 months. If the Applicant needs additional time beyond this 12-month deadline, it must submit a written time extension request that includes the status of work and a timeline for completion.

FEMA only approves additional time if the Applicant begins construction on the damaged facility within 12 months of the declaration date, unless circumstances beyond the control of the Applicant prevented the start of construction within this 12-month timeframe.

### (a) Improved Project

If FEMA approves an Improved Project for a facility for which it also approved temporary relocation of the services to a temporary facility, the temporary facility is only eligible for PA funding for the estimated amount of time necessary to restore the facility to its pre-disaster design and function. If the actual time to restore the facility with the improvements extends beyond this timeframe and causes the Applicant to continue its use of the temporary facility, FEMA does not reimburse any cost associated with that continued use. However, FEMA may reimburse costs associated with relocating its services back into the facility as part of the approved temporary facility project.

### (b) Alternate Project

If FEMA approves an Alternate Project for a facility for which it also approved temporary relocation of the services to a temporary facility, FEMA does not reimburse any temporary facility costs incurred after the date the Applicant requests that Alternate Project.

---

<sup>248</sup> 44 C.F.R. § 206.204(c)(1).

<sup>249</sup> 44 C.F.R. § 206.204(c)(2)(ii).

(c) *Alternative Procedures Project*

If FEMA approves an Alternative Procedures Project for a facility for which it also approved temporary relocation of the services to a temporary facility, continued PA funding for the temporary facility is dependent upon the SOW of the Alternative Procedures Project.

## **8. Disposition Requirements**

If the Applicant purchased or constructed a temporary facility, it must return to FEMA the Federal share of the equity in the facility. The Applicant must report the equity to FEMA when the approved deadline has expired or when the facility is no longer needed for the authorized purpose, whichever occurs first.

If FEMA only funded a portion of the cost of the facility, the Applicant must return to FEMA the Federal share of FEMA's proportionate equity in the facility. The amount due FEMA is computed by applying FEMA's percentage of participation in the cost of the purchase or construction to the fair market value or sale proceeds, taking into consideration reasonable out-of-pocket costs related to the sale.

The Applicant may either retain the facility or sell it. If the Applicant disposes of real property (land or structures) acquired with PA funding and acquires replacement real property using funds from the same PA project, it may use the net proceeds of the sale to offset the cost of the replacement property.

## **W. Snow-Related Activities**

When the President declares an incident as a Snowstorm or specifically authorizes snow assistance in a declaration for a Severe Winter Storm, FEMA provides PA funding for impacts related to snow, but the assistance is limited.<sup>250</sup> See [Appendix H: Snow Assistance](#), for detailed information.

### **1. Limited Time Period**

Snow-related activities are eligible for a continuous 48-hour period to address the most critical emergency needs.<sup>251</sup> Each Applicant designates the beginning of its 48-hour period. However, a State or Territorial agency that conducts snow-related activities in multiple locations throughout the State or Territory, such as a Department of Transportation, may use different 48-hour periods for different locations.

Once FEMA approves a project for the Applicant's designated 48-hour period, the Applicant cannot change its selected period.

If the Applicant awards a contract for periods greater than the 48-hour period, PA funding is limited to the costs incurred during the 48-hour period.

The FEMA Assistant Administrator of the Recovery Directorate may extend the eligible period by 24 hours in counties, parishes, or Tribal government areas where the snowfall exceeds the historical record snowfall by at least 50 percent.

---

<sup>250</sup> 44 C.F.R. § 206.227.

<sup>251</sup> 44 C.F.R. § 206.227.

## 2. Eligible Work

Eligible work includes:

- Snow-related activities (for limited time as discussed above):
  - Snow removal;
  - Snow dumps;
  - De-icing;
  - Salting; and
  - Sanding of roads and other eligible facilities.
- Other emergency protective measures (not restricted to the limited time) including, but not limited to, search and rescue and sheltering.

Limited snow-related activities necessary to carry out emergency protective measures, such as clearing snow in the *immediate* area of a downed power line, are eligible outside of the limited time period and in counties declared but not designated for snow assistance.

For Severe Winter Storm Declarations that do not specifically authorize snow assistance, FEMA only provides PA funding for limited snow-related activities that are necessary to perform otherwise eligible work. For example, snow removal necessary to repair downed power lines is eligible, while normal snow removal from roads (including salting and sanding) is ineligible.

## X. Emergency Repair or Stabilization

Emergency repair or stabilization of an eligible facility is eligible as Emergency Work if it eliminates or lessens an immediate threat.<sup>252</sup> Work performed under an exigent circumstance that restores the pre-disaster design and function of the facility in accordance with codes and standards is Permanent Work,<sup>253</sup> not Emergency Work.

Emergency repair of a facility is ineligible if another Federal agency has the specific authority to provide assistance for the facility (even if the repair is temporary),<sup>254</sup> such as for:

- Federal-Aid highways – Federal Highway Administration (FHWA); or
- Flood control works – USACE and NRCS.

For Tribal governments specifically, although the Bureau of Indian Affairs' (BIA) or FHWA may have authority to provide temporary emergency repairs of Tribal roads, such roads may be eligible for PA funding provided the Tribal Government does not receive funding from BIA or FHWA for the work.

### 1. Operation Blue Roof (DFA Only)

Operation Blue Roof provides homeowners with plastic sheeting to cover damaged roofs until arrangements can be made for permanent repairs. The purpose of Operation Blue Roof is to protect property, reduce temporary housing costs, and allows residents to remain in their homes while recovering from the incident. Therefore, only dwellings that can be safely occupied after

---

<sup>252</sup> 44 C.F.R. § 206.201(b).

<sup>253</sup> 44 C.F.R. § 206.201(j).

<sup>254</sup> 44 C.F.R. § 206.226(a).

blue roof installation are eligible. The costs of these services are ineligible for reimbursement. However, FEMA may provide DFA for these services.<sup>255</sup>

## **2. Slope Stabilization**

If a landslide or other slope instability is triggered by the incident and poses an immediate threat to life, public health and safety, or improved public or private property, emergency protective measures to stabilize the slope may be eligible.

FEMA only provides PA funding for the least costly option necessary to alleviate the threat. FEMA limits eligible stabilization measures to the area of the immediate threat, not the entire slope. Work must be reasonable relative to the size and scope of the area of instability.

FEMA may authorize funding for post-disaster inspections and limited geotechnical investigations to determine if the instability creates an unsafe condition that poses an immediate threat.

Eligible emergency protective measures include, but are not limited to:

- Emergency drainage measures;
- Emergency ground protection to better stabilize the mass (rip rap, sheeting);
- Partial excavation at the head of a sliding mass to reduce its driving force;
- Backfilling or buttressing at the toe of a sliding mass using measures such as gabions, rock toes, cribwalls, binwalls, and soldier pile walls; and
- Installation of barriers to redirect debris flow.

## **3. Mold Remediation**

The incident may cause facilities to be inundated or exposed to wet and humid weather conditions for extended periods of time. These conditions may cause growth and spreading of mold in structures and on contents, causing threats to public health and increasing the repair cost.

The following remediation activities may be eligible as emergency protective measures:

- Wet vacuuming, damp wiping, or vacuuming with High-Efficiency Particulate Air (HEPA) equipment of the interior space;
- Removal of contaminated gypsum board, plaster (or similar wall finishes), carpet or floor finishes, and ceilings or permanent light fixtures; and
- Cleaning of contaminated heating and ventilation (including ductwork), plumbing, and air conditioning systems or other mechanical equipment.

Pre-remediation mold sampling is only eligible when the sampling reveals the presence of mold. Post-remediation sampling is eligible to confirm that remediation is complete.

The Applicant may use a variety of mold cleanup methods to remediate mold damage based on the extent of damage and type of damaged material. [Appendix I: Mold Remediation](#), provides information for consideration when developing a SOW for mold remediation. The Applicant must follow applicable SLTT government guidelines for mold sampling and remediation.

FEMA only provides PA funding for mold sampling performed by an indoor environmental professional, such as a Certified Industrial Hygienist, Certified Indoor Environmental

---

<sup>255</sup> See [www.usace.army.mil/Media/Fact-Sheets/Fact-Sheet-Article-View/Article/475463/temporary-roofing/](http://www.usace.army.mil/Media/Fact-Sheets/Fact-Sheet-Article-View/Article/475463/temporary-roofing/) for additional information.

Consultant, or Certified Microbial Consultant. The indoor environmental professional should not be employed by the remediation company to avoid a conflict of interest. FEMA considers technical evaluations performed by licensed professionals when determining the eligibility of mold remediation.

For mold remediation to be eligible, mold must not be a result of poor facility maintenance or failure to take protective measures to prevent the spread of mold in a reasonable time after the incident. If the Applicant can document and justify why it did not take measures to prevent further contamination, or why measures taken were insufficient to prevent further damage, mold remediation may be eligible.

Examples of extenuating circumstances include:

- Disruption of power;
- Facility is underwater;
- Facility is inaccessible;
- Heating, ventilation, and air conditioning (HVAC) equipment is damaged; and
- Insufficient resources to remediate the entire facility.

FEMA evaluates whether the facility had pre-existing water infiltration conditions when determining whether mold remediation is eligible. For this evaluation, FEMA considers whether there is evidence of:

- Improperly sealed windows or exterior vents;
- Standing water against an exterior wall;
- Poorly maintained drains or gutters with rust or vegetative growth;
- Absence of rain gutters; and
- Leaking ceiling tiles.

#### **4. Emergency Berms on Beaches**

If a natural or engineered beach has eroded to a point where flooding from a 5-year storm<sup>256</sup> could damage improved property, cost-effective emergency protective measures on the beach that protect the improved property against damage from that 5-year storm are eligible.

Eligible measures typically include the construction of emergency sand berms to protect against additional damage from a 5-year storm. Emergency sand berms are not intended to permanently restore the beach; they are intended only to provide protection from immediate threats. The Applicant may construct emergency berms with sand recovered from the beach or with imported sand. If the Applicant constructs the berms with imported sand, FEMA will only provide PA funding if the sand is from a source that meets applicable environmental regulations and one of the following circumstances exists:

- Recoverable quantities are insufficient; or
- SLTT government regulations prohibit placement of the recovered sand.

To show that a 5-year storm could damage improved property, the Applicant must demonstrate that the stillwater level plus wave runup elevation as determined by computer modeling for a 5-year storm exceeds the post-incident elevation of the primary dune.

---

<sup>256</sup> 44 C.F.R. § 206.221(c). For flood incidents specifically, an immediate threat is a threat from a 5-year flood (a flood that has a 20 percent chance of occurring in any given year).

The 5-year Stillwater Level (SWL) is equal to the average water surface elevation of the rise in seawater level (surge) resulting from a 5-year storm, plus wave setup and the astronomical tide. The 5-year Total Water Level (TWL) is equal to the elevation of the wave runup predicted for a 5-year storm plus the SWL. Locations where the elevation of the post-incident profile is less than the TWL are eligible for placement of an emergency berm. See Figure 12 below.

**Figure 12. Determining Eligibility of Emergency Berms on Beaches**

Based on the average expected erosion for a 5-year storm, FEMA only provides PA funding for emergency berms constructed with up to 6 cubic yards per linear foot of sand above the 5-year stillwater level or the berm’s pre-incident profile, whichever is less. In some cases, placing sand below the 5-year stillwater level may be necessary to provide a base for berm. The placement of that sand is also eligible as part of the emergency protective measure.

Placement of dune grass on an emergency dune or berm is only eligible if it is required by permit and is an established, enforced, uniform practice that applies to the construction of all emergency berms within the Applicant’s jurisdiction, regardless of the circumstance. The Applicant must include the grass placement cost in the dune or berm construction cost when evaluating cost-effectiveness. Any maintenance of the dune grass after the initial installation is ineligible.

### III. Damage Caused During Performance of Emergency Work

The Applicant may damage improved property, supplies, or equipment during the performance of eligible emergency response activities or debris removal operations.

The repair of damage to public property, supplies, or equipment is eligible as part of the respective Emergency Work (Category A or B) Project<sup>257</sup> if the damage was:

- Due to severe conditions resulting from the incident;
- Unavoidable; and
- Not due to improper or excessive use.

Replacement of damaged crops, trees, shrubs, or other ground cover is ineligible, unless the replacement meets the criteria in [Chapter 8:IX.E. Parks, Recreational, Other \(Category G\)](#).

For equipment damage, FEMA requires maintenance records to demonstrate that the equipment was regularly maintained and in good operational order prior to the incident, and details regarding when, where, and how the damage occurred.

Repair of damage to private property is only eligible if the above criteria is met and one of the following:

- The property is an easement and the Applicant is legally responsible for repairing the damage it causes to the easement; or
- The Applicant leased the property either for sheltering or for a temporary debris staging site, and the lease agreement establishes that the Applicant is legally responsible for the repair.

Damage caused by snow-related activities conducted outside of the authorized period, as described in [Chapter 7:II.W. Snow-Related Activities](#), is ineligible.

---

<sup>257</sup> Although the repairs may be Permanent Work, FEMA includes it on the Emergency Work project as damage resulting from the emergency work.

# CHAPTER 8: PERMANENT WORK ELIGIBILITY

Permanent Work (Categories C–G) is work required to restore a facility to its pre-disaster design (size and capacity) and function in accordance with applicable codes and standards.<sup>258</sup> Emergency repair or stabilization to eliminate or lessen an immediate threat is Emergency Work. All Permanent Work is subject to the eligibility of the facility as described in [Chapter 4:II. Facility Eligibility](#) and shown in Figure 13. *Permanent Work Eligibility*. This chapter provides PA Policy for Permanent Work.

Figure 13. Permanent Work Eligibility

Pre-disaster design means the size or capacity of a facility as originally constructed or subsequently modified. It does not mean the capacity at which the Applicant was using the facility at the time of the incident if different from the most recent designed capacity.<sup>259</sup>

### Example of Restoring to Pre-disaster Design

If a school designed for a capacity of 100 students is damaged beyond repair, the eligible funding for the replacement facility is limited to that necessary for 100 students, even if more than 100 students were attending the school prior to the incident.

Pre-disaster function is the function for which the facility was originally designed or subsequently modified. For example, if the Applicant designed and constructed an administrative building, but later altered it in accordance with applicable construction codes or standards to use as a school, the pre-disaster function would be as a school. If the facility was serving an alternate function at the time of the incident, but was not altered to provide that function, FEMA provides PA funding to restore the facility either to the original pre-disaster function, OR pre-disaster alternate function, whichever costs less.<sup>260</sup>

### Example of Restoring to Pre-disaster Function

If the Applicant is using an office building as a storage facility at the time of an incident, and it is less costly to restore the facility as a storage facility, only those repairs necessary to restore it as a storage facility are eligible.

Any special lighting or wall and floor finishes that are typical of an office building are not necessary for a storage facility and, therefore, are ineligible.

<sup>258</sup> 44 C.F.R. § 206.201(j). Although this section of 44 C.F.R. does not reference function as part of the definition of Permanent Work, 44 C.F.R. § 206.203(d)(2) states that if the Applicant does not restore the function, it is an Alternate Project. See [Chapter 8:VIII. Capped Projects](#) for discussion on Alternate Projects.

<sup>259</sup> 44 C.F.R. § 206.201(k).

<sup>260</sup> 44 C.F.R. § 206.226(k)(1).

FEMA may approve changes to the pre-disaster design or construction method (including materials) if the changes are required due to access issues, site conditions, or to tie into existing infrastructure. The changes must not impact the capacity or function of the facility. The Applicant must show that the changes are reasonable based on the type and extent of restoration and are consistent with the Applicant's general construction practices.

In cases where ineligible damage, such as a pre-existing condition, if not repaired, may compromise repair of eligible damage, FEMA may make PA funding for repair of the eligible damage contingent upon the Applicant repairing the ineligible damage. For example, FEMA may determine that repairs to a damaged bridge deck are eligible. However, the deck cannot be repaired unless the Applicant replaces rotting timbers that support the deck.

While PA funding is always based on pre-disaster size, capacity, and function, FEMA has developed procedures under Section 428 of the Stafford Act to maximize the ability of Applicants to drive their own recovery. Under this process, Section 428 Alternative Procedures are considered for all large Permanent Work Projects. This approach standardizes a single process for the development and consideration of fixed cost estimates as the first option for all Permanent Work Projects. This ensures Applicants have awareness of the opportunities and benefits provided by the Alternative Procedures, including: flexibility in meeting post-disaster recovery needs, as opposed to being limited to rebuilding back to what existed prior to the disaster; ability to share funds across all Alternative Procedures Permanent Work Projects; ability to retain and use excess funds to reduce risk and improve future disaster operations (subject to timely closeout); and eligibility for cost-effective hazard mitigation on Replacement Projects. Applicants will be able to agree to a fixed cost estimate or choose to pursue funding under standard, actual cost procedures.

## I. Environmental and Historic Preservation Considerations

The Applicant needs to make every effort to afford FEMA the opportunity to perform EHP reviews prior to starting any work that has potential to impact the environment or historic properties, including archaeological resources. This includes, but is not limited to, demolition, site preparation, and ground disturbing activities. FEMA must ensure that the project complies with appropriate EHP laws, regulations, and EOs. If the Applicant starts this work prior to FEMA's completion of the EHP review, it jeopardizes PA funding for the entire project.<sup>261</sup>

Permanent Work Projects that restore a damaged facility essentially to pre-disaster design are excluded from National Environmental Policy Act (NEPA) review through a statutory exclusion (STATEX).<sup>262</sup> All others require NEPA review. Many qualify for one of the Categorical Exclusions (CATEXs) under NEPA which apply to actions that typically have little or no impact on the environment, as long as there are no "extraordinary circumstances" as defined by DHS.<sup>263</sup> An example of an extraordinary circumstance is a potentially significant impact on species, habitats, historic properties, or environmentally sensitive areas protected under Federal law. If any extraordinary circumstances apply, the project does not qualify for a CATEX. Although

---

<sup>261</sup> Stafford Act § 316, 41 U.S.C. § 5159; 2 C.F.R. § 200.300.

<sup>262</sup> Stafford Act § 316, 41 U.S.C. § 5159.

<sup>263</sup> See FEMA Instruction 108-1, Section 3.2 and DHS Instruction 023-01-001-01, [Appendix A: Environmental and Historic Preservation Compliance](#).

many projects are statutorily excluded from NEPA review or covered by a CATEX, Permanent Work Projects require review for compliance with other EHP laws, regulations, and EOs.

Projects that involve changes in the location, footprint, alignment, or size of a facility may not meet a CATEX and may adversely affect or have impacts on wetlands; floodplains, flood heights, or upstream/downstream velocities; federally listed threatened and endangered species and their critical habitats; essential fish habitats; historic properties, including archaeological sites; and other environmental or historic resources. If a project does not meet a CATEX, it will require a higher level of NEPA analysis. The most common higher-level analysis is referred to as an environmental assessment (EA).<sup>264</sup> In rare circumstances, a project may require an environmental impact statement (EIS),<sup>265</sup> the highest level of analysis, which requires a much more detailed analysis than an EA. FEMA is responsible for NEPA compliance and identifying the required level of review.<sup>266</sup> FEMA may conduct the EA or EIS. If the Applicant chooses to conduct the EA or EIS, it must obtain FEMA approval prior to initiating the EA or EIS and submit the EA or EIS to FEMA for review and approval prior to construction. When the Applicant conducts the EA or EIS, FEMA reimburses the associated cost based on the cost share of the project.

FEMA may be required to consult with Federal, State, Territorial, and Tribal government resource agencies before the Applicant begins work. These agencies may include, but are not limited to, USFWS and NMFS for impacts to federally listed threatened and endangered species; USFWS for impacts to Coastal Barrier Resource System zones and bald or golden eagles; NMFS for impacts to essential fish habitat or marine mammals; USACE for projects in navigable waters or that involve dredging or filling in U.S. waters; and SHPO or THPO for effects to historic properties. If the Applicant begins construction work before FEMA completes its EHP review, the Applicant jeopardizes PA funding for that project. FEMA may not be able to conduct consultation with resource agencies after the Applicant initiates work on a project because it forecloses on an agencies' ability to comment on, or consider, alternatives that would avoid, minimize, or mitigate adverse impacts to the environment or effects to historic properties.

Similar to NEPA, Section 106 of the National Historic Preservation Act (NHPA) requires Federal agencies to consider actions on historic properties. While some Permanent Work Projects meet allowances within a Statewide Programmatic Agreement or only require a consultation letter to a SHPO/THPO, projects that adversely affect historic properties, including archaeological sites, may require the negotiation of a Memorandum of Agreement (MOA) or a project specific Programmatic Agreement to resolve adverse effects. Depending on the historic property, its level of significance, the level of controversy or if it is a National Historic Landmark (NHL), in addition to SHPO/THPO, FEMA may be required to invite the Advisory Council on Historic Preservation (ACHP) and the National Park Service (NPS) to participate in consultation. These Section 106 agreements to resolve adverse effects may have significant time and cost implications.

Consultations undertaken pursuant to the ESA will typically include required conservation measures for threatened and endangered species and their habitat. Applicants should address environmental planning at the beginning of the project scoping and project development stages

---

<sup>264</sup> FEMA Instruction 108-1, Section 3.2.

<sup>265</sup> Ibid.

<sup>266</sup> The National Environmental Policy Act of 1969, as amended, Public Law 91-190, 42 U.S.C. §§ 4321-4347.

to help avoid delays and additional costs at the EHP compliance stage. Early environmental planning should include consideration of potential project-related conservation and mitigation measures. When EHP laws, regulations, or EOs require actions to mitigate adverse effects, the Applicant is responsible for all costs associated with performing the required mitigation measures, unless such actions are directly related to the restoration of disaster-related damage.

FEMA is responsible for reviewing connected actions associated with a proposed project, even if FEMA is not funding the connected action. Actions are connected if they: automatically trigger other actions; cannot or will not proceed unless other actions are taken previously or simultaneously; or are interdependent parts of a larger action and depend on the larger action for their justification.

Some projects, such as Improved or Alternate Projects, may involve significant changes to the pre-disaster configuration of a facility (e.g., location, footprint, or size). FEMA conducts EHP compliance reviews on the actual SOW to be performed, prior to approving the project.

To facilitate EHP review, the Applicant should provide:

- Site map (including geographical coordinates in latitude, longitude) showing the location of all proposed areas where the Applicant will conduct site work or construction and the extent of ground disturbance (including any staging areas, access roads, parking, landscaping, grading, or utilities);
- Construction dates and photographs of all facilities in the project area;
- Photographs of all facilities in the project that may be affected by the project;
- Any known environmental issues or historic preservation concerns, such as, but not limited to, threatened and endangered species including their critical habitat, location in floodplain or wetlands, presence of asbestos within the facility, or facility's location in an archaeologically sensitive area;
- Environmental assessments;
- Historic property designations or surveys, including archaeological surveys;
- Available information about the presence of any resources protected under Federal law (see [Appendix A: Environmental and Historic Preservation Compliance](#) for a list of frequently-encountered laws); and
- Copies of permits and correspondence with regulatory agencies, including but not limited to:
  - SHPO/THPO (historic properties, including archeological sites);
  - USACE (work in navigable waterways, dredging or discharging dredged materials or fill in waterways or wetlands, culvert repair, culvert installation, culvert upsizing, riprap work, bridge work, work involved in a stream, or work in a wetland);
  - USFWS (federally listed threatened and endangered species, migratory birds, bald and golden eagles, work in Coastal Barrier Resource System areas, work in or near waterways or wetlands);
  - National Oceanic and Atmospheric Administration (federally listed threatened and endangered species, essential fish habitat, work in National Marine Sanctuaries);

- EPA (work involving underground injection, work with the potential to increase contamination of sole source aquifers); and
- State, Territorial, or Tribal environmental agencies.

## II. Requirement to Obtain and Maintain Insurance

Applicants that receive PA funding for permanent work to replace, repair, reconstruct, or construct a facility must obtain and maintain insurance to protect the facility against future loss.<sup>267</sup> This requirement applies to insurable facilities or property (buildings, contents, equipment, and vehicles), including those funded as an Alternate, Improved, or Alternative Procedures Project. FP 206-086-1 *Public Assistance Policy on Insurance*, describes these requirements in detail.<sup>268</sup>

The Applicant must insure facilities with the types and extent of insurance reasonably available, adequate, and necessary to protect against future loss to the property.<sup>269</sup> The type of insurance refers to the hazard(s) that caused the damage and extent refers to the amount of insurance required, which is calculated based on the eligible costs prior to any reductions (including the non-Federal share reduction).

The Applicant is not required to obtain and maintain insurance on facilities with \$5,000 or less in eligible costs (prior to any reductions).<sup>270</sup>

The Applicant may request that FEMA modify the insurance requirement when:

- The required insurance is not reasonably available;
- An alternative to the insurance requirement provides adequate protection against future loss to the property; or
- The required insurance is not necessary to protect against future loss to the property.

Additionally, FEMA does not require greater types and amounts of insurance than are certified as reasonably available, adequate, or necessary by the appropriate State or Territorial Insurance Commissioner.<sup>271</sup> The State or Territorial Insurance Commissioner cannot waive Federal insurance requirements but may certify the types and extent of insurance reasonable to protect against future loss to an insurable facility.<sup>272</sup>

The Applicant may comply with the insurance requirement for both flood and non-flood hazards with coverage available through commercial property insurance, which may include blanket insurance policies, standard flood insurance policies, insurance pools, or a combination of these sources.<sup>273</sup> In some cases, with FEMA approval, the Applicant may comply with the insurance requirement using a self-insurance plan.<sup>274</sup>

If the Applicant does not comply with the requirement to obtain and maintain insurance, FEMA will deny or deobligate PA funds related to the noncompliance from the current disaster.

<sup>267</sup> Stafford Act § 311, 42 U.S.C. § 5154; 44 C.F.R. § 206 Subpart I.

<sup>268</sup> [FEMA FP 206-086-1 Public Assistance Policy on Insurance](#).

<sup>269</sup> Stafford Act § 311, 42 U.S.C. § 5154; 44 C.F.R. § 206 Subpart I.

<sup>270</sup> 44 C.F.R. § 206.253(d).

<sup>271</sup> 44 C.F.R. § 206.253(c).

<sup>272</sup> 44 C.F.R. §§ 206.252(d) and 206.253(c).

<sup>273</sup> 44 C.F.R. § 206.253(b)(2).

<sup>274</sup> Stafford Act § 311(c), 42 U.S.C. § 5154(c); 44 C.F.R. Part 75.

Additionally, the facilities for which the Applicant failed to comply are ineligible for future PA funding.

#### **A. Insurance Reductions and Impact on Facility Eligibility in Subsequent Disasters**

If the Applicant does not maintain the required insurance from a previous disaster, then the facility is ineligible for PA funding in a subsequent disaster, regardless of the hazard(s) that caused the damage.<sup>275</sup>

When the Applicant receives PA funding for a facility damaged by the same hazard in a subsequent disaster, FEMA reduces funding in this subsequent disaster by the amount of insurance required from the previous disaster. If FEMA or the State or Territorial Insurance Commissioner certification modified the Applicant's insurance requirement, FEMA reduces funding by the modified insurance amount. If the Applicant's anticipated or actual insurance proceeds are higher than the amount of insurance required in the previous disaster, FEMA reduces funding by the anticipated or actual amount of insurance proceeds to avoid a duplication of benefits.

### **III. Codes and Standards**

FEMA provides PA funding to restore facilities based on pre-disaster design and function in conformity with current applicable codes, specifications, and standards.<sup>276</sup> The Applicant needs to provide documentation to support the eligibility of code or standard upgrades, including, but not limited to, the requirement to apply the codes or standards and to support they were formally adopted, implemented, and uniformly applied.

#### **A. Eligibility Criteria**

Facility repairs and new construction may “trigger” upgrade requirements established by codes or standards. Upgrades required by Federal or SLTT repair or replacement codes or standards are eligible only if the code or standard:<sup>277</sup>

- Applies to the type of restoration required;
- Is appropriate to the pre-disaster use of the facility;
- Is reasonable, in writing, formally adopted by the SLTT government, and implemented by the Applicant on or before the declaration date, OR is a legal Federal requirement;
- Applies uniformly; and
- Was enforced during the time it was in effect.

##### **1. Applies to the Type of Restoration Required**

Codes and standards must apply to the type of restoration required. Codes and standards for new construction are often different than codes and standards for repair work. If FEMA determines a facility is eligible for replacement, compliance with current codes and standards for new construction is eligible. If FEMA determines a facility is ineligible for replacement, only code-required upgrades applicable to repairs are eligible.

---

<sup>275</sup> Stafford Act § 311(b), 42 U.S.C. § 5154(c); 44 C.F.R. § 206.253(f).

<sup>276</sup> Stafford Act § 406(e), 42 U.S.C. § 5172(e); 44 C.F.R. § 206.226(d).

<sup>277</sup> 44 C.F.R. § 206.226(d).

A code or standard may include a trigger that requires:

- Upgrades to all structural components; or
- In addition to upgrading all structural components, bringing the non-structural components into conformance with current codes or standards for new construction.

If an upgrade to an entire structural or non-structural system within a building is triggered, the upgrade is only eligible if there is a direct relationship between the upgrade work and eligible damage.<sup>278</sup> Only upgrade work within the same system as the damage is eligible.

FEMA evaluates the eligibility of the work to upgrade or change the configuration of damaged systems for reasonableness with respect to the type and extent of damage.

#### **Examples of Codes or Standards that do Not Apply to the Restoration Required**

The Applicant requests PA funding for the repair of a damaged building and the construction of a parking garage. The Applicant states that while there was no parking garage prior to the incident, zoning codes and other local ordinances require one. Because parking improvements have no relationship to the disaster-related repairs, they do not apply to the type of restoration required and are ineligible.

Similarly, if a code or standard that applies to new construction or the rehabilitation of an entire road requires the construction of paved shoulders, drainage swales, and berms, the construction of these improvements is ineligible for a project involving repairs to discrete damaged portions of the road shoulders.

## **2. Appropriate to Pre-disaster Use**

Codes and standards must be appropriate to the pre-disaster use of the facility. FEMA determines the eligibility of code-required upgrades based on the facility's pre-disaster design or actual use at the time of the disaster. The least costly of the following is eligible:

- Pre-disaster use of the facility, if serving the same function for which it was originally designed; or
- Alternate use of the facility, if serving an alternate function at the time of the incident.

#### **Example of a Code or Standard that is Not Appropriate to the Pre-disaster Use of the Facility**

The original design of a facility was a warehouse; however, the Applicant was using the facility as a classroom before the incident. Restoring the facility as a classroom in conformance with classroom codes or standards would not be eligible if it would cost more than restoring the facility as a warehouse in accordance with code or standards applicable to a warehouse.

## **3. Reasonable**

Codes and standards must be reasonable. When determining reasonableness, FEMA:

- Examines the general reasonableness of the code or standard and the trigger for application of the code or standard;

---

<sup>278</sup> 44 C.F.R. § 206.223(a)(1).

- Determines whether the upgrade and trigger relate to the type of restoration required by the damage and whether the upgrade and trigger are justified based on the extent of damage;
- Considers whether the upgrade and the trigger are technically defensible from an engineering perspective; and
- Determines whether the cost of the upgrade is reasonable.

FEMA may determine a very large upgrade based on a very low trigger to be unreasonable.

#### **Example of Reasonableness**

Installation of a code or standard-required new sprinkler system throughout a building is eligible if that building is replaced. However, installation of that sprinkler system is ineligible if the eligible work only involved repair of the building, even if required by the code or standard, unless it is reasonable based on the eligible repair.

#### **4. Written, Formally Adopted, and Implemented**

Codes and standards must be in writing, formally adopted by the SLTT government, and implemented by the Applicant on or before the declaration date, OR be a legal Federal requirement, such as an ADA or seismic safety requirement. An appropriate legislative body or regulatory authority within the jurisdiction must:

- Approve the code or standard;
- Make it a matter of public record; and
- Formally incorporate it into the building code or other applicable ordinance.

The code or standard must apply to the facility in question. For example, if a State has jurisdiction over a particular type of work and formally adopts a code or standard related to that work, a Tribal or local government in that State does not necessarily have had to formally adopt the code or standard for it to apply to its facility. The Tribal or local government meets the above requirement if it shows that it implements the code or standard consistently.

FEMA does not recognize codes or standards adopted by a PNP specifically for its facilities when determining whether compliance with codes or standards is eligible. FEMA also does not accept codes or standards adopted by agencies or divisions of SLTT governments that are not authorized to set codes or standards within the broad governmental jurisdiction of the SLTT government.

#### **Example of a Standard that is Not in Writing, Formally Adopted, and Implemented**

FEMA approves funding to replace a culvert that was washed out by a flood. The State natural resources department denies the Applicant's permit application for replacing the culvert, and recommends the Applicant construct a bridge instead. The decision of the permitting officials is discretionary and not based on a written and formally adopted code or standard; therefore, the bridge construction is ineligible.

## 5. Applies Uniformly

Codes and standards must apply uniformly to all similar types of facilities, whether private or public, eligible or ineligible, in the Applicant's jurisdiction or (if applicable) in a particular hazard zone within its jurisdiction.

For FEMA to find that a code or standard and its triggers are uniformly applied, the code or standard must meet all of the following conditions. The code or standard must:

- Provide for uniform accountability in the event of noncompliance;
- Not be subject to discretionary enforcement by public officials; and
- Not allow for selective application.

A code or standard must meet three tests to demonstrate that it is not selectively applied:

- The upgrade is generally triggered regardless of the cause of damage and is also triggered for renovations or improvements.
- The code or standard is applied regardless of the source of funding for the work.
- The code or standard is not applied selectively based on the availability of funds.

### Example of a Standard that Does Not Apply Uniformly

A local jurisdiction has authority over all facilities, both public and private. A statewide code or standard imposes seismic retrofit requirements for all public buildings, but not for privately-owned buildings. The seismic retrofitting is ineligible as it does not apply uniformly to all similar types of facilities within the Applicant's jurisdiction.

## 6. Enforced

The code or standard must have been enforced during the time it was in effect. FEMA may provide PA funding for costs related to an upgrade based on confirmation of previous enforcement and in reliance on continued enforcement. If the local jurisdiction subsequently violates this criterion, no further work to comply with the code or standard is eligible within the local jurisdiction.

If FEMA determines a jurisdiction has had no reasonable opportunity to enforce the code or standard, the upgrade may be eligible. A reasonable opportunity to enforce may be lacking when a code or standard is new or when a facility affected by the code or standard has not been damaged during the time the code or standard was in effect.

### Example of a Code or Standard that Was Not Enforced While in Effect

The City's Building Code requires foundation upgrades when installing new or repairing old trailers. Prior to the incident the City allowed for the installation of several new trailers without the code-required foundation upgrades. After the incident, the Applicant requests funding to upgrade the foundation of several damaged trailers citing the City's Building Code. The upgrades to the foundation of the damaged trailers are ineligible because the Applicant had not been enforcing the standard.

## **B. FEMA Consensus-Based Codes, Specifications and Standards**

For buildings, electric power, roads, bridges, potable water supply, and wastewater, FEMA requires that Applicants incorporate specific codes, specifications, and standards in accordance with FEMA Recovery Interim Policy FP 104-009-11 *Consensus-Based Codes, Specifications and Standards for Public Assistance*.<sup>279</sup>

## **C. Ineligible Upgrades**

Upgrades recommended by design standards, guidelines, policies, industry practices, or other non-mandatory provisions are ineligible if the provisions do not meet all of the criteria noted in [Chapter 8:III.A. Codes and Standards, Eligibility Criteria](#). Upgrades that are deemed ineligible but enhance a facility's ability to resist similar damage in a future incident, may be eligible as mitigation (See [Chapter 8:IV. Hazard Mitigation](#)).

## **D. Historic Preservation Compliance**

### **1. Federal Requirement**

If the facility is listed in, or meets the criteria to be listed in, the National Register of Historic Places, and an applicable code or standard requires repair in a certain manner, costs associated with work to comply with that code or standard are eligible, even if repair costs exceed replacement costs. This is an exception to the regulatory requirement that when a facility is eligible for replacement, FEMA limits eligible costs to the less expensive of repairs or replacement (see [Chapter 8:V.C. Repair vs. Replacement, Eligible Funding](#)).<sup>280</sup>

### **2. State, Territorial, or Tribal Government Requirement**

If a State, Territorial, or Tribal historic building code or standard requires specific work be performed, FEMA evaluates the code or standard using the eligibility criteria in [Chapter 8:III.A. Codes and Standards, Eligibility Criteria](#). Most State historic building codes and standards encourage code officials to allow *less* intrusive alternatives to requirements of the prevailing codes or standards, but do not require any particular work be performed. As a result, the codes and standards usually fail to meet the eligibility criteria.

## **E. Floodplain Management and Wetland Protection**

When providing PA funding for a project in or impacting a floodplain or wetland, the following requirements apply.

For any structure (walled or roofed buildings, including mobile homes and gas or liquid storage tanks)<sup>281</sup> built, replaced, or Substantially Improved in a Special Flood Hazard Area (SFHA), the Applicant must, at a minimum, either elevate or floodproof the lowest floor (including the basement) to or above the 100-year base flood elevation (BFE).<sup>282</sup> The BFE is based on the best

---

<sup>279</sup> Stafford Act § 406(e)(1)(A)(ii), 42 U.S.C. § 5172 as amended by the Disaster Recovery Reform Act. The interim policy is available [here](#).

<sup>280</sup> 44 C.F.R. § 206.226(f)(2) and (3).

<sup>281</sup> 44 C.F.R. § 9.4.

<sup>282</sup> 44 C.F.R. § 9.11(d)(3)(i) and (iii).

available information in accordance with FEMA Policy 104-008-2: *Guidance on the Use of Available Flood Hazard Information*.<sup>283</sup>

If the structure contains a critical action and is in the 100 or 500-year floodplain, the Applicant must, at a minimum, elevate the lowest floor (including the basement) to or above the 500-year flood elevation.<sup>284</sup> If the structure in the 100 or 500-year floodplain is nonresidential, the Applicant may opt to floodproof to the required level instead of elevating.<sup>285</sup>

Critical actions are actions for which even a slight chance of flooding is too great and are further defined in 44 C.F.R. § 9.4, which includes examples of actions that FEMA deems critical. The minimum floodplain of concern for critical actions is the 500-year floodplain (also referred to as the critical action floodplain). If an action is not specified in 44 C.F.R. § 9.4, FEMA utilizes the U.S. Water Resource Council Floodplain Management Guidelines<sup>286</sup> to determine whether a proposed action is deemed a critical action by considering the following:

- The potential for additional impacts if the proposed project is flooded in a future incident (e.g., the facility contains volatile or toxic materials);
- The ability for occupants of buildings such as hospitals, schools, and nursing homes to evacuate in time to avoid loss of life and injury given the flood warning lead-time available in a future incident; and
- The potential for emergency services and utilities to become inoperative, or essential and irreplaceable records to be lost if a facility is flooded in a future incident.

Further, if the structure is substantially improved in a Coastal High Hazard Area, the Applicant must elevate the facility to the BFE (the 500-year

The term “**critical action**” should not be confused with a PNP “critical service.”

### Terminology

FEMA publishes **Flood Insurance Rate Maps** that identify the following:

- **Special Flood Hazard Area:** The land area subject to inundation during a flood having a 1 percent chance of occurring in a given year (also referred to as the base flood or 100-year flood).
- **Base Flood:** The flood which has a one percent chance of being equaled or exceeded in any given year (also known as a 100-year flood). This term is used in the National Flood Insurance Program (NFIP) to indicate the minimum level of flooding to be used by a community in its floodplain management regulations.
- **Base Flood Elevation:** The computed elevation to which floodwater is anticipated to rise during the base flood.
- **Coastal High Hazard Area:** The area subject to high velocity waters including, but not limited to, hurricane waves or tsunamis. On a Flood Insurance Rate Map (FIRM), this appears as zone V1-30, VE or V.
- **Floodway:** The portion of the floodplain which is effective in carrying flow, within which this carrying capacity must be preserved and where the flood hazard is usually highest, i.e., where water depths and velocities are the greatest. It is that area which provides for the discharge of the base flood so the cumulative increase in water surface elevation is no more than one foot.

<sup>283</sup> [www.fema.gov/sites/default/files/2020-04/Available Flood Hazard Information Policy 104-008-2.pdf](http://www.fema.gov/sites/default/files/2020-04/Available_Flood_Hazard_Information_Policy_104-008-2.pdf).

<sup>284</sup> 44 C.F.R. § 9.11(d)(3)(i) and (ii).

<sup>285</sup> 44 C.F.R. § 9.11(d)(3)(iii).

<sup>286</sup> [www.energy.gov/nepa/downloads/floodplain-management-guidelines-implementing-co-11988-water-resources-council-1978](http://www.energy.gov/nepa/downloads/floodplain-management-guidelines-implementing-co-11988-water-resources-council-1978).

flood elevation for critical actions) (including wave height) on open works (walls columns, piers, piles, etc.) and anchor it properly.<sup>287</sup> New construction is prohibited in a Coastal High Hazard Area and within regulatory floodways unless the structure has a functionally dependent use; or facilitates open space use.<sup>288</sup>

#### **F. Requirement for Communities Participating in the National Flood Insurance Program**

A community that participates in the National Flood Insurance Program (NFIP) must adopt and enforce a floodplain management ordinance that meets or exceeds the minimum NFIP requirements.<sup>289</sup> Such an ordinance must contain construction requirements for new construction or Substantial Improvement of buildings located in a SFHA. In addition to other requirements, the ordinance must require that new or Substantially Improved buildings be elevated so that the lowest floor is at or above the BFE or floodproofed to a level equal to or above the BFE (some communities have more restrictive ordinances that require elevation or floodproofing to greater levels.)

Work required for compliance with the floodplain ordinance is eligible provided the ordinance meets the eligibility criteria for codes and standards and the Substantial Improvements are disaster-related repairs. If the cost to repair a facility in accordance with the floodplain ordinance is greater than the cost to replace the facility in accordance with the ordinance, the eligible cost is capped at the replacement cost.

#### **G. Accessibility for Individuals with Disabilities**

The ADA and other disability rights laws such as the Architectural Barriers Act (ABA) require that all newly constructed facilities be accessible to and usable by individuals with disabilities<sup>290</sup> and that repairs that might affect the ability of individuals with disabilities to use the facility comply with accessibility standards.<sup>291</sup> In some circumstances, FEMA provides PA funding for accessibility compliance requirements.

FEMA provides PA funding regardless of whether the facility was in compliance prior to the incident, provided the Applicant was not cited for a violation. If the Applicant was notified of being in violation of a requirement prior to the incident and did not bring the facility into compliance, then accessibility requirements related to the violation are ineligible.

---

<sup>287</sup> 44 C.F.R. § 9.11(d)(2) and (7).

<sup>288</sup> 44 C.F.R. § 9.11(d)(1)

<sup>289</sup> 44 C.F.R. § 60.3.

<sup>290</sup> 42 U.S.C. § 12101 et seq.; 28 C.F.R. § 35.151(a)

<sup>291</sup> 42 U.S.C. § 12147(a); 28 C.F.R. § 35.151(b).

Some special provisions apply when ADA requirements “threaten or destroy the historic significance of qualified historic buildings and facilities.”<sup>292</sup> FEMA addresses these provisions during its consultation with the SHPO or THPO and incorporates them into the agreement regarding the repairs to the building.

FEMA may also provide PA funding for additional SLTT government ADA requirements that meet the eligibility criteria for codes or standards, as described in [Chapter 8:III.A. Codes and Standards, Eligibility Criteria.](#)

### **Facilities Eligible for Repair**

If the primary function area sustained eligible disaster damage, FEMA may provide PA funding for reasonable changes required by an eligible code or standard to increase accessibility to undamaged elements that serve the primary function area and the path of travel to the primary function area such as an accessible entrance, accessible routes to the primary function area, restroom access, accessible drinking fountains, and other elements.

To be eligible for PA funding, the required alterations must have a reasonable and technically supportable relationship to the damaged elements of the facility. As a result, there may be alterations required that are ineligible for PA funding.

PA funding for alterations to the path of travel requirements cannot exceed the ADA requirement of 20 percent of the total cost to repair the primary

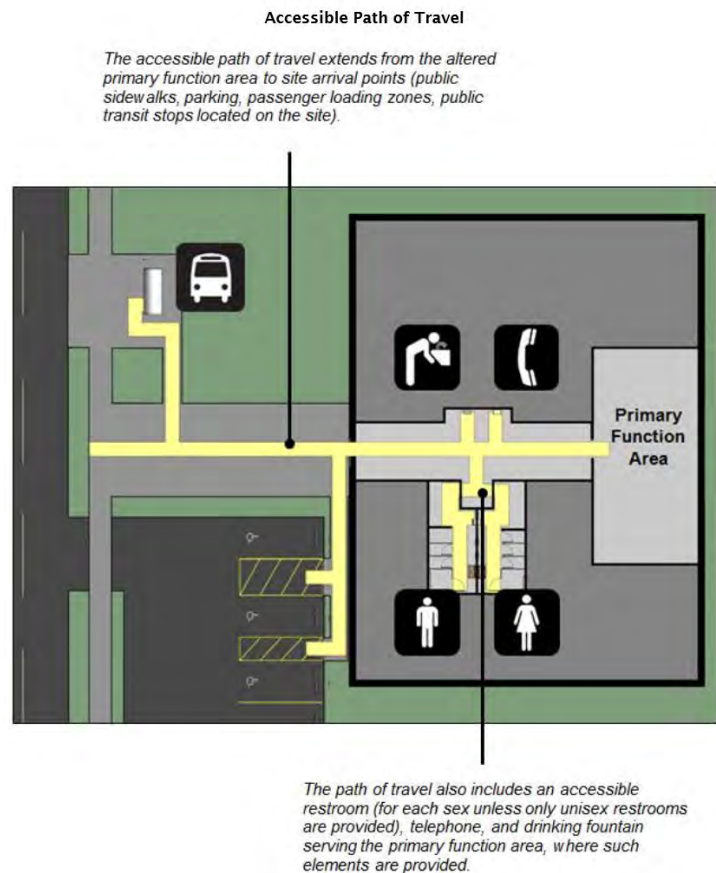

### **Terminology**

A **primary function area** is the area where a major activity occurs for which the facility is intended. Examples include the dining area of a cafeteria, meeting rooms of a conference center, and public offices providing governmental services to the public.

**Path of travel** includes a continuous, unobstructed way of pedestrian passage to the primary function area. This includes interior and exterior approaches such as hallways, doorways, sidewalks, streets, parking areas, and public transit drop points. See Figure 14. *Path of Travel.*

**Service facilities** to the primary function area include restrooms, telephones, and drinking fountains.

See [www.access-board.gov/guidelines-and-standards/buildings-and-sites/about-the-ada-standards/guide-to-the-ada-standards](http://www.access-board.gov/guidelines-and-standards/buildings-and-sites/about-the-ada-standards/guide-to-the-ada-standards).

**Figure 14. Path of Travel**

<sup>292</sup> 28 C.F.R. § 36.405.

function area.<sup>293</sup> The 20 percent calculation is defined at 28 C.F.R. § 35.151(b)(4)(iii). If the costs for ADA upgrades exceed the 20 percent, the Applicant must prioritize the accessible elements as described in 28 C.F.R. § 35.151 (b)(4)(iv).

If the Applicant engages in repairs that are ineligible for PA funding, the cost of requirements triggered by those repairs are ineligible.

## H. Permit Requirements

If a Federal or SLTT government permitting agency requires additional work based on a code or standard that does not meet the eligibility criteria in [Chapter 8:III.A. Codes and Standards, Eligibility Criteria](#), the cost of the additional work is only eligible if the work:

- Does not change the pre-disaster size, capacity, or function of the facility;
- Applies to the type of repair or restoration required;
- Is reasonable based on the type and extent of damage; and
- Is an established, enforced, uniform practice that applies to all similar types of facilities within the Applicant's jurisdiction, regardless of the circumstance.

## IV. Hazard Mitigation

Hazard mitigation is any sustained action taken to reduce or eliminate long-term risk to people and property from natural hazards and their effects. FEMA has authority to provide PA funding for cost-effective hazard mitigation measures for facilities damaged by the incident.<sup>294</sup>

In addition to providing funding for hazard mitigation under the PA Program, FEMA also provides hazard mitigation funding under its Hazard Mitigation Assistance (HMA) programs. FEMA's Federal Insurance and Mitigation Administration administers the HMA programs, which are briefly described in Figure 15. *FEMA Hazard Mitigation Programs*. The eligibility criteria, procedures, and timelines for implementation of the hazard mitigation measures funded under the HMA programs differ from the hazard mitigation measures funded under the PA Program.

---

<sup>293</sup> For calculation purposes, the total costs of the primary function area repair include the repair costs of the roof, HVAC system, mechanical rooms, janitorial closets, locker rooms, and private offices directly associated with the repair of the primary function area.

<sup>294</sup> Stafford Act § 406(e), 42 U.S.C. § 5172; 44 C.F.R. § 206.226(e).

\* See exception for Alternative Procedure Projects in Chapter 2, Section VII.G.4(c).

**Figure 15. FEMA Hazard Mitigation Programs**

FEMA refers to PA-funded hazard mitigation as PA mitigation and mitigation funded under HMGP as HMGP mitigation.

The Applicant may use both PA mitigation and HMGP mitigation funds to implement mitigation measures on the same facility, but not for the same work. The Applicant cannot use funds from one of these mitigation programs to meet the non-Federal cost share of work funded under the other mitigation program.

This document provides details regarding PA mitigation funding. FEMA’s *Hazard Mitigation Assistance Guidance* provides further details on HMGP mitigation funding and the HMA programs.<sup>295</sup>

#### **A. Public Assistance Hazard Mitigation**

FEMA evaluates proposed PA mitigation measures for eligibility, cost-effectiveness, technical feasibility and effectiveness, and compliance with EHP laws, regulations, and EOs. In addition, FEMA ensures that the mitigation does not negatively impact the facility’s operation or surrounding areas or create susceptibility to damage from another hazard.

### Hazard Mitigation Grant Program

The Recipient manages HMGP and is responsible for soliciting applications from STTL government agencies. Projects submitted to the Recipient must be in accordance with the Recipient’s Hazard Mitigation Plan, address severe detrimental impacts, and have the greatest potential to reduce future losses. Eligible projects include acquisition of hazard-prone property, retrofitting existing buildings and facilities, elevation of flood-prone structures, infrastructure protection measures, and hazard mitigation planning. SLTT government agencies should direct questions regarding HMGP to the State, Territorial, or Tribal Hazard Mitigation Officer: [www.fema.gov/state-hazard-mitigation-officers](http://www.fema.gov/state-hazard-mitigation-officers).

<sup>295</sup> [www.fema.gov/grants/mitigation/hazard-mitigation-assistance-guidance](http://www.fema.gov/grants/mitigation/hazard-mitigation-assistance-guidance).

To be eligible for PA funding, the mitigation measures must directly reduce the potential of future damage to the damaged portion(s) of the facility. Generally, eligible PA mitigation measures are those the Applicant performs on the damaged portion(s) of the facility. If the Applicant proposes mitigation measures that are distinct and separate from the damaged portion(s) of the facility, FEMA evaluates the proposal and determines eligibility on a case-by-case basis considering how the mitigation measure protects the damaged portion(s) of the facility and whether the mitigation measure is reasonable based on the extent of damage. Some examples of such measures include:

- Constructing floodwalls around damaged facilities;
- Installing new drainage facilities (including culverts) along a damaged road;
- Adding fire suppression systems at facilities damaged by wildfire; and
- Dry floodproofing both damaged and undamaged buildings that contain components of a system that are functionally interdependent (i.e., when the entire system is jeopardized if any one component of the system fails).

If FEMA determines mitigation measures to undamaged portions ineligible as PA mitigation the Applicant may request HMGP funding from the State, Territorial, or Tribal government to provide protection to undamaged portions, while utilizing PA mitigation funds to provide protection to damaged portions.

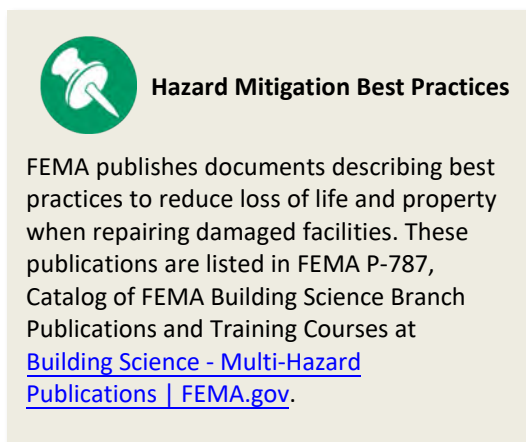

PA mitigation opportunities usually present themselves during facility repair. However, in cases where the Applicant needs to repair a facility in an expedited manner, it may miss an opportunity to implement mitigation measures during repair. If the Applicant implements mitigation measures after the PA-funded repair is complete, the mitigation work may still be eligible for PA funding; however, FEMA will not provide PA funding for any duplicative work triggered by the subsequent mitigation.

In some instances, the Applicant may implement mitigation measures after the incident occurs but before the incident is declared or before FEMA has the opportunity to evaluate the measure for eligibility. In these cases, the mitigation work may still be eligible for PA funding if it is cost-effective and FEMA confirms compliance with applicable EHP laws, regulations, and EOs.

If FEMA approves PA funding for mitigation and the Applicant does not complete the PA mitigation work, FEMA will deobligate the PA mitigation funds.

### **Cost-effective Evaluation**

PA mitigation measures must be cost-effective.<sup>296</sup> FEMA considers PA mitigation measures to be cost-effective if any of the following criteria are met:

**Hazard Mitigation Best Practices**

FEMA publishes documents describing best practices to reduce loss of life and property when repairing damaged facilities. These publications are listed in FEMA P-787, Catalog of FEMA Building Science Branch Publications and Training Courses at [Building Science - Multi-Hazard Publications | FEMA.gov](#).

---

<sup>296</sup> 44 C.F.R. § 206.226(e).

- The cost for the mitigation measure does not exceed 15 percent of the total eligible repair cost (prior to any insurance reductions) of the facility or facilities for which the mitigation measure applies;
- The mitigation measure is specifically listed in [Appendix J: Cost-Effective Public Assistance Hazard Mitigation Measures](#), AND the cost of the mitigation measure does not exceed 100 percent of the eligible repair cost (prior to any insurance reductions) of the facility or facilities for which the mitigation measure applies; and
- The Recipient or Applicant demonstrates through an acceptable benefit-cost analysis (BCA) methodology that the measure is cost-effective. FEMA's BCA software<sup>297</sup> provides appropriate BCA methodologies.

Many mitigation measures that do not meet the first two requirements above prove to be cost-effective based on a BCA. If the mitigation measure is not cost-effective based on the first two criteria, FEMA, the Recipient, and the Applicant work together to develop a BCA to determine whether it is cost-effective.

A BCA is based on a comparison of the total estimated cost for the PA mitigation measure to the total value of expected benefits to society. FEMA's BCA methodology considers common project benefits, which include reductions in the magnitude or frequency of:

- Damage to the facility and its contents;
- The need for emergency protective measures;
- The need for temporary facilities;
- Loss of function;
- Casualties (typically included only for earthquake, tornado, and wildfire mitigation); and
- Previous impacts regardless of whether the impacts occurred in Federal declarations (only if documented).

## **B. Public Assistance Mitigation Funds for Capped Projects**

### **1. Improved Project**

If the capped amount for an Improved Project includes PA mitigation funds and the Applicant either does not complete the PA mitigation work, or replaces or relocates the original facility, FEMA deobligates the PA mitigation funds.

### **2. Alternate Project**

If the SOW to restore a facility includes PA mitigation, and the Applicant elects to proceed with an Alternate Project, FEMA does not include costs related to the PA mitigation in the capped amount for the Alternate Project.

### **3. Alternative Procedures Project**

When the Applicant is restoring the function, but changing the pre-disaster capacity of a facility, the proposed PA mitigation SOW is developed based on the actual SOW to be performed; however, the cost-effectiveness is evaluated based on the fixed-cost amount accepted for the pre-disaster restoration SOW. If the capacity is increased, the proposed hazard mitigation SOW and cost is limited to the SOW and cost necessary to mitigate to the pre-disaster capacity of the

---

<sup>297</sup> [www.fema.gov/grants/guidance-tools/benefit-cost-analysis](http://www.fema.gov/grants/guidance-tools/benefit-cost-analysis).

damaged facility. If the Applicant does not complete the approved PA mitigation, FEMA deobligates the portion of the fixed-cost amount related to hazard mitigation.

## V. Repair vs. Replacement

When evaluating whether a damaged facility is eligible for replacement, FEMA compares the repair cost with the replacement cost and evaluates the feasibility of repairing the facility.<sup>298</sup>

A facility is considered repairable when:

- The cost to repair the disaster-related damage does not exceed 50 percent of the cost to replace the facility based on its pre-disaster size, capacity, and function; and
- It is feasible to repair the facility so that it can perform the pre-disaster function as well as it did prior to the incident.<sup>299</sup>

The comparison of the repair cost to the replacement cost results in a fraction that expresses repair as a percentage of replacement. The percentage is calculated with the repair cost as the numerator and the replacement costs as the denominator. FEMA refers to this as the “50% Rule.”

The purpose of the 50% Rule is to make an early determination on whether it is more prudent to repair or replace a facility. It is not intended to be a full calculation of all eligible project costs.

### A. Calculation

The repair cost (numerator) is the cost of repairing disaster-related damage only and includes costs related to compliance with codes and standards that apply to the repair of the damaged elements only.<sup>300</sup> The numerator does not include costs associated with:

- Upgrades of non-damaged elements even if required by codes or standards (e.g., elevation of an entire facility triggered by repair);
- Demolition beyond that which is essential to repair the damaged elements;
- Site work;
- Soft costs;
- Contents;
- Hazard mitigation measures; or
- Emergency Work.

The replacement cost (denominator) is the cost of replacing the facility based on its pre-disaster design (size and capacity) and function in accordance with applicable codes or standards. The denominator does not include costs associated with:

- Demolition;
- Site work;

<sup>298</sup> 44 C.F.R. § 206.226(f).

<sup>299</sup> 44 C.F.R. § 206.226(f)(1).

<sup>300</sup> This includes consensus-based codes, specifications, and standards.

#### Terminology

**Soft costs** are those not considered as direct construction costs, including:

- Architectural costs
- Engineering costs
- Project management costs
- Financing
- Legal fees
- Other pre-/post-construction expenses

**Site Work** is any exterior work at the site. Examples include:

- Excavation
- Backfill
- Erosion control
- Utility installation
- Paving

- Soft costs;
- Contents;
- Hazard mitigation measures; or
- Emergency Work.

Although certain costs are not included in the 50% Rule calculation to determine whether the facility is eligible for replacement, the costs may be eligible for PA funding subject to all other eligibility requirements.

## B. Written Request

The Applicant should submit its request for replacement within one year of the Declaration. The request should include both repair and replacement cost estimates with supporting documentation, prepared in accordance with the requirements described in [Chapter 9:II.E.2. Applicant Estimates](#).

FEMA professionally licensed engineers and architects, qualified cost estimators, construction managers, and staff with other technical expertise, as necessary, develop or review and validate the estimates used in the 50% Rule calculations. For any replacement requests over \$5 million, FEMA submits the estimates to an independent third-party for an additional review of the estimates. FEMA considers the results of the third-party review prior to approving replacement.

## C. Eligible Funding

If the estimated repair cost exceeds 50 percent of the estimated replacement cost,<sup>301</sup> the actual replacement cost is eligible. The Applicant may elect to repair the facility in conformance with applicable codes and standards. In this case, FEMA limits the eligible cost to the estimated cost of repair or replacement, whichever is less.<sup>302</sup>

If the facility is not eligible for replacement based on the 50% Rule but the **total** estimated repair cost exceeds the **total** estimated replacement cost (not the estimated costs used for the 50 percent calculation), FEMA caps the total eligible cost at the **total** estimated replacement cost.

Relocation is only eligible for PA funding if it meets the requirements of [Chapter 8:VI. Relocations](#). If compliance with a code or standard is not feasible without relocating a facility and

### Floodplain Management Ordinance Compliance

The costs to comply with a local floodplain management ordinance that requires elevation or floodproofing of a Substantially Damaged facility in an SFHA are eligible for PA funding. These costs are not included in the repair cost of the 50% Rule calculation but are included in the replacement cost of the calculation. Therefore, the repair cost for the 50% Rule calculation is estimated without regard to whether the facility receives a substantial damage determination or whether the facility contains a critical action.

<sup>301</sup> For repair versus replacement, the term “replacement cost” means the cost of replacement in accordance with applicable codes and standards.

<sup>302</sup> 44 C.F.R. § 206.226(f)(2).

relocation is not eligible for PA funding based on Chapter 8:VI. *Relocations*, then FEMA caps the funding without including the costs related to relocation and considers it an Improved Project.

Demolition of a facility that is eligible for replacement is eligible as part of the work to replace the facility. Eligible costs include removal of the associated demolition debris.

PA mitigation funding cannot be applied to replacement facilities, unless the facility is part of an Alternative Procedures Project (described in [Chapter 8:VIII. Capped Projects](#)) or the mitigation measure is listed in [Appendix J: Cost Effective Public Assistance Hazard Mitigation Measures](#).

As discussed in [Chapter 8:III.D.1. Historic Preservation Compliance, Federal Requirement](#), if an applicable code or standard requires that a historic facility be restored in a certain manner and does not allow other options, the cost to restore the facility in accordance with the code or standard is eligible and may exceed the estimated replacement cost.<sup>303</sup> A historic facility is defined as one listed in, or eligible for listing in, the National Register of Historic Places.

#### Substantial Damage Determination

A floodplain manager's Substantial Damage determination is part of the NFIP eligibility process and is separate and distinct from the PA eligibility process for determining whether a facility is eligible for replacement or relocation.

FEMA determines whether replacement costs are eligible for PA Program based on the criteria in [Chapter 8:V. Repair vs. Replacement](#). FEMA determines whether relocation costs are eligible for PA funding based on the criteria in [Chapter 8:VI. Relocation](#) and [8:IV. Hazard Mitigation](#).

#### D. Replacement of Components of a Facility or System

FEMA does not apply the 50% Rule to a facility's structural or mechanical components (e.g., windows, roofs, HVAC; electrical, plumbing). For example, FEMA does not apply the 50% Rule to a damaged HVAC system to determine whether the system should be repaired or replaced because it is a component of a building. If the HVAC system is repairable, as determined by an inspector or engineer with appropriate technical expertise, FEMA limits its funding to the repair of the system.

For facilities that are systems composed of multiple components that are easily segregated, FEMA applies the 50% Rule to individual components of the system, rather than the entire system. The following are examples of facilities that are systems to which FEMA applies the 50% Rule calculation to individual components:

- Drainage channel or irrigation system: a section from damaged node to damaged node, which is where there are intersections or connecting points.
- Water or sewer line system: a section of piping from damaged manhole to damaged manhole, a lift station, or a manhole structure.
- Water or wastewater treatment plant: a control building, clarifier, or sedimentation pond.
- Roadway: each damaged roadway section.

Electrical distribution systems are evaluated for replacement based on the criteria in [Chapter 8:IX.D.2. Power: Transmission and Distribution System Conductor Replacement](#).

---

<sup>303</sup> 44 C.F.R. § 206.226(f)(3).

The following are examples of facilities to which FEMA applies the 50% Rule to the entire facility:

- Bridges;
- Culverts;
- Buildings;
- Pumping stations;
- Piers;
- Pools, including integral pumping;
- Bath houses or rest rooms;
- Equipment;
- Lighting structures; and
- Signs.

## VI. Relocation

FEMA may approve funding for and require restoration of an Applicant's destroyed (i.e., eligible for replacement) facility at a new location. FEMA only provides PA funding when all of the following conditions apply:

- The facility is subject to repetitive heavy damage because of its location. For example, facilities located in a SFHA or wildland-urban interface<sup>304</sup> and subject to repetitive heavy flood or fire damage;
- Project approval is not barred by other regulations;<sup>305</sup> and
- The overall project, including all costs, is cost-effective. If the cost to relocate the facility is less than the eligible cost to replace the facility at its original location (the value of the land at the original site is not included as part of this evaluation) then the project is cost effective. In instances where the cost of relocation exceeds the cost to replace the facility at its original location FEMA may use its BCA process and software to determine cost effectiveness.

An applicable Federal or SLTT code or standard, such as a floodplain management regulation, may also require that a damaged facility be relocated away from a hazardous area (e.g. floodway). If the facility is destroyed (i.e. eligible for replacement), FEMA determines whether relocation is cost-effective in the same manner as described above.

If the Applicant requests relocation of a facility that FEMA is not requiring to be relocated, FEMA may provide funding for the relocation if it is more cost-effective than replacing it at the current location. In the case of a request for relocation, FEMA evaluates the cost effectiveness as a PA mitigation measure using its BCA process and software<sup>306</sup> to compare the benefits of the damage prevented to the facility at its original location against the cost of replacement and relocation at the new location.

---

<sup>304</sup> The wildland-urban interface (WUI) is the area between wildland and urban land.

<sup>305</sup> 44 C.F.R. § 206.226(g)(1).

<sup>306</sup> [www.fema.gov/grants/guidance-tools/benefit-cost-analysis](http://www.fema.gov/grants/guidance-tools/benefit-cost-analysis).

If relocation is not feasible, cost effective, or eligible for PA funding the Applicant may request an Improved, Alternate, or Alternative Procedures Project as detailed in [Chapter 8:VIII. Capped Projects](#).

#### **A. Eligible Work and Funding**

Eligible work associated with relocation includes land acquisition and construction of necessary support facilities, such as roads, parking lots, and utilities. Demolition and removal of the original facility are also eligible if deemed necessary.<sup>307</sup> FEMA limits PA funding to the amount necessary to make the relocated facility and its associated components operational.

FEMA considers the proximity of the new site to utilities (water, sewer, and electric) and approves the least costly solution. Construction of an off-site support facility is only eligible if it is a utility that would serve the relocated facility exclusively.

For land acquisition, if the facility was located on 10 acres of land at the time of the incident, and FEMA determines that 10 acres is not necessary for the operation of the facility, FEMA limits PA funding to the necessary amount of land.

In situations where the Applicant owns the facility, but not the land or the support facilities at the original location, the cost to purchase the land or build support facilities is ineligible.

When FEMA requires relocation, FEMA does not provide future PA funding for repair or replacement of the original facility or for other facilities at the original site unless the facility facilitates an open space use.<sup>308</sup> For example, if the Applicant converts the original site to a park, FEMA may provide PA funding in the future for park components, such as benches, tables, restrooms, or gravel roads.

#### **B. Sale or Lease of Property at Original Site**

The Applicant may sell or lease the original facility or the land on which a relocated facility was originally located. The Applicant must inform the purchaser of the property that FEMA will not provide future PA funding for repair or replacement of the original facility or for other facilities at the original site unless the facility facilitates an open space use.

The property which the facility is relocated to, and the relocated facility itself, are subject to the real property provisions of 2 C.F.R. part 200 including disposition and reporting requirements under 2 C.F.R. §§ 200.311 and 329, respectively.

If the Applicant takes an action, such as demolition, using PA funds at the original site, FEMA must complete an EHP review before the action occurs.

## **VII. Facility Located in or Impacting a Floodplain**

When FEMA provides PA funding for restoration of a facility located in or impacting a floodplain, FEMA is required to ensure minimization of harm to or within the floodplain.

---

<sup>307</sup> 44 C.F.R. § 206.226(g)(2).

<sup>308</sup> 44 C.F.R. § 206.226(g)(3).

## **A. 8-Step Decision-making Process**

FEMA is responsible for determining whether a PA project will have an adverse impact on the 100-year floodplain (500-year floodplain for critical actions). To make this determination, FEMA initiates the 8-step decision-making process defined in 44 C.F.R. § 9.6. As part of this process FEMA evaluates the impacts the project may have on the floodplain and practicable alternatives for environmental, social, economic, technical, and legal factors, as defined in 44 C.F.R. § 9.9. Some alternatives may not be eligible for PA funding. For example, if the 8-step review process identifies relocation of a facility as a practicable alternative to repairing it in the SFHA, but the facility is ineligible for relocation as described in [Chapter 8:VI. Relocations](#), then costs associated with relocating the facility are ineligible for PA funding. FEMA considers whether each alternative identified is eligible for PA funding and, if not, whether the Applicant has funding available to proceed with the alternative without PA funding.

Projects in the 100-year floodplain (500-year floodplain for critical actions) are only eligible if, as a result of completing the 8-step process, FEMA is unable to identify a practicable alternative to restoring the facility within the floodplain. The 8-step process is not required for projects where the repair cost is less than \$5,000.<sup>309</sup>

## **B. Facility Located in a Special Flood Hazard Area**

SFHAs<sup>310</sup> are areas that are subject to inundation during a 100-year flood (a flood having a 1 percent chance of occurrence in a given year).

### **1. National Flood Insurance Program**

For an NFIP-insurable facility located in an SFHA, FEMA must reduce PA funding when the facility is:

- Located in an area that FEMA has identified as an SFHA for more than 1 year;
- Damaged by flooding; and
- Uninsured for flood loss.

If the Applicant believes that its property is incorrectly identified on a Flood Insurance Rate Map (FIRM) as being located within the SFHA, it may request a Letter of Map Amendment or Letter of Map Revision from FEMA within 6 months of the declaration. If the Applicant's request is approved and FEMA determines that the property is not located in an SFHA, FEMA may reinstate PA funding. Costs incurred in pursuit of a Letter of Map Amendment or Letter of Map Revision are ineligible for PA funding.

If the Applicant does not have flood insurance for the facility or carries inadequate flood insurance for the insurable facility, FEMA reduces eligible project costs by the lesser of:

- The maximum amount of insurance proceeds that could have been obtained from an NFIP standard flood insurance policy for the building and its contents,<sup>311</sup> or
- The value of the building and its contents at the time of the incident.

---

<sup>309</sup> 44 C.F.R. § 9.5(c)(13).

<sup>310</sup> 44 C.F.R. § 206.251.

<sup>311</sup> 44 C.F.R. § 206.252(a).

FEMA does not apply this reduction to PNP facilities in communities that do not participate in the NFIP.<sup>312</sup> However, for FEMA to provide PA funding for the PNP facility, the community must agree to participate in the NFIP within 6 months of the declaration and the PNP must purchase the required flood insurance; or the PNP must obtain and maintain flood insurance from another source.<sup>313</sup>

#### Intent of Permanent Work Alternative Procedures

The intent of the PA Alternative Procedures for Permanent Work is to provide the Applicant with a flexible avenue to drive its own recovery outcomes. Instead of driving the Applicant's recovery within the confines of what the PA Program can fund, PA staff develop projects and identify the amount of PA funds that are available for Applicants to use toward a strategic recovery outcome. The Recipient and Applicant may also work together with various Federal agencies and other stakeholders to identify other available sources of funding that may also be applied to achieve the desired outcome.

## VIII. Capped Projects

FEMA provides three options that provide flexibility for the Applicant to use PA funding differently than restoring the pre-disaster design and function of the facility. For these options, FEMA caps the amount of PA funding based on the estimated amount to restore the damaged facility to its pre-disaster design and function, including current eligible codes and standards as defined in [Chapter 8:III. Codes and Standards](#).<sup>314</sup>

The three capped project options are:

- Alternative Procedures Project under Section 428 (Large Projects only):<sup>315</sup> This type of project offers the maximum amount of flexibility with how the Applicant may use PA funding, including use of excess funds which are not eligible under the Improved or Alternate Project options. The Applicant may use funds across all Permanent Work Alternative Procedures Projects with no requirement to rebuild communities back to what existed prior to the disaster. Alternative Procedures Projects are subject to acceptance of a fixed-cost offer within the deadlines described in [Chapter 9:II.E.6\(a\). Fixed Cost Offer Deadlines](#).
- Improved Project: The Applicant may wish to make improvements to a damaged facility that are not required by eligible codes or standards. A project that restores the pre-disaster function of a facility and incorporates improvements or changes to the pre-disaster design is an Improved Project.
- Alternate Project: The Applicant may determine that the public welfare is not best served by restoring the function of the damaged facility. When this occurs, the Applicant must obtain FEMA's approval to apply PA funding toward a different facility (or facilities). FEMA refers to this as an Alternate Project.<sup>316</sup> The Alternate Project must be a

---

<sup>312</sup> 44 C.F.R. § 206.252(b).

<sup>313</sup> Ibid.

<sup>314</sup> This includes consensus-based codes, specifications, and standards.

<sup>315</sup> Stafford Act § 428, 42 U.S.C. § 5189f.

<sup>316</sup> 44 C.F.R. § 206.203(d)(2).

permanent project that benefits the general public, serving the same general area that was being served by the original facility.

Capped projects may involve significant changes to the pre-disaster configuration of a facility (e.g., location, footprint, or size). FEMA conducts EHP compliance reviews on the actual proposed SOW to be performed, prior to approving the project.

## **A. Capped Project Funding**

### **Alternative Procedures Project Funding Under Section 428**

FEMA caps Federal funding for an Alternative Procedures Project based on the aggregate Federal share of the approved estimated cost:

- To restore the damaged facilities to pre-disaster design and function in accordance with eligible codes and standards; and
- For cost-effective PA mitigation measures associated with the actual restoration SOW that the Applicant will perform.

### **Improved Project Funding**

FEMA limits Federal funding for an Improved Project to the lesser of the following:

- The Federal share of the approved estimate to restore the damaged facility to its pre-disaster design and function; or
- The Federal share of the actual costs of completing the Improved Project.<sup>317</sup>

FEMA only increases eligible funding for an Improved Project if the Applicant identifies an error or omission in the original SOW or cost estimate related to restoring the facility to its pre-disaster design and function.

### **Alternate Project Funding**

FEMA limits Federal funding for an Alternate Project to the lesser of:

- The Federal share of the approved estimate to restore the damaged facility to its pre-disaster design and function; or
- The Federal share of the actual cost of completing the Alternate Project.<sup>318</sup>

## **B. Use of Capped Project Funds**

FEMA has different requirements for how the Applicant can use the funds related to each type of capped project.

---

<sup>317</sup> 44 C.F.R. § 206.203(d)(1).

<sup>318</sup> 44 C.F.R. § 206.203(d)(2)(ii) and (iii).

## 1. Use of Alternative Procedures Project Funds

FEMA will complete a fixed-cost estimate for all large Permanent Work Projects. FEMA will transmit this estimate as a fixed-cost offer to the Applicant for consideration. When the Applicant accepts a fixed cost offer for a Large Project in accordance with [Chapter 9:II.E.6\(a\). Fixed Cost Offer Deadlines](#), FEMA considers it an Alternative Procedures Project and the Applicant is:

- Not required to rebuild back to what existed prior to the disaster;
- Allowed to share funds across all Alternative Procedures Permanent Work Projects;
- Not required to track costs to specific work items or facilities as funds can be shared across all Alternative Procedures Permanent Work Projects;
- Allowed to retain and use excess funds to reduce risk and improve future disaster operations (subject to timely closeout); and
- Eligible for cost-effective hazard mitigation on Replacement Projects.

The Applicant may use Alternative Procedures Permanent Work Project funds, including any excess funds across all of its Alternative Procedures Permanent Work Projects.

The Applicant may request to use the funds for any of the activities defined as eligible under the *Use of Fixed-Cost Funds* column in the table below. Once FEMA approves, and the Applicant completes, the SOW associated with these activities, the Applicant may use any excess funds for the expanded list of eligible activities listed under the *Use of Excess Funds* column.

Any excess funds remaining after the approved SOW is complete may be used for cost-effective activities that reduce the risk of future damage, hardship, or suffering from a major disaster, and activities that improve future PA operations or planning. The Applicant must submit a proposed SOW for use of any excess funds, along with a project timeline to the Recipient within 90 days of completing its last Alternative Procedures Project. The Recipient must forward the request to FEMA within 180 days of date the last Alternative Procedures Project was completed. FEMA evaluates the proposed use of excess funds for reasonableness to ensure prudent use of funds. FEMA also evaluates the submitted project timeline and approves an appropriate deadline for work completion, not to exceed the overall disaster period of performance.

The following table lists examples of eligible and ineligible types of work and costs when using fixed-cost funds and excess funds.

| <b>Type of Work or Cost (all work or costs listed must otherwise be eligible for PA)</b> | <b>Use of Fixed-Cost Funds</b> | <b>Use of Excess Funds</b> |
|--|--------------------------------|----------------------------|
| Restoration of disaster-damaged facilities and equipment                                 | Eligible                       | Eligible                   |

### Example of an Alternative Procedures Project

A county road crosses a watercourse and its adjacent floodplain using five culverts. During the incident, floodwaters overtop the road and damage the crossings, either by washing out the culverts or by damaging the roadway and headwalls. FEMA approves a Project to repair or replace each culvert crossing, including hazard mitigation measures to increase the size of the culverts. The Applicant requests that the aggregate funding for the five crossings be used to replace the current configuration with one bridge.

|  |            |            |
|--|------------|------------|
| Alternate Projects (e.g., purchasing equipment, constructing new facilities, improvements to undamaged facilities such as shelters and emergency operation centers) in declared areas  | Eligible   | Eligible   |
| Cost-effective hazard mitigation measures for undamaged facilities   | Ineligible | Eligible   |
| Covering future insurance premiums, including meeting obtain and maintain (O&M) insurance requirements, on damaged or undamaged facilities   | Ineligible | Eligible   |
| Work on facilities that are ineligible due to a failure to meet previous O&M requirements  | Ineligible | Ineligible |
| Conducting or participating in training for response or recovery activities, including Federal grants management or procurement courses  | Ineligible | Eligible   |
| Planning for future disaster response and recovery operations, such as developing or updating plans (e.g., Debris Management Plans, Hazard Mitigation Plans, Pre- disaster Recovery Plans, Emergency Management Plans), integrating these plans into other plans, preparedness activities, exercises, and outreach | Ineligible | Eligible   |
| Salaries for PA or emergency management staff. This may include but is not limited to, staff performing PA award or subaward administration, monitoring, and closeout activities for other PA disaster awards, and staff developing or updating disaster plans   | Ineligible | Eligible   |
| Paying down debts  | Ineligible | Ineligible |
| Covering operating expenses  | Ineligible | Ineligible |
| Covering budget shortfalls   | Ineligible | Ineligible |
| Covering the non-Federal cost share of FEMA projects or other Federal awards   | Ineligible | Ineligible |

Obtain-and-maintain requirements for insurance apply to work funded with excess funds, as appropriate.

If the Applicant does not accept the fixed-cost offer, the project will be processed utilizing standard procedures and final funding will be based on actual costs. The flexible use of funds and the use of excess funds are not available under standard procedures.

## 2. Use of Improved Project Funds

The Applicant may use Improved Project funds to improve the damaged facility. The facility must have the same function and at least the same capacity that existed immediately prior to the disaster. The following are examples of Improved Projects:

- Laying asphalt on a gravel road;
- Replacing a firehouse that originally had two bays with a firehouse that has three bays;
- Incorporating requirements dictated by a code or standard that does not meet PA eligibility criteria; and

- Relocating a facility when FEMA is not requiring the relocation.

The Applicant must obtain approval from the Recipient.<sup>319</sup> If the Improved Project significantly changes the pre-disaster configuration of the facility, the Recipient must forward the request to FEMA to ensure that the Improved Project complies with appropriate EHP laws, regulations, and EOs.

The Applicant can combine PA funds with funding from another Federal agency to construct the Improved Project. However, the Applicant cannot use funding from another Federal agency toward the non-Federal cost share of the PA-funded project, unless the legislation for the other grant allows such use. CDBG<sup>320</sup> is an example of a Federal program that, in certain circumstances, allows use of its funding to meet the non-Federal share of another Federal grant program.

### 3. Use of Alternate Project Funds

The Applicant may use Alternate Project funds toward a project that does not restore the pre-disaster function of the damaged facility. This includes:

- Repair, expand, mitigate, or construct a facility that would otherwise be an eligible facility under the PA Program;<sup>321</sup>
- Demolish facilities;
- Purchase capital equipment that has a useful life of at least 1 year and is equal to, or greater than, \$5,000 per unit;
- Fund project shortfalls due to mandatory flood insurance reductions taken from PA Program funding for repairs to buildings in SFHAs (see [Chapter 8:VII.B.1. National Flood Insurance Program](#));
- Supplement funds for an Improved Project; and
- Conduct cost-effective hazard mitigation measures, regardless of whether the facility was damaged by the incident and whether the measures reduce the risk of future damage from the same type of incident or of the same type of damage caused by the incident. Alternate Project funds may be use used for hazard mitigation provided that:
  - Funding does not duplicate other FEMA mitigation funding; and
  - Measures reduce the risk of future damage to a facility that is otherwise eligible either under the PA or HMA programs. If the measures are the same type as those eligible for HMA funding, they must meet a need for governmental services and functions or eligible PNP services and functions in the area affected by the incident.

If the Alternate Project involves construction, the Applicant must obtain FEMA approval prior to the start of construction as FEMA must ensure that it complies with appropriate EHP laws, regulations, and EOs.<sup>322</sup>

The Applicant may not use Alternate Project funds to:

- Meet budget shortfalls;
- Create a new community plan;

---

<sup>319</sup> 44 C.F.R. § 206.203(d)(1).

<sup>320</sup> [www.hud.gov/program\\_offices/comm\\_planning/communitydevelopment](http://www.hud.gov/program_offices/comm_planning/communitydevelopment).

<sup>321</sup> 44 C.F.R. § 206.203(d)(2)(iv).

<sup>322</sup> 44 C.F.R. § 206.203(d)(2)(v).

- Landscape;
- Pay for operating expenses;<sup>323</sup>
- Purchase supplies, furniture, or equipment costing less than \$5,000 per unit;
- Pay the non-Federal share of any PA project;<sup>324</sup>
- Fund buyouts for mitigation, such as acquisition of flood-prone property to create open space;
- Supplement funds on projects that utilize other Federal agency grants; or
- Fund a project located in a FEMA-designated floodway.

### C. Disposition of Original Facility

For Alternate and Alternative Procedures Projects, if the Applicant does not repair, replace, or sell the damaged facility for which the capped project funding was based, and that facility is unsafe if not repaired, the Applicant must render the facility safe and secure (e.g., by restricting access, locking doors and windows, constructing a fence around the property) or demolish it.

If the Applicant receives funds for salvaged components of the facility, FEMA adjusts the capped project by the value or anticipated fair market value of salvaged materials less the estimated costs necessary to demolish the facility, grade the site, or make the facility safe and secure.

For any action at the original site, such as demolition, that is completed using PA funds, FEMA must conduct an EHP review. However, if the Applicant completes the work at the original site using non-PA funds, a FEMA EHP review is not required.

If the Applicant opts to keep a damaged facility for a later use, the facility may be eligible for PA funding in future incidents, provided the Applicant repaired the facility in accordance with current codes and standards, and completed any mitigation measures that FEMA included in the original SOW prior to the incident.

## IX. Eligibility Considerations by Facility

This section details the types of facilities captured within each category of work along with specific eligibility criteria related to one or more of the facilities within each category. See [Appendix N: Work Eligibility Considerations by Type of Facility](#) for a summary of eligibility by facility type.

### A. Roads and Bridges (Category C)

Roads may be paved, gravel, or dirt. Road components include, but may not be limited to:

- Surfaces;
- Bases;
- Shoulders;
- Ditches;
- Drainage structures, such as culverts;
- Low water crossings; and

---

<sup>323</sup> Ibid.

<sup>324</sup> Ibid.

- Associated facilities, such as lighting, sidewalks, guardrails, and signs.

Bridge components include, but may not be limited to:

- Decking;
- Guardrails;
- Girders;
- Pavement;
- Abutments;
- Piers;
- Slope protection;
- Approaches; and
- Associated facilities, such as lighting, sidewalks, and signs.

Permanent Work to restore roads and bridges is eligible unless restoration is under the specific authority of another Federal Agency such as FHWA. However, for Tribal governments specifically, although BIA or FHWA may have authority to provide Permanent restoration of public Tribal roads, such roads may be eligible for PA funding provided the Tribal Government does not receive funding from BIA or FHWA for the same work.

FHWA has authority to restore public roads under the Emergency Relief (ER) Program.<sup>325</sup> Roads that are eligible for ER assistance are identified as Federal-aid routes, which include highways on the Federal-aid highway system and all other public roads not classified as local roads or rural minor collectors. The ER Program is activated separately from Presidential declarations under the Stafford Act and may not be activated for all incidents. Federal-aid routes are ineligible for Permanent Work even if the ER Program is not activated or if the program is activated but FHWA does not provide funding for the work. FHWA also has authority to assist with restoration of transportation facilities under the Emergency Relief for Federally Owned Roads Program (ERFO).<sup>326</sup>

Private roads are those that are not owned or operated by or otherwise the legal responsibility of a Federal or SLTT entity (including orphan roads, roads in gated communities, homeowners' association roads, etc.). These roads are ineligible. However, roads owned by a Tribal government may be eligible even if they are not open to the general public.

Work to repair scour or erosion damage to a channel or stream bank is eligible if the repair is necessary to restore the structural integrity of an eligible road, culvert, or bridge. Earthwork in a channel or stream embankment that is not related to restoring the structural integrity of an eligible facility is ineligible.

## 1. Maintenance

The incident may cause minor damage to roads that result in damage similar to that which may occur over time from other causes, such as the age of the road, traffic flow, and frequent rain. Costs related to maintenance of roads are ineligible. Therefore, distinguishing between pre-existing damage and damage caused by the incident is often difficult. For the repair of this type

---

<sup>325</sup> [www.fhwa.dot.gov/programadmin/erelief.cfm](http://www.fhwa.dot.gov/programadmin/erelief.cfm).

<sup>326</sup> [fh.fhwa.dot.gov/programs/erfo/](http://fh.fhwa.dot.gov/programs/erfo/).

of damage to be eligible, the Applicant must demonstrate that the damage was directly caused by the incident.

When evaluating eligibility of reported road damage, in addition to evaluating how the incident caused the damage, FEMA reviews maintenance records or documentation establishing that the Applicant has a routine maintenance program. In the absence of maintenance records, FEMA reviews material purchase invoices and activity logs and inspects other sections of the Applicant's road system to confirm the performance of regular maintenance activities.

Work to repair potholes or fatigue cracking is usually ineligible as this type of damage is rarely caused directly by one incident.

## **B. Water Control Facilities (Category D)**

Water control facilities are those facilities built for the following purposes:

- Channel alignment;
- Recreation;
- Navigation;
- Land reclamation;
- Irrigation;
- Maintenance of fish and wildlife habitat;
- Interior drainage;
- Erosion prevention;
- Flood control; or
- Storm water management.

They include:

- Dams and reservoirs;
- Levees and floodwalls;
- Lined and unlined engineered drainage channels;
- Canals;
- Aqueducts;
- Sediment and debris basins;
- Storm water retention and detention basins;
- Coastal shoreline protective devices;
- Irrigation facilities;
- Pumping facilities; and
- Navigational waterways and shipping channels.

## 1. Restoring the Capacity of Channels, Basins, and Reservoirs

Restoring the pre-disaster carrying or storage capacity of engineered channels, debris and sediment basins, storm water detention and retention basins, and reservoirs may be eligible, but only if the Applicant provides documentation to establish:

- The pre-disaster capacity of the facility; and
- That the Applicant maintains the facility on a regular schedule.

If the Applicant chooses to remove non-incident-related material along with that deposited as a result of the incident, the project is considered an Improved Project.

## 2. Flood Control Works

Flood control works are those structures such as levees, flood walls, flood control channels, and water control structures designed and constructed to have appreciable effects in preventing damage by irregular and unusual rises in water levels.

Generally, flood control works are under the authority of USACE or NRCS and restoration of damaged flood control works under the authority of another Federal agency is ineligible. Flood control works under the specific authority of NRCS are those that are part of the Watershed and Flood Prevention Operations (WFPO) Program under PL 83-566.<sup>327</sup>

Secondary levees riverward of a primary levee are ineligible, unless the secondary levee protects human life.

## C. Buildings and Equipment (Category E)

Buildings, including:

- All structural and non-structural components, including mechanical, electrical, and plumbing systems;
- Contents and equipment within the building; and
- Furnishings.

Equipment includes:

- Vehicles; and
- Construction equipment.

Repair or replacement of buildings and equipment is eligible.

### Documentation Supporting Pre-disaster Capacity

Survey data that is either *recent* or covers a multi-year period to substantiate the amount of new material reasonably attributable to the incident.

### Documentation Supporting Regular Maintenance

Written maintenance plan and/or activity logs documenting regular intervals of activity. Applicant logs documenting clearance of blockages in response to resident complaints are not sufficient to substantiate a regular maintenance schedule.

<sup>327</sup> [www.nrcs.usda.gov/wps/portal/nrcs/main/national/programs/landscape/wfpo](http://www.nrcs.usda.gov/wps/portal/nrcs/main/national/programs/landscape/wfpo).

## 1. Buildings

A Public Housing Authority facility is only eligible for Permanent Work if Congress does not appropriate funds to HUD for emergency capital needs for the facility.

For buildings and building systems, distinguishing between damage caused by the incident and pre-existing damage may be difficult. Before making an eligibility determination, FEMA considers each of the following:

- Evidence of regular maintenance;
- Evidence of pre-disaster condition, such as interior water stains from a leaky roof (in such cases, FEMA evaluates whether the roof was repaired prior to the incident);
- The severity and impacts of the incident; and
- Whether the Applicant took prudent actions to prevent additional damage.

Mold remediation and removal of mud, silt, or other accumulated debris is eligible as Permanent Work when conducted in conjunction with restoration of the facility.

### (a) *Earthquake Damage to Welded Steel Moment Frame Buildings*

FEMA has specific eligibility criteria for evaluating and repairing earthquake damage to buildings constructed with welded steel moment frames. FEMA bases the eligibility criteria on *Recommended Post Earthquake Evaluation and Repair Criteria for Welded Steel Moment Frame Buildings* (FEMA 352).<sup>328</sup>

The repair of the damaged frame connections to pre-earthquake design in accordance with FEMA 352, Chapter 6, is eligible, but only if FEMA approves a specific SOW for the repairs prior to the Applicant performing the work. Repair of the architectural finishes and fire retardants removed in the area of the damage are also eligible.

## 2. Equipment and Supplies

Repairing damaged—or replacing destroyed—equipment and supplies with the same number of equivalent items is eligible.<sup>329</sup> Equivalent items are similar in age, condition, and capacity.

The Applicant may replace equipment or supplies with different items used for the same general purpose. However, FEMA caps the eligible cost at the estimated amount for items equivalent to those damaged.

When equipment is not repairable, FEMA uses “blue book” values or similar price guides to estimate the eligible cost.

When a used item is not reasonably available (within a reasonable cost, time, or distance) or does not meet applicable national consensus standards, the purchase of a new item with similar capacity is eligible.

If the cost to replace the item is less than the cost to repair it, FEMA limits PA funding to the replacement cost.

### Terminology

**Consensus standards** are standards that have been adopted by a nationally recognized standards-producing organization.

<sup>328</sup> [www.nehrp.gov/pdf/fema352.pdf](http://www.nehrp.gov/pdf/fema352.pdf).

<sup>329</sup> 44 C.F.R. § 206.226(h).

### 3. Files

Eligible activities associated with the recovery of files include, but are not limited to:

- Recovery of damaged hard copies;
- Stabilizing the damaged hard copies;
- Sanitizing damaged hard copies;
- Photocopying or scanning damaged hard copies to re-establish files; and
- Recovering data from water-damaged computer hard drives.

Recovery of damaged hard copies includes labor and materials, such as bags, boxes, and containers. Stabilizing damaged hard copies includes freeze-drying. Photocopying or scanning includes labor and materials such as new folders and paper.

Not all activities are eligible. Examples of ineligible activities include:

- Establishing new information databases;
- Manually entering data that was lost in damaged computers;
- Scanning re-established hardcopy files into computers to create digital files; and
- Deciphering photocopies of damaged hard copies.

### 4. Research-Related Contents

Reagents and specimen collections are eligible for replacement based on the following criteria.

The number of units of each reagent eligible for replacement is equal to the number lost OR to the number necessary to restore basic research activity, whichever is less.

FEMA reimburses the purchase price from commercial sources or other institutions, whichever is less. The replacement of reagents that are so unique that they are considered an outcome of a research program is ineligible.

Replacing a representative, but not necessarily a whole portion, of a specimen collection may be eligible. To be eligible for replacement, the specimen types should be available for purchase from commercial sources or other institutions and support an ongoing eligible educational or medical program.

### 5. Animals

Animals housed or exhibited in an eligible facility are eligible for replacement with the same number of comparable animals if they are:

- Injured to the extent they are no longer able to function for the intended purpose;
- Killed;
- A destroyed specimen; or
- A damaged specimen that is not recoverable.

#### Terminology

A **reagent** is a substance used in a chemical reaction to detect, measure, examine, or produce other substances. Some reagents are very common and available for purchase from commercial sources.

A **specimen** is a portion or quantity of material for use in testing, examination, or study, including blood plasma and flesh tissue.

A **specimen collection** is a repository of specimens related to biomedical, marine, or agricultural research.

The animal is ineligible for replacement if a comparable animal is not available for purchase or the Applicant is unable to obtain a comparable one at a reasonable cost.

Eligible animals may include, but are not limited to:

- Police animals;
- Trained and certified rescue dogs;
- Animals in museums, zoos, or publicly owned nature centers;
- Fish in fish hatcheries;
- Taxidermy specimens (animals preserved and mounted in lifelike representations);
- Animals used by rehabilitation facilities as part of diagnosis or treatment; and
- Laboratory animals used in an active research program.

The replacement of animals on loan to an eligible facility at the time they are destroyed is eligible if the Applicant substantiates legal responsibility.

Additionally, FEMA may provide PA funding for actions taken to save the lives of these animals as a Category B emergency protective measure.

*(a) Determining Costs*

The estimated cost to replace an animal is usually determined through market surveys. Costs associated with acquiring donated, loaned, or wild animals as replacement animals are eligible if they do not exceed the estimated cost of purchasing a comparable animal.

When a destroyed animal is replaced through a donation or loan of a comparable animal, costs associated with the purchase of another comparable animal are ineligible.

For laboratory animals, eligible costs associated with replacement include, but are not limited to, the replacement cost of a laboratory animal that is as genetically close as possible to, but does not exceed, the genetic progression of the lost animal AND can be reasonably procured commercially. If an identically genetic animal is not available, the eligible cost is based on a readily procured animal that is as genetically close as possible to the original animal. The Applicant, using its scientific research staff, an independent member of the scientific community, or a certified expert, needs to make reasonable decisions on the genetic likeness of the replacement lab animals.

Ineligible costs associated with replacing laboratory animals include:

- The cost of reproducing a new animal with all the characteristics of the lost animal to re-establish research;
- The cost of using a laboratory to perform a breeding program to advance benchmark stock to the genetic changes lost because of the incident;
- The cost associated with surgery required to replace a surgically altered animal; and
- The cost associated with the replacement of a laboratory animal when an animal of similar genetic characteristics can be obtained at no cost from other researchers or institutions.

If the Applicant requests, and the Recipient approves, other than in-kind and exact number of replacement animals, FEMA caps the Federal share based on the estimated in-kind replacement costs.

## 6. Irreplaceable Collections and Individual Objects

Collections and individual objects are artifacts, specimens, artworks, archives, public records, and other items that are often considered irreplaceable because of their artistic, educational, historic, legal, scientific, or social significance. They are nonliving and, therefore, do not include animals or plant material, and are usually one-of-a-kind. Eligible collections and individual objects may be in storage or on display in a public or PNP facility and may include items located outdoors, such as sculptures and public art installations.

Stabilization of damaged collections or individual objects is eligible. Stabilization is a series of treatment measures to maintain the integrity of a collection or object and to minimize deterioration. Stabilization involves taking the minimum steps necessary to return a collection or object to a condition in which it can function in the same capacity as it did prior to the incident. This includes:

- Treating damaged items through proper environmental controls, such as temperature and humidity; and
- Chemical or mechanical cleaning to stabilize items to prolong their existence, maintain their integrity, and minimize further deterioration from the damaging effects of the incident.

Additional treatment beyond stabilization is eligible if it is necessary to maintain the integrity of the collection or object and return it to its pre-disaster function.

In some cases, costs associated with restoring an item to pre-disaster—but not original—condition may be eligible. For example, repairing a tear in a painting that was a direct result of the incident may be eligible, whereas costs to remove signs of pre-disaster aging, such as layers of old varnish, are ineligible.

Costs associated with the development of a treatment plan for a damaged collection or individual object are eligible. Treatment needs to be conducted by qualified

### Documentation Supporting Classification as Collection or Individual Object

Documentation of collections and individual objects generally include accession, catalog, and inventory documentation. Applicants should submit all associated documentation along with a clear title to all items.

### Terminology

**Archives** are materials created or received by a person, family, or organization, public or private, and preserved because of the enduring value they contain, or as evidence of the functions and responsibilities of their creator, especially those materials maintained using the principles of provenance, original order, and collective control.

**Accession** is formal process used to legally accept and record a specimen or artifact as a collection item.

A **catalog** is a full record of information specific to an item and cross-referenced to other records and files, including identification and documentation of the material.

**Stabilization** is a series of treatment measures intended to maintain the integrity of a collection or object and to minimize deterioration. It involves the minimum steps necessary to return a collection or object to a condition in which it can function in the same capacity as it did prior to the disaster.

**Conservation** is the preservation of a collection or object for the future. Conservation activities include examination, documentation, treatment, and preventive care, supported by research (e.g., scholarly and technological, x-rays, paint sampling) and education.

**Special library collections** typically include unique, rare printed books, first editions (often author-signed), manuscripts, archives, artifacts, photos, engravings, graphics, music, and ephemera, as well as limited edition print runs of special collections of maps or other important topics.

conservation professionals with the appropriate specialty and in accordance with the American Institute for Conservation Code of Ethics and Guidelines for Practice.<sup>330</sup> FEMA, in consultation with the Recipient and Applicant, may recommend no treatment when non-intervention best serves to promote the preservation of damaged items.

Collections and individual objects damaged to the extent that stabilization is not practicable or possible are considered destroyed. Replacement of destroyed collections or individual objects is ineligible.

Restoring materials, equipment, and exhibition furnishings associated with the storage, display, preservation, or exhibition of collections and individual objects is eligible. These may include, but are not limited to:

- Equipment regulating temperature or humidity;
- Exhibit panels;
- Models; and
- Video and audio equipment.

## **7. Library Books and Publications**

Replacement of damaged or destroyed library books and publications is eligible based on the pre-disaster inventory of the quantities of the books and publications. Re-shelving, cataloging, and other work incidental to the replacement of library books and publications is also eligible.<sup>331</sup>

However, special library collections, including rare books, manuscripts, and other fragile materials, are only eligible for treatment, not replacement.

## **D. Utilities (Category F)**

Utilities include:

- Water storage facilities, treatment plants, and delivery systems;
- Power generation, transmission, and distribution facilities, including, but not limited to, wind turbines, generators, substations, and power lines;
- Natural gas transmission and distribution facilities;
- Sewage collection systems and treatment plants; and
- Communication systems.

### **1. Right-of-Way Clearance**

The Applicant may need to clear its ROW to obtain access to repair a utility. It is the Applicant's responsibility to maintain its ROW. FEMA may fund limited clearance of incident-related debris from the ROW to enable access to the facility. Additionally, if trees in the vicinity of the facility were damaged by the incident and an arborist confirms that the trees cause an immediate threat of further damage to the facility (e.g., overhead power lines), FEMA may provide PA funding to remove those trees. Any further clearance of debris in the ROW is ineligible for FEMA funding.

---

<sup>330</sup> [www.culturalheritage.org/about-conservation/code-of-ethics](http://www.culturalheritage.org/about-conservation/code-of-ethics).

<sup>331</sup> 44 C.F.R. § 206.226(i).

## 2. Power: Transmission and Distribution System Conductor Replacement

For electrical transmission or distribution systems, determining the disaster-related damage to some components, such as poles, guys, and cross-arms, can usually be accomplished by visual inspection. However, determining the full extent of disaster-related damage to conductors is more challenging, particularly with older systems. A conductor is eligible for replacement when it is stretched beyond the point where it can be effectively repaired and re-sagged to meet appropriate clearances, sag, and tension, and to meet pre-disaster reliability.

A conductor is only eligible for replacement (reconductoring) when the Applicant cannot effectively repair it because one of the following exists within a line section:

- Twenty-five percent or more of the conductor spans have visible damage, such as broken strands, splices, or sleeves (installed as a result of the incident) or severe pitting, burns, or kinks;
- Thirty percent or more of the line spans are visually stretched (out of sag), or do not meet clearance requirements such as conductor-to-conductor or conductor-to-ground clearance;
- Forty percent or more of the supporting poles need to be replaced or plumbed (straightened). A pole is considered to be in need of straightening if it is leaning such that it is unsafe to climb;
- Forty percent or more of the supporting structures (other than poles) have damage such as broken cross-arms, braces, ties, insulators, guys, pulled anchors, or bent pins. If more than one element of the support structure is damaged, it still only counts as one damaged support structure. If a pole is counted under the previous bullet, FEMA does not count the supporting structure under this criterion;
- Sixty-five percent or more of any combination of the damage described in the bullets above; or
- Evidence provided by a licensed Professional Engineer that demonstrates the conductor is damaged beyond repair.

### Conductor Spans

The number of conductor spans is calculated by multiplying the number of conductors per span by the number of spans.

For example, a three-phase line section with three spans has 12 conductor spans:

$$4 \text{ conductors} \times 3 \text{ spans} = 12$$

If a single conductor span has damage in more than one location, it only counts as one damaged conductor span. Similarly, if more than one conductor is damaged, it still only counts as one damaged span.

### Terminology

A **line section** is a group of contiguous spans selected for evaluation. A span is the distance between two poles or structures.

The Applicant has flexibility in defining a line section. A line section can be:

- A single span
- All the spans between two dead-end structures
- All the spans on a feeder
- All the spans on a tap
- Any other group of contiguous spans that are evaluated together

If the Applicant provides sufficient documentation establishing the pre-disaster condition and a line section of its system meets one of the six criteria above, that line section is eligible to be reconductored.

The use of #2 Aluminum Conductor Steel Reinforced (ACSR) is considered a lower cost alternative to replacing conductor with equal or lesser amperage capacity such as copper weld conductor, hard and soft drawn copper wire, smaller ACSR, and Amerductor. Therefore, if a conductor with equal or lesser amperage capacity to #2 ACSR is eligible for reconductoring, the line section is eligible to be replaced with #2 ACSR. When the Applicant replaces conductor with #2 ACSR, adjustments to other components of the electric distribution and transmission systems to accommodate #2 ACSR, including, but not limited to, adjusting span lengths between utility poles and increasing pole heights and standards to meet appropriate design requirements are eligible. The Applicant does not need to cite a code or standard for this additional work even though the appropriate design requirements may come from Federal or SLTT codes or standards, including National Electrical Safety Code or Rural Utilities Service (RUS) standards.

If the Applicant prefers to reductor a line with conductor of lesser amperage capacity than #2 ACSR, such as #4 ACSR (including associated adjustments in span lengths and pole heights), FEMA provides PA funding for the work if the cost is less than the cost of reductoring with #2 ACSR (including associated adjustments in span lengths and pole heights).

If the Applicant plans to upgrade its conductor to an amperage capacity above #2 ACSR, and there is no code or standard requiring the upgrade that meets the eligibility requirements discussed in B, the additional upgrades are ineligible and the Applicant must request an Improved Project.

If the damage does not meet the criteria for replacement, only the repair of the damaged line section(s) is eligible.

#### **Documentation Supporting Pre-disaster Condition of a Conductor**

To document the pre-disaster condition of a conductor, the Applicant should provide the following information:

- A signed, dated, and stamped letter from a licensed professional engineer who has direct experience with the damaged electrical transmission or distribution system certifying the pre-disaster capacity and condition of the conductor along with records providing satisfactory evidence of the pre-disaster capacity and condition of the conductor. Records may include, but are not limited to, maintenance records, contract documents, work orders, inspection logs, or a description of past inspection and maintenance activities certified by a licensed professional engineer.
- If available, copies of construction work plans demonstrating the utility's past practices and current and future projects.
- If required by RUS, a copy of any corrective action plans submitted to RUS in compliance with 7 C.F.R. §1730.25, Corrective action (RUS borrowers only).
- Staking sheets.

If the Applicant provides the information above, FEMA does not require further documentation to establish pre-disaster condition. The Applicant is not precluded from substantiating the pre-disaster condition with other documentation if it is unable to provide the documentation described above.

## **E. Parks, Recreational, Other (Category G)**

Eligible publicly owned facilities in this category include:

- Mass transit facilities such as railways;
- Beaches;
- Parks;
- Playground equipment;
- Swimming pools;
- Bath houses;
- Tennis courts;
- Boat docks;
- Piers;
- Picnic tables;
- Golf courses;
- Ball fields;
- Fish hatcheries;
- Ports and harbors; and
- Other facilities that do not fit in Categories C–F.

Unimproved natural features are ineligible.

Plantings (such as trees, shrubs, and other vegetation) are eligible when they are part of the restoration of an eligible facility for the purpose of erosion control, to minimize sediment runoff, or to stabilize slopes, including dunes on eligible improved beaches.

Grass and sod replacement are eligible if it is an integral part of the restoration of an eligible recreational facility. Vegetation replacement is also eligible if necessary to restore the function of the facility (e.g., if vegetation is a component of a sewage filtration system).

Plantings required to mitigate environmental impacts, such as those required to address impacts to wetlands or endangered species habitat, are only eligible if required by a Federal or SLTT code or standard or permit that meets the criteria described in [Chapter 8:III.H. Permit Requirements](#).

Long-term monitoring to ensure vegetative growth is ineligible even if it meets the requirements above.

Plantings ineligible for replacement include, but are not limited to:

- Replacement of trees, shrubs, and other vegetation;
- Replacement of destroyed crops; and
- Cosmetic or aesthetic vegetation, such as landscaping around public facilities or in median strips along roadways. This restriction applies even when the vegetation is damaged during performance of eligible work, such as when repairing underground utilities within landscaped areas.

## 1. Beaches

Replacement of sand on beaches is only eligible under certain conditions.<sup>332</sup> A beach is considered an eligible facility when all of the following conditions exist:

- The beach is not a federally constructed shoreline under the specific authority of USACE (i.e., not a specifically authorized and constructed Coastal Storm Risk Management Project);<sup>333</sup>
- The beach was constructed by the placement of imported sand—of proper grain size—to a designed elevation, width, and slope;<sup>334</sup> and
- The Applicant has established and adhered to a maintenance program involving periodic renourishment with imported sand to preserve the original design or a specific engineered design that is justified and clearly stated in the maintenance program.<sup>335</sup> Placement of sand under the following circumstances does not meet this requirement:
  - Emergency or “one-time” nourishment, even if to a design;
  - Emergency or “as-needed” renourishments when the beach has eroded to a critical condition where all original nourishment is gone;
  - Partial renourishments or “hot-spot” nourishments; or
  - Renourishment using material from a channel maintenance project when dredge spoils do not meet compatibility design criteria and the amount placed is dependent on the amount dredged, not the beach design.

### Documentation Supporting Eligibility of a Beach

To document eligibility of a beach as a designed and maintained facility, the Applicant **must** provide the following information (all required unless the beach was previously determined eligible, in which case FEMA may request only a portion of this information):

- Design studies, plans, construction documents, and as-builts for the original nourishment;
- Documentation and details of the maintenance plan, including how the need for renourishment is determined and funded; and
- Renourishment history, design studies, and as-builts for every renourishment, including construction documents if applicable.

<sup>332</sup> 44 C.F.R. §§ 206.226(j) and 206.201(c).

<sup>333</sup> 44 C.F.R. § 206.226(a).

<sup>334</sup> 44 C.F.R. § 206.226(j)(2)(i).

<sup>335</sup> 44 C.F.R. § 206.226(j)(2)(ii).

**Figure 16. Typical Beach Profile**

The amount of sand eligible for replacement is limited to the amount lost due to the incident. The Applicant needs to substantiate the amount of sand claimed with pre-and post-incident profiles that extend at least to the seaward edge of the sub-aqueous nearshore zone (Depth of Closure) (see Figure 16. *Typical Beach Profile*). If pre-storm profiles are not available, documentation may include design documents and renourishment history. The Applicant needs to adjust quantities to account for any erosion that occurred between the pre- and post-incident profiles.

Replacing sand that eroded prior to the incident is ineligible. However, the Applicant is encouraged to renourish the project to achieve the design profile.

## F. Landslides and Slope Stabilization

If an eligible facility is located on a slope and is damaged as a result of a landslide or slope instability triggered by the incident, FEMA determines the stability of the slope that supports the facility before it approves PA funding to restore the facility. Restoration of the integral ground that supports the facility may also be eligible. The impact of slope stability on eligibility is as follows:

- If the site is stable, permanent restoration of the facility and its integral ground is eligible.
- If the site is unstable and there is no evidence of pre-disaster instability after the facility was constructed, permanent restoration of the facility and its integral ground is eligible, including measures to stabilize the integral ground.
- If the site is unstable and there is evidence of pre-disaster instability after the facility was constructed, restoration of the facility's integral ground is ineligible. Restoration of the

### Terminology

**Integral ground** refers to only the ground necessary to physically support a facility.

Integral ground may be natural or improved ground upon which an eligible facility is located and that is essential to support the structural integrity and utility of the facility.

facility is eligible only upon the Applicant stabilizing the site and restoring the integral ground.

Site inspections and limited geotechnical assessments to determine site stability and to obtain a technical opinion of the cause of the slope failure are eligible.

Permanent repair to stabilize natural ground that is not integral to an eligible facility's function is ineligible.

FEMA may approve permanent relocation of the facility if the facility is subject to repetitive heavy damage and relocation is cost-effective. Eligible costs for relocation are described in Chapter 8:VI. *Relocation*.

The Applicant may request an Alternate Project if restoration of the facility is not feasible because of soil instability.

# CHAPTER 9: SCOPE OF WORK AND COST DEVELOPMENT

Once FEMA, the Recipient, and the Applicant agree on the damage description and dimensions, either the Applicant submits the SOW and cost for FEMA review and validation, or FEMA submits the project to its CRC to develop the SOW and cost. This is Phase III of the PA Program delivery process, *Scoping and Costing*, and is described in this chapter.

## I. Scope of Work Development

For completed work, the Applicant must describe the completed SOW for each of the projects and provide supporting documentation.

For Emergency Work, the SOW includes work required to address immediate threats and to remove debris and must include quantitative information. For Permanent Work, the SOW includes a description of how the Applicant plans to repair, or has repaired, the damage, including repair dimensions and hazard mitigation description and dimensions.

The Applicant should provide the following for each site (not an all-inclusive list):

- Whether the work is complete;
- Who performed, or will perform, the work (e.g., force account, contract, etc.);
- Proposed or completed, repair scope of work, including PA mitigation measures; and
- Technical studies, reports, and assessments.

## II. Cost Development

FEMA or the Recipient assists the Applicant with preparing project applications based on actual or estimated costs.

### A. Project Thresholds

FEMA establishes a minimum project threshold for each Federal fiscal year. The threshold applies to incidents declared within that fiscal year and is based on the Consumer Price Index. If a project application totals less than the minimum threshold<sup>336</sup> after the Applicant has accounted for all project costs—including insurance proceeds and other reductions to avoid duplication of benefits—the project is ineligible.<sup>337</sup>

The minimum threshold applies to each project application and not to each damage line item. FEMA does not combine work among several sites onto one project application for the **sole** purpose of reaching the minimum threshold. Because of the administrative cost involved, FEMA does not process project applications under the minimum threshold unless the

#### Small Project Preparation

If the Applicant prepares its own Small Projects, it **must** submit them to FEMA for validation within 60 days of the Recovery Scoping Meeting.

<sup>336</sup> The minimum threshold is available at: <https://www.fema.gov/assistance/public/applicants/per-capita-impact-indicator>.

<sup>337</sup> 44 C.F.R. § 206.202(d)(2).

Applicant is eligible, is disputing the SOW or costs, and is planning to appeal an amount that would increase the project amount to at least the minimum threshold. The minimum threshold does not apply to Donated Resources or Management Costs; however, these projects are only eligible when the donated resources or management costs are related to an eligible project that meets the minimum threshold.

FEMA also establishes a dollar threshold each Federal fiscal year for the implementation of Simplified Procedures under Section 422 of the Stafford Act. This threshold defines a project as large or small.<sup>338</sup>

- A Large Project has costs equal to or greater than the threshold.
- A Small Project has costs below the threshold.<sup>339</sup>

The threshold applies to incidents declared within that fiscal year. FEMA administers funding for Large and Small Projects differently. For Large Projects that are not capped, FEMA adjusts any estimated costs to the actual incurred amount so that the final approved funding is based on actual costs.<sup>340</sup> For Small Projects, FEMA does not adjust estimated costs to the actual incurred amount.<sup>341</sup> FEMA determines whether a project is large or small based on the final approved amount of eligible costs after any cost adjustments, including insurance reductions.

## **B. Expedited Projects for Emergency Work**

FEMA may provide expedited funding for Emergency Work Projects (Category A or B) that meet or exceed the Large Project threshold. FEMA funds Expedited Projects at 50 percent of the Federal share of the estimated project cost. Requests for Expedited Projects must be submitted to FEMA within 60 days of the Applicant's Recovery Scoping Meeting. To support its request, the Applicant must provide enough information for FEMA to validate that the work and costs are eligible. FEMA will work to obligate funding within 90 days of receipt of the request. Therefore, the PA Group Supervisor notifies the CRC as soon as possible after receiving a request.

The Applicant must substantiate its legal responsibility for the work. The Applicant needs to provide the following broken down by the Applicant's monthly (or bi-weekly) operational periods (if Category A or B has an increased Federal cost share for a limited timeframe, the Applicant needs to separate work anticipated to be completed within the increased cost share timeframe from work anticipated to be completed after the increased cost share period (See [Chapter 6:XIII. Increased Federal Cost Share for a Limited Timeframe](#)):

- A detailed description of the work and documentation to substantiate that the work is eligible. This includes:
  - Description of immediate threat;
  - Detailed description of work activities;
  - Work locations; and
  - Additionally, for debris: estimated quantities by type of debris substantiated with photographs or video, temporary staging and disposal locations with copies of permits and reduction methods.

---

<sup>338</sup> The project threshold amount is available at: [www.fema.gov/assistance/public/applicants/per-capita-impact-indicator](http://www.fema.gov/assistance/public/applicants/per-capita-impact-indicator).

<sup>339</sup> Stafford Act § 422, 42 U.S.C. § 5189; 44 C.F.R. § 206.203(c).

<sup>340</sup> 44 C.F.R. § 206.205(b).

<sup>341</sup> 44 C.F.R. § 206.205(a).

- The total estimated cost with documentation to support the basis of the estimate and substantiate that the cost estimate is reasonable. This includes:
  - Insurance documentation
  - For Force Account labor or other hourly labor costs such as mutual aid labor:
    - Number of personnel;
    - Average hours per day;
    - Average days per week;
    - Average pay rate;
    - Lodging and per diem rates; and
    - Mutual Aid Agreement, Memorandum of Understanding or other written agreement
  - For Force Account equipment:
    - Amount of equipment by type;
    - Average hours per day;
    - Average days per week; and
    - Hourly rate
  - For rented equipment:
    - Rental agreement with pricing
  - For contract work:
    - Request for proposals, bid documents, contracts;
    - If bids have not yet been received, the Applicant may submit a unit price estimate; and
    - Debris monitor information

FEMA estimates the work based on cost information provided by the Applicant. If the Applicant does not provide sufficient cost information, FEMA may use average historical pricing. For contracted work, FEMA uses the unit cost from the contract if it determines the costs are reasonable; however, this is only for the purpose of expediting funding based on an estimate. FEMA reviews the Applicant's procurement and contracting for compliance and addresses any noncompliance prior to final reconciliation and closeout of the project.

FEMA provides the Federal cost share for the remaining 50 percent of the project cost once the Applicant provides all of the documentation required to support the estimated project cost for a non-Expedited Project.

### **C. Costs for Projects with All Work Completed**

For projects with all work complete, the PDMG works with the Applicant to:

- Answer programmatic, EHP, insurance, and hazard mitigation questions;
- Identify information and documentation requirements; and
- Address contextual information needed for supporting the Applicant's claim for completed work.

Once work on a project is 100% complete, the Applicant must submit documentation for the project within 90 days of the Recovery Scoping Meeting or within 90 days of the work completion date, whichever is later, regardless of whether the project has been obligated. FEMA makes its eligibility determination and processes the project based on the documentation

received within the 90-day deadline.<sup>342</sup> FEMA denies assistance for work and costs that are not supported with documentation by this deadline. There may be cases where, during review of the documentation submitted, FEMA determines additional information or explanation is required. In this instance, FEMA may generate an RFI specifying a deadline for response.

For Small Projects, FEMA may accept certification in lieu of documentation and may process the projects based on estimated costs even if all work is completed.<sup>343</sup> However, with exception of the scenarios listed in [Chapter 12:I.A. Small Projects](#), Small Project estimates are not subsequently adjusted to reflect actual costs.

The Applicant must still retain documentation for Net Small Project Overrun appeals and audits.

#### Terminology

**Work Completion Date** is the date the Applicant completes all work associated with the approved SOW including meeting all compliance requirements. It does not include invoice payments, warranty periods, or grant management activities (e.g., compiling and submitting documentation, financial reconciliation, requesting payment, etc.).

### D. Estimating Emergency Work Projects with Work to be Completed

Emergency Work Projects are often difficult to estimate due to the type of work conducted. Unlike Permanent Work, where a detailed SOW is usually determined and estimated with unit pricing in advance, the detailed scope of work to address Emergency Work is often unknown and therefore, difficult to estimate in advance. Additionally, emergency response activities do not generally have established unit pricing and have a lot of variables that can impact pricing. If the Applicant provides sufficient information, FEMA may process Emergency Work Projects based on estimates.

### E. Estimating Permanent Work Projects with Work to be Completed

When work is not yet complete, FEMA determines the amount of PA funding based on the estimated cost to restore the damaged facility to its pre-disaster design and function, including eligible codes and standards. The amount may include a reasonable amount of anticipated soft costs but does not include costs that are only related to, or only triggered by, changes to the pre-disaster design or function of the damaged facility. These include, but are not limited to, costs related to:

- Engineering and design;
- EHP compliance; and
- Work required by codes or standards.

If FEMA developed the SOW, it also develops the associated cost estimate.

#### 1. Projects Requiring Engineering Analysis

Some projects may require an engineering analysis to determine the method of repair. In these cases, FEMA may provide PA funding for engineering and design services.

<sup>342</sup> 44 C.F.R. § 206.205(b)(1) and 2 C.F.R. § 200.343.

<sup>343</sup> Stafford Act § 422, 42 U.S.C. § 5189; 44 C.F.R. § 206.205(a).

## 2. Applicant Estimates

FEMA accepts an Applicant-submitted cost estimate if the estimate:

- Is prepared by a licensed Professional Engineer or other estimating professional, such as a licensed architect or certified professional cost estimator<sup>344</sup> who certifies that the estimate was prepared in accordance with industry standards;
- Includes certification that the estimated cost directly corresponds to the repair of the agreed upon damage;
- Is based on unit costs for each component of the SOW and not a lump sum amount;
- Contains a level of detail sufficient for FEMA to validate that all components correspond with the agreed-upon SOW;
- Is based on the current phase of design or construction inclusive of any known costs;
- Includes actual costs for work completed at the time the cost estimate is developed; and
- Is reasonable.

FEMA evaluates Applicant-submitted estimates for reasonableness based on the criteria in [Chapter 6.I. Reasonable Costs](#) using the checklist in [Appendix L: Validation of Applicant-Provided Cost Estimates](#).

## 3. FEMA Estimates

When FEMA develops cost estimates for sites with Permanent Work that is less than 90 percent complete and total costs are expected to meet or exceed the Large Project threshold, FEMA uses the CEF in accordance with the CEF Instruction Guide<sup>345</sup>. The CEF Instructional Guide defines various factors and the range of percentage values that FEMA may apply to projects. In rare cases, a factor may need to be reviewed or adjusted. FEMA Headquarters has access to technical assistance to review the appropriate ranges for factors. Only FEMA Headquarters has the authority to approve the use of factors that exceed the CEF specified range or approve additional factors. FEMA will include the CEF contingency factor “Applicant Reserve for Change Orders” but will not include any additional factors or risk premiums associated with capped projects (Improved, Alternate, or Alternative Procedures Projects).

## 4. Expert Panel Review

A FEMA-funded,<sup>346</sup> independent third-party panel of cost estimating experts may review project estimates. FEMA does not use this panel for appeals. The review is limited to issues pertaining to the estimated cost and the panel does not make decisions related to the eligibility of work. However, it may make determinations about whether cost elements are required to execute the SOW. The panel may review cost documentation for completed work, if necessary.

- All project estimates with an estimated Federal share of \$25 million or greater are reviewed by the independent panel.
- FEMA may request the independent panel review for any cost estimate.
- The Applicant may request the panel review the estimate for any project with an estimated Federal share of at least \$5 million.

---

<sup>344</sup> In lieu of a license or certification, an individual with professional experience and proficiency in the field of cost estimating may prepare and sign the cost estimate.

<sup>345</sup> [www.fema.gov/pdf/government/grant/pa/cef\\_instruct.pdf](http://www.fema.gov/pdf/government/grant/pa/cef_instruct.pdf).

<sup>346</sup> The expert panel is fully funded by FEMA and does not require a non-Federal cost share.

## 5. Insurance Reductions

FEMA reduces the estimate to account for insurance coverage based on:

- Actual insurance proceeds, if known; or
- Anticipated insurance proceeds based on the Applicant’s insurance policy, if the amount of actual proceeds is unknown.

## 6. Fixed-Cost Offer for Alternative Procedures Projects

FEMA professionally licensed engineers and architects, qualified cost estimators, construction managers, and staff with other technical expertise, as necessary, develop or review and validate estimates for all large Permanent Work Projects. FEMA transmits the estimates as fixed-cost offers to the Applicant via PA Grants Manager for consideration. If the Applicant accepts the fixed-cost offer for a Large Project, it is considered an Alternative Procedures Project.

FEMA approves the fixed-cost amount upon obligation of the project.<sup>347</sup> Once the fixed-cost amount is obligated, FEMA considers it reasonable and eligible, as long as there is no evidence of fraud and the Applicant complies with Federal grant conditions.

The following table summarizes the differences between the Alternative Procedures policy and the standard PA policy:

| Alternative Procedures Project  | Standard Project   |
|---|--|
| Fixed-cost project with use of excess funds.  | Actual cost project. No retention of excess funds associated with the approved estimate. |
| May use funds across all Alternative Procedure Permanent Work Projects.   | Can only use funds toward the specific work identified in each specific project.         |
| After FEMA approves a SOW, approval is only required for changes that involve buildings or structures aged 45 years or older, ground disturbing activities, or work in or near water.   | After FEMA approves a SOW, approval is required for any change to the SOW.               |
| Do not need to track costs associated with changes to the SOW (see <a href="#">Chapter 12:I.C. Alternative Procedures Permanent Work Projects</a> for closeout requirements)  | Must track costs associated with all changes to the SOW.                                 |
| Do not need to track costs to specific work items. Only need to track the total costs associated with the all of its Alternative Procedures Permanent Work Projects. (see <a href="#">Chapter 12:I.C. Alternative Procedures Permanent Work Projects</a> for closeout requirements) | Must track costs specific to each work item within each individual project.              |
| Do not need to track work to specific Alternative Procedures Projects. Only need to substantiate that   | Must track all work to each individual project.  |

<sup>347</sup> Obligation constitutes FEMA’s acceptance of the fixed amount.

|  |  |
|--|--|
| the work is related to the approved SOW covered across the projects. |  |
|--|--|

Once the Applicant accepts a fixed cost offer, it may not revert back to a project funded based on actual costs. FEMA does not adjust the fixed amount even if the Applicant discovers hidden damage while conducting approved work. Prior to closing the project, FEMA adjusts the fixed estimate to account for actual insurance proceeds as described in [Chapter 6:XVIII.A. Insurance Proceeds](#). Once FEMA and the Applicant agree to a fixed-cost, FEMA will not adjust funding on the basis of reasonableness or eligibility provided the Applicant completes the approved scope of work. This does not preclude de-obligations on the basis of noncompliance with grant conditions, such as environmental or historic preservation; duplication of benefits, including insurance; or evidence of fraud.

If the estimated amount is less than the Applicant is willing to accept as a fixed cost, the Applicant may decline the offer and FEMA will process the project using standard procedures. In these cases, FEMA obligates the project based on the estimated amount in the offer and adjusts funding based on actual eligible costs at closeout.

(a) *Fixed Cost Offer Deadlines*

The Applicant has up to 18 months from the disaster declaration date to accept a fixed-cost offer for each project (also subject to 30-day deadline from receipt). If the Applicant is requesting hazard mitigation funding, it must determine the actual SOW and hazard mitigation measures to be performed within the 30-day and 18-month deadlines.

Each time FEMA transmits a fixed-cost offer, the Recipient and Applicant have a combined total of 30 calendar days from the date of FEMA’s transmittal of the fixed-cost offer to accept the offer (not to exceed the 18-month deadline). FEMA processes projects without accepted fixed-cost offers by the 30-day and 18-month deadlines using standard PA policies and procedures and adjust funding based on actual eligible costs at closeout.

Time extensions to accept fixed-cost offers must be approved by FEMA’s Assistant Administrator for Recovery.

### III. Compliance Reviews

The CRC conducts a series of reviews for program compliance. The Insurance Specialist reviews the Applicant’s insurance documentation, calculates required reductions, and documents insurance obtain and maintain requirements as a condition of the award. FEMA EHP staff review the SOW to determine if the SOW has a potential of impacting environmental or historic resources, FEMA EHP staff review the SOW to determine if modifications would reduce potential impacts. and document the EHP requirements as a condition of the award.

# CHAPTER 10: OBLIGATION AND RECOVERY TRANSITION

This Chapter describes the final review and obligation process, the Recovery Transition Meeting, and provides an overview of PA considerations for transitioning field operations back to the Regional office, a PA Processing Center, or a Long-Term Recovery Office. It also includes PA policy on appeals and provides a summary of arbitration. Recipients and FEMA conduct final project reviews in Phase IV: *Final Reviews*. FEMA obligates Projects and transitions recovery roles and responsibilities in Phase V of the PA Program delivery process, *Obligation and Recovery Transition*.

## I. Final Review and Obligation

### A. Recipient Review

Project applications are routed to the Recipient for review before FEMA conducts the final review. The Recipient reviews project applications to ensure that all of the Applicant's incident-related impacts, repair methods, and costs are properly addressed.

### B. Final Review

The PAGS performs the Final Review to verify the work and costs described in the project application are eligible before obligating funds. The final reviewer ensures the cost share is accurate.

If the Federal cost share is greater than \$1 million, the final reviewer submits the project application to the Million Dollar Review queue. FEMA notifies Congress and the Department of Homeland Security of project applications with a Federal cost share greater than \$1 million before obligation (including subsequent project amendments). FEMA refers to this as the Large Project Notification (LPN) process.

If the Federal share is less than \$1 million, the final reviewer submits the project application into a queue where FEMA obligates the Federal share of the eligible project cost to the Recipient.<sup>348</sup> Once obligated, the Project constitutes the official record of the approved SOW for the Project.

### C. Obtaining Funds

Strategic Funds Management is FEMA's process for obligating PA funding based on the Applicant's schedule to execute the work. If a Permanent Work Project is greater than \$1 million and the Applicant does not need funds for more than 180 days from the time the Project is ready for obligation, FEMA obligates funds based on the project completion schedule. FEMA's *Strategic Funds Management – Implementation Procedures for the Public Assistance Program* (FEMA SOP 9570.24) addresses this obligation process in detail.<sup>349</sup>

---

<sup>348</sup> 44 C.F.R. § 206.202(e).

<sup>349</sup> [www.fema.gov/sites/default/files/2020-07/fema\\_9570.24\\_startegic-funds-mgmt\\_SOP\\_12-21-2012.pdf](http://www.fema.gov/sites/default/files/2020-07/fema_9570.24_startegic-funds-mgmt_SOP_12-21-2012.pdf).

The Recipient is responsible for notifying the Applicant that funds are available<sup>350</sup> and for distributing the funds to the appropriate Subrecipient.<sup>351</sup> Funds that FEMA has obligated are available to the Recipient to pass through to the appropriate Subrecipient.<sup>352</sup>

## II. Recovery Transition Meeting

The PDMG coordinates with the Recipient to schedule a Recovery Transition Meeting once the Applicant has signed all of its projects in PA Grants Portal. The transition meeting prepares the Applicant for FEMA's transition of PA Operations from the JFO to the Regional office. The PDMG or Recipient representative contacts the Applicant to coordinate meeting logistics, review discussion topics, and identify appropriate Applicant attendees. FEMA, the Recipient, and the Applicant attend the Recovery Transition Meeting.

FEMA uses this meeting to:

- Ensure all claimed damage is sufficiently and accurately documented;
- Discuss record retention requirements;
- Explain deadlines for completion of work and appeals, including Net Small Project Overruns;
- Ensures the Applicant understands the terms and conditions of the projects (e.g., requirements for environmental and historic preservation, procurement, minimum standards, disposition, etc.);
- Transition primary point-of-contact from field personnel to the Recipient; and
- Discuss questions or concerns.

## III. Transition Field Operation to Regional or Recovery Office

This section provides an overview of PA considerations for transitioning from the JFO and CRC environment, in which project application development is the predominant activity, to the post-JFO environment (e.g., Regional Office or Long-Term Recovery Office), where program management and closeout are predominant.

A JFO closes when most FEMA program and FCO goals have been met. The FCO coordinates with the FEMA Region, FEMA Headquarters, the PAGS, and other program leads to determine closure. PA considerations include the number of remaining:

- Project applications to be written;
- Project applications in each review queue; and
- Recovery Transition Meetings.

Once the JFO closes, PA operations are transferred to the Regional Office or to a Recovery Operation. The Region regains primary responsibility for ongoing operations and the CRC maintains its support role to the region until all project applications for the incident have been processed through obligation.

The need for a PA Recovery Operation exists when the JFO is ready to close but too much work remains for the Region to assume full responsibility for the operation or if the Regional Office is

---

<sup>350</sup> 44 C.F.R. § 206.200(b)(2)(i).

<sup>351</sup> 44 C.F.R. § 206.202(a).

<sup>352</sup> 44 C.F.R. § 206.200(b)(2)(ii).

located too far from the incident location. In this situation, a Recovery Operation is set up to finish remaining project amendments, complete required reviews, resolve outstanding issues, and obligate remaining funds. PA Recovery Operations may include the following:

- PA Processing Center: Established by the respective Regional Office after a small to medium sized disaster when IA is no longer active in the disaster area and the FCO has demobilized; the PAGS may still be active in the Processing Center with oversight provided by the Regional Office; and
- Long-Term Recovery Office: Established by FEMA Headquarters after a large disaster.

Transition from a Recovery Operation to the Regional Office varies by region. It typically occurs when project formulation is complete and outstanding issues have been resolved.

# CHAPTER 11: POST AWARD MONITORING

This chapter provides PA policy and procedures on Phase VI: *Post Award Monitoring and Amendments*. This includes reporting requirements, post award changes in SOW, work completion deadlines, and audits.

## I. Large Project Quarterly Progress Reports

The Large Project Quarterly Progress Report (QPR) is a tool for FEMA and the Recipient to track the progress of Large Projects. FEMA requires the Recipient to report on the status of all open Large Projects on a quarterly basis.<sup>353</sup> Recipients must submit QPRs to FEMA no later than 30 days after the end of each quarter (see Table 6, *Deadlines for Submitting Quarterly Progress Reports*).

The Subrecipient must submit the following for each incomplete Large Project on a quarterly basis:

- Total expenditures to date;
- Status of the project (either construction phase or percent complete);
- Whether the work is complete (per definition in [Chapter 11:V. Work Completion Deadlines](#));
- Projected or actual work completion date (per definition in [Chapter 11:V. Work Completion Deadlines](#)); and
- Any circumstances that could delay the project.

In addition to verifying and submitting the Subrecipient's information above, the Recipient must submit the following for each open Large Project on a quarterly basis:

- Total amount disbursed to the Subrecipient;
- Whether final payment was made;
- Whether time extensions were approved; and
- Latest approved work completion deadline.

**Table 6: Deadlines for Submitting Quarterly Progress Reports**

| Quarter | Dates                   | Report Due Date |
|---------|-------------------------|-----------------|
| 1       | October 1 – December 31 | January 30      |
| 2       | January 1 – March 31    | April 30        |
| 3       | April 1 – June 30       | July 30         |
| 4       | July 1 – September 30   | October 30      |

## II. Financial Status Reports

Recipients submit Federal Financial Status Reports (FFRs) (SF-425s) quarterly to the respective FEMA Regional Office.<sup>354</sup> The FFR provides the status of funds for the prime award, the

<sup>353</sup> 44 C.F.R. § 206.204(f).

<sup>354</sup> 2 C.F.R. § 200.327.

Recipient's expenditure drawdowns, and whether the Recipient is meeting its cost-share requirements.

### III. Federal Funding Accountability and Transparency Act

The Federal Funding Accountability and Transparency Act (FFATA) requires Recipients to register in the FFATA Subaward Reporting System (FSRS) and report on all awards and subawards equal to or greater than \$25,000.

### IV. Post Award Change in Scope of Work

While proceeding with the project, the Applicant must ensure that it uses PA funding only for eligible work as identified in the Project). The Applicant may identify a need to change the SOW. The Applicant should engage the Recipient and FEMA as soon as it identifies a change to the SOW to allow FEMA time to review changes for eligibility and EHP compliance requirements prior to commencement of work. If the Applicant begins work associated with a change before FEMA review and approval, it jeopardizes PA funding.

A change requires a written request with detailed justification and documentation to support the eligibility of the requested revision.<sup>355</sup> If the request involves previously unreported damage, the Applicant must also provide documentation demonstrating how the incident caused the damage. The Recipient must forward the request to FEMA with its written recommendation.<sup>356</sup> Table 7: *Information to Support SOW Changes*, indicates the information necessary for FEMA to evaluate a request for a change in SOW.

FEMA engages subject matter experts for technical assistance when necessary to reach a determination of whether the requested change is eligible for PA funding.

Changes in SOW due to one of the following reasons are generally eligible:

- Alternate repair method is more cost-effective than the original proposed repair method;
- Original repair method is not technically feasible;
- Increase in previously approved quantities due to errors and omissions;
- Hidden damage discovered during construction and is disaster-related; or
- The Applicant wishes to pursue an Improved or Alternate Project.

---

<sup>355</sup> 44 C.F.R. § 206.204(e) and 2 C.F.R. § 200.308.

<sup>356</sup> 44 C.F.R. § 206.204(e).

**Table 7. Information to Support SOW Changes**

| Information to Support SOW Changes   |
|--|
| <p><b>Change in SOW requests should be submitted prior to the approved project deadline and include the following (not an all-inclusive list):</b></p> <ul style="list-style-type: none"><li><input type="checkbox"/> Detailed changes to SOW and cost (required)</li><li><input type="checkbox"/> Reason for changes (required)<ul style="list-style-type: none"><li>• If more cost-effective repair: both cost estimates</li><li>• If original SOW not feasible: supporting documentation such as technical reports</li><li>• If hidden damage (must be found during performance of eligible work):<ul style="list-style-type: none"><li>○ Documentation substantiating the damage is related to the declared incident;</li><li>○ Photographs documenting damage; and</li><li>○ Change orders</li></ul></li></ul></li><li><input type="checkbox"/> Construction timeline / project schedule<ul style="list-style-type: none"><li>• Time extension, if necessary (include information in Table 8. <i>Information to Support a Time Extension</i>)</li></ul></li></ul> |

**A. Scope of Work Changes on Permanent Work Alternative Procedures Projects**

For Alternative Procedures Projects, once the SOW is approved and a fixed-cost offer is accepted:

- The Applicant must notify FEMA prior to making SOW changes that involve:
  - Buildings or structures that are 45 years of age or older,
  - Ground disturbing activities, or
  - Work in or near waterways.

With exception of buildings or structures that are 45 years of age or older, the Applicant does not need to notify FEMA when it intends to make changes that substantially conform to the approved SOW. Changes that substantially conform include items, such as:

- Substitutions in material type (e.g., pre-cast concrete vs. steel beam, stainless steel vs galvanized fasteners); or
- Interior floor plan reconfigurations (e.g., adding, moving or removing rooms/features).

If the Applicant wishes to change the SOW to the extent that it changes the hazard mitigation, such changes must be approved within the 18-month deadline and the fixed-cost offer amount will be adjusted to reflect the cost of the revised hazard mitigation SOW.

## V. Work Completion Deadlines

FEMA only provides PA funding for work completed and costs incurred<sup>357</sup> within regulatory deadlines (see Figure 17. *Work Completion Deadlines*). The deadline for Emergency Work is 6 months from the declaration date. The deadline for Permanent Work is 18 months from the declaration date.<sup>358</sup> FEMA considers these timeframes to be a project's approved POP.

| Deadlines for Completion of Work |        |
|----------------------------------|--------|
| Type of Work                     | Months |
| Emergency Work                   | 6      |
| Permanent Work                   | 18     |

**Figure 17. Work Completion Deadlines**

Work completion is defined as the completion of all work associated with the approved SOW including meeting all compliance requirements. It does not include invoice payments, warranty periods, or PA grant management and administration activities (e.g., compiling and submitting closeout documentation, financial reconciliation, requesting payment, etc.). If the Applicant determines it needs additional time to complete work, it must submit a written request for a time extension to the Recipient with the following information:

- Documentation substantiating delays beyond its control;
- A detailed justification for the delay;
- Status of the work; and
- The project timeline with the projected completion date.<sup>359</sup>

The Recipient has authority to extend deadlines for individual projects based on extenuating circumstances. Except for temporary relocation projects, the Recipient may extend Emergency Work up to an additional 6 months and Permanent Work up to an additional 30 months.<sup>360</sup> The Recipient must notify FEMA when it approves a time extension either via FEMA's systems and reporting mechanisms or written notification.<sup>361</sup>

FEMA has authority to extend individual project deadlines beyond these timeframes if extenuating circumstances justify additional time.<sup>362</sup>

The prime award POP begins on the first day of the incident period and initially extends four years from the declaration date. Project extensions cannot exceed the Recipient's prime award POP. Therefore, the Recipient must request FEMA approval for an extension to the prime award POP if it anticipates project work to extend beyond the end of the prime award POP.<sup>363</sup>

FEMA generally considers the following to be extenuating circumstances beyond the Applicant's control:

- Permitting or EHP compliance related delays due to other agencies involved;
- Environmental limitations (such as short construction window);

<sup>357</sup> 2 C.F.R. § 200.309 and 44 C.F.R. § 206.204(d)(2).

<sup>358</sup> 44 C.F.R. § 206.204(c)(1).

<sup>359</sup> 44 C.F.R. § 206.204(d)(2).

<sup>360</sup> 44 C.F.R. § 206.204(c)(2)(ii).

<sup>361</sup> Per 2 C.F.R. § 200.308(d)(2), for non-construction Emergency Work, the Recipient must notify FEMA at least 10 days prior to the project deadline.

<sup>362</sup> 44 C.F.R. § 206.204(d).

<sup>363</sup> The FEMA Chief Financial Officer must approve the request.

- Inclement weather (site access prohibited or adverse impact on construction); and
- Lack of availability of materials, equipment, or contractors to complete work.

FEMA generally considers the following to be circumstances within the control of the Applicant and not justifiable for a time extension:

- Permitting or environmental delays due to Applicant delays in requesting permits;
- Lack of funding;
- Change in administration or cost accounting system; and
- Compilation of cost documentation.

Although FEMA only provides PA funding for work performed on or before the approved deadline, the Applicant must still complete the approved SOW for funding to be eligible.<sup>364</sup> FEMA deobligates funding for any project that the Applicant does not complete. If the Applicant completes a portion of the approved SOW and the completed work is distinct from the uncompleted work, FEMA only deobligates funding for the uncompleted work. For example, if one project includes funds for three facilities and the Applicant restores only two of the three facilities, FEMA only deobligates the amount related to the facility that the Applicant did not restore.

Table 8: *Information to Support a Time Extension*, indicates the information that the Applicant should submit to support a request for a time extension.

**Table 8. Information to Support a Time Extension**

| Information to Support a Time Extension  |
|--|
| <p><b>Request should be submitted prior to current approved deadline, be specific to one project, and include the following information with supporting documentation:</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Dates and provisions of all previous time extensions</li> <li><input type="checkbox"/> Construction timeline / project schedule in support of requested time (required)</li> <li><input type="checkbox"/> Basis for time extension request (required) <ul style="list-style-type: none"> <li>• Delay in obtaining permits <ul style="list-style-type: none"> <li>○ Permitting agencies involved and application dates</li> </ul> </li> <li>• Environmental delays or limitations (e.g., short construction window, nesting seasons) <ul style="list-style-type: none"> <li>○ Correspondence with various agencies</li> <li>○ Specific details</li> </ul> </li> <li>• Inclement weather (prolonged severe weather conditions prohibited access to the area, or adversely impacted construction) <ul style="list-style-type: none"> <li>○ Specific details</li> </ul> </li> <li>• Other reason for delay <ul style="list-style-type: none"> <li>○ Specific details</li> </ul> </li> </ul> </li> </ul> |

## VI. Audits

Recipients and Subrecipients are subject to Federal and non-Federal audits. Records are subject to audit by State or Territorial government auditors, FEMA, the U.S. Department of Homeland

<sup>364</sup> 44 C.F.R. § 206.204(d)(2).

Security Office of Inspector General, and the U.S. Government Accountability Office (GAO).<sup>365</sup> FEMA may adjust project funding due to audit findings.

#### **A. Single Audits**

A Recipient or Subrecipient that expends \$750,000 or more in Federal funds during its fiscal year must perform a single or program-specific audit.<sup>366</sup>

#### **B. Government Accountability Office**

The GAO is the investigatory arm of Congress and is under the direction of the Comptroller General of the United States. GAO is an independent, nonpartisan agency that investigates how the Federal Government spends taxpayer dollars. Its mission is to help improve the performance and accountability of the Federal Government. Although the GAO usually audits FEMA programs, it has authority to audit any project.

#### **C. Office of the Inspector General**

The Department of Homeland Security's Office of Inspector General (OIG) conducts independent audits and investigations on FEMA programs, operations, activities, and functions; how Recipients and Subrecipients expend Federal funds; and oversight of non-Federal audits such as single audits. The OIG evaluates activities to identify, deter, and address fraud, waste, and abuse. The OIG has authority to audit any project, including Alternative Procedures Projects.

#### **D. Recovery of Improper Payments**

FEMA conducts audit assessments on drawdowns to recover payments identified as improper as required by the Improper Payments Elimination and Recovery Improvement Act (IPERIA). FEMA's *Public Assistance Recovery of Improper Payments Standard Operating Procedure* (SOP 9570.16)<sup>367</sup> provides additional information.

# CHAPTER 12: FINAL RECONCILIATION AND CLOSEOUT

Phase VII: *Final Reconciliation and Closeout* is the final stage of PA Program delivery process. This chapter provides PA policy and procedural requirements for reconciliation and closeout of Projects, Subrecipients, and the PA award.<sup>368</sup>

## I. Project Reconciliation and Closeout

FEMA requires timely and complete project-level information from the Recipient as work is completed to facilitate efficient and effective closeout of the Recipient's prime award. This section defines requirements for project-level closeout. To initiate project-level closeout, the Subrecipient must inform the Recipient that its project is complete and the date the work was completed. To ensure a timely closeout process, the Subrecipient should notify the Recipient immediately as it completes each Large Project and when it has completed its last Small Project. Subrecipients should not wait for the Quarterly Progress Report to inform the Recipient as it must meet the 90-day closeout deadlines defined throughout this section.

### A. Small Projects

Once FEMA obligates a Small Project, FEMA does not adjust the approved amount of an individual Small Project. This applies even when FEMA obligates the Project based on an estimate and actual costs for completing the eligible SOW differ from the estimated amount. To close Small Projects, the Recipient must submit a Small Project Completion Certification and certify that:

- The Subrecipient completed the approved SOWs for all of its Small Projects in accordance with the FEMA-State/Territory/Tribe Agreement; and
- It made all payments in accordance with the FEMA-State/Territory/Tribe agreement.<sup>369</sup>

FEMA only adjusts the approved amount on individual Small Projects if one of the following conditions applies:

- The Subrecipient did not complete the approved SOW;
- The Subrecipient requests additional funds related to an eligible change in SOW; or
- The Project contains inadvertent errors or omissions.

In these cases, FEMA only adjusts the specific cost items affected.

If the total actual cost of all of a Subrecipient's Small Projects combined exceeds the total amount obligated for all of the Small Projects, the Subrecipient may request additional funding. The Subrecipient must request the additional funding through the appeal process, described in [Chapter 3: V.C. Appeal Rights and Requirements](#), within 60 days of work completion on its last Small Project.<sup>370</sup> FEMA refers to this as a Net Small Project Overrun (NSPO) appeal. The appeal

---

<sup>368</sup> The language in this document supersedes the language in the December 2013 *Public Assistance Program Management and Grant Closeout Standard Operating Procedure* (SOP) 9570.14.

<sup>369</sup> 44 C.F.R. § 206.205(a).

<sup>370</sup> 44 C.F.R. § 206.204(e)(2).

must include actual cost documentation for all Small Projects that FEMA originally funded based on estimate amounts.<sup>371</sup>

If the Subrecipient is not appealing for an NSPO, the Recipient must submit the certification to FEMA within 180 days from the latest Small Project work completion date or the latest approved deadline of the Subrecipient's Small Projects, whichever is sooner. The Recipient must submit certification of completion of all of its own Small Projects within 90 days of the latest Small Project work completion date or the approved deadline of its last Small Projects, whichever is sooner.<sup>372</sup>

Once FEMA receives the Recipient's certification and completes the necessary review, FEMA closes the respective Small Projects and notifies the Recipient in writing.

## **B. Large Projects**

FEMA closes Large Projects individually as each is completed.<sup>373</sup> With exception of Capped Projects, the final eligible amount for a Large Project is the actual documented cost incurred to complete the eligible SOW.<sup>374</sup>

The Subrecipient must provide documentation to support the actual costs within 90 days of work completion.<sup>375</sup> The Recipient must submit a Large Project Expenditure Report and Completion Certification and must certify that:

- All incurred costs are associated with the approved SOW;
- The Subrecipient completed all work in compliance with the FEMA-State/Territory/Tribe Agreement; and
- It made all payments in accordance with 2 C.F.R. § 200.305.<sup>376</sup>

The Recipient must submit its certification of the Subrecipient's completion of each Large Project with the final claim for PA funding for the Project and supporting documentation to FEMA within 180 days of the work completion date or the Project deadline, whichever occurs first.<sup>377</sup> The Recipient must submit its certification for each of its own Large Projects within 90 days of the work completion date or the Project deadline, whichever occurs first. If work on a Large Project is complete prior to obligation, the Applicant must still submit actual cost documentation within the 90 days of work completion. However, the Recipient's certification and final payment of claim is due within 180-days from the date of obligation.

At a minimum, Large Project closeout packages must include:

- A cost breakdown identifying the individual elements that comprise the total actual costs claimed;
- Subrecipient's accounting of Project expenditures and dates of expenditures (such as a report from its accounting system);

---

<sup>371</sup> 44 C.F.R. § 206.204(e).

<sup>372</sup> 2 C.F.R. § 200.343.

<sup>373</sup> 44 C.F.R. § 206.205(b).

<sup>374</sup> 44 C.F.R. § 206.203(c)(1).

<sup>375</sup> 44 C.F.R. § 206.205(b)(1) and 2 C.F.R. § 200.343.

<sup>376</sup> 44 C.F.R. § 206.205(b)(1).

<sup>377</sup> 2 C.F.R. § 200.343. FEMA allows 180 days based on the combined allowance of 90 days for the Subrecipient and 90 days for the Recipient.

- All applicable documentation to support the actual costs as identified in [Chapter 6. Cost Eligibility](#);
- Documentation sufficient for FEMA to validate the work performed was consistent with the approved SOW;
- Documentation to substantiate compliance with all terms and conditions of the award (e.g., EHP compliance documentation and insurance policies showing additional coverage obtained); and
- A summary explaining the documentation submitted.

Prior to closing Projects, FEMA:

- Verifies there are no outstanding appeals or arbitration cases;
- Reviews the invoices and other documentation related to the work performed to validate it was consistent with the approved SOW, including completion of any approved PA mitigation;
- Determines whether the Subrecipient completed the work within the approved deadline (FEMA limits reimbursement to costs incurred within the deadline);
- Ensures no duplication of funding exists (e.g., with insurance or costs in any other related Projects);
- Validates compliance with cost principles, including, but not limited to:
  - Equipment and property disposition;
  - Procurement and contracting; and
  - Reasonableness of costs (FEMA limits reimbursement to what it can determine to be reasonable).
- Validates compliance with all terms and conditions of the award, including, but not limited to:
  - Code and standard requirements;
  - EHP requirements; and
  - Insurance obtain and maintain requirements.
- FEMA reviews and verifies the accuracy of the actual costs and evaluates and reconciles any cost overruns or underruns. If the information is extensive, such as payroll records or trip tickets, FEMA selects and reviews a representative sample of the documents. If FEMA successfully validates the sample, it considers all of the records to be correct. However, if FEMA identifies errors it works with the Recipient to correct the errors and reviews a larger sample. If necessary, based on the number or significance of the errors, FEMA may return the final claim for correction and resubmittal. For Projects with funding changes, FEMA prepares a project amendment and obligates additional funds or reduces funding based on actual costs to complete the eligible SOW.<sup>378</sup>

If the Project included approved PA mitigation measures; FEMA does not re-evaluate the cost-effectiveness of the PA mitigation based on the final actual cost. If during the review, FEMA determines that the Subrecipient performed work that was not included in the approved SOW, the Subrecipient jeopardizes its funding. FEMA designates the project as an Improved Project,

---

<sup>378</sup> 44 C.F.R. § 206.205(b)(2).

reviews the additional SOW for EHP compliance, and either deobligates or caps funding at the original estimated amount, depending on the outcome of the review.<sup>379</sup>

For Capped Projects, the Subrecipient must provide documentation to support that it used the funds in accordance with the eligibility criteria described in [Chapter 8:VIII.B. Use of Capped Project Funds](#).

If the Applicant did not comply with all Federal requirements (e.g., procurement and contracting, codes and standards, EHP, insurance, etc.), FEMA may deobligate either all or a portion of the funding.

Once FEMA completes its review and funding adjustments, FEMA closes the Project and notifies the Recipient in writing.

### **C. Alternative Procedures Permanent Work Projects**

Work must be completed by the end of the latest Alternative Procedures Project period of performance and the Recipient must certify that all incurred costs are associated with the approved SOW and that the Subrecipient completed all work in accordance with FEMA regulations and policies. The Recipient must submit its certification to FEMA within 180 days of the Subrecipient completing its last Alternative Procedures Project or the latest Alternative Procedure Project deadline, whichever occurs first, in order for the Subrecipient to retain and use any excess funds.

The closeout certification must include a final report of Alternative Procedures Project costs and documentation to support the following:

- Summary of actual work completed;
- Mitigation measures achieved, if applicable;
- Compliance with EHP requirements;
- Compliance with the obtain and maintain insurance requirement;
- Summary of total actual costs to complete the Alternative Procedure Projects;
- Compliance with Federal procurement procedures; and
- Actual insurance proceeds received.

Subrecipients do not need to track costs to specific work items. Subrecipients only need to substantiate and certify that all claimed costs are related to the overall work deemed eligible for the Alternative Procedure Projects.

### **D. Subrecipients**

The Recipient needs to request that FEMA close each Subrecipient once all of its respective Projects have been completed and closed for the disaster. The Recipient may either request this in the same submittal as the Subrecipient's last Project closeout request or may submit a separate request. The request should include a Project Completion Certification Report as it lists all of the Subrecipient's Projects.

---

<sup>379</sup> 44 C.F.R. § 206.203(d)(1).

If all of the Subrecipient's Projects are closed and there are no outstanding audits, FEMA closes the Subrecipient and notifies the Recipient in writing.

## II. Stafford Act Section 705

Stafford Act Section 705 imposes a 3-year limit on FEMA's authority to recover payments made to SLTT government Recipients and Subrecipients unless there is evidence of fraud. Section 705 does not apply to PNPs. To ensure consistent application of the provisions contained in Section 705, FEMA issued Recovery Policy (FP 205-081-2), *Stafford Act Section 705, Disaster Grant Closeout Procedures*, which describes the limitations and requirements in detail.<sup>380</sup>

## III. Public Assistance Award Closeout

The Recipient must submit its final FFR (SF-425) with a written request to close the PA award. FEMA and the Recipient certify that all work was completed, all eligible costs have been reimbursed, and financially reconciled. The PA program is programmatically closed when FEMA ensures that all PA Projects awarded for the incident met statutory and regulatory requirements. For FEMA to close the PA award, the following conditions should be met:

- FEMA has issued final determinations on all appeals;
- FEMA has obligated all eligible PA funding;
- The Recipient and Subrecipients have completed all PA Projects and have met the statutory and regulatory requirements governing the program, including compliance with EHP requirements and insurance purchase requirements;
- The Recipient has passed through all obligated funds appropriately and submitted its final expenditure report to FEMA;
- FEMA has adjusted the funding level for the program, as appropriate; and
- Both FEMA and the Recipient have completed all administrative actions related to the PA Program.

The Recipient must liquidate all obligations within 90 days of the end of the prime award period of performance.

## IV. Documentation Retention Requirements

Subrecipients must maintain all source documentation for each Project<sup>381</sup> for 3 years after the date of transmission of the final expenditure report for project completion as certified by the Recipient.<sup>382</sup> The Recipient must keep all financial and program documentation<sup>383</sup> for 3 years after the date it submits the final SF-425. There are several exceptions to this timeframe that may require longer retention periods, including exceptions relating to real property and equipment disposition, audits, and litigation.<sup>384</sup> Additionally, SLTT government laws may require longer retention periods.

# TERMS AND DEFINITIONS

## **Acquisition cost**

The net invoice price of equipment including the cost of modifications, attachments, accessories, or auxiliary apparatus necessary to make it usable for the purpose it was acquired. Other charges such as the cost of installation, transportation, taxes, duty, or protective in-transit insurance, shall be included or excluded from the unit acquisition cost in accordance with the Recipient's regular accounting practices.

## **Animal**

Any living or dead member of the animal kingdom, including any mammal, fish, bird, amphibian, reptile, mollusk, crustacean, arthropod, or other invertebrate or any part thereof.

## **Applicant**

A non-Federal entity submitting an application for assistance under the Recipient's Federal award.

## **Assistance Animal**

An animal that works, provides assistance, or performs tasks for the benefit of a person with a disability, or provide emotional support that alleviates identified symptoms or effects of a person's disability. Although dogs are the most common type of assistance animal, other animals can also be assistance animals.

## **Award (Federal)**

The financial assistance that a non-Federal entity receives either directly from a Federal awarding agency or indirectly from a pass-through entity; or the cost-reimbursement contract under the Federal Acquisition Regulation that a non-Federal entity receives directly from a Federal awarding agency or indirectly from a pass-through entity.

## **Backfill Employee**

A replacement employee who performs the regular duties of other personnel.

## **Coastal zone**

The coastal waters (including the lands therein and thereunder) and the adjacent shorelands (including the waters therein and thereunder), strongly influenced by each other and in proximity to the shorelines of coastal States, including islands, transitional and intertidal areas, salt marshes, wetlands, and beaches.

## **Cost-to-charge ratio**

A ratio established by Medicare to estimate a medical service provider's actual costs in relation to its charges.

## **Critical action**

An action for which even a slight chance of flooding is too great. The minimum floodplain of concern for critical actions is the 500-year floodplain (also referred to as the critical action floodplain).

**Current fair market value**

The value of equipment and supplies determined by selling them in a competitive market or by researching advertised prices for similar items on the used market.

**Duplication of Benefits**

Funding received from two sources for the same item of work.

**Educational institution**

Any elementary school as defined by section 801(c) of the Elementary and Secondary Education Act of 1965; any secondary school as defined by section 801(h) of the Elementary and Secondary Education Act of 1965; or any institution of higher education as defined by section 1201 of the Higher Education Act of 1965.

**Emergency**

Any occasion or instance for which the President determines Federal assistance is needed to supplement SLTT efforts and capabilities to save lives and to protect property and public health and safety, or to lessen or avert the threat of a catastrophe in any part of the United States.

**Emergency Protective Measure**

An action taken by a community before, during, and after an incident to save lives, protect public health and safety, and prevent damage to improved public and private property.

**Emergency Work**

Work that must be done immediately to save lives, protect improved property, protect public health and safety, or avert or lessen the threat of a major disaster.

**Equipment**

Tangible personal property, including information technology systems, having a useful life of more than 1 year and a per-unit acquisition cost that equals or exceeds the lesser of the capitalization level established by the non-Federal entity for financial statement purposes, or \$5,000.

**Facility**

Any publicly or privately-owned building, works, system or equipment—built or manufactured—or an improved and maintained natural feature. Land used for agricultural purposes is not a facility.

**Federal agency**

Any department, independent establishment, government corporation, or other agency of the executive branch of the Federal Government, including the United States Postal Service, but not including the American National Red Cross.

**Federal share**

The portion of the total project costs that are paid by Federal funds.

**Final expenditure report**

The report the Recipient submits to FEMA for all of a Subrecipient's Projects, certifying that the grant terms and conditions have been met and project costs are reconciled.

**Flood control work**

A structure such as a levee, flood wall, flood control channel, or water control structure that was designed and constructed to have appreciable effects in preventing damage by irregular and unusual rises in water level.

**Flood fighting**

An activity or measure (e.g., sandbagging, buttressing) intended to prevent or stop flooding, at levels above flood stage, or to prevent structural failure.

**Force account**

An Applicant's own labor forces and equipment.

**Fringe benefits**

A percentage of the actual wages that pays for employee benefits.

**Immediate threat**

The threat of additional damage or destruction from an event that can reasonably be expected to occur within 5 years.

**Improved property**

A structure, facility, or item of equipment that was built, constructed, or manufactured. Land used for agricultural purposes is not improved property.

**Incident period**

The time span during which the disaster-causing incident occurs.

**Indian Tribal Government**

Any federally recognized governing body of an Indian or Alaska Native Tribe, band, nation, pueblo, village, or community that the Secretary of the Interior acknowledges to exist as an Indian Tribe under the Federally Recognized Tribe List Act of 1994, Title 25 of the U.S. Code (U.S.C.) 479a. This does not include Alaska Native corporations, the ownership of which is vested in private individuals.

**Indirect cost**

A cost incurred for a common or joint purpose benefiting more than one cost objective that is not readily assignable to the cost objectives specifically benefited.

**Inland zone**

The environment inland of the coastal zone excluding the Great Lakes and specified ports and harbors on inland rivers. Precise boundaries are identified in Federal regional contingency plans.

**Large Project**

A project for which the final obligated (Federal and non-Federal) amount is equal to or *greater* than the annually adjusted cost threshold for small project grants.

**Local government**

A county, municipality, city, town, township, local public authority, school district, special district, intrastate district, council of governments (regardless of whether the council of governments is incorporated as a nonprofit corporation under State law), regional or interstate government entity, or agency or instrumentality of a local government; an Indian Tribe or authorized tribal organization, or Alaska Native village or organization that does not meet the definition of Indian Tribal Government; or a rural community, unincorporated town or village, or other public entity, for which an application for assistance is made by a State or political subdivision of a State.

**Major disaster**

Any natural catastrophe (including any hurricane, tornado, storm, high water, wind-driven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, or drought), or, regardless of cause, any fire, flood, or explosion, in any part of the United States, for which the President determines causes damage of sufficient severity and magnitude to warrant major disaster assistance under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as Amended to supplement the efforts and available resources of SLTT governments and disaster relief organizations in alleviating the damage, loss, hardship, or suffering caused thereby.

**Management cost**

Any indirect cost, any direct administrative cost, and any other administrative expense associated with a specific project under a major disaster or emergency.

**Museum**

A facility that preserves and exhibits a documented collection of artistic, historic, scientific, or other objects.

**Non-Federal entity**

An institution of higher education, nonprofit organization, local government, Indian Tribe, or State that carries out a Federal award as a Recipient or Subrecipient.

**Pass-through entity**

A non-Federal entity that provides a subaward to a Subrecipient to carry out part of a Federal program.

**Period of performance**

The time during which the non-Federal entity may incur new obligations to carry out the work authorized under the Federal award.

**Permanent Work**

Restorative work that must be performed through repairs or replacement to restore an eligible facility on the basis of its pre-disaster design and current applicable codes and standards.

**Personal property**

Property other than real property. It may be tangible, having physical existence, or intangible.

**Pet (household)**

A Domesticated animal that is traditionally kept in the home for pleasure rather than for commercial purposes, can travel in a commercial carrier, and can be housed in a temporary facility. Examples are dogs, cats, birds, rabbits, rodents, and turtles. Household pets do not include reptiles (except turtles), amphibians, fish, insects, arachnids, farm animals (including horses), or animals kept for racing purposes.

**Pre-disaster design**

The size or capacity of a facility as originally designed and constructed or subsequently modified by changes or additions to the original design. It does not mean the capacity at which the facility was being used at the time the major disaster occurred if different from the most recent designed capacity.

**Pre-disaster function**

The function the facility was performing immediately prior to the disaster.

**Private nonprofit organization**

Any nongovernmental agency or entity that currently has an effective ruling letter from the U.S. Internal Revenue Service, granting tax exemption under Sections 501(c), (d), or (e) of the Internal Revenue Code, or satisfactory evidence from the State that the nonrevenue producing organization or entity is a nonprofit one organized or doing business under State law.

**Private roads**

Roads that are not owned or operated by or otherwise the legal responsibility of a Federal or SLTT entity (including orphan roads, roads in gated communities, homeowners' association roads, etc.).

**PNP custodial care facility**

A building, structure, or system, including those for essential administration and support, that is used to provide institutional care for persons who require close supervision and some physical constraints on their daily activities for their self-protection, but do not require day-to-day medical care.

**PNP educational facility**

Classrooms plus related supplies, equipment, machinery, and utilities of an educational institution necessary or appropriate for instructional, administrative, and support purposes.

**PNP emergency facility**

A building, structure, equipment, or system used to provide emergency services, such as fire protection, ambulance, or rescue, to the general public, including the administrative and support facilities essential to the operation of such emergency facilities, even if not contiguous.

**PNP medical facility**

A hospital, outpatient facility, rehabilitation facility, or facility for long-term care as such terms are defined in Section 645 of the Public Health Service Act (42 U.S.C. 291o) and any similar facility offering diagnosis or treatment of mental or physical injury or disease, including the administrative and support facilities essential to the operation of such medical facilities even if not contiguous.

**Project**

A logical grouping of work required as a result of the declared major disaster or emergency.

**Providing entity**

The entity providing mutual aid assistance to a requesting entity pursuant to a local or statewide mutual aid agreement.

**Public entity**

An organization formed for a public purpose whose direction and funding are provided by one or more political subdivisions of the State.

**Public facility**

Any of the following facilities owned by a SLTT government: any flood control, navigation, irrigation, reclamation, public power, sewage treatment and collection, water supply and distribution, watershed development, or airport facility; any non-Federal aid, street, road, or highway; and any other public building, structure, or system, including those used for educational, recreational, or cultural purposes; or any park.

**Real property**

Land, including land improvements, structures, and appurtenances thereto, but excludes moveable machinery and equipment.

**Recipient**

A non-Federal entity that receives a Federal award directly from a Federal awarding agency to carry out an activity under a Federal program.

**Reasonable cost**

A cost is reasonable if, in its nature and amount, it does not exceed that which would be incurred by a prudent person under the circumstances prevailing at the time the decision was made to incur the cost. In other words, a reasonable cost is a cost that is both fair and equitable for the type of work being performed.

**Rehabilitation facility**

A facility that primarily provides diagnosis and treatment for rehabilitation of injuries, disabilities, or illness. (Consistent with the definition of “comprehensive outpatient rehabilitation facility” in 42 U.S.C. § 1395x(cc)(2)).

**Request for Public Assistance**

The form a public entity or PNP organization uses to apply for assistance under the Public Assistance Program.

**Requesting Entity**

An entity that requests mutual aid assistance from a Providing Entity for work resulting from a declared fire, emergency, or major disaster within its legal jurisdiction.

**Service animal**

A dog that is individually trained to do work or perform tasks for people with disabilities or access and functional needs.

**Simplified acquisition threshold**

The dollar amount below which a non-Federal entity may purchase property or services using small purchase methods. The simplified acquisition threshold is set by the Federal Acquisition Regulation at 48 C.F.R. Subpart 2.1 (Definitions) and in accordance with 41 U.S.C. 1908. As of the publication of this part, the simplified acquisition threshold is \$150,000, but this threshold is periodically adjusted for inflation.

**Small Project**

A project for which the final obligated (Federal and non-Federal) amount is less than the annually adjusted cost threshold for small project grants.

**Special Flood Hazard Area**

The land area subject to inundation during a flood having a 1 percent chance of being equaled or exceeded in a given year (also referred to as the base flood or 100-year flood). Special Flood Hazard Areas are shown on FIRMs published by FEMA.

**State**

Any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, U.S. Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

**Subaward**

An award provided by a pass-through entity to a Subrecipient for the Subrecipient to carry out part of a Federal award received by the pass-through entity. It does not include payments to a contractor or payments to an individual that is a beneficiary of a Federal program.

**Subrecipient**

A non-Federal entity that receives a subaward from a pass-through entity to carry out part of a Federal program. It does not include an individual that is a beneficiary of such program. A Subrecipient may also be a Recipient of other Federal awards directly from a Federal awarding agency.

**Substantial Damage**

Damage of any origin sustained by a structure whereby the cost of restoring the structure to its before damaged condition would equal or exceed 50 percent of the market value of the structure before the damage occurred.

**Supply**

Any tangible personal property other than that meeting the definition of equipment.

**Trust land**

Land, the title to which is held by the United States in trust for an Indian Tribe or individual, or which is held by an Indian Tribe or individual subject to a restriction by the United States against alienation. “Trust or restricted interest in land” or “trust or restricted interest in a parcel of land” means an interest in trust land. Collectively referred to as “trust lands.”

**Wetland**

An area that is saturated by water with a frequency sufficient to support or, under normal hydrologic conditions would support, a prevalence of vegetation or aquatic life typically adapted to saturated or seasonally saturated soil conditions (e.g., swamp, fresh and saltwater marsh, bog, fen).

**Zoo**

Any facility maintained under the care of a Doctor of Veterinary Medicine, in which live animal(s) are kept for public exhibition or education. Aquariums and wildlife or zoological parks may meet this definition.

## APPENDIX A: ENVIRONMENTAL AND HISTORIC PRESERVATION COMPLIANCE

The following statutes and Executive Orders (EOs) are commonly encountered Federal requirements that were established to protect the environment and preserve the Nation's historic and archaeological resources. FEMA reviews each Public Assistance (PA) project to ensure the work complies with applicable Federal environmental and historic preservation (EHP) laws, their implementing regulations, and applicable EOs. Compliance with all Federal and SLTT laws is a requirement of every FEMA award. SLTT laws, such as hazardous material management laws, vary by location and are not included in this appendix.

FEMA prepares a Greensheet at the beginning of each emergency or disaster declaration with specific information relevant to each State and area. The Greensheet briefly discusses the relevant laws and project types that might trigger application of those laws and informs the Applicant that failure to comply with Federal and SLTT laws may jeopardize funding.

### **National Environmental Policy Act**

Section 102 of the National Environmental Policy Act (NEPA) requires Federal agencies to integrate environmental values into their decision-making processes by considering the environmental impacts of their proposed actions and reasonable alternatives to those actions.<sup>385</sup> The White House Council on Environmental Quality publishes its NEPA regulations in Title 40 of the Code of Federal Regulations (C.F.R.) Parts 1500–1508. The U.S. Department of Homeland Security publishes policies and procedures for implementing NEPA and provide specific processes that FEMA must follow before funding a project. The NEPA process ensures consideration of environmental consequences of the project before decisions are made and involves the public.

### **National Historic Preservation Act**

Section 106 of the National Historic Preservation Act (NHPA) requires FEMA to consider the effects an undertaking will have on historic properties and provide the Advisory Council on Historic Preservation the opportunity to comment on the effects of the undertaking.<sup>386</sup> Historic properties include buildings or groups of buildings (districts), structures, objects, landscapes, archaeological sites, and traditional cultural properties included in, or eligible for inclusion in, the National Register of Historic Places.<sup>387</sup>

### **Endangered Species Act**

The Endangered Species Act (ESA) requires Federal agencies to use their authorities to conserve federally listed threatened and endangered species (listed species) and critical habitats. FEMA must also consult with the U.S. Fish and Wildlife Service (USFWS) and the National Oceanic and Atmospheric Administration's (NOAA's) National Marine Fisheries Service (NMFS), also known as NOAA Fisheries, to ensure that proposed projects will not jeopardize the continued

---

<sup>385</sup> 42 U.S.C. § 4332.

<sup>386</sup> 16 U.S.C. § 470f.

<sup>387</sup> [www.nps.gov/subjects/nationalregister/index.htm](http://www.nps.gov/subjects/nationalregister/index.htm).

existence of any listed species or result in the destruction or adverse modification of critical habitat for listed species.<sup>388</sup>

### **Clean Water Act**

The Clean Water Act (CWA) establishes the basic structure for regulating discharges of pollutants in the waters of the United States (e.g., rivers and streams, lakes and ponds, coastlines, wetlands, estuaries). The CWA makes it unlawful to discharge any pollutant from a specific source into navigable waters without the appropriate CWA permits from the U.S. Army Corps of Engineers (USACE) or State regulatory agency.<sup>389</sup> In addition, the CWA requires authorization for dredging or filling in waters (including disposal of dredged material).

### **Rivers and Harbors Act**

The Rivers and Harbors Act requires that authorization be obtained from USACE to construct any structure in or over any navigable water, including authorization for projects involving constructing or modifying bridges and causeways over navigable waters or constructing any dam or dike in a navigable water. Typically, requests for this type of authorization are handled together with requests for authorization of projects under Section 404 of the CWA.

### **Safe Drinking Water Act**

The purpose of the Safe Drinking Water Act is to protect public health by ensuring the quality of drinking water. The law authorizes the U.S. Environmental Protection Agency (EPA) to, among other things, set standards for the levels of individual contaminants allowed in drinking water and designate as aquifers that are the sole or principal source of drinking water for an area as sole source aquifers. For any financial assistance project that has the potential to contaminate an aquifer and that is located in the identified review area for a sole source aquifer, FEMA must consult with the EPA before funding the project.

### **Clean Air Act**

The Clean Air Act (CAA) protects the Nation's air through the reduction of smog and atmospheric pollution. Air quality compliance often requires certain measures be implemented, such as dust abatement, vehicle emissions control, fuel storage, and distribution procedures. There may be additional requirements in nonattainment areas (defined as those areas that do not meet national standards for air quality and, therefore, require more rigorous compliance measures).<sup>390</sup>

### **Coastal Barrier Resources Act**

The Coastal Barrier Resources Act (CBRA)<sup>391</sup> established the John H. Chafee Coastal Barrier Resources System (CBRS), which consists of relatively undeveloped coastal barriers along the Atlantic, Gulf, Great Lakes, and Caribbean coasts. CBRA minimizes adverse impacts to these areas by restricting Federal assistance that encourages development within the CBRS. USFWS

---

<sup>388</sup> 16 U.S.C. § 1536, Endangered Species Act Section 7.

<sup>389</sup> 33 U.S.C. § 1251 et seq.

<sup>390</sup> 42 U.S.C. § 7401 et seq.

<sup>391</sup> 16 U.S.C. § 3501 et seq.

publishes maps designating these areas.<sup>392</sup> FEMA must consult with USFWS prior to providing PA funding for work within the CBRs.<sup>393</sup>

### **Migratory Bird Treaty Act**

The Migratory Bird Treaty Act makes it unlawful to pursue, hunt, take, capture, kill, or sell migratory birds listed in the statute without a waiver from USFWS.<sup>394</sup> FEMA consults with USFWS regarding projects likely to trigger compliance with this Act.

### **Bald and Golden Eagle Protection Act**

The Bald and Golden Eagle Protection Act prohibits any person from pursuing, capturing, killing, wounding, disturbing, or otherwise taking bald eagles or golden eagles, including their parts (e.g., feathers), nests, or eggs, unless authorized by a permit from the USFWS. The prohibition on disturbance applies to nests and previously used nest sites when eagles are not present if, were an eagle to return, such alterations would lead to injury, death or nest abandonment.

### **Magnuson-Stevens Fishery Conservation and Management Act**

The Magnuson-Stevens Fishery Conservation and Management Act is the primary law for managing and maintaining sustainable fisheries in waters of the United States. The Magnuson-Stevens Fishery Conservation and Management Act protects essential fish habitat, which includes the waters and substrate necessary to maintain healthy fisheries. FEMA must consult with NMFS when any proposed PA project could have an adverse effect on essential fish habitat (defined as any impact that reduces quality or quantity of essential fish habitat).<sup>395</sup>

### **Marine Mammal Protection Act**

The Marine Mammal Protection Act prohibits, with certain exceptions, the “take” of marine mammals in U.S. waters or by U.S. citizens on the high seas. The law prohibits attempts to hunt, capture, kill, or harass any marine mammals. The law authorizes NMFS or USFWS (depending on the species in question) to issue incidental take permits and incidental harassment authorizations.

### **National Marine Sanctuaries Act (NMSA)**

The National Marine Sanctuaries Act, which is part of the Marine Protection, Research and Sanctuaries Act, authorizes the Secretary of Commerce to designate and manage areas of the marine environment as National Marine Sanctuaries (NMS), which NOAA administers. Activities within each NMS are governed by regulations. A sanctuary resource is defined as any living or nonliving resource of a NMS that contributes to the conservation, recreational, ecological, historical, educational, cultural, archeological, scientific, or aesthetic value of the sanctuary. The National Marine Sanctuaries Act prohibits destroying, injuring, or causing the

---

<sup>392</sup> 16 U.S.C. §§ 3501 and 3503. The U.S. Fish and Wildlife Service publishes Coastal Barrier Resource System maps at: [www.fws.gov/ecological-services/habitat-conservation/cbra/Maps/index.html](http://www.fws.gov/ecological-services/habitat-conservation/cbra/Maps/index.html).

<sup>393</sup> 16 U.S.C. § 3505.

<sup>394</sup> 16 U.S.C. §§ 703–712.

<sup>395</sup> 16 U.S.C. §§ 1801–1884.

loss of any sanctuary resource. A permit is required to conduct any activity within a sanctuary that is otherwise prohibited.

### **Coastal Zone Management Act**

The Coastal Zone Management Act (CZMA) provides for the management of the Nation's coastal resources. The CZMA establishes a voluntary partnership between the Federal Government and coastal and great lakes States. It requires participating States to develop State coastal zone management plans. PA projects located in, or near, established coastal zone management areas must be consistent with the enforceable policies of the State's federally approved coastal zone management program.<sup>396</sup> Before approving a project in a coastal zone management area, FEMA consults with the State agency overseeing the implementation of the CZMA plan to ensure the project is consistent with the program's provisions.

### **Farmland Protection Policy Act**

The Farmland Protection Policy Act is intended to minimize the extent to which Federal programs contribute to the conversion of prime or unique farmland, or land of statewide or local importance, to nonagricultural uses and to ensure that Federal programs are administered in a manner that, to the extent practicable, will be compatible with State, local, and private programs and policies to protect farmland. The Farmland Protection Policy Act and U.S. Department of Agriculture (USDA) implementing procedures require FEMA to evaluate whether projects it funds irreversibly convert such farmland to nonagricultural uses and to consider alternative actions that could avoid adverse effects. For projects that have the potential to irreversibly convert such farmland, FEMA must consult with the USDA Natural Resources Conservation Service (NRCS) to identify potential impacts to that farmland.<sup>397</sup>

### **Wild and Scenic Rivers Act**

The Wild and Scenic Rivers Act protects the free-flowing condition of rivers that are part of the National Wild and Scenic Rivers System (System) or are under study for inclusion in the System because of their scenic, recreational, geologic, fish and wildlife, historic, cultural, or other similar values (the rivers under study are listed on the Nationwide Rivers Inventory or have been formally identified as Study Rivers). If a proposed project is located on a river covered by the Wild and Scenic Rivers Act (including a designated river, a Study River, or a river on the Nationwide Rivers Inventory), FEMA must review it for compliance with the Wild and Scenic Rivers Act and consult with the managing agency for the affected designated river.<sup>398</sup>

### **Resource Conservation and Recovery Act**

The Resource Conservation and Recovery Act (RCRA) established a framework for Federal, State, and local cooperation for controlling the management of hazardous and non-hazardous solid waste. EPA's role is to establish minimum regulatory standards, usually implemented by the States, which can establish their own requirements for solid waste management. RCRA

---

<sup>396</sup> 16 U.S.C. § 1451 et seq.

<sup>397</sup> 7 U.S.C. § 4201 et seq.

<sup>398</sup> 16 U.S.C. § 1271 et seq.

requires the safe disposal of waste materials, promotes the recycling of waste materials, and encourages cooperation with local agencies.<sup>399</sup>

### **Comprehensive Environmental Response, Compensation and Liability Act**

The Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), also known as Superfund, authorizes the Federal Government to respond to releases or threatened releases of hazardous substances into the environment through short-term removals and long-term remedial response actions. Superfund also triggered the development of the National Priorities List, a list of national priorities among the sites with known or threatened releases of hazardous contaminants. The 1986 amendments to CERCLA included the Emergency Planning and Community Right-to-Know Act (EPCRA) which, among other things, creates mechanisms to help local communities plan for chemical emergencies.

### **Executive Order 11988, Floodplain Management**

EO 11988, Floodplain Management, requires Federal agencies to minimize or avoid, to the extent possible, the long- and short-term adverse impacts associated with occupancy and modifications of floodplain and to avoid direct and indirect support of floodplain development wherever there is a practicable alternative. It requires Federal agencies to use a systematic decision-making process to evaluate the potential effects of projects located in, or affecting, floodplains; document each step of the process; and involve the public in the decision-making process. This process is designed to:

- Reduce flood loss risks;
- Minimize the impacts of floods on human safety, health, and welfare; and
- Restore and preserve the natural and beneficial functions of floodplains.

FEMA publishes its implementing regulations for EO 11988 in 44 C.F.R. Part 9, Floodplain Management and Protection of the Wetlands. These regulations set forth the policy, procedures, and responsibilities to implement and enforce the EO, including the decision-making process, which is referred to as the 8-step process.<sup>400</sup>

### **Executive Order 11990, Protection of Wetlands**

EO 11990, Protection of Wetlands, requires Federal agencies to avoid to the extent possible, the long- and short-term adverse impacts associated with the destruction or modification of wetlands and to avoid direct or indirect support of new construction in wetlands wherever there is a practicable alternative. To meet these objectives, EO 11990 requires Federal agencies to use a systematic decision-making process to evaluate the potential effects of projects in, or affecting, wetlands; document each step of the process; and involve the public in the decision-making process.

FEMA publishes its implementing regulations for EO 11990, Protection of Wetlands in 44 C.F.R. Part 9, Floodplain Management and Protection of the Wetlands. These regulations set forth the policy, procedures, and responsibilities to implement and enforce the EO, including the decision-making process, which is referred to as the 8-step process.

---

<sup>399</sup> 42 U.S.C. § 6901 et seq.

<sup>400</sup> 44 C.F.R. § 9.6, Decision-making process.

**Executive Order 12898, Environmental Justice**

EO 12898, Environmental Justice, requires Federal agencies to identify and address any disproportionately high and adverse human health or environmental effects on minority and low-income populations as a result of their actions.

**Executive Order 13112, Invasive Species**

EO 13112, Invasive Species, requires agencies to use their programs and authorities to help prevent the introduction, establishment, and spread of invasive species; respond to invasive species outbreaks; restore native species in areas invaded by invasive species; promote public education related to invasive species control; and avoid authorizing, funding, or carrying out activities that promote the introduction, establishment, or spread of invasive species.

## APPENDIX B: PRIVATE NONPROFIT FACILITY ELIGIBILITY EXAMPLES

Below are examples of private nonprofit (PNP) facility eligibility determinations.

### **Facility owned by PNP – PNP Leases Portion of Space to For-Profit Service**

Parkland Hospital is an eligible PNP that owns a medical office building and leases a portion of it to doctors and laboratories that are providing for-profit services. The for-profit leases are for 70 percent of the floor space, excluding the common area floor space, as defined in this policy.

#### Analysis:

The building is ineligible because the eligible services were offered in less than 50 percent of the building space.

### **PNP Recreational Center Providing Eligible Services**

The PNP Springtown Recreation Center claims that it provides eligible essential social services in addition to its recreation activities and should be eligible for assistance. The organization claims that its services now include day care for elderly adults, senior citizen center programs, programs for families of domestic abuse, and shelter workshops. These programs are provided by the recreation center staff and offered 5 days a week. Recreation activities are limited to evenings and weekends. The entire center is used for the eligible services.

#### Analysis

The organization would not appear to be eligible based upon its name and presumed mission. A detailed examination is necessary to determine the eligibility of the organization and its facility based upon the eligible services provided. In cases where space is not dedicated to any specific activity, the amount of time dedicated to eligible purposes in such spaces determines eligibility and the level of assistance. Therefore, even though the entire facility is used for eligible purposes, FEMA prorates PA funding based on the proportion of the total time it is used for eligible services.

### **Support Facility Owned by PNP**

A parking garage is owned by an eligible PNP hospital to support its nearby hospital facility. The ground floor is leased to retail businesses and totals 15 percent of the total space of the garage.

#### Analysis

Title 44 of the Code of Federal Regulations (C.F.R.) § 206.221(e), *Private nonprofit facility*, authorizes assistance for administrative and support facilities essential to the operation of medical facilities and emergency facilities, which in this example includes the parking garage. Because the hospital uses more than 50 percent of the parking garage, the facility is eligible based on primary use. FEMA assistance would be prorated based on the percentage of space used for the eligible parking purpose. The parking garage is eligible only because of its association with the hospital.

### **Facilities Owned by PNP Homeowners' Association**

The Woodlands Homeowners' Association is a PNP organization responsible for providing certain services for a 200-home development. The Homeowners' Association's facilities are local neighborhood streets, water system, sewage system, fire station, medical clinic, neighborhood park, community center, and a recreational lake and dam.

#### *Analysis*

The Homeowners' Association operates facilities that provide essential social services and therefore is an eligible PNP. The lake and dam, park, and streets do not meet the definition of eligible facilities. The water and sewage systems meet the definition of a utility and are eligible for assistance. The fire station and medical clinic are eligible as emergency and medical facilities. The community center might be eligible if it serves the general public outside the Homeowners' Association community and if it is established and primarily used as a gathering place for a variety of social, educational enrichment, and community service activities.

### **Recreational Center – Primarily Athletic Services**

Westover Recreation Center sponsors a number of activities.

The center is available for rental Friday, Saturday, and Sunday evening to companies, religious groups, clubs, and civic organizations. It is offered as a location for league parties, office parties, seminars, conferences, and holiday celebrations. The center has rooms set aside for seniors' bridge and other card games, along with occasional workshops for photography, pottery and ceramics, and art.

However, the center is primarily oriented to athletics, as exemplified by a large indoor pool and locker room, a half dozen squash/racquetball courts, a weight/exercise room, and a 9,200-square-foot gymnasium/basketball court.

#### *Analysis*

Although Westover Recreation Center offers a number of activities generally considered eligible community center functions, it is, first and foremost, a recreation center. In contrast to the definition of an eligible community center, it is neither established nor primarily used as a "gathering place for a variety of social, educational enrichment, and community service activities," even though it does offer some of these.

"Facilities established or primarily used for athletic (or) recreational activities are ineligible community centers." It is not necessary to calculate the percentage of time or space devoted to community activities versus athletic and recreational activities, because Westover is overwhelmingly athletic and recreational. For these reasons, a PNP facility similar to Westover would not be eligible.

### **Mixed Use Community Center – Nominal Fee**

Somerset Community Center consists of a number of meeting rooms, a lending library, social services room, health services room, dining room, activity area with games and a wide-screen TV, darkroom, pianos for practice, ceramics lab, woodshop, computer room, sewing machines, exercise room, and a large foyer. Outside are a fitness trail, garden plots, an outdoor basketball court and softball field, a gazebo, and picnic area.

A nominal membership fee is charged. Classes are offered in piano, bridge, arts and crafts, and cooking. The center sponsors numerous seniors' activities, which include trips, luncheons, and recreational and educational activities. A lunch program is offered for seniors and their spouses. Some exercise classes are also offered. Health screenings and immunizations are regularly offered. Door-to-door transportation is provided to those who need it.

#### Analysis

By virtue of the wide range of community activities, Somerset Community Center would be an eligible community center. Although it does offer athletic and recreational activities, these are minimal in the time and space allocated to them; therefore, it is not a recreational center. The nominal fee makes it a service to the public.

#### **School Operated by a Religious Institution**

The Community Church operates a State-certified private school offering first through eighth grades. The teaching curriculum includes math, science, English, history, physical education, and religious doctrine. The school has an average attendance of 500 students. The campus consists of three buildings: one used primarily for the secular curriculum, one used primarily for religious instruction, and a chapel primarily used for religious worship. Admissions to the school are restricted to members of Community Church.

#### Analysis

Evaluate the three buildings separately. The two buildings used, respectively, for secular and religious education are eligible as educational facilities. As educational facilities, they are considered to provide critical services and therefore Community Church does not need to apply to SBA to receive funding for permanent work on those buildings. The chapel is eligible as a house of worship. Houses of worship provide noncritical services, so Community Church is required to apply for an SBA loan for the chapel. The restricted admissions process does not affect eligibility. Pursuant to the Stafford Act, no PNP facility is excluded from eligibility because leadership or membership in the organization is limited to people that share a religious faith or practice.

## APPENDIX C: WELDED STEEL MOMENT FRAME

FEMA has specific eligibility criteria for inspecting, evaluating, and repairing earthquake damage to buildings constructed with welded steel moment framing connections subject to brittle fracture, such as those constructed prior to 1995 using the prescribed detail of the 1991 Uniform Building Code (Section 2710(g)(B) or its equivalent). FEMA bases the eligibility criteria on *Recommended Post Earthquake Evaluation and Repair Criteria for Welded Steel Moment Frame Buildings* (FEMA 352).<sup>401</sup>

### *Reimbursement for Preliminary Post-earthquake Assessment*

The process of preliminary screening, which helps to rapidly identify buildings that are likely to have sustained significant damage to welded steel moment frame connections, is ineligible for Public Assistance (PA) funding. Preliminary screening is typically performed by building department officials immediately following an earthquake to determine if a building needs further evaluation.

Following the preliminary screening, the Applicant may use the preliminary evaluation method described in FEMA 352 to determine, on a preliminary basis, whether a building has sustained either structural or nonstructural damage that results in a hazardous condition. Preliminary evaluations include:

- A general review of the building's construction characteristics to determine its structural system and vulnerable features;
- A visit to the building site to observe its overall condition and note obvious signs of damage; and
- A determination of an appropriate posting category for the building, on the basis of the preceding results and engineering judgment. Posting categories are described by the following designations:
  - Green – Little or no damage. Poses no immediate threat.
  - Yellow – Structural or nonstructural damage. Limited or localized safety hazard.
  - Red – Significant damage to structural elements. Significant safety hazard.

Preliminary evaluation is eligible only when conditions result in a yellow or red designation.

### *Reimbursement for Detailed Post-earthquake Evaluations*

As recommended in FEMA 352, the Applicant should conduct a detailed evaluation on all buildings determined to have potential welded steel moment frame fractures, as identified in the preliminary assessment, and designated with a yellow or red posting. Eligible work includes the reasonable evaluation of the effects of the identified, significant connection damage to the future performance of the building structure. To be eligible, this evaluation should be limited to the recommendations in FEMA 352, Chapter 4, as follows:

---

<sup>401</sup> [www.fema.gov/media-library/assets/documents/747](http://www.fema.gov/media-library/assets/documents/747).

- Visual bottom flange connection inspections performed at locations selected in accordance with FEMA 352, Chapter 4, Method 2 (Inspection of a Sample of Connections) are eligible.
- The inspection of a sample of the total welded steel moment frame connections in the building, in accordance with guidance provided in FEMA 352, Chapter 4, Method 2 is eligible.
- If an Applicant discovers certain types of damage, additional visual inspection of bottom or top flange connections at locations recommended in FEMA 352, Chapter 4, are also eligible but only after the Applicant informs FEMA of the frame damage already discovered and FEMA approves the follow-on inspection.

The eligible work associated with connection inspection includes:

- Removal of necessary architectural finishes, such as plaster/drywall;
- Removal of fire retardants in the inspection area of the connection.;
- Visual inspection; and
- Nondestructive testing as appropriate, necessary, and approved by FEMA. Testing may include liquid dye-penetrant testing or magnetic particle testing, but not ultrasonic testing.

In circumstances where a building is assigned a green posting, visual inspections are only eligible for those connections where the Applicant has found significant damage (as defined in FEMA 352, Chapter 4) associated with the declared earthquake disaster.

Visual inspection of additional connections (at locations recommended by FEMA 352, following the discovery of damaged connections) will also be eligible, but only after the Applicant has informed FEMA of the frame damage already discovered and FEMA approves the follow-on inspection. FEMA may also approve nondestructive testing if the visual inspections indicate a significant potential for concealed damage.

Except as detailed above, any inspections that do not yield discovery of significant connection damage attributable to the earthquake are ineligible.

Generally, detailed analytical or experimental studies or Level 2 evaluations as described in FEMA 352, Chapter 5, are ineligible unless FEMA provides approval before the Applicant initiates the work.

# APPENDIX D: FREQUENT COMPLIANCE ISSUES WITH COOPERATIVE PURCHASING PROGRAMS

The following is a list of frequent compliance issues with Federal procurement requirements when Tribal or local government or private nonprofit (PNP) Applicants use cooperative purchasing programs for procurements above the simplified acquisition threshold:

## **Full and Open Competition**

The Applicant must ensure that solicitations used by cooperative purchasing programs include a clear and accurate description of the scope of work or goods actually required. Additionally, cooperative purchasing programs that place overly restrictive requirements on solicitations risk noncompliance with the full and open competition requirements in 2 C.F.R. § 200.319.

## **Procurement Method**

Cooperative purchasing programs must comply with allowable procurement methods in 2 C.F.R. § 200.320. Some of these methods require that Applicants publicly advertise or publicize the solicitations, solicit bids from an adequate number of known suppliers, and award contracts to the responsible, responsive firm with the lowest price or to the responsive firm whose proposal is most advantageous to the program with price and other factors considered.

## **Socio-economic Contracting**

The Applicant must ensure cooperative purchasing programs take the applicable affirmative steps to encourage participation of small businesses, minority businesses, and women owned enterprises. Failure to take any of the affirmative steps violates 2 C.F.R. § 200.321.

## **Geographic Preferences**

Any geographic preferences that a cooperative purchasing program uses in evaluating bids or proposals and any additional terms and conditions in a cooperative purchasing program's pre-negotiated agreements that favor or give preference to local suppliers violates 2 C.F.R. § 200.319(b) and be restrictive of competition.

## **Contract Provisions**

Cooperative purchase programs at times do not include the federally required contract provisions in the agreements with vendors. In accordance with 2 C.F.R. § 200.326, all contracts must contain the applicable contract clauses described in Appendix II to the Uniform Rules (Contract Provisions for non-Federal Entity Contracts Under Federal Awards).

## **Cost or Price Analysis**

The Applicant must conduct an independent cost or price analysis when using cooperative purchasing agreements in accordance with 2 C.F.R. § 200.323.

# APPENDIX E: STUMP CONVERSION TABLE

## Diameter to Volume Capacity

FEMA quantifies the number of cubic yards of debris for each size of stump based on the following formula:

$$\frac{[(\text{Stump Diameter}^2 \times 0.7854) \times \text{Stump Length}] + [(\text{Root-Ball Diameter}^2 \times 0.7854) \times \text{Root-Ball Height}]}{46,656}$$

0.7854 is one-fourth Pi and is a constant.

46,656 is used to convert cubic inches to cubic yards and is a constant.

The formula used to calculate the cubic yardage used the following factors, based upon findings in the field:

- Stump diameter measured 2 feet up from the ground
- Stump diameter to root-ball diameter ratio of 1:3.6
- Root-ball height of 31 inches

| Stump Diameter<br>(Inches) | Debris Volume<br>(Cubic Yards) | Stump Diameter<br>(Inches) | Debris Volume<br>(Cubic Yards) |
|----------------------------|--------------------------------|----------------------------|--------------------------------|
| 6                          | 0.3                            | 46                         | 15.2                           |
| 7                          | 0.4                            | 47                         | 15.8                           |
| 8                          | 0.5                            | 48                         | 16.5                           |
| 9                          | 0.6                            | 49                         | 17.2                           |
| 10                         | 0.7                            | 50                         | 17.9                           |
| 11                         | 0.9                            | 51                         | 18.6                           |
| 12                         | 1                              | 52                         | 19.4                           |
| 13                         | 1.2                            | 53                         | 20.1                           |
| 14                         | 1.4                            | 54                         | 20.9                           |

## APPENDIX G: MOSQUITO ABATEMENT

FEMA may provide reimbursement for mosquito abatement measures at the written request of the SLTT public health officials after FEMA consults with the Centers for Disease Control and Prevention (CDC), based on any of the following:

- Evidence of:
  - Higher levels of disease transmitting mosquitoes in the impacted area following the incident;
  - A significant number of disease-carrying mosquitoes in the area due to the increase in incident-related standing water; or
  - The potential for disease transmission and human exposure to disease carrying mosquitoes based on the detection of arboviral diseases in sentinel organisms (poultry, wild birds, mosquito pools) in the impacted area prior to the incident, discovered during surveillance as part of mosquito abatement activities, or reported human cases in which transmission occurred prior to the incident.
- A determination that a significant increase in the mosquito population and/or the change of biting mosquito species poses a threat to emergency workers who are required to work out-of-doors, thereby significantly hampering response and recovery efforts.

Such evidence may include an abnormal rise in landing rates or trap counts, significant changes in species composition or estimate of infection rates, when compared to pre-incident surveillance results.

- Verification from medical facilities within the affected area that an increase in the general public's exposure to mosquitoes has directly resulted in secondary infections, especially among those with weakened immune systems such as the elderly, the very young, or the sick. This may occur when increased numbers of residents in impacted areas with extended power outages are forced to open buildings for air circulation.

Where possible, a determination of the need for vector control measures should be based on surveillance data provided by local agencies, or on surveillance conducted as a component of the emergency response. Similarly, termination of control efforts should be based on mosquito

### Terminology

An **arbovirus** is a virus utilizing arthropods as vectors and is transmitted via their feeding to a definitive host.

The **landing rate**, expressed as number of mosquitoes landing per minute, is used as an adult mosquito surveillance measure utilizing human volunteers as bait.

**Methoprene Briquettes** are formulated with methoprene (compound that mimics the action of an insect growth-regulating hormone and prevents the normal maturation of insect larvae) growth inhibitor and a timed-release carrier that resembles a charcoal briquette.

A **sentinel organism** is an organism, usually fowl, purposely exposed to mosquito bites outdoors to monitor pathogen transmission by mosquitoes.

**Seroconversion** is the development of detectable antibodies in the blood of a sentinel organism directed against an infectious agent.

**Trap count** is the number of female mosquitoes captured in a trap receptacle each night the traps are set.

density and disease transmission monitoring, and on the degree of exposure to mosquitoes of residents and responders. Information useful in determining the need for emergency mosquito control measures includes:

- The local jurisdiction's mosquito population density estimates pre- and post-disaster, including information about species composition;
- Arbovirus transmission activity indices, including information about the location of surveillance activities; indices may consist of:
  - Infection rates in mosquitoes;
  - Seroconversion in sentinel chickens;
  - Equine case;
  - Human cases;
- The amount and type of flooding (e.g., saltwater/freshwater, coastal/inland);
- The extent and location of damage to housing;
- The extent, location, and anticipated duration of power interruption;
- The anticipated extent and duration of cleanup and recovery operations; and
- A description of the type of mosquito management required (e.g., aerial or ground- based adulticide applications, larvicide applications), and duration of application to reduce the threat and the areas where the interventions are needed.

To be eligible for Public Assistance funding, insecticide formulations must be among those approved and registered by the U.S. Environmental Protection Agency for use in urban areas for mosquito control and must be applied according to label directions and precautions by appropriately trained and certified applicators. Furthermore, mosquito abatement measures must comply with all Federal and SLTT laws, ordinances, and regulations concerning vector control. Mosquito abatement measures include, but are not limited to the following:

- Adulticiding – The ground or aerial spraying of insecticides to kill adult mosquitoes
- Larviciding – The application of chemicals, including methoprene briquettes, by ground or air to kill mosquito larvae or pupae
- Breeding habitat removal or alteration – The modification of potential breeding habitat to make it unsuitable for mosquito breeding or to facilitate larval control, including:
  - Draining or removing standing water in close proximity to homes, schools, sheltering facilities, and businesses;
  - Increased dewatering through the pumping of existing drainage systems; and
  - Dissemination of information (e.g., inserting flyers with resident's water bills, public service announcements, newspaper campaigns) to direct residents to remove the mosquito breeding habitat.

## APPENDIX H: SNOW ASSISTANCE

Snow-related activities, including snow removal, de-icing, salting, snow dumps, and sanding of roads and other eligible facilities, is only an eligible emergency protective measure when a winter storm results in record or near-record<sup>402</sup> snowfall.<sup>403</sup> FEMA authorizes snow assistance by county based on a finding that the county received record or near-record snowfall or meets the contiguous county criteria as described below. FEMA evaluates Tribal lands either as part of a requested county or separately.

### **Record or Near-Record Snowfall**

FEMA utilizes data collected by the National Oceanic and Atmospheric Administration's National Centers for Environmental Information (NCEI) to identify the historical 1-, 2-, and 3-day snowfall records for each county. For current event snowfall, FEMA relies primarily on snowfall measurements taken at National Weather Service (NWS) Cooperative Network Stations but accepts measurements from other sources if those measurements are verified as reasonable and accurate by the NWS. Historical 1-, 2-, and 3-day snowfall records by county are available on the NCEI Snow Climatology Database (SCDB) at the following website: [www.ncdc.noaa.gov/snow-and-ice/snowfall-extremes](http://www.ncdc.noaa.gov/snow-and-ice/snowfall-extremes). Daily snowfall reports by county are available at: [www.ncdc.noaa.gov/snow-and-ice/daily-snow](http://www.ncdc.noaa.gov/snow-and-ice/daily-snow).

FEMA follows the following process to determine record or near-record snowfalls:

- Compare current snowfall amounts with the historical record snowfall amounts for a like number of days without regard for the month in which the record snowfall or current event occurred.
- For multiple-day snowstorms, counties or Tribal lands that meet the 1-day record or near-record requirement on any 1 day, or the 2-day record or near record over 2 consecutive days, or the 3-day record or near record over 3 consecutive days, etc., meets the record or near-record criteria for that county or Tribal lands.
- FEMA relies on the NWS to determine the duration of the snowstorm.
- When data from multiple NWS-verified sources exist within a county or Tribal lands, FEMA compares the highest current event snowfall reported by the NWS within that county or Tribal land with the highest historical record snowfall for that county or Tribal land.
- For counties or Tribal lands that do not have NCEI or NWS historical record snowfall data, use the historical record from the nearest NWS Cooperative Network Station in an adjacent county or Tribal land, even if located in an adjacent State, for determining historical snowfall records.
- If current event snowfall data are not available from the NWS for a county or Tribal land, use the nearest NWS Cooperative Network Station data from an adjacent county, even if located in an adjacent State.
- FEMA may designate a county or Tribal land that does not receive a record or near-record snowfall, but is contiguous to a county (generally referred to as a “core county”) that does receive a record or near-record snowfall, for snow assistance if the county or

---

<sup>402</sup> FEMA generally considers near record as being within 10 percent of the record snowfall.

<sup>403</sup> 44 C.F.R. § 206.227.

Tribal land has current event snowfall that meets or exceeds the current event snowfall of the core county, to which it is contiguous. Base this comparison on the highest current event snowfall received by each county as reported by the NWS.

- Consider counties or Tribal areas that experience snowfalls occurring over a period exceeding 3 consecutive days that do not reach record or near-record snowfalls during a 3-day period, and for which there are no historical snowfall records for a period exceeding 3 days with NCEI or NWS, on a case-by-case basis.

### **Winter Storm or Snowstorm Declaration Requests**

The request for a Major Disaster Declaration must include a request for snow assistance as part of that declaration. All such requests are subject to the requirements and processes established in the Stafford Act and FEMA regulations.<sup>404</sup> In addition to the information required in every declaration request, requests for snow assistance must include the following information:

- Identification of core and contiguous counties for which a snowstorm declaration is requested;
- Duration of snowfall, as identified or confirmed by the NWS; and
- For each requested county or Tribal land, daily snowfall totals from NWS stations or NWS-verified sources and historical record snowfall data from the NCEI.

Generally, the current event weather and snowfall information is included in a statement or report from the NWS describing the event.

FEMA only includes costs related to snow activities as part of the preliminary damage assessment data for counties or Tribal lands that meet the record or near-record criteria or qualify as contiguous counties.

Other categories of work, including Permanent Work, may be authorized for snowstorm or winter storm declarations as appropriate.

#### **Terminology**

A **Core County** is a county that has a record or near record snowfall with PA costs that exceed the annually established countywide per capita impact indicator and is designated for snow assistance under a major disaster declaration.

A **Contiguous County** is a county in the same State that shares a common border with a core county without geographic separation other than by a minor body of water, typically not exceeding one mile between the land areas of such counties.

---

<sup>404</sup> 44 C.F.R. § 206 Subpart B (206.31–48).

# APPENDIX I: MOLD REMEDIATION

## Mold Remediation Methods

The following list describes common mold remediation methods.

| Method                                    | Application  |
|---|--|
| Wet Vacuum                                | <ul style="list-style-type: none"> <li>• Use when materials are wet</li> <li>• Use where water has accumulated, such as on floors, carpets and hard surfaces</li> <li>• Do not use when sufficient liquid is not present</li> </ul>  |
| Damp Wipe                                 | <ul style="list-style-type: none"> <li>• Wipe or scrub non-porous (hard) surfaces with water and detergent</li> <li>• Follow instructions listed on the product label</li> </ul>   |
| High Efficiency Particulate (HEPA) Vacuum | <ul style="list-style-type: none"> <li>• Final clean-up after thoroughly dry and contaminated materials are removed</li> <li>• Recommended for cleanup of dust outside of the remediation area</li> <li>• Properly seal HEPA filter</li> <li>• Personal protection equipment is highly recommended; filter and contents must be disposed of in well-sealed bags</li> </ul> |
| Discard                                   | <ul style="list-style-type: none"> <li>• Use for building materials and furnishings that cannot be remediated</li> <li>• Seal contents in two bags using 6-mil polyethylene sheeting</li> <li>• Cover large items in polyethylene sheeting and seal with duct tape</li> <li>• Sealing materials must be within containment area to limit further contamination</li> </ul>  |

Summarized from Indoor Environments Division of the U.S. Environmental Protection Agency, "Mold Remediation in Schools and Commercial Buildings": [www.epa.gov/mold/mold\\_remediation.html](http://www.epa.gov/mold/mold_remediation.html).

## Application of Remediation Methods

The following list outlines typical mold remediation actions.

| Water Damaged Material            | Action  |
|-----------------------------------|---|
| Books and paper                   | <ul style="list-style-type: none"> <li>• Non-valuable items – discard</li> <li>• Valuable/important – photocopy and discard originals</li> <li>• Invaluable items – freeze in frost-free freezer or meat locker, or freeze dry</li> </ul> |
| Carpet and backing                | <ul style="list-style-type: none"> <li>• Wet vacuum</li> <li>• Reduce ambient humidity levels with dehumidifier</li> <li>• Accelerate drying process with fans</li> </ul>   |
| Ceiling tiles                     | <ul style="list-style-type: none"> <li>• Discard and replace (replacement only eligible as Permanent Work)</li> </ul>   |
| Cellulose insulation              | <ul style="list-style-type: none"> <li>• Discard and replace (replacement only eligible as Permanent Work)</li> </ul>   |
| Concrete or cinder block surfaces | <ul style="list-style-type: none"> <li>• Wet vacuum</li> <li>• Accelerate drying process with dehumidifiers, fans, and/or heaters</li> </ul>  |

| Water Damaged Material  | Action   |
|---|--|
| Fiberglass Insulation   | <ul style="list-style-type: none"> <li>• Discard and replace (replacement only eligible as Permanent Work)</li> </ul>  |
| Hard surfaces, porous floorings (linoleum, ceramic tile, vinyl) | <ul style="list-style-type: none"> <li>• Vacuum or damp wipe with water and mild detergent</li> <li>• Scrubbing may be necessary</li> <li>• Allow to dry</li> </ul>  |
| Upholstered furniture   | <ul style="list-style-type: none"> <li>• Wet vacuum</li> <li>• Accelerate drying process with dehumidifiers, fans, and/or heaters</li> </ul>   |
| Wallboard (drywall and gypsum board)                            | <ul style="list-style-type: none"> <li>• If obvious swelling and seams are not intact – discard</li> <li>• If no obvious swelling and seams are intact – may be dried in place</li> <li>• Ventilate wall cavity</li> </ul> |
| Window drapes   | <ul style="list-style-type: none"> <li>• Launder or clean according to manufacturer’s instructions</li> </ul>  |
| Wood surfaces   | <ul style="list-style-type: none"> <li>• Remove water with wet vacuum</li> <li>• Accelerate drying process with dehumidifiers, fans, and/or heaters</li> <li>• Wet paneling – discard and ventilate wall cavity</li> </ul> |

Summarized from Indoor Environments Division of the U.S. Environmental Protection Agency, "Mold Remediation in Schools and Commercial Buildings": [www.epa.gov/mold/table1.html](http://www.epa.gov/mold/table1.html).

# APPENDIX J: COST-EFFECTIVE PUBLIC ASSISTANCE HAZARD MITIGATION MEASURES

FEMA considers the following mitigation measures to be cost-effective Public Assistance (PA) mitigation if the measures do not exceed 100 percent of the eligible repair cost (prior to any insurance reductions). The mitigation measures must meet all eligibility requirements described in [Chapter 8:IV. Hazard Mitigation](#). There may be instances where these measures are required by codes or standards. In such cases FEMA first evaluates whether the work is eligible as a code or standard (See [Chapter 8:II. Codes and Standards](#)).

## I. Drainage Structures:

For Sections I.A. and I.C. (below), PA and environmental and historic preservation (EHP) staff coordinate to determine whether a hydrologic and hydraulic (H&H) study is needed. The Applicant must submit an H&H study to determine the appropriate culvert size with no adverse up or downstream impacts and National Flood Insurance Program regulations when:

- The facility is in a special flood hazard area;
- There is a potential adverse impact to the floodplain;<sup>405</sup>
- There is a potential adverse impact to a federally listed threatened or endangered species, critical habitat, or essential fish habitat;<sup>406</sup> or
- It is required to demonstrate compliance with the Clean Water Act.

A. Replace the structure with multiple structures or a larger structure. The Applicant may use existing SLTT drainage criteria for sizing replacement culverts. The Applicant must consider replacement structures with regard to the total drainage system.

B. For the purpose of erosion control, add properly designed entrance and exit structures, such as a headwall, wingwalls, flared aprons, or energy dissipation measures to increase efficiency and help to minimize scour and erosion. Depending on the severity of erosion, solutions for bank protection may include gabion baskets, rip rap,

### Example

Adding a relief culvert located at the same crossing site as a damaged culvert and in the embankment above the flow line of the primary culvert or located upstream of the main culvert. A relief culvert provides an alternate route for the flow if the main culvert is over capacity or gets plugged and prevents sedimentation through the high-flow scouring action.

<sup>405</sup> 44 C.F.R. §§ 9.11(d)(4) and 60.3(b)(7), (c)(10), and (d)(3).

<sup>406</sup> Endangered Species Act 16 U.S.C. §§ 1531-1544 and Magnuson-Stevens Fishery Conservation and Management Act.

cast-in-place concrete, crushed stone or rock, grouted rip rap<sup>407</sup>, sheet-piling, geotextile fabric, or similar measures to control erosion. Alternatively, the use of vegetation or a combination of vegetation and construction materials such as live fascines, vegetated geogrids, live crib walls, brush mattresses, root wads, or similar measures are eligible. The Applicant should consider using green infrastructure techniques such as bioswales, bioretention, rain gardens and similar techniques that may be used in public drainage systems.

C. Culverts:

1. Where the alignment of a culvert is inconsistent with existing water flow, realign the culvert vertically or horizontally or relocate the culvert to improve hydraulics and minimize erosion and scour. The Applicant must consider realignment of structures with regard to the total drainage system.
2. Extend the culvert discharge to mitigate erosion and scour by extending the discharge end beyond the toe of the embankment.
3. Install a debris barrier to prevent debris blockage or fins designed to orient floating debris for passage through the culvert.
4. Install a debris barrier riser to allow debris to float up with the rising floodwaters without blocking flow into the culvert.

II. Transportation Facilities:

A. Bridges:

1. Where traffic counts are low, replace with low-water crossings.
2. Install cables to restrain a bridge from being knocked off piers or abutments during floods or earthquakes.
3. Install girder and deck uplift tie-downs to prevent their displacement from the substructure.
4. Install Longitudinal Peaked Stone Toe Protection with nature planting, upstream of a failed abutment, to provide a stable floodplain bench for the protection of the abutment and the adjoining bridge approach. Consider other relevant Bio-engineering applications such as engineered logjams, log vanes or log bendway weir.

B. Marine Pier Ramps: If attached to decking, install open decking or floating decking with uplift-resistant tie-downs and fasteners.

C. Roadways and Railways: Where shoulders are susceptible to overflow from adjacent water courses, stabilize shoulders and embankments with geotextile fabric and revetments.

D. Roadways: Use geotextile drainage blankets between the pavement section and subbase to strengthen subgrade.

---

<sup>407</sup> Projects involving grouted rip rap may be subject to an environmental assessment and may not be allowable in all instances.

### III. Mechanical, Electrical, Plumbing (MEP) Components:

- A. Provide seismic bracing for electrical lines, conduit, piping, duct-work, water heaters, and other MEP equipment. Components can be wall mounted, floor mounted, or suspended.
- B. Roof-Mounted Equipment: Secure to roof top via a continuous load path, using tie-downs, straps, or other anchoring systems that will resist expected wind forces.
- C. Elevate or dry floodproof components or systems vulnerable to flood damage, including equipment controls, electrical panels; heating, ventilation, and air conditioning/machinery rooms; emergency generators; and fuel tanks. When wiring cannot be elevated, replace with equipment suitable for submerged applications.
- D. Install switches, circuit isolation and/or quick connect capability to facilitate rapid connection of backup power for any damaged or susceptible mechanical and electrical components.
- E. Install camlocks, transfer switches, and electrical panels to facilitate the connection of portable emergency generators.

### IV. Pipes:

- A. Install pipe joint restraints, flexible piping at pipe/conduit connections, or replace pipes with more ductile material.
- B. Install continuous lining or encasement to prevent infiltration or structural collapse.
- C. Underground Pipes: Install shut-off valves so that damaged sections of pipe can be isolated.

### V. Water/Wastewater:

- A. Pumps: If pumps and their attached motors are damaged by stormwater inundation, replace them with submersible or inline pumps as appropriate.
- B. Sewer Access Covers: Elevate to the hydraulic grade line. When elevation is not feasible or practicable, install devices to prevent infiltration into access holes such as cast-iron watertight frames and covers.
- C. Well Systems: Seal exposed portions of well casing or raise the elevation of the well head to prevent infiltration of flood waters.
- D. Raw water intakes: Install buttressing to prevent damage from erosion, scour, and flood debris.

### VI. Electric Power Systems:

- A. Provide looped distribution service or other redundancies in the electrical service to critical facilities, such as hospitals and fire stations.
- B. Install surge suppressors and lightning arrestors.
- C. Transformers:
  - 1. Elevate pad transformers above the Base Flood Elevation.

2. Support pole-mounted transformers with multiple poles.

D. Power Poles:

1. Replace damaged poles with higher-rated poles (preferably two classes stronger) of the same or different material. When replacing poles with higher-rated poles, install guys and anchors to provide lateral support for poles supporting pole-mounted transformers, regulators, capacitor banks, reclosers, air-break switches, or other electrical distribution equipment.
2. Remove large diameter lines.
3. Add cross-bracing to H-frame poles to provide additional strength.
4. Power Lines: Add guy-wires or additional support.

VII. Storage Tanks:

- A. Anchor or otherwise protect from movement by strengthening or stiffening base connections.
- B. Install self-initiating disconnects and shut-off valves between tanks and distribution lines to minimize damage and leaks.

VIII. Buildings and Structures:

- A. For small support buildings subject to uplift or rollover from high winds, securely anchor the buildings to foundations to prevent toppling or becoming missile hazards.
- B. Elevate or dry or wet floodproof buildings.
- C. Footings: Where spread footings have been undercut by scour, underpin footings.
- D. Siding: Replace with a stronger siding with stronger attachments to the wall sheathing and structure.
- E. Vents: Replace with water-resistant vents.
- F. Non-structural Building Components: Brace interior walls, partitions, parapets, anchor veneer or cladding, suspended light features, drop ceilings, soffits, and other non-structural elements that could collapse and cause injury or block safe exit of a building during an earthquake or high-wind event.
- G. Furnishings: Provide seismic ties, straps, or clips to secure replaced furniture, cabinets, computers, bookcases, and other furnishings.
- H. Roofs
  1. Install hurricane clips, fasteners, anchors, straps, and connectors that are compatible with the roof system and corrosion-resistant in coastal areas.
  2. Strengthen the high-wind pressure areas (e.g., corner zones, roof soffits, overhangs).
  3. Strengthen roof openings, such as hatches and skylights.
  4. Low Slope Roofs: Replace entire roof covering with a fully adhered roof covering, such as a modified bitumen membrane roof. FEMA does not provide PA mitigation

funding for loose laid insulation or membranes as punctures can cause large amounts of water intrusion. Additionally, FEMA does not provide PA mitigation funding for loose laid roof membranes with loose ballast stones as the stones can become projectiles in high winds and cause damage.

5. Gable Roofs: Replace the gable-end framing with hipped roof framing to reduce wind forces (lower edge pressure; reduced projected wind area) and strengthen the roof framing.
6. Gutters and Downspouts: Upgrade to direct water away from the structure to prevent interior or basement water damage.

I. Doors and Windows:

1. Upgrade the weather stripping to prevent water infiltration.
2. Replace doors, door frames, hinges, and hardware with wind-resistant units.
3. Strengthen windows.
4. Replace glass with impact-resistant material.
5. Install shutters on windows:
  - a. Of critical facilities, such as hospitals.
  - b. On the lower floors of noncritical facilities most likely to be struck by debris.
  - c. Of buildings with very high-value contents that can be damaged by water (such as libraries and document centers).
  - d. Of buildings when failure of roofing materials or other portions of nearby structures could create impact hazards.

IX. Signage: Replace sign panels and their supports with a stronger type of system of supports and panels. Consider using multiple support posts and stronger panels and fasteners.

## APPENDIX K: CONTRACT PROVISIONS

The following is a list of frequent compliance issues with Federal procurement requirements when Tribal or local government or private nonprofit (PNP) Applicants use cooperative purchasing programs for procurements.

If an Applicant plans to use Federal funds to pay or reimburse equipment expenses or services under a contract, that contract must contain the applicable clauses described in [Appendix II to the Uniform Rules](#) (Contract Provisions for Non-Federal Entity Contracts Under Federal Awards) under 2 C.F.R. § 200.326. Additionally, FEMA recommends certain contract clauses recommended by FEMA.

This appendix outlines the federally required contract provisions in addition to FEMA-recommended provisions applicable to PA applicant contracts. For some of the required clauses, sample language or references to find sample language are listed below. Sample language for certain required clauses (remedies, termination for cause and convenience, changes) is not listed since these must be drafted in accordance with the non-Federal entity's applicable local laws and procedures. For the clauses which require that exact language be included, the required language is specifically identified below.

The non-Federal entity alone is responsible for ensuring that all language included in their contracts meets the requirements of 2 C.F.R. § 200.326 and 2 C.F.R. Part 200, Appendix II.

**REMEDIES:** Applies to all FEMA grant and cooperative agreement programs.

Contracts for more than the simplified acquisition threshold, currently set at \$250,000, must address administrative, contractual, or legal remedies in instances where contractors violate or breach contract terms, and provide for such sanctions and penalties as appropriate. See 2 C.F.R. Part 200, Appendix II, A.

**TERMINATION FOR CAUSE AND CONVENIENCE:** Applies to all FEMA grant and cooperative agreement programs.

All contracts exceeding \$10,000 must address termination for cause and for convenience by the non-Federal entity, including how it will be affected and the basis for settlement. See 2 C.F.R. Part 200, Appendix II, B.

**EQUAL EMPLOYMENT OPPORTUNITY:** This requirement applies to all FEMA grant and cooperative agreement programs and exact language below is required.

**Standard:** Except as otherwise provided under 41 C.F.R. Part 60, all contracts that meet the definition of “federally assisted construction contract” in 41 C.F.R. § 60-1.3 must include the equal opportunity clause provided under 41 C.F.R. § 60- 1.4(b), in accordance with Executive Order 11246, *Equal Employment Opportunity* (30 Fed. Reg. 12319, 12935, 3 C.F.R. Part, 1964-1965 Comp., p. 339), as amended by Executive Order 11375, *Amending Executive Order 11246 Relating to Equal Employment Opportunity*, and implementing regulations at 41 C.F.R. Part 60 (Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor). See 2 C.F.R. Part 200, Appendix II, C.

## Key Definitions.

Federally Assisted Construction Contract. The regulation at 41 C.F.R. § 60-1.3 defines a “federally assisted construction contract” as any agreement or modification thereof between any applicant and a person for construction work which is paid for in whole or in part with funds obtained from the Government or borrowed on the credit of the Government pursuant to any Federal program involving a grant, contract, loan, insurance, or guarantee, or undertaken pursuant to any Federal program involving such grant, contract, loan, insurance, or guarantee, or any application or modification thereof approved by the Government for a grant, contract, loan, insurance, or guarantee under which the applicant itself participates in the construction work.

Construction Work. The regulation at 41 C.F.R. § 60-1.3 defines “construction work” as the construction, rehabilitation, alteration, conversion, extension, demolition or repair of buildings, highways, or other changes or improvements to real property, including facilities providing utility services. The term also includes the supervision, inspection, and other onsite functions incidental to the actual construction.

Required Language: 41 C.F.R. Part 60-1.4(b) requires the insertion of the following contract clause.

During the performance of this contract, the contractor agrees as follows:

(1) The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, sexual orientation, gender identity, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, sexual orientation, gender identity, or national origin. Such action shall include, but not be limited to the following:

Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

(2) The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, or national origin.

(3) The contractor will not discharge or in any other manner discriminate against any employee or applicant for employment because such employee or applicant has inquired about, discussed, or disclosed the compensation of the employee or applicant or another employee or applicant. This provision shall not apply to instances in which an employee who has access to the

compensation information of other employees or applicants as a part of such employee's essential job functions discloses the compensation of such other employees or applicants to individuals who do not otherwise have access to such information, unless such disclosure is in response to a formal complaint or charge, in furtherance of an investigation, proceeding, hearing, or action, including an investigation conducted by the employer, or is consistent with the contractor's legal duty to furnish information.

(4) The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representatives of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(5) The contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(6) The contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(7) In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

(8) The contractor will include the portion of the sentence immediately preceding paragraph (1) and the provisions of paragraphs (1) through (8) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance:

*Provided*, however, that in the event a contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States.

The applicant further agrees that it will be bound by the above equal opportunity clause with respect to its own employment practices when it participates in federally assisted construction work: *Provided*, that if the applicant so participating is a State, Territorial, or local government,

the above equal opportunity clause is not applicable to any agency, instrumentality or subdivision of such government which does not participate in work on or under the contract.

The applicant agrees that it will assist and cooperate actively with the administering agency and the Secretary of Labor in obtaining the compliance of contractors and subcontractors with the equal opportunity clause and the rules, regulations, and relevant orders of the Secretary of Labor, that it will furnish the administering agency and the Secretary of Labor such information as they may require for the supervision of such compliance, and that it will otherwise assist the administering agency in the discharge of the agency's primary responsibility for securing compliance.

The applicant further agrees that it will refrain from entering into any contract or contract modification subject to Executive Order 11246 of September 24, 1965, with a contractor debarred from, or who has not demonstrated eligibility for, Government contracts and federally assisted construction contracts pursuant to the Executive Order and will carry out such sanctions and penalties for violation of the equal opportunity clause as may be imposed upon contractors and subcontractors by the administering agency or the Secretary of Labor pursuant to Part II, Subpart D of the Executive Order. In addition, the applicant agrees that if it fails or refuses to comply with these undertakings, the administering agency may take any or all of the following actions: Cancel, terminate, or suspend in whole or in part this grant (contract, loan, insurance, guarantee); refrain from extending any further assistance to the applicant under the program with respect to which the failure or refund occurred until satisfactory assurance of future compliance has been received from such applicant; and refer the case to the Department of Justice for appropriate legal proceedings.

**CONTRACT WORK HOURS AND SAFETY STANDARDS ACT:** This requirement applies to all FEMA contracts awarded by the non-federal entity exceeding \$100,000 under grant and cooperative agreement programs that involve the employment of mechanics or laborers. It is applicable to construction work. These requirements do not apply to the purchase of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

Standard: Where applicable (see 40 U.S.C. §§ 3701-3708), all contracts awarded by the non-Federal entity exceeding \$100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. §§ 3702 and 3704, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. See 2 C.F.R. Part 200, Appendix II, E. Under 40 U.S.C. § 3702, each contractor must be required to compute the wages of every mechanic and laborer based on a standard work week of 40 hours. Work exceeding the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked beyond 40 hours in the work week. Further, no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous, or dangerous.

Suggested Language: 29 C.F.R. § 5.5(b) provides contract clause language concerning compliance with the Contract Work Hours and Safety Standards Act. FEMA suggests including

the following contract clause:

Compliance with the Contract Work Hours and Safety Standards Act.

(1) *Overtime requirements.* No contractor or subcontractor contracting for any part of the contract work which may require or involve the employment of laborers or mechanics shall require or permit any such laborer or mechanic in any workweek in which he or she is employed on such work to work in excess of forty hours in such workweek unless such laborer or mechanic receives compensation at a rate not less than one and one-half times the basic rate of pay for all hours worked in excess of forty hours in such workweek.

(2) *Violation; liability for unpaid wages; liquidated damages.* In the event of any violation of the clause set forth in paragraph (b)(1) of this section the contractor and any subcontractor responsible therefor shall be liable for the unpaid wages. In addition, such contractor and subcontractor shall be liable to the United States (in the case of work done under contract for the District of Columbia or a territory, to such District or to such territory), for liquidated damages. Such liquidated damages shall be computed with respect to each individual laborer or mechanic, including watchmen and guards, employed in violation of the clause set forth in paragraph (b)(1) of this section, in the sum of \$26 for each calendar day on which such individual was required or permitted to work in excess of the standard workweek of forty hours without payment of the overtime wages required by the clause set forth in paragraph (b)(1) of this section.

(3) *Withholding for unpaid wages and liquidated damages.* The **(write in the name of the Federal agency or the loan or grant recipient)** shall upon its own action or upon written request of an authorized representative of the Department of Labor withhold or cause to be withheld, from any moneys payable on account of work performed by the contractor or subcontractor under any such contract or any other Federal contract with the same prime contractor, or any other federally-assisted contract subject to the Contract Work Hours and Safety Standards Act, which is held by the same prime contractor, such sums as may be determined to be necessary to satisfy any liabilities of such contractor or subcontractor for unpaid wages and liquidated damages as provided in the clause set forth in paragraph (b)(2) of this section.

(4) *Subcontracts.* The contractor or subcontractor shall insert in any subcontracts the clauses set forth in paragraph (b)(1) through (4) of this section and also a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The prime contractor shall be responsible for compliance by any subcontractor or lower tier subcontractor with the clauses set forth in paragraphs (b)(1) through (4) of this section.

**CLEAN AIR ACT AND THE FEDERAL WATER POLLUTION CONTROL ACT:** This requirement applies to contracts awarded by a non-Federal entity of amounts exceeding \$150,000 under a federal grant.

**Standard:** If applicable, contracts must contain a provision that requires the contractor to agree to comply with all applicable standards, orders, or regulations issued pursuant to the Clean Air Act

(42 U.S.C. §§ 7401-7671q.) and the Federal Water Pollution Control Act as amended (33 U.S.C. §§ 1251-1387). Violations must be reported to FEMA and the Regional Office of the Environmental Protection Agency. See 2 C.F.R. Part 200, Appendix II, G.

Suggested Language: The following provides a sample contract clause.

#### Clean Air Act

1. The contractor agrees to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act, as amended, 42 U.S.C. § 7401 et seq.
2. The contractor agrees to report each violation to the **(name of applicant entering into the contract)** and understands and agrees that the **(name of the applicant entering into the contract)** will, in turn, report each violation as required to assure notification to the Federal Emergency Management Agency, and the appropriate Environmental Protection Agency Regional Office.
3. The contractor agrees to include these requirements in each subcontract exceeding \$150,000 financed in whole or in part with Federal assistance provided by FEMA.

#### Federal Water Pollution Control Act

1. The contractor agrees to comply with all applicable standards, orders, or regulations issued pursuant to the Federal Water Pollution Control Act, as amended, 33 U.S.C. 1251 et seq.
2. The contractor agrees to report each violation to the **(name of the applicant entering into the contract)** and understands and agrees that the **(name of the applicant entering into the contract)** will, in turn, report each violation as required to assure notification to the Federal Emergency Management Agency, and the appropriate Environmental Protection Agency Regional Office.
3. The contractor agrees to include these requirements in each subcontract exceeding \$150,000 financed in whole or in part with Federal assistance provided by FEMA.

**DEBARMENT AND SUSPENSION:** This requirement applies to all FEMA grant and cooperative agreement programs.

Standard: Non-Federal entities and contractors are subject to the debarment and suspension regulations implementing Executive Order 12549, *Debarment and Suspension* (1986) and Executive Order 12689, *Debarment and Suspension* (1989) at 2 C.F.R. Part 180 and the Department of Homeland Security's regulations at 2 C.F.R. Part 3000 (Non-procurement Debarment and Suspension).

## Requirements:

1. These regulations restrict awards, subawards, and contracts with certain parties that are debarred, suspended, or otherwise excluded from or ineligible for participation in Federal assistance programs and activities. See 2 C.F.R. Part 200, Appendix II, ¶ H; and 2 C.F.R. § 200.213. A contract award must not be made to parties listed in the SAM Exclusions. SAM Exclusions is the list maintained by the General Services Administration that contains the names of parties debarred, suspended, or otherwise excluded by agencies, as well as parties declared ineligible under statutory or regulatory authority other than Executive Order 12549. SAM exclusions can be accessed at [www.sam.gov](http://www.sam.gov). See 2 C.F.R. § 180.530.
2. In general, an “excluded” party cannot receive a Federal grant award or a contract within the meaning of a “covered transaction,” to include subawards and subcontracts. This includes parties that receive Federal funding indirectly, such as contractors to recipients and subrecipients. The key to the exclusion is whether there is a “covered transaction,” which is any non-procurement transaction (unless excepted) at either a “primary” or “secondary” tier. Although “covered transactions” do not include contracts awarded by the Federal Government for purposes of the non-procurement common rule and DHS’s implementing regulations, it does include some contracts awarded by recipients and subrecipients.
3. Specifically, a covered transaction includes the following contracts for goods or services:
  - a. The contract is awarded by a recipient or subrecipient in the amount of at least \$25,000.
  - b. The contract requires the approval of FEMA, regardless of amount.
  - c. The contract is for federally required audit services.
  - d. A subcontract is also a covered transaction if it is awarded by the contractor of a recipient or subrecipient and requires either the approval of FEMA or is in excess of \$25,000.

Suggested Language: The following provides a debarment and suspension clause. It incorporates an optional method of verifying that contractors are not excluded or disqualified.

## Suspension and Debarment

1. This contract is a covered transaction for purposes of 2 C.F.R. pt. 180 and 2 C.F.R. pt. 3000. As such, the contractor is required to verify that none of the contractor’s principals (defined at 2 C.F.R. § 180.995) or its affiliates (defined at 2 C.F.R. § 180.905) are excluded (defined at 2 C.F.R. § 180.940) or disqualified (defined at 2 C.F.R. § 180.935).

2. The contractor must comply with 2 C.F.R. pt. 180, subpart C and 2 C.F.R. pt. 3000, subpart C, and must include a requirement to comply with these regulations in any lower tier covered transaction it enters into.
3. This certification is a material representation of fact relied upon by **(insert name of recipient/subrecipient/applicant)**. If it is later determined that the contractor did not comply with 2 C.F.R. pt. 180, subpart C and 2 C.F.R. pt. 3000, subpart C, in addition to remedies available to **(insert name of recipient/subrecipient/applicant)**, the Federal Government may pursue available remedies, including but not limited to suspension and/or debarment.
4. The bidder or proposer agrees to comply with the requirements of 2 C.F.R. pt. 180, subpart C and 2 C.F.R. pt. 3000, subpart C while this offer is valid and throughout the period of any contract that may arise from this offer. The bidder or proposer further agrees to include a provision requiring such compliance in its lower tier covered transactions.

**BYRD ANTI-LOBBYING AMENDMENT:** This requirement applies to all FEMA grant and cooperative agreement programs. Contractors that apply or bid for a contract of \$100,000 or more under a federal grant must file the required certification. See 2 C.F.R. Part 200, Appendix II, I; 31 U.S.C. § 1352; and 44 C.F.R. Part 18.

Standard: Each tier certifies to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, officer or employee of Congress, or an employee of a Member of Congress in connection with obtaining any Federal contract, grant or any other award covered by 31 U.S.C. § 1352. FEMA's regulation at 44 C.F.R. Part 18 implements the requirements of 31 U.S.C. § 1352 and provides, in Appendix A to Part 18, a copy of the certification that is required to be completed by each entity as described in 31 U.S.C. § 1352. Each tier must also disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award. Such disclosures are forwarded from tier-to-tier up to the Federal awarding agency.

Suggested Language:

Byrd Anti-Lobbying Amendment, 31 U.S.C. § 1352 (as amended)

Contractors who apply or bid for an award of \$100,000 or more shall file the required certification. Each tier certifies to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, officer or employee of Congress, or an employee of a Member of Congress in connection with obtaining any Federal contract, grant, or any other award covered by 31 U.S.C. § 1352. Each tier shall also disclose any lobbying

with non-Federal funds that takes place in connection with obtaining any Federal award. Such disclosures are forwarded from tier-to-tier up to the recipient who in turn will forward the certification(s) to the awarding agency.

Required Certification: If applicable, contractors must sign and submit to the non-Federal entity the following certification.

#### APPENDIX A, 44 C.F.R. PART 18 – CERTIFICATION REGARDING LOBBYING

##### Certification for Contracts, Grants, Loans, and Cooperative Agreements

The undersigned certifies, to the best of his or her knowledge and belief, that:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.
2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.
3. The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

The Contractor, \_\_\_\_\_, certifies or affirms the truthfulness and accuracy of each statement of its certification and disclosure, if any. In addition, the Contractor understands and agrees that the provisions of 31 U.S.C. Chap. 38, Administrative Remedies for False Claims and Statements, apply to this certification and disclosure, if any.

\_\_\_\_\_  
Signature of Contractor's Authorized Official

\_\_\_\_\_  
Name and Title of Contractor's Authorized Official

\_\_\_\_\_  
Date

**PROCUREMENT OF RECOVERED MATERIALS:** This requirement applies to all contracts awarded by a non-federal entity under FEMA grant and cooperative agreement programs.

**Standard:** A non-Federal entity that is a state agency or agency of a political subdivision of a state and its contractors must comply with Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act. See 2 C.F.R. Part 200, Appendix II, J; and 2 C.F.R. § 200.322.

**Requirements:** The requirements of Section 6002 include procuring only items designated in guidelines of the EPA at 40 C.F.R. Part 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, where the purchase price of the item exceeds \$10,000 or the value of the quantity acquired by the preceding fiscal year exceeded \$10,000; procuring solid waste management services in a manner that maximizes energy and resource recovery; and establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines.

**Suggested Language:**

1. In the performance of this contract, the Contractor shall make maximum use of products containing recovered materials that are EPA-designated items unless the product cannot be acquired—
  - a. Competitively within a timeframe providing for compliance with the contract performance schedule;
  - b. Meeting contract performance requirements; or
  - c. At a reasonable price.
2. Information about this requirement, along with the list of EPA-designated items, is available at EPA's Comprehensive Procurement Guidelines web site, <https://www.epa.gov/smm/comprehensive-procurement-guideline-cpg-program>.
3. The Contractor also agrees to comply with all other applicable requirements of Section 6002 of the Solid Waste Disposal Act.”

## RECOMMENDED CONTRACT PROVISIONS

The Uniform Rules authorize FEMA to require additional provisions for non-Federal entity contracts. Although FEMA does not currently require additional provisions, FEMA recommends the following for PA applicant contracts:

### ACCESS TO RECORDS.

Standard: All recipients, subrecipients, successors, transferees, and assignees must acknowledge and agree to comply with applicable provisions governing DHS access to records, accounts, documents, information, facilities, and staff. Recipients must give DHS and FEMA access to, and the right to examine and copy, records, accounts, and other documents and sources of information related to the federal financial assistance award and permit access to facilities, personnel, and other individuals and information as may be necessary, as required by DHS regulations *and* other applicable laws or program guidance. See DHS Standard Terms and Conditions: Version 8.1 (2018). Additionally, FEMA is prohibited from providing reimbursement to any SLTT government, or PNP organization for activities made pursuant to a contract that purports to prohibit audits or internal reviews by the FEMA administrator or Comptroller General.

### Suggested Language:

Access to Records. The following access to records requirements apply to this contract:

1. The Contractor agrees to provide (**insert name of state agency or local or Indian tribal government**), (**insert name of recipient**), the FEMA Administrator, the Comptroller General of the United States, or any of their authorized representatives access to any books, documents, papers, and records of the Contractor which are directly pertinent to this contract for the purposes of making audits, examinations, excerpts, and transcriptions.
2. The Contractor agrees to permit any of the foregoing parties to reproduce by any means whatsoever or to copy excerpts and transcriptions as reasonably needed.
3. The Contractor agrees to provide the FEMA Administrator or his authorized representatives access to construction or other work sites pertaining to the work being completed under the contract.
4. In compliance with the Disaster Recovery Act of 2018, the (**write in name of the non-federal entity**) and the Contractor acknowledge and agree that no language in this contract is intended to prohibit audits or internal reviews by the FEMA Administrator or the Comptroller General of the United States.

**CHANGES:** FEMA recommends, therefore, that a non-Federal entity include a changes clause in its contract that describes how, if at all, changes can be made by either party to alter the

method, price, or schedule of the work without breaching the contract. The language of the clause may differ depending on the nature of the contract and the end-item procured.

**Standard:** To be eligible for FEMA assistance under the non-Federal entity’s FEMA grant or cooperative agreement, the cost of the change, modification, change order, or constructive change must be allowable, allocable, within the scope of its grant or cooperative agreement, and reasonable for the completion of project scope.

**DHS SEAL, LOGO, AND FLAGS:** FEMA recommends that Applicants include a provision that a contractor shall not use the DHS seal(s), logos, crests, or reproductions of flags or likenesses of DHS agency officials without specific FEMA pre-approval.

**Standard:** Recipients must obtain permission prior to using the DHS seal(s), logos, crests, or reproductions of flags or likenesses of DHS agency officials. See DHS Standard Terms and Conditions: Version 8.1 (2018).

**Suggested Language:** “The contractor shall not use the DHS seal(s), logos, crests, or reproductions of flags or likenesses of DHS agency officials without specific FEMA pre-approval.”

**COMPLIANCE WITH FEDERAL LAW, REGULATIONS, AND EXECUTIVE ORDERS:** FEMA recommends that Applicants include an acknowledgement that FEMA financial assistance will be used to fund the contract along with the requirement that the contractor will comply with all applicable Federal law, regulations, executive orders, and FEMA policies, procedures, and directives.

**Standard:** The recipient and its contractors are required to comply with all Federal laws, regulations, and executive orders.

**Suggested Language:** “This is an acknowledgement that FEMA financial assistance will be used to fund all or a portion of the contract. The contractor will comply with all applicable Federal law, regulations, executive orders, FEMA policies, procedures, and directives.”

**NO OBLIGATION BY FEDERAL GOVERNMENT:** FEMA recommends that the non-Federal entity include a provision in its contract that states that the Federal Government is not a party to the contract and is not subject to any obligations or liabilities to the non-Federal entity, contractor, or any other party pertaining to any matter resulting from the contract.

**Standard:** FEMA is not a party to any transaction between the recipient and its contractor. FEMA is not subject to any obligations or liable to any party for any matter relating to the contract.

**Suggested Language:** “The Federal Government is not a party to this contract and is not subject to any obligations or liabilities to the non-Federal entity, contractor, or any other party pertaining to any matter resulting from the contract.”

**PROGRAM FRAUD AND FALSE OR FRAUDULENT STATEMENTS OR RELATED**

**ACTS:** FEMA recommends that the non-Federal entity include a provision in its contract that the contractor acknowledges that 31 U.S.C. Chap. 38 (Administrative Remedies for False Claims and Statements) applies to its actions pertaining to the contract.

Standard. Recipients must comply with the requirements of The False Claims Act (31 U.S.C. §§ 3729-3733) which prohibits the submission of false or fraudulent claims for payment to the federal government. See DHS Standard Terms and Conditions: Version 8.1 (2018); and 31 U.S.C. §§ 3801-3812, which details the administrative remedies for false claims and statements made. The non-Federal entity must include a provision in its contract that the contractor acknowledges that 31 U.S.C. Chap. 38 (Administrative Remedies for False Claims and Statements) applies to its actions pertaining to the contract.

Suggested Language. “The Contractor acknowledges that 31 U.S.C. Chap. 38 (Administrative Remedies for False Claims and Statements) applies to the Contractor’s actions pertaining to this contract.”

## APPENDIX L: VALIDATION OF APPLICANT-PROVIDED COST ESTIMATES

This Appendix provides a checklist that FEMA Public Assistance (PA) staff must use to review and validate cost estimates submitted to FEMA for Permanent Work. FEMA staff may also use relevant portions of this checklist for Emergency Work. FEMA includes this checklist in the associated subaward file in PA Grants Manager.

The steps for validating Applicant-provided cost estimates are as follows:

### 1. **Verify that the estimate:**

- Is prepared by a licensed Professional Engineer or other estimating professional, such as a licensed architect or certified professional cost estimator<sup>408</sup> who certifies that the estimate was prepared in accordance with industry standards;
- Includes certification that the estimated cost directly corresponds to the repair of the agreed upon damage;
- Is based on unit costs for each component of the scope of work (SOW) and not a lump sum amount; and
- Contains a level of detail sufficient for FEMA to validate that all components correspond with the agreed-upon SOW.

### 2. **Review the scope of work and cost estimate to verify only eligible items are included:**

- The scope of work items in the cost estimate are required based on the agreed-upon damage description and dimensions.
- The scope of work included ineligible items, and FEMA has removed the ineligible components from the estimate (documentation detailing the components removed and reason for removal is attached).
- The scope of work included ineligible items, and FEMA is returning the estimate to the Applicant to revise.

---

<sup>408</sup> In lieu of a license or certification, an individual with professional experience and proficiency in the field of cost estimating may prepare and sign the cost estimate.

**3. Determine whether unit costs are from an approved source of industry standard information and whether current cost data publications were used:**

There are numerous sources that may be used in the preparation of cost estimates.

- The Applicant used the following appropriate cost estimating resource(s):
  - Industry standard construction cost estimating resource
    - RSMeans
    - XActimate
    - BNi Costbooks
    - Marshall & Swift
    - Sweet's Unit Cost Guide
    - Other \_\_\_\_\_
  - Local cost data from \_\_\_\_\_
  - Contract unit costs from recently completed projects
  - Other: \_\_\_\_\_
- FEMA returned the estimate to the Applicant to revise as the Applicant did not use an appropriate cost estimate resource.

**4. Determine the components of unit costs:**

Ensure that the components that make up the unit costs are fully understood. The purpose of this review is to ensure that components of the unit costs are not duplicated elsewhere in the cost estimate.

- The estimate contained sufficient information related to the components of the unit costs:
  - Each unit cost represented a complete and in-place cost that included all labor, equipment, materials, small tools, incidentals, and hauling costs necessary to complete that element of work.
  - Unit costs were analyzed to determine if general contractor overhead and profit were included in the unit costs:
    - Both general contractor and subcontractor overhead and profit are included in the unit costs and these costs are not duplicated elsewhere in the estimate or in the Cost Estimating Format (CEF).
    - Overhead and profit are not included in the unit costs.
    - Overhead and profit are duplicated in the estimate.
    - Costs for surveying, construction inspection, and permit compliance fees are not duplicated (i.e., not included within a unit cost and separately in the estimate).
- The estimate did not contain sufficient information related to the components of the unit costs. FEMA requested additional information from the Applicant.

**5. Validate the cost estimate for completeness and reasonableness.**

- The costs of work items are reasonable based on a representative sample.
- FEMA has determined costs for items of work in the estimate to be unreasonable (see attached). Therefore, the estimate was returned to Applicant to revise.
- All items of work included in the cost estimate are eligible.
- FEMA has removed ineligible items of work from the cost estimate (see attached).
- All work activities required to complete the work are quantified with unit costs.
- The cost estimate included lump sum amounts for work activities that need to be adjusted to unit prices. FEMA has returned the estimate to the Applicant for revision.
- The appropriate locality adjustment factor from the cost estimating publication is used for each line item, as applicable. Where historical costs were used, a locality adjustment was not applied, but cost escalation factors were added.
- The appropriate locality adjustment factor from the cost estimating publication was not used (see attached) or, as historical costs were used, a locality adjustment was inappropriately applied.
- Cost items checked are within 10 percent of the local average weighted unit prices or industry standard construction cost data (based on a review of at least six of the ten largest cost items against local average weighted unit prices or industry standard construction cost data (or there were less than ten cost items and all were reviewed) and based on reviewing at least 25 percent of the remaining cost items against local average weighted unit prices or industry standard construction cost data.
- Cost items checked are not within 10 percent of the local average weighted unit prices or industry standard construction cost data; therefore, the estimate was returned to Applicant to revise.

# APPENDIX M: ALTERNATIVE PROCEDURES FOR PERMANENT WORK

Alternative Procedures for Permanent Work under Section 428 of the Stafford Act is designed to achieve better recovery outcomes and simplify the delivery of assistance.

## Objectives

- Focus on outcome-based recovery;
- Enable applicants to use funds in a manner that best meets their specific needs for recovery;
- Promote long-term resiliency;
- Improve future preparedness; and
- Simplify the delivery of assistance.

## Benefits of using the Pilot

- No requirement to rebuild communities back to what existed prior to the disaster.
- Applicants can share funds across all Permanent Work Pilot Projects.
- Excess funds may be used to reduce risk and improve future disaster operations.
- Hazard mitigation funding may be added to Replacement Projects.

## Project Requirements

- In order to receive the benefits:
  - ✓ The project must be a Large Project.
  - ✓ Applicants must accept a fixed cost offer.
- The fixed cost is based on the estimated amount to rebuild to pre-disaster design and function.
- FEMA processes any project that does not have a fixed cost accepted within 18 months of the declaration date using standard PA policies.
- FEMA will consider time extensions on a case by case basis.

The attached table summarizes the differences between the Alternative Procedures and standard PA procedures:

| <i>Alternative Procedures</i>   | <i>Standard Procedures</i>   |
|---|--|
| Fixed-cost project with use of excess funds.  | Actual cost project. No retention of excess funds associated with the approved estimate. |
| May use funds across all Alternative Procedures Projects.   | Can only use funds toward the specific work identified in each specific Project.         |
| After FEMA approves a SOW, FEMA only requires approval for changes that involve buildings or structures aged 45 years or older, ground disturbing activities, or work in or near water. | After FEMA approves a SOW, FEMA requires approval for any change to the SOW.             |

|  |   |
|--|---|
| Do not need to track costs associated with changes to the SOW.   | Must track costs associated with all changes to the SOW.                    |
| Do not need to track costs to specific work items. Only need to track the total costs associated with the Alternative Procedures Projects.                             | Must track costs specific to each work item within each individual project. |
| Do not need to track work to specific projects. Only need to substantiate that the work is related to the approved SOW covered in the Alternative Procedures Projects. | Must track all work to each individual project.                             |

# APPENDIX N: WORK ELIGIBILITY CONSIDERATIONS BY TYPE OF FACILITY

| Work Eligibility Considerations: All Facilities  |   |   |
|--|---|---|
| PAPPG Reference  | Topic   | Applicability   |
| Chapter 4:II, <i>Facility Eligibility</i>  | <b>Facility Eligibility</b>   | All Permanent Work.   |
| Chapter 4:I, <i>General Work Eligibility</i>   | <b>General Work Eligibility</b> <ul style="list-style-type: none"> <li>○ Result of Declared Incident</li> <li>○ Within Designated Area</li> <li>○ Applicant's Legal Responsibility</li> </ul> | All work.   |
| Chapter 6, <i>Cost Eligibility</i>   | <b>Cost Eligibility</b>   | All eligible work.  |
| Chapter 7, <i>Emergency Work Eligibility</i>   | <b>Emergency Work Eligibility</b>   | All Emergency Work.   |
| Chapter 7:I, <i>Debris Removal (Category A)</i>  | <b>Debris Removal Eligibility</b>   | All Debris Removal Work.  |
| Chapter 4:I.C; Chapter 7 and ; Appendix A  | <b>Environmental and Historic Preservation (EHP) Compliance</b>   | All work (including ground disturbance for any staging areas, access roads, parking, landscaping, grading, or utilities).   |
| Chapter 8:III, Codes and Standards   | <b>Codes and Standards</b>  | Upgrades to pre-disaster design required by codes or standards.   |
| Chapter 8:IV, <i>Hazard Mitigation</i> ; and Appendix J  | <b>Hazard Mitigation</b>  | Hazard mitigation is any sustained action (work) taken to reduce or eliminate long-term risk to people and property from natural hazards and their effects  |
| Chapter 8:V, <i>Repair vs. Replacement</i>   | <b>Replacement</b>  | The purpose of the 50% Rule is to make an early determination on whether it is more prudent to repair or replace a facility. It is not intended to be a full calculation of all eligible project costs. |
| Chapter 8:VI, <i>Relocation</i>  | <b>Permanent Relocation</b>   | FEMA may approve funding for and require restoration of an Applicant's destroyed (i.e., eligible for replacement) facility at a new location.   |
| Chapter 8:III.E, <i>Floodplain Management and Wetland Protection</i> and VII, <i>Facility Located in or Impacting a Floodplain</i> | <b>Floodplain Considerations</b>  | All Permanent Work in or impacting the floodplain   |

### Work Eligibility Considerations: All Facilities

|   |   |   |
|---|---|---|
| Chapter 8:IX.F, <i>Landslides and Slope Stabilization</i>         | <b>Landslides and Slope Stabilization</b> | Facilities damaged due to a landslide or slope instability triggered by the incident. |
| Chapter 7:II.V, <i>Temporary Relocation of Essential Services</i> | <b>Temporary Relocation</b>               | Certain essential community service facilities.                                       |

### Work Eligibility Considerations: Roads and Bridges

| Road (including surface, base, shoulders, roadside ditches, guardrails, lighting, signage, sidewalks, etc.), drainage structure (culvert, low-water crossing), bridge (including, but not limited to, decking, pavement, piers, girders, abutments, slope protection, approaches, guardrails, lighting, signage, sidewalks) |          |   |   |  |
|---|----------|---|---|--|
| EHP laws, regulations, and executive orders (EOs) that frequently apply: NEPA; NHPA, ESA, CWA, CAA, EOs 11988 and 11990; projects involving work in waterways usually require Section 404 permits – permits issued by the USACE as required by the CWA.   |          |   |   |  |
| PAPPG Reference   | Category | Eligible Work (including, but not limited to):  | Ineligible Work and Costs   | Other Considerations   |
| Chapter 7:I   | <b>A</b> | <b>Debris removal and disposal to eliminate an immediate threat</b>   | <ul style="list-style-type: none"> <li>○ Removal of debris placed on public ROWs from commercial properties unless pre-approved by FEMA</li> <li>○ Removal of materials related to the construction, repair, or renovation of either residential or commercial structures</li> </ul>  | Must distinguish between incident-related debris versus debris generated by other recent events.   |
| Chapter 7:II.J  | <b>B</b> | <b>Emergency access</b><br><b>If the extent of damage or blockage makes these areas inaccessible, work related to providing access is eligible.</b> <ul style="list-style-type: none"> <li>○ This includes clearing debris from or conducting emergency repairs to an access facility, such as a road or bridge.</li> <li>○ Eligible work is limited to that necessary for the access to remain passable</li> </ul> | <ul style="list-style-type: none"> <li>○ Removal of debris from a privately-owned access facility UNLESS no other access point exists, and damage or debris impedes emergency access.</li> <li>○ Emergency repairs to privately-owned roads UNLESS no other access point exists, damage impedes emergency access, and repair eliminates temporary housing needs.</li> </ul> | The Applicant must complete all necessary legal processes or obtains rights-of-entry and agreements to indemnify and hold harmless the Federal Government. |

### Work Eligibility Considerations: Roads and Bridges

Road (including surface, base, shoulders, roadside ditches, guardrails, lighting, signage, sidewalks, etc.), drainage structure (culvert, low-water crossing), bridge (including, but not limited to, decking, pavement, piers, girders, abutments, slope protection, approaches, guardrails, lighting, signage, sidewalks)

EHP laws, regulations, and executive orders (EOs) that frequently apply: NEPA; NHPA, ESA, CWA, CAA, EOs 11988 and 11990; projects involving work in waterways usually require Section 404 permits – permits issued by the USACE as required by the CWA.

**Federal Requirements (when applicable)**

**A. 2 CFR. Part 200 Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards.**

The Contractor shall comply with the Federal requirements per 2 Code of Federal Regulations (CFR) Part 200 Super Circular, titled "Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards", effective July 01, 2023, and any subsequent revisions and updates to 2 CFR. Part 200 "Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards". 2 CFR Part 200 - Procurement Standards, as of July 01, 2023, attached below.

**B. Federal Equal Opportunity Employer Requirement.**

1. The Contractor is an Equal Opportunity Employer and will comply with all equal opportunity employment laws. The Contractor will further ensure that all subcontractors it utilizes in providing the services required hereunder will comply with all equal opportunity employment laws.
2. During the performance of this contract, the Contractor agrees as follows:
  - a) The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The Contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be limited to the following: Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.
  - b) The Contractor will, in all solicitations or advertisements for employees placed by or on behalf of the Contractor, state that all qualified applicants will receive considerations for employment without regard to race, color, religion, sex, or national origin.
  - c) The Contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representatives of the Contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.
  - d) The Contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, as amended by Executive Order 11375, and of the rules, regulations, and relevant orders of the Secretary of Labor.
  - e) The Contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, as amended by Executive Order 11375, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.
  - f) In the event of the Contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the Contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, as amended by Executive Order 11375, and such other sanctions as may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, as amended by Executive Order 11375, and by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.
  - g) The Contractor will include the portion of the sentence immediately preceding paragraph 1 and the provisions of paragraphs a) through f) in every subcontract or Purchase Order (PO) unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, as amended

by Executive Order 11375, so that such provisions will be binding upon each subcontractor or vendor. The Contractor will take such action with respect to any subcontract or PO as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: Provided, however, That in the event a Contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency the Contractor may request the United States to enter into such litigation to protect the interests of the United States.

**C. Compliance of Reporting Requirements.**

The Contractor hereby acknowledges that the County has the responsibility for providing required reporting, including financial information, program progress, and real property status, in accordance with 2 CFR. § 200.327, 2 CFR. § 200.328, and 2 CFR. § 200.329 on frequencies established by the Federal awarding agency.

**D. Access to Records.**

The following access to records requirements apply to this contract in respect to federal financial assistance awards:

- (a) The CONTRACTOR agrees to provide the County, the State of Florida, the Federal grantor agency, the Comptroller General of the United States, or any of their authorized representatives access to any books, documents, papers, and records of the CONTRACTOR which are directly pertinent to this contract for the purposes of making audits, examinations, excerpts, and transcriptions.
- (b) The CONTRACTOR agrees to permit any of the foregoing parties to reproduce by any means whatsoever or to copy excerpts and transcriptions as reasonably needed.
- (c) The CONTRACTOR agrees to provide the Federal grantor agency administrator or his authorized representatives access to construction or other work sites pertaining to the work being completed under the contract.

**E. Retention of Records.**

1. The County shall retain all records related to this project for five (5) years from the date of final expenditure report for projects funded by grant programs.
2. The Contractor shall retain all records related to this Agreement for five (5) years after termination of this contract.

**F. Compliance with the Contract Work Hours and Safety Standards Act.**

1. Overtime requirements. No Contractor or subcontractor contracting for any part of the contract work which may require or involve the employment of laborers or mechanics shall require or permit any such laborer or mechanic in any workweek in which he or she is employed on such work to work in excess of forty (40) hours in such workweek unless such laborer or mechanic receives compensation at a rate not less than one and one-half times the basic rate of pay for all hours worked in excess of forty hours in such workweek.
2. Violation; liability for unpaid wages; liquidated damages. In the event of any violation of the clause set forth in paragraph A of this section the Contractor and any subcontractor responsible therefor shall be liable for the unpaid wages. In addition, such Contractor and subcontractor shall be liable to the United States (in the case of work done under contract for the District of Columbia or a territory, to such District or to such territory), for liquidated damages. Such liquidated damages shall be computed with respect to each individual laborer or mechanic, including watchmen and guards, employed in violation of the clause set forth in paragraph A of this section, in the sum of \$10 for each Day on which such individual was required or permitted to work in excess of the standard workweek of forty hours without payment of the overtime wages required by the clause set forth in paragraph A of this section.
3. Withholding for unpaid wages and liquidated damages. The County shall upon its own action or

upon written request of an authorized representative of the Department of Labor withhold or cause to be withheld, from any moneys payable on account of work performed by the Contractor or subcontractor under any such contract or any other Federal contract with the same prime Contractor, or any other federally-assisted contract subject to the Contract Work Hours and Safety Standards Act, which is held by the same prime Contractor, such sums as may be determined to be necessary to satisfy any liabilities of such Contractor or subcontractor for unpaid wages and liquidated damages as provided in the clause set forth in paragraph B of this section.

4. Subcontracts. The Contractor or subcontractor shall insert in any subcontracts the clauses set forth in paragraphs 1 through 3 of this section and also a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The prime Contractor shall be responsible for compliance by any subcontractor or lower tier subcontractor with the clauses set forth in paragraphs 1 through 3 of this section.

**G. Clean Air Act and The Federal Water Pollution Control Act.**

1. The Contractor agrees to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. 7401-7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251-1387).
2. The Contractor agrees to report each violation to the County and understands and agrees that the County will, in turn, report each violation as required to assure notification to the County, Federal Emergency Management Agency, and the appropriate Environmental Protection Agency Regional Office.
3. The Contractor agrees to include these requirements in each subcontract exceeding \$100,000 financed in whole or in part with Federal assistance provided by FEMA.

**H. Suspension and Debarment.**

1. This contract is a covered transaction for purposes of 2 CFR. Part 180 and 2 CFR. Part 3000. As such the Contractor is required to verify that none of the Contractor, its principals (defined at 2 CFR. § 180.995), or its affiliates (defined at 2 CFR. § 180.905) are excluded (defined at 2 CFR. § 180.940) or disqualified (defined at 2 CFR. § 180.935).
2. The Contractor must comply with 2 CFR. Part 180, subpart C and 2 CFR. Part 3000, subpart C and must include a requirement to comply with these regulations in any lower tier covered transaction it enters into.
3. This certification is a material representation of fact relied upon by the County. If it is later determined that the Contractor did not comply with 2 CFR. Part 180, subpart C and 2 CFR. Part 3000, subpart C, in addition to remedies available to the Florida Department of Emergency Management (recipient) and Franklin County (sub-recipient), the Federal Government may pursue available remedies, including but not limited to suspension and/or debarment.
4. The Proposer agrees to comply with the requirements of 2 CFR. Part 180, subpart C and 2 CFR. Part 3000, subpart C while this offer is valid and throughout the period of any contract that may arise from this offer. The Proposer further agrees to include a provision requiring such compliance in its lower tier covered transactions.

**I. Byrd Anti-Lobbying Amendment, 31 U.S. C. § 1352 (As Amended).**

1. Contractors who apply or propose for an award of \$100,000 or more shall file the required certification. Each tier certifies to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any Federal contract, grant, or any other award covered by 31 U.S.C. § 1352. Each tier shall also disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award. Such disclosures are forwarded from tier to tier up to the recipient.
2. Federal Form 'C.1' titled "44 CFR. Part 18 – Certification Regarding Lobbying" is hereby attached and made a binding part hereof.

**J. Procurement of Recovered Materials.**

1. In the performance of this contract, the Contractor shall make maximum use of products containing recovered materials that are EPA- designated items unless the product cannot be acquired:
  - a) Competitively within a timeframe providing for compliance with the contract performance schedule;
  - b) Meeting contract performance requirements; or
  - c) At a reasonable price.
2. Information about this requirement is available at EPA's Comprehensive Procurement Guidelines web site, <http://www.epa.gov/cpg/>. The list of EPA-designate items is available at <http://www.epa.gov/cpg/products.htm>.

**K. Department of Homeland Security (DHS) Seal, Logo and Flags.**

The Contractor shall not use the Department of Homeland Security (DHS) seal(s), logos, crests, or reproductions of flags or likenesses of DHS agency officials without specific pre-approval from the appropriate Federal agency.

**L. Compliance with Federal Law, Regulations and Executive Orders.**

This is an acknowledgement that Federal and state financial assistance may be used to fund payment for services provided under this contract. The Contractor will comply will all applicable federal law, regulations, executive orders, as well as policies, procedures and directives of the respective funding Federal grantor agency.

**M. No Obligation by the Federal Government.**

The Federal Government is not a party to this contract and is not subject to any obligations or liabilities to the County, Contractor, or any other party pertaining to any matter resulting from the contract.

**N. Fraud and False or Fraudulent or Related Acts.**

The Contractor acknowledges that 31 U.S.C. Chap. 38 (Administrative Remedies for False Claims and Statements) applies to the Contractor's actions pertaining to this contract.

**O. Compliance with the "Davis-Bacon Act":**

- (a) In accordance with the requirements of the Davis-Bacon Act (40 U.S.C. §§ 3141-3144 and 3146-3148) as supplemented by Department of Labor regulations at 29 C.F.R. Part 5 (Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction) as amended), all prime construction contracts in excess of \$2,000 must comply with the Davis-Bacon Act. CONTRACTORS are required to pay wages to laborers and mechanics at a rate not less that the prevailing wages specified in a wage determination made by the Secretary of Labor. In addition, CONTRACTORS must pay wages not less than once a week.
- (b) The COUNTY shall report all suspected or reported violations to the appropriate Federal agency in accordance with 2 C.F.R. Part 200, Appendix II, ¶ D

**P. Compliance with the Copeland "Anti-Kickback Act":**

- (a) The CONTRACTOR hereby agrees to comply with the Copeland "Anti-Kickback" Act (40 U.S. C. 3145), as supplemented by the Department of Labor regulations (29 C.F.R. Part 3, "Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States".
- (b) Each CONTRACTOR or SUBCONTRACTOR are hereby prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he or she is otherwise entitled.
- (c) The CONTRACTOR or subcontractor shall insert in any subcontracts the clause above and such other clauses as the FEMA may by appropriate instructions require, and also a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The

- prime CONTRACTOR shall be responsible for the compliance by any subcontractor or lower tier subcontractor with all of these contract clauses.
- (d) Breach. A breach of the contract clauses above may be grounds for termination of the contract, and for debarment as a CONTRACTOR and subcontractor as provided in 29 C.F.R. § 5.12.
  - (e) The COUNTY shall report all suspected or reported violations to the appropriate Federal agency in accordance with 2 C.F.R. Part 200, Appendix II, ¶ D

**Q.**

**Hatch Act**

The CONTRACTOR shall comply with the Hatch Act, 5 USC 1501 – 1508, and shall ensure that no funds provided, nor personnel employed under this agreement, shall be in any way or to any extent engaged in the conduct of political activities in violation of Chapter 15 of Title V of the U.S.C.

## § 200.1 Definitions.

These are the definitions for terms used in this part. Different definitions may be found in Federal statutes or regulations that apply more specifically to particular programs or activities. These definitions could be supplemented by additional instructional information provided in governmentwide standard information collections. For purposes of this part, the following definitions apply:

**Acquisition cost** means the cost of the asset including the cost to ready the asset for its intended use.

Acquisition cost for equipment, for example, means the net invoice price of the equipment, including the cost of any modifications, attachments, accessories, or auxiliary apparatus necessary to make it usable for the purpose for which it is acquired. Acquisition costs for software includes those development costs capitalized in accordance with generally accepted accounting principles (GAAP). Ancillary charges, such as taxes, duty, protective in transit insurance, freight, and installation may be included in or excluded from the acquisition cost in accordance with the non-Federal entity's regular accounting practices.

**Advance payment** means a payment that a Federal awarding agency or pass-through entity makes by any appropriate payment mechanism, including a predetermined payment schedule, before the non-Federal entity disburses the funds for program purposes.

**Allocation** means the process of assigning a cost, or a group of costs, to one or more cost objective(s), in reasonable proportion to the benefit provided or other equitable relationship. The process may entail assigning a cost(s) directly to a final cost objective or through one or more intermediate cost objectives.

**Assistance listings** refers to the publicly available listing of Federal assistance programs managed and administered by the General Services Administration, formerly known as the Catalog of Federal Domestic Assistance (CFDA).

**Assistance listing number** means a unique number assigned to identify a Federal Assistance Listings, formerly known as the CFDA Number.

**Assistance listing program title** means the title that corresponds to the Federal Assistance Listings Number, formerly known as the CFDA program title.

**Audit finding** means deficiencies which the auditor is required by § 200.516(a) to report in the schedule of findings and questioned costs.

**Auditee** means any non-Federal entity that expends Federal awards which must be audited under subpart F of this part.

**Auditor** means an auditor who is a public accountant or a Federal, State, local government, or Indian tribe audit organization, which meets the general standards specified for external auditors in generally accepted government auditing standards (GAGAS). The term auditor does not include internal auditors of nonprofit organizations.

**Budget** means the financial plan for the Federal award that the Federal awarding agency or pass-through entity approves during the Federal award process or in subsequent amendments to the Federal award. It may include the Federal and non-Federal share or only the Federal share, as determined by the Federal awarding agency or pass-through entity.

**Budget period** means the time interval from the start date of a funded portion of an award to the end date of that funded portion during which recipients are authorized to expend the funds awarded, including any funds carried forward or other revisions pursuant to § 200.308.

**Capital assets** means:

- (1) Tangible or intangible assets used in operations having a useful life of more than one year which are capitalized in accordance with GAAP. Capital assets include:
  - (i) Land, buildings (facilities), equipment, and intellectual property (including software) whether acquired by purchase, construction, manufacture, exchange, or through a lease accounted for as financed purchase under Government Accounting Standards Board (GASB) standards or a finance lease under Financial Accounting Standards Board (FASB) standards; and
  - (ii) Additions, improvements, modifications, replacements, rearrangements, reinstallations, renovations or alterations to capital assets that materially increase their value or useful life (not ordinary repairs and maintenance).
- (2) For purpose of this part, capital assets do not include intangible right-to-use assets (per GASB) and right-to-use operating lease assets (per FASB). For example, assets capitalized that recognize a lessee's right to control the use of property and/or equipment for a period of time under a lease contract. See also § 200.465.

**Capital expenditures** means expenditures to acquire capital assets or expenditures to make additions, improvements, modifications, replacements, rearrangements, reinstallations, renovations, or alterations to capital assets that materially increase their value or useful life.

**Central service cost allocation plan** means the documentation identifying, accumulating, and allocating or developing billing rates based on the allowable costs of services provided by a State or local government or Indian tribe on a centralized basis to its departments and agencies. The costs of these services may be allocated or billed to users.

**Claim** means, depending on the context, either:

- (1) A written demand or written assertion by one of the parties to a Federal award seeking as a matter of right:
  - (i) The payment of money in a sum certain;
  - (ii) The adjustment or interpretation of the terms and conditions of the Federal award; or
  - (iii) Other relief arising under or relating to a Federal award.
- (2) A request for payment that is not in dispute when submitted.

**Class of Federal awards** means a group of Federal awards either awarded under a specific program or group of programs or to a specific type of non-Federal entity or group of non-Federal entities to which specific provisions or exceptions may apply.

**Closeout** means the process by which the Federal awarding agency or pass-through entity determines that all applicable administrative actions and all required work of the Federal award have been completed and takes actions as described in § 200.344.

**Cluster of programs** means a grouping of closely related programs that share common compliance requirements. The types of clusters of programs are research and development (R&D), student financial aid (SFA), and other clusters. "Other clusters" are as defined by OMB in the compliance supplement or as designated by a State for Federal awards the State provides to its subrecipients that meet the definition of a cluster of programs. When designating an "other cluster," a State must identify the Federal awards included in the cluster and advise the subrecipients of compliance requirements applicable to the cluster,

consistent with § 200.332(a). A cluster of programs must be considered as one program for determining major programs, as described in § 200.518, and, with the exception of R&D as described in § 200.501(c), whether a program-specific audit may be elected.

**Cognizant agency for audit** means the Federal agency designated to carry out the responsibilities described in § 200.513(a). The cognizant agency for audit is not necessarily the same as the cognizant agency for indirect costs. A list of cognizant agencies for audit can be found on the Federal Audit Clearinghouse (FAC) website.

**Cognizant agency for indirect costs** means the Federal agency responsible for reviewing, negotiating, and approving cost allocation plans or indirect cost proposals developed under this part on behalf of all Federal agencies. The cognizant agency for indirect cost is not necessarily the same as the cognizant agency for audit. For assignments of cognizant agencies see the following:

- (1) For Institutions of Higher Education (IHEs): Appendix III to this part, paragraph C.11.
- (2) For nonprofit organizations: Appendix IV to this part, paragraph C.2.a.
- (3) For State and local governments: Appendix V to this part, paragraph F.1.
- (4) For Indian tribes: Appendix VII to this part, paragraph D.1.

**Compliance supplement** means an annually updated authoritative source for auditors that serves to identify existing important compliance requirements that the Federal Government expects to be considered as part of an audit. Auditors use it to understand the Federal program's objectives, procedures, and compliance requirements, as well as audit objectives and suggested audit procedures for determining compliance with the relevant Federal program.

**Computing devices** means machines used to acquire, store, analyze, process, and publish data and other information electronically, including accessories (or "peripherals") for printing, transmitting and receiving, or storing electronic information. See also the definitions of *supplies* and *information technology systems* in this section.

**Contract** means, for the purpose of Federal financial assistance, a legal instrument by which a recipient or subrecipient purchases property or services needed to carry out the project or program under a Federal award. For additional information on subrecipient and contractor determinations, see § 200.331. See also the definition of *subaward* in this section.

**Contractor** means an entity that receives a contract as defined in this section.

**Cooperative agreement** means a legal instrument of financial assistance between a Federal awarding agency and a recipient or a pass-through entity and a subrecipient that, consistent with 31 U.S.C. 6302-6305:

- (1) Is used to enter into a relationship the principal purpose of which is to transfer anything of value to carry out a public purpose authorized by a law of the United States (see 31 U.S.C. 6101(3)); and not to acquire property or services for the Federal Government or pass-through entity's direct benefit or use;
- (2) Is distinguished from a grant in that it provides for substantial involvement of the Federal awarding agency in carrying out the activity contemplated by the Federal award.
- (3) The term does not include:
  - (i) A cooperative research and development agreement as defined in 15 U.S.C. 3710a; or

- (ii) An agreement that provides only:
  - (A) Direct United States Government cash assistance to an individual;
  - (B) A subsidy;
  - (C) A loan;
  - (D) A loan guarantee; or
  - (E) Insurance.

**Cooperative audit resolution** means the use of audit follow-up techniques which promote prompt corrective action by improving communication, fostering collaboration, promoting trust, and developing an understanding between the Federal agency and the non-Federal entity. This approach is based upon:

- (1) A strong commitment by Federal agency and non-Federal entity leadership to program integrity;
- (2) Federal agencies strengthening partnerships and working cooperatively with non-Federal entities and their auditors; and non-Federal entities and their auditors working cooperatively with Federal agencies;
- (3) A focus on current conditions and corrective action going forward;
- (4) Federal agencies offering appropriate relief for past noncompliance when audits show prompt corrective action has occurred; and
- (5) Federal agency leadership sending a clear message that continued failure to correct conditions identified by audits which are likely to cause improper payments, fraud, waste, or abuse is unacceptable and will result in sanctions.

**Corrective action** means action taken by the auditee that:

- (1) Corrects identified deficiencies;
- (2) Produces recommended improvements; or
- (3) Demonstrates that audit findings are either invalid or do not warrant auditee action.

**Cost allocation plan** means central service cost allocation plan or public assistance cost allocation plan.

**Cost objective** means a program, function, activity, award, organizational subdivision, contract, or work unit for which cost data are desired and for which provision is made to accumulate and measure the cost of processes, products, jobs, capital projects, etc. A cost objective may be a major function of the non-Federal entity, a particular service or project, a Federal award, or an indirect (Facilities & Administrative (F&A)) cost activity, as described in subpart E of this part. See also the definitions of *final cost objective* and *intermediate cost objective* in this section.

**Cost sharing or matching** means the portion of project costs not paid by Federal funds or contributions (unless otherwise authorized by Federal statute). See also § 200.306.

**Cross-cutting audit finding** means an audit finding where the same underlying condition or issue affects all Federal awards (including Federal awards of more than one Federal awarding agency or pass-through entity).

**Disallowed costs** means those charges to a Federal award that the Federal awarding agency or pass-through entity determines to be unallowable, in accordance with the applicable Federal statutes, regulations, or the terms and conditions of the Federal award.

**Discretionary award** means an award in which the Federal awarding agency, in keeping with specific statutory authority that enables the agency to exercise judgment ("discretion"), selects the recipient and/or the amount of Federal funding awarded through a competitive process or based on merit of proposals. A discretionary award may be selected on a non-competitive basis, as appropriate.

**Equipment** means tangible personal property (including information technology systems) having a useful life of more than one year and a per-unit acquisition cost which equals or exceeds the lesser of the capitalization level established by the non-Federal entity for financial statement purposes, or \$5,000. See also the definitions of *capital assets*, *computing devices*, *general purpose equipment*, *information technology systems*, *special purpose equipment*, and *supplies* in this section.

**Expenditures** means charges made by a non-Federal entity to a project or program for which a Federal award was received.

- (1) The charges may be reported on a cash or accrual basis, as long as the methodology is disclosed and is consistently applied.
- (2) For reports prepared on a cash basis, expenditures are the sum of:
  - (i) Cash disbursements for direct charges for property and services;
  - (ii) The amount of indirect expense charged;
  - (iii) The value of third-party in-kind contributions applied; and
  - (iv) The amount of cash advance payments and payments made to subrecipients.
- (3) For reports prepared on an accrual basis, expenditures are the sum of:
  - (i) Cash disbursements for direct charges for property and services;
  - (ii) The amount of indirect expense incurred;
  - (iii) The value of third-party in-kind contributions applied; and
  - (iv) The net increase or decrease in the amounts owed by the non-Federal entity for:
    - (A) Goods and other property received;
    - (B) Services performed by employees, contractors, subrecipients, and other payees; and
    - (C) Programs for which no current services or performance are required such as annuities, insurance claims, or other benefit payments.

**Federal agency** means an "agency" as defined at 5 U.S.C. 551(1) and further clarified by 5 U.S.C. 552(f).

**Federal Audit Clearinghouse (FAC)** means the clearinghouse designated by OMB as the repository of record where non-Federal entities are required to transmit the information required by subpart F of this part.

**Federal award** has the meaning, depending on the context, in either paragraph (1) or (2) of this definition:

- (1)

- (i) The Federal financial assistance that a recipient receives directly from a Federal awarding agency or indirectly from a pass-through entity, as described in § 200.101; or
  - (ii) The cost-reimbursement contract under the Federal Acquisition Regulations that a non-Federal entity receives directly from a Federal awarding agency or indirectly from a pass-through entity, as described in § 200.101.
- (2) The instrument setting forth the terms and conditions. The instrument is the grant agreement, cooperative agreement, other agreement for assistance covered in paragraph (2) of the definition of *Federal financial assistance* in this section, or the cost-reimbursement contract awarded under the Federal Acquisition Regulations.
  - (3) Federal award does not include other contracts that a Federal agency uses to buy goods or services from a contractor or a contract to operate Federal Government owned, contractor operated facilities (GOCOs).
  - (4) See also definitions of Federal financial assistance, grant agreement, and cooperative agreement.

**Federal award date** means the date when the Federal award is signed by the authorized official of the Federal awarding agency.

**Federal awarding agency** means the Federal agency that provides a Federal award directly to a non-Federal entity.

**Federal financial assistance** means

- (1) Assistance that non-Federal entities receive or administer in the form of:
  - (i) Grants;
  - (ii) Cooperative agreements;
  - (iii) Non-cash contributions or donations of property (including donated surplus property);
  - (iv) Direct appropriations;
  - (v) Food commodities; and
  - (vi) Other financial assistance (except assistance listed in paragraph (2) of this definition).
- (2) For § 200.203 and subpart F of this part, *Federal financial assistance* also includes assistance that non-Federal entities receive or administer in the form of:
  - (i) Loans;
  - (ii) Loan Guarantees;
  - (iii) Interest subsidies; and
  - (iv) Insurance.
- (3) For § 200.216, Federal financial assistance includes assistance that non-Federal entities receive or administer in the form of:
  - (i) Grants;
  - (ii) Cooperative agreements;
  - (iii) Loans; and

(iv) Loan Guarantees.

- (4) Federal financial assistance does not include amounts received as reimbursement for services rendered to individuals as described in § 200.502(h) and (i).

**Federal interest** means, for purposes of § 200.330 or when used in connection with the acquisition or improvement of real property, equipment, or supplies under a Federal award, the dollar amount that is the product of the:

- (1) The percentage of Federal participation in the total cost of the real property, equipment, or supplies; and
- (2) Current fair market value of the property, improvements, or both, to the extent the costs of acquiring or improving the property were included as project costs.

**Federal program** means:

- (1) All Federal awards which are assigned a single Assistance Listings Number.
- (2) When no Assistance Listings Number is assigned, all Federal awards from the same agency made for the same purpose must be combined and considered one program.
- (3) Notwithstanding paragraphs (1) and (2) of this definition, a cluster of programs. The types of clusters of programs are:
- (i) Research and development (R&D);
  - (ii) Student financial aid (SFA); and
  - (iii) "Other clusters," as described in the definition of *cluster of programs* in this section.

**Federal share** means the portion of the Federal award costs that are paid using Federal funds.

**Final cost objective** means a cost objective which has allocated to it both direct and indirect costs and, in the non-Federal entity's accumulation system, is one of the final accumulation points, such as a particular award, internal project, or other direct activity of a non-Federal entity. See also the definitions of *cost objective* and *intermediate cost objective* in this section.

**Financial obligations**, when referencing a recipient's or subrecipient's use of funds under a Federal award, means orders placed for property and services, contracts and subawards made, and similar transactions that require payment.

**Fixed amount awards** means a type of grant or cooperative agreement under which the Federal awarding agency or pass-through entity provides a specific level of support without regard to actual costs incurred under the Federal award. This type of Federal award reduces some of the administrative burden and record-keeping requirements for both the non-Federal entity and Federal awarding agency or pass-through entity. Accountability is based primarily on performance and results. See §§ 200.102(c), 200.201(b), and 200.333.

**Foreign organization** means an entity that is:

- (1) A public or private organization located in a country other than the United States and its territories that is subject to the laws of the country in which it is located, irrespective of the citizenship of project staff or place of performance;

- (2) A private nongovernmental organization located in a country other than the United States that solicits and receives cash contributions from the general public;
- (3) A charitable organization located in a country other than the United States that is nonprofit and tax exempt under the laws of its country of domicile and operation, and is not a university, college, accredited degree-granting institution of education, private foundation, hospital, organization engaged exclusively in research or scientific activities, church, synagogue, mosque or other similar entities organized primarily for religious purposes; or
- (4) An organization located in a country other than the United States not recognized as a foreign public entity.

**Foreign public entity** means:

- (1) A foreign government or foreign governmental entity;
- (2) A public international organization, which is an organization entitled to enjoy privileges, exemptions, and immunities as an international organization under the International Organizations Immunities Act (22 U.S.C. 288-288f);
- (3) An entity owned (in whole or in part) or controlled by a foreign government; or
- (4) Any other entity consisting wholly or partially of one or more foreign governments or foreign governmental entities.

**General purpose equipment** means equipment which is not limited to research, medical, scientific or other technical activities. Examples include office equipment and furnishings, modular offices, telephone networks, information technology equipment and systems, air conditioning equipment, reproduction and printing equipment, and motor vehicles. See also the definitions of *equipment* and *special purpose equipment* in this section.

**Generally accepted accounting principles (GAAP)** has the meaning specified in accounting standards issued by the GASB and the FASB.

**Generally accepted government auditing standards (GAGAS)**, also known as the Yellow Book, means generally accepted government auditing standards issued by the Comptroller General of the United States, which are applicable to financial audits.

**Grant agreement** means a legal instrument of financial assistance between a Federal awarding agency or pass-through entity and a non-Federal entity that, consistent with 31 U.S.C. 6302, 6304:

- (1) Is used to enter into a relationship the principal purpose of which is to transfer anything of value to carry out a public purpose authorized by a law of the United States (see 31 U.S.C. 6101(3)); and not to acquire property or services for the Federal awarding agency or pass-through entity's direct benefit or use;
- (2) Is distinguished from a cooperative agreement in that it does not provide for substantial involvement of the Federal awarding agency in carrying out the activity contemplated by the Federal award.
- (3) Does not include an agreement that provides only:
  - (i) Direct United States Government cash assistance to an individual;
  - (ii) A subsidy;
  - (iii) A loan;

- (vi) A loan guarantee; or
- (v) Insurance.

**Highest level owner** means the entity that owns or controls an immediate owner of the offeror, or that owns or controls one or more entities that control an immediate owner of the offeror. No entity owns or exercises control of the highest-level owner as defined in the Federal Acquisition Regulations (FAR) (48 CFR 52.204-17).

**Hospital** means a facility licensed as a hospital under the law of any state or a facility operated as a hospital by the United States, a state, or a subdivision of a state.

**Improper payment** means:

- (1) Any payment that should not have been made or that was made in an incorrect amount under statutory, contractual, administrative, or other *legally applicable* requirements.
  - (i) Incorrect amounts are overpayments or underpayments that are made to eligible recipients (including inappropriate denials of payment or service, any payment that does not account for credit for applicable discounts, payments that are for an incorrect amount, and duplicate payments). An improper payment also includes any payment that was made to an ineligible recipient or for an ineligible good or service, or payments for goods or services not received (except for such payments authorized by law).

**Note 1 to paragraph (1)(i) of this definition.** Applicable discounts are only those discounts where it is both advantageous and within the agency's control to claim them.

- (ii) When an agency's review is unable to discern whether a payment was proper as a result of insufficient or lack of documentation, this payment should also be considered an improper payment. When establishing documentation requirements for payments, agencies should ensure that all documentation requirements are necessary and should refrain from imposing additional burdensome documentation requirements.
  - (iii) Interest or other fees that may result from an underpayment by an agency are not considered an improper payment if the interest was paid correctly. These payments are generally separate transactions and may be necessary under certain statutory, contractual, administrative, or other legally applicable requirements.
  - (iv) A "questioned cost" (as defined in this section) should not be considered an improper payment until the transaction has been completely reviewed and is confirmed to be improper.
  - (v) The term "payment" in this definition means any disbursement or transfer of Federal funds (including a commitment for future payment, such as cash, securities, loans, loan guarantees, and insurance subsidies) to any non-Federal person, non-Federal entity, or Federal employee, that is made by a Federal agency, a Federal contractor, a Federal grantee, or a governmental or other organization administering a Federal program or activity.
  - (vi) The term "payment" includes disbursements made pursuant to prime contracts awarded under the Federal Acquisition Regulation and Federal awards subject to this part that are expended by recipients.
- (2) See definition of improper payment in OMB Circular A-123 appendix C, part I A (1) "What is an improper payment?" Questioned costs, including those identified in audits, are not an improper payment until reviewed and confirmed to be improper as defined in OMB Circular A-123 appendix C.

**Indian tribe** means any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. Chapter 33), which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians (25 U.S.C. 450b(e)). See annually published Bureau of Indian Affairs list of Indian Entities Recognized and Eligible to Receive Services.

**Institutions of Higher Education (IHEs)** is defined at 20 U.S.C. 1001.

**Indirect (facilities & administrative (F&A)) costs** means those costs incurred for a common or joint purpose benefitting more than one cost objective, and not readily assignable to the cost objectives specifically benefitted, without effort disproportionate to the results achieved. To facilitate equitable distribution of indirect expenses to the cost objectives served, it may be necessary to establish a number of pools of indirect (F&A) costs. Indirect (F&A) cost pools must be distributed to benefitted cost objectives on bases that will produce an equitable result in consideration of relative benefits derived.

**Indirect cost rate proposal** means the documentation prepared by a non-Federal entity to substantiate its request for the establishment of an indirect cost rate as described in appendices III through VII and appendix IX to this part.

**Information technology systems** means computing devices, ancillary equipment, software, firmware, and similar procedures, services (including support services), and related resources. See also the definitions of *computing devices* and *equipment* in this section.

**Intangible property** means property having no physical existence, such as trademarks, copyrights, patents and patent applications and property, such as loans, notes and other debt instruments, lease agreements, stock and other instruments of property ownership (whether the property is tangible or intangible).

**Intermediate cost objective** means a cost objective that is used to accumulate indirect costs or service center costs that are subsequently allocated to one or more indirect cost pools or final cost objectives. See also the definitions of *cost objective* and *final cost objective* in this section.

**Internal controls** for non-Federal entities means:

- (1) Processes designed and implemented by non-Federal entities to provide reasonable assurance regarding the achievement of objectives in the following categories:
  - (i) Effectiveness and efficiency of operations;
  - (ii) Reliability of reporting for internal and external use; and
  - (iii) Compliance with applicable laws and regulations.
- (2) Federal awarding agencies are required to follow internal control compliance requirements in OMB Circular No. A-123, Management's Responsibility for Enterprise Risk Management and Internal Control.

**Loan** means a Federal loan or loan guarantee received or administered by a non-Federal entity, except as used in the definition of *program income* in this section.

- (1) The term "direct loan" means a disbursement of funds by the Federal Government to a non-Federal borrower under a contract that requires the repayment of such funds with or without interest. The term includes the purchase of, or participation in, a loan made by another lender and financing

arrangements that defer payment for more than 90 days, including the sale of a Federal Government asset on credit terms. The term does not include the acquisition of a federally guaranteed loan in satisfaction of default claims or the price support loans of the Commodity Credit Corporation.

- (2) The term "direct loan obligation" means a binding agreement by a Federal awarding agency to make a direct loan when specified conditions are fulfilled by the borrower.
- (3) The term "loan guarantee" means any Federal Government guarantee, insurance, or other pledge with respect to the payment of all or a part of the principal or interest on any debt obligation of a non-Federal borrower to a non-Federal lender, but does not include the insurance of deposits, shares, or other withdrawable accounts in financial institutions.
- (4) The term "loan guarantee commitment" means a binding agreement by a Federal awarding agency to make a loan guarantee when specified conditions are fulfilled by the borrower, the lender, or any other party to the guarantee agreement.

**Local government** means any unit of government within a state, including a:

- (1) County;
- (2) Borough;
- (3) Municipality;
- (4) City;
- (5) Town;
- (6) Township;
- (7) Parish;
- (8) Local public authority, including any public housing agency under the United States Housing Act of 1937;
- (9) Special district;
- (10) School district;
- (11) Intrastate district;
- (12) Council of governments, whether or not incorporated as a nonprofit corporation under State law; and
- (13) Any other agency or instrumentality of a multi-, regional, or intra-State or local government.

**Major program** means a Federal program determined by the auditor to be a major program in accordance with § 200.518 or a program identified as a major program by a Federal awarding agency or pass-through entity in accordance with § 200.503(e).

**Management decision** means the Federal awarding agency's or pass-through entity's written determination, provided to the auditee, of the adequacy of the auditee's proposed corrective actions to address the findings, based on its evaluation of the audit findings and proposed corrective actions.

**Micro-purchase** means a purchase of supplies or services, the aggregate amount of which does not exceed the micro-purchase threshold. Micro-purchases comprise a subset of a non-Federal entity's small purchases as defined in § 200.320.

**Micro-purchase threshold** means the dollar amount at or below which a non-Federal entity may purchase property or services using micro-purchase procedures (see § 200.320). Generally, the micro-purchase threshold for procurement activities administered under Federal awards is not to exceed the amount set by the FAR at 48 CFR part 2, subpart 2.1, unless a higher threshold is requested by the non-Federal entity and approved by the cognizant agency for indirect costs.

**Modified Total Direct Cost (MTDC)** means all direct salaries and wages, applicable fringe benefits, materials and supplies, services, travel, and up to the first \$25,000 of each subaward (regardless of the period of performance of the subawards under the award). MTDC excludes equipment, capital expenditures, charges for patient care, rental costs, tuition remission, scholarships and fellowships, participant support costs and the portion of each subaward in excess of \$25,000. Other items may only be excluded when necessary to avoid a serious inequity in the distribution of indirect costs, and with the approval of the cognizant agency for indirect costs.

**Non-discretionary award** means an award made by the Federal awarding agency to specific recipients in accordance with statutory, eligibility and compliance requirements, such that in keeping with specific statutory authority the agency has no ability to exercise judgement (“discretion”). A non-discretionary award amount could be determined specifically or by formula.

**Non-Federal entity (NFE)** means a State, local government, Indian tribe, Institution of Higher Education (IHE), or nonprofit organization that carries out a Federal award as a recipient or subrecipient.

**Nonprofit organization** means any corporation, trust, association, cooperative, or other organization, not including IHEs, that:

- (1) Is operated primarily for scientific, educational, service, charitable, or similar purposes in the public interest;
- (2) Is not organized primarily for profit; and
- (3) Uses net proceeds to maintain, improve, or expand the operations of the organization.

**Notice of funding opportunity** means a formal announcement of the availability of Federal funding through a financial assistance program from a Federal awarding agency. The notice of funding opportunity provides information on the award, who is eligible to apply, the evaluation criteria for selection of an awardee, required components of an application, and how to submit the application. The notice of funding opportunity is any paper or electronic issuance that an agency uses to announce a funding opportunity, whether it is called a “program announcement,” “notice of funding availability,” “broad agency announcement,” “research announcement,” “solicitation,” or some other term.

**Office of Management and Budget (OMB)** means the Executive Office of the President, Office of Management and Budget.

**Oversight agency for audit** means the Federal awarding agency that provides the predominant amount of funding directly (direct funding) (as listed on the schedule of expenditures of Federal awards, see § 200.510(b)) to a non-Federal entity unless OMB designates a specific cognizant agency for audit. When the direct funding represents less than 25 percent of the total Federal expenditures (as direct and sub-awards) by the non-Federal entity, then the Federal agency with the predominant amount of total funding is the designated oversight agency for audit. When there is no direct funding, the Federal awarding agency which is the predominant source of pass-through funding must assume the oversight responsibilities. The duties of the oversight agency for audit and the process for any reassignments are described in § 200.513(b).

**Participant support costs** means direct costs for items such as stipends or subsistence allowances, travel allowances, and registration fees paid to or on behalf of participants or trainees (but not employees) in connection with conferences, or training projects.

**Pass-through entity (PTE)** means a non-Federal entity that provides a subaward to a subrecipient to carry out part of a Federal program.

**Performance goal** means a target level of performance expressed as a tangible, measurable objective, against which actual achievement can be compared, including a goal expressed as a quantitative standard, value, or rate. In some instances (e.g., discretionary research awards), this may be limited to the requirement to submit technical performance reports (to be evaluated in accordance with agency policy).

**Period of performance** means the total estimated time interval between the start of an initial Federal award and the planned end date, which may include one or more funded portions, or budget periods. Identification of the period of performance in the Federal award per § 200.211(b)(5) does not commit the awarding agency to fund the award beyond the currently approved budget period.

**Personal property** means property other than real property. It may be tangible, having physical existence, or intangible.

**Personally Identifiable Information (PII)** means information that can be used to distinguish or trace an individual's identity, either alone or when combined with other personal or identifying information that is linked or linkable to a specific individual. Some information that is considered to be PII is available in public sources such as telephone books, public websites, and university listings. This type of information is considered to be Public PII and includes, for example, first and last name, address, work telephone number, email address, home telephone number, and general educational credentials. The definition of PII is not anchored to any single category of information or technology. Rather, it requires a case-by-case assessment of the specific risk that an individual can be identified. Non-PII can become PII whenever additional information is made publicly available, in any medium and from any source, that, when combined with other available information, could be used to identify an individual.

**Program income** means gross income earned by the non-Federal entity that is directly generated by a supported activity or earned as a result of the Federal award during the period of performance except as provided in § 200.307(f). (See the definition of *period of performance* in this section.) Program income includes but is not limited to income from fees for services performed, the use or rental of real or personal property acquired under Federal awards, the sale of commodities or items fabricated under a Federal award, license fees and royalties on patents and copyrights, and principal and interest on loans made with Federal award funds. Interest earned on advances of Federal funds is not program income. Except as otherwise provided in Federal statutes, regulations, or the terms and conditions of the Federal award, program income does not include rebates, credits, discounts, and interest earned on any of them. See also § 200.407. See also 35 U.S.C. 200-212 "Disposition of Rights in Educational Awards" applies to inventions made under Federal awards.

**Project cost** means total allowable costs incurred under a Federal award and all required cost sharing and voluntary committed cost sharing, including third-party contributions.

**Property** means real property or personal property. See also the definitions of *real property* and *personal property* in this section.

**Protected Personally Identifiable Information (Protected PII)** means an individual's first name or first initial and last name in combination with any one or more of types of information, including, but not limited to, social security number, passport number, credit card numbers, clearances, bank numbers, biometrics, date and

place of birth, mother's maiden name, criminal, medical and financial records, educational transcripts. This does not include PII that is required by law to be disclosed. See also the definition of *Personally Identifiable Information (PII)* in this section.

**Questioned cost** means a cost that is questioned by the auditor because of an audit finding:

- (1) Which resulted from a violation or possible violation of a statute, regulation, or the terms and conditions of a Federal award, including for funds used to match Federal funds;
- (2) Where the costs, at the time of the audit, are not supported by adequate documentation; or
- (3) Where the costs incurred appear unreasonable and do not reflect the actions a prudent person would take in the circumstances.
- (4) Questioned costs are not an improper payment until reviewed and confirmed to be improper as defined in OMB Circular A-123 appendix C. (See also the definition of *Improper payment* in this section).

**Real property** means land, including land improvements, structures and appurtenances thereto, but excludes moveable machinery and equipment.

**Recipient** means an entity, usually but not limited to non-Federal entities that receives a Federal award directly from a Federal awarding agency. The term recipient does not include subrecipients or individuals that are beneficiaries of the award.

**Renewal award** means an award made subsequent to an expiring Federal award for which the start date is contiguous with, or closely follows, the end of the expiring Federal award. A renewal award's start date will begin a distinct period of performance.

**Research and Development (R&D)** means all research activities, both basic and applied, and all development activities that are performed by non-Federal entities. The term research also includes activities involving the training of individuals in research techniques where such activities utilize the same facilities as other research and development activities and where such activities are not included in the instruction function. "Research" is defined as a systematic study directed toward fuller scientific knowledge or understanding of the subject studied. "Development" is the systematic use of knowledge and understanding gained from research directed toward the production of useful materials, devices, systems, or methods, including design and development of prototypes and processes.

**Simplified acquisition threshold** means the dollar amount below which a non-Federal entity may purchase property or services using small purchase methods (see § 200.320). Non-Federal entities adopt small purchase procedures in order to expedite the purchase of items at or below the simplified acquisition threshold. The simplified acquisition threshold for procurement activities administered under Federal awards is set by the FAR at 48 CFR part 2, subpart 2.1. The non-Federal entity is responsible for determining an appropriate simplified acquisition threshold based on internal controls, an evaluation of risk, and its documented procurement procedures. However, in no circumstances can this threshold exceed the dollar value established in the FAR (48 CFR part 2, subpart 2.1) for the simplified acquisition threshold. Recipients should determine if local government laws on purchasing apply.

**Special purpose equipment** means equipment which is used only for research, medical, scientific, or other technical activities. Examples of special purpose equipment include microscopes, x-ray machines, surgical instruments, and spectrometers. See also the definitions of *equipment* and *general purpose equipment* in this section.

**State** means any state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, U.S. Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, and any agency or instrumentality thereof exclusive of local governments.

**Student Financial Aid (SFA)** means Federal awards under those programs of general student assistance, such as those authorized by Title IV of the Higher Education Act of 1965, as amended, (20 U.S.C. 1070-1099d), which are administered by the U.S. Department of Education, and similar programs provided by other Federal agencies. It does not include Federal awards under programs that provide fellowships or similar Federal awards to students on a competitive basis, or for specified studies or research.

**Subaward** means an award provided by a pass-through entity to a subrecipient for the subrecipient to carry out part of a Federal award received by the pass-through entity. It does not include payments to a contractor or payments to an individual that is a beneficiary of a Federal program. A subaward may be provided through any form of legal agreement, including an agreement that the pass-through entity considers a contract.

**Subrecipient** means an entity, usually but not limited to non-Federal entities, that receives a subaward from a pass-through entity to carry out part of a Federal award; but does not include an individual that is a beneficiary of such award. A subrecipient may also be a recipient of other Federal awards directly from a Federal awarding agency.

**Subsidiary** means an entity in which more than 50 percent of the entity is owned or controlled directly by a parent corporation or through another subsidiary of a parent corporation.

**Supplies** means all tangible personal property other than those described in the definition of *equipment* in this section. A computing device is a supply if the acquisition cost is less than the lesser of the capitalization level established by the non-Federal entity for financial statement purposes or \$5,000, regardless of the length of its useful life. See also the definitions of *computing devices* and *equipment* in this section.

**Telecommunications cost** means the cost of using communication and telephony technologies such as mobile phones, land lines, and internet.

**Termination** means the ending of a Federal award, in whole or in part at any time prior to the planned end of period of performance. A lack of available funds is not a termination.

**Third-party in-kind contributions** means the value of non-cash contributions (*i.e.*, property or services) that—

- (1) Benefit a federally-assisted project or program; and
- (2) Are contributed by non-Federal third parties, without charge, to a non-Federal entity under a Federal award.

**Unliquidated financial obligations** means, for financial reports prepared on a cash basis, financial obligations incurred by the non-Federal entity that have not been paid (liquidated). For reports prepared on an accrual expenditure basis, these are financial obligations incurred by the non-Federal entity for which an expenditure has not been recorded.

**Unobligated balance** means the amount of funds under a Federal award that the non-Federal entity has not obligated. The amount is computed by subtracting the cumulative amount of the non-Federal entity's unliquidated financial obligations and expenditures of funds under the Federal award from the cumulative amount of the funds that the Federal awarding agency or pass-through entity authorized the non-Federal entity to obligate.

*Voluntary committed cost sharing* means cost sharing specifically pledged on a voluntary basis in the proposal's budget on the part of the non-Federal entity and that becomes a binding requirement of Federal award. See also § 200.306.

[85 FR 49529, Aug. 13, 2020, as amended at 86 FR 10439, Feb. 22, 2021]

## Subpart B—General Provisions

Link to an amendment published at 89 FR 30136, Apr. 22, 2024.

### § 200.100 Purpose.

(a) *Purpose.*

(1) This part establishes uniform administrative requirements, cost principles, and audit requirements for Federal awards to non-Federal entities, as described in § 200.101. Federal awarding agencies must not impose additional or inconsistent requirements, except as provided in §§ 200.102 and 200.211, or unless specifically required by Federal statute, regulation, or Executive order.

(2) This part provides the basis for a systematic and periodic collection and uniform submission by Federal agencies of information on all Federal financial assistance programs to the Office of Management and Budget (OMB). It also establishes Federal policies related to the delivery of this information to the public, including through the use of electronic media. It prescribes the manner in which General Services Administration (GSA), OMB, and Federal agencies that administer Federal financial assistance programs are to carry out their statutory responsibilities under the Federal Program Information Act (31 U.S.C. 6101-6106).

(b) *Administrative requirements.* Subparts B through D of this part set forth the uniform administrative requirements for grant and cooperative agreements, including the requirements for Federal awarding agency management of Federal grant programs before the Federal award has been made, and the requirements Federal awarding agencies may impose on non-Federal entities in the Federal award.

(c) *Cost principles.* Subpart E of this part establishes principles for determining the allowable costs incurred by non-Federal entities under Federal awards. The principles are for the purpose of cost determination and are not intended to identify the circumstances or dictate the extent of Federal Government participation in the financing of a particular program or project. The principles are designed to provide that Federal awards bear their fair share of cost recognized under these principles except where restricted or prohibited by statute.

(d) *Single Audit Requirements and Audit Follow-up.* Subpart F of this part is issued pursuant to the Single Audit Act Amendments of 1996, (31 U.S.C. 7501-7507). It sets forth standards for obtaining consistency and uniformity among Federal agencies for the audit of non-Federal entities expending Federal awards. These provisions also provide the policies and procedures for Federal awarding agencies and pass-through entities when using the results of these audits.

(e) *Guidance on challenges and prizes.* For OMB guidance to Federal awarding agencies on challenges and prizes, please see memo M-10-11 Guidance on the Use of Challenges and Prizes to Promote Open Government, issued March 8, 2010, or its successor.

[78 FR 78608, Dec. 26, 2013, as amended at 85 FR 49536, Aug. 13, 2020]

**§ 200.101 Applicability.**

**(a) General applicability to Federal agencies.**

- (1) The requirements established in this part apply to Federal agencies that make Federal awards to non-Federal entities. These requirements are applicable to all costs related to Federal awards.
- (2) Federal awarding agencies may apply subparts A through E of this part to Federal agencies, for-profit entities, foreign public entities, or foreign organizations, except where the Federal awarding agency determines that the application of these subparts would be inconsistent with the international responsibilities of the United States or the statutes or regulations of a foreign government.

**(b) Applicability to different types of Federal awards.**

- (1) Throughout this part when the word “must” is used it indicates a requirement. Whereas, use of the word “should” or “may” indicates a best practice or recommended approach rather than a requirement and permits discretion.
- (2) The following table describes what portions of this part apply to which types of Federal awards. The terms and conditions of Federal awards (including this part) flow down to subawards to subrecipients unless a particular section of this part or the terms and conditions of the Federal award specifically indicate otherwise. This means that non-Federal entities must comply with requirements in this part regardless of whether the non-Federal entity is a recipient or subrecipient of a Federal award. Pass-through entities must comply with the requirements described in subpart D of this part, §§ 200.331 through 200.333, but not any requirements in this part directed towards Federal awarding agencies unless the requirements of this part or the terms and conditions of the Federal award indicate otherwise.

Table 1 to Paragraph (b)

| The following portions of this Part   | Are applicable to the following types of Federal Awards and Fixed-Price Contracts and Subcontracts (except as noted in paragraphs (d) and (e) of this section): | Are NOT applicable to the following types of Federal Awards and Fixed-Price Contracts and Subcontracts:  |
|---|---|--|
| Subpart A—Acronyms and Definitions  | —All  |  |
| Subpart B—General Provisions, except for §§ 200.111 English Language, 200.112 Conflict of Interest, 200.113 Mandatory Disclosures | —All  |  |
| §§ 200.111 English Language, 200.112 Conflict of Interest, 200.113 Mandatory Disclosures  | —Grant Agreements and cooperative agreements  | —Agreements for loans, loan guarantees, interest subsidies and insurance.<br>—Procurement contracts awarded by Federal Agencies under the Federal Acquisition Regulation and subcontracts under those contracts. |

| The following portions of this Part  | Are applicable to the following types of Federal Awards and Fixed-Price Contracts and Subcontracts (except as noted in paragraphs (d) and (e) of this section):  | Are NOT applicable to the following types of Federal Awards and Fixed-Price Contracts and Subcontracts:  |
|--|--|--|
| Subparts C-D, except for §§ 200.203 Requirement to provide public notice of Federal financial assistance programs, 200.303 Internal controls, 200.331-333 Subrecipient Monitoring and Management | –Grant Agreements and cooperative agreements   | –Agreements for loans, loan guarantees, interest subsidies and insurance.<br>–Procurement contracts awarded by Federal Agencies under the Federal Acquisition Regulation and subcontracts under those contracts.   |
| § 200.203 Requirement to provide public notice of Federal financial assistance programs  | –Grant Agreements and cooperative agreements<br>–Agreements for loans, loan guarantees, interest subsidies and insurance   | –Procurement contracts awarded by Federal Agencies under the Federal Acquisition Regulation and subcontracts under those contracts.  |
| §§ 200.303 Internal controls, 200.331-333 Subrecipient Monitoring and Management   | –All   |  |
| Subpart E–Cost Principles  | –Grant Agreements and cooperative agreements, except those providing food commodities<br>–All procurement contracts under the Federal Acquisition Regulations except those that are not negotiated   | –Grant agreements and cooperative agreements providing foods commodities.<br>–Fixed amount awards.<br>–Agreements for loans, loans guarantees, interest subsidies and insurance.<br>–Federal awards to hospitals (see Appendix IX Hospital Cost Principles). |
| Subpart F–Audit Requirements   | –Grant Agreements and cooperative agreements<br>–Contracts and subcontracts, except for fixed price contracts and subcontracts, awarded under the Federal Acquisition Regulation<br>–Agreements for loans, loans guarantees, interest subsidies and insurance and other forms of Federal Financial Assistance as defined by the Single Audit Act Amendment of 1996 | –Fixed-price contracts and subcontracts awarded under the Federal Acquisition Regulation.  |

- (c) **Federal award of cost-reimbursement contract under the FAR to a non-Federal entity.** When a non-Federal entity is awarded a cost-reimbursement contract, only subpart D, §§ 200.331 through 200.333, and subparts E and F of this part are incorporated by reference into the contract, but the requirements of subparts D, E, and F are supplementary to the FAR and the contract. When the Cost Accounting Standards (CAS) are applicable to the contract, they take precedence over the requirements of this part, including subpart F of this part, which are supplementary to the CAS requirements. In addition, costs that are made unallowable under 10 U.S.C. 2324(e) and 41 U.S.C. 4304(a) as described in the FAR 48 CFR part 31, subpart 31.2, and 48 CFR 31.603 are always unallowable. For requirements other than those covered in subpart D, §§ 200.331 through 200.333, and subparts E and F of this part, the terms of the contract and the FAR apply. Note that when a non-Federal entity is awarded a FAR contract, the FAR applies, and the terms and conditions of the contract shall prevail over the requirements of this part.
- (d) **Governing provisions.** With the exception of subpart F of this part, which is required by the Single Audit Act, in any circumstances where the provisions of Federal statutes or regulations differ from the provisions of this part, the provision of the Federal statutes or regulations govern. This includes, for agreements with Indian tribes, the provisions of the Indian Self-Determination and Education and Assistance Act (ISDEAA), as amended, 25 U.S.C 450-458ddd-2.
- (e) **Program applicability.** Except for §§ 200.203, 200.216, and 200.331 through 200.333, the requirements in subparts C, D, and E of this part do not apply to the following programs:
- (1) The block grant awards authorized by the Omnibus Budget Reconciliation Act of 1981 (including Community Services), except to the extent that subpart E of this part apply to subrecipients of Community Services Block Grant funds pursuant to 42 U.S.C. 9916(a)(1)(B);
  - (2) Federal awards to local education agencies under 20 U.S.C. 7702-7703b, (portions of the Impact Aid program);
  - (3) Payments under the Department of Veterans Affairs' State Home Per Diem Program (38 U.S.C. 1741); and
  - (4) Federal awards authorized under the Child Care and Development Block Grant Act of 1990, as amended:
    - (i) Child Care and Development Block Grant (42 U.S.C. 9858).
    - (ii) Child Care Mandatory and Matching Funds of the Child Care and Development Fund (42 U.S.C. 9858).
- (f) **Additional program applicability.** Except for §§ 200.203 and 200.216, the guidance in subpart C of this part does not apply to the following programs:
- (1) Entitlement Federal awards to carry out the following programs of the Social Security Act:
    - (i) Temporary Assistance for Needy Families (title IV-A of the Social Security Act, 42 U.S.C. 601-619);
    - (ii) Child Support Enforcement and Establishment of Paternity (title IV-D of the Social Security Act, 42 U.S.C. 651-669b);
    - (iii) Foster Care and Adoption Assistance (title IV-E of the Act, 42 U.S.C. 670-679c);
    - (iv) Aid to the Aged, Blind, and Disabled (titles I, X, XIV, and XVI-AABD of the Act, as amended);

- (v) Medical Assistance (Medicaid) (title XIX of the Act, 42 U.S.C. 1396-1396w-5) not including the State Medicaid Fraud Control program authorized by section 1903(a)(6)(B) of the Social Security Act (42 U.S.C. 1396b(a)(6)(B)); and
  - (vi) Children's Health Insurance Program (title XXI of the Act, 42 U.S.C. 1397aa-1397mm).
- (2) A Federal award for an experimental, pilot, or demonstration project that is also supported by a Federal award listed in paragraph (f)(1) of this section.
  - (3) Federal awards under subsection 412(e) of the Immigration and Nationality Act and subsection 501(a) of the Refugee Education Assistance Act of 1980 (Pub. L. 96-422, 94 Stat. 1809), for cash assistance, medical assistance, and supplemental security income benefits to refugees and entrants and the administrative costs of providing the assistance and benefits (8 U.S.C. 1522(e)).
  - (4) Entitlement awards under the following programs of The National School Lunch Act:
    - (i) National School Lunch Program (section 4 of the Act, 42 U.S.C. 1753);
    - (ii) Commodity Assistance (section 6 of the Act, 42 U.S.C. 1755);
    - (iii) Special Meal Assistance (section 11 of the Act, 42 U.S.C. 1759a);
    - (iv) Summer Food Service Program for Children (section 13 of the Act, 42 U.S.C. 1761); and
    - (v) Child and Adult Care Food Program (section 17 of the Act, 42 U.S.C. 1766).
  - (5) Entitlement awards under the following programs of The Child Nutrition Act of 1966:
    - (i) Special Milk Program (section 3 of the Act, 42 U.S.C. 1772);
    - (ii) School Breakfast Program (section 4 of the Act, 42 U.S.C. 1773); and
    - (iii) State Administrative Expenses (section 7 of the Act, 42 U.S.C. 1776).
  - (6) Entitlement awards for State Administrative Expenses under The Food and Nutrition Act of 2008 (section 16 of the Act, 7 U.S.C. 2025).
  - (7) Non-discretionary Federal awards under the following non-entitlement programs:
    - (i) Special Supplemental Nutrition Program for Women, Infants and Children (section 17 of the Child Nutrition Act of 1966) 42 U.S.C. 1786;
    - (ii) The Emergency Food Assistance Programs (Emergency Food Assistance Act of 1983) 7 U.S.C. 7501 note; and
    - (iii) Commodity Supplemental Food Program (section 5 of the Agriculture and Consumer Protection Act of 1973) 7 U.S.C. 612c note.

[85 FR 49536, Aug. 13, 2020, as amended at 86 FR 10439, Feb. 22, 2021]

## § 200.102 Exceptions.

- (a) With the exception of subpart F of this part, OMB may allow exceptions for classes of Federal awards or non-Federal entities subject to the requirements of this part when exceptions are not prohibited by statute. In the interest of maximum uniformity, exceptions from the requirements of this part will be permitted as described in this section.

- (b) Exceptions on a case-by-case basis for individual non-Federal entities may be authorized by the Federal awarding agency or cognizant agency for indirect costs, except where otherwise required by law or where OMB or other approval is expressly required by this part.
- (c) The Federal awarding agency may adjust requirements to a class of Federal awards or non-Federal entities when approved by OMB, or when required by Federal statutes or regulations, except for the requirements in subpart F of this part. A Federal awarding agency may apply less restrictive requirements when making fixed amount awards as defined in subpart A of this part, except for those requirements imposed by statute or in subpart F of this part.
- (d) Federal awarding agencies may request exceptions in support of innovative program designs that apply a risk-based, data-driven framework to alleviate select compliance requirements and hold recipients accountable for good performance. See also § 200.206.

[85 FR 49538, Aug. 13, 2020, as amended at 86 FR 10439, Feb. 22, 2021]

### § 200.103 Authorities.

This part is issued under the following authorities.

- (a) Subparts B through D of this part are authorized under 31 U.S.C. 503 (the Chief Financial Officers Act, Functions of the Deputy Director for Management), 41 U.S.C. 1101-1131 (the Office of Federal Procurement Policy Act), Reorganization Plan No. 2 of 1970, and Executive Order 11541 (“Prescribing the Duties of the Office of Management and Budget and the Domestic Policy Council in the Executive Office of the President”), the Single Audit Act Amendments of 1996, (31 U.S.C. 7501-7507), as well as The Federal Program Information Act (Pub. L. 95-220 and Pub. L. 98-169, as amended, codified at 31 U.S.C. 6101-6106).
- (b) Subpart E of this part is authorized under the Budget and Accounting Act of 1921, as amended; the Budget and Accounting Procedures Act of 1950, as amended (31 U.S.C. 1101-1125); the Chief Financial Officers Act of 1990 (31 U.S.C. 503-504); Reorganization Plan No. 2 of 1970; and Executive Order 11541, “Prescribing the Duties of the Office of Management and Budget and the Domestic Policy Council in the Executive Office of the President.”
- (c) Subpart F of this part is authorized under the Single Audit Act Amendments of 1996, (31 U.S.C. 7501-7507).

[85 FR 49538, Aug. 13, 2020]

### § 200.104 Supersession.

As described in § 200.110, this part supersedes the following OMB guidance documents and regulations under title 2 of the Code of Federal Regulations:

- (a) A-21, “Cost Principles for Educational Institutions” (2 CFR part 220);
- (b) A-87, “Cost Principles for State, Local and Indian Tribal Governments” (2 CFR part 225) and also FEDERAL REGISTER notice 51 FR 552 (January 6, 1986);
- (c) A-89, “Federal Domestic Assistance Program Information”;
- (d) A-102, “Grant Awards and Cooperative Agreements with State and Local Governments”;

- (e) A-110, "Uniform Administrative Requirements for Awards and Other Agreements with Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations" (codified at 2 CFR 215);
- (f) A-122, "Cost Principles for Non-Profit Organizations" (2 CFR part 230);
- (g) A-133, "Audits of States, Local Governments and Non-Profit Organizations"; and
- (h) Those sections of A-50 related to audits performed under subpart F of this part.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75882, Dec. 19, 2014; 85 FR 49538, Aug. 13, 2020]

### § 200.105 Effect on other issuances.

- (a) **Superseding inconsistent requirements.** For Federal awards subject to this part, all administrative requirements, program manuals, handbooks and other non-regulatory materials that are inconsistent with the requirements of this part must be superseded upon implementation of this part by the Federal agency, except to the extent they are required by statute or authorized in accordance with the provisions in § 200.102.
- (b) **Imposition of requirements on recipients.** Agencies may impose legally binding requirements on recipients only through the notice and public comment process through an approved agency process, including as authorized by this part, other statutes or regulations, or as incorporated into the terms of a Federal award.

[85 FR 49538, Aug. 13, 2020]

### § 200.106 Agency implementation.

The specific requirements and responsibilities of Federal agencies and non-Federal entities are set forth in this part. Federal agencies making Federal awards to non-Federal entities must implement the language in subparts C through F of this part in codified regulations unless different provisions are required by Federal statute or are approved by OMB.

[85 FR 49538, Aug. 13, 2020]

### § 200.107 OMB responsibilities.

OMB will review Federal agency regulations and implementation of this part, and will provide interpretations of policy requirements and assistance to ensure effective and efficient implementation. Any exceptions will be subject to approval by OMB. Exceptions will only be made in particular cases where adequate justification is presented.

### § 200.108 Inquiries.

Inquiries concerning this part may be directed to the Office of Federal Financial Management Office of Management and Budget, in Washington, DC. Non-Federal entities' inquiries should be addressed to the Federal awarding agency, cognizant agency for indirect costs, cognizant or oversight agency for audit, or pass-through entity as appropriate.

### § 200.109 Review date.

OMB will review this part at least every five years after December 26, 2013.

### § 200.110 Effective/applicability date.

- (a) The standards set forth in this part that affect the administration of Federal awards issued by Federal awarding agencies become effective once implemented by Federal awarding agencies or when any future amendment to this part becomes final.
- (b) Existing negotiated indirect cost rates (as of the publication date of the revisions to the guidance) will remain in place until they expire. The effective date of changes to indirect cost rates must be based upon the date that a newly re-negotiated rate goes into effect for a specific non-Federal entity's fiscal year. Therefore, for indirect cost rates and cost allocation plans, the revised Uniform Guidance (as of the publication date for revisions to the guidance) become effective in generating proposals and negotiating a new rate (when the rate is re-negotiated).

[85 FR 49538, Aug. 13, 2020]

### § 200.111 English language.

- (a) All Federal financial assistance announcements and Federal award information must be in the English language. Applications must be submitted in the English language and must be in the terms of U.S. dollars. If the Federal awarding agency receives applications in another currency, the Federal awarding agency will evaluate the application by converting the foreign currency to United States currency using the date specified for receipt of the application.
- (b) Non-Federal entities may translate the Federal award and other documents into another language. In the event of inconsistency between any terms and conditions of the Federal award and any translation into another language, the English language meaning will control. Where a significant portion of the non-Federal entity's employees who are working on the Federal award are not fluent in English, the non-Federal entity must provide the Federal award in English and the language(s) with which employees are more familiar.

### § 200.112 Conflict of interest.

The Federal awarding agency must establish conflict of interest policies for Federal awards. The non-Federal entity must disclose in writing any potential conflict of interest to the Federal awarding agency or pass-through entity in accordance with applicable Federal awarding agency policy.

### § 200.113 Mandatory disclosures.

The non-Federal entity or applicant for a Federal award must disclose, in a timely manner, in writing to the Federal awarding agency or pass-through entity all violations of Federal criminal law involving fraud, bribery, or gratuity violations potentially affecting the Federal award. Non-Federal entities that have received a Federal award including the term and condition outlined in appendix XII to this part are required to report certain civil, criminal, or administrative proceedings to SAM (currently FAPIIS). Failure to make required disclosures can result in any of the remedies described in § 200.339. (See also 2 CFR part 180, 31 U.S.C. 3321, and 41 U.S.C. 2313.)

[85 FR 49539, Aug. 13, 2020]

## Subpart C—Pre-Federal Award Requirements and Contents of Federal Awards

Link to an amendment published at [89 FR 30136](#), Apr. 22, 2024.

**Source:** 85 FR 49539, Aug. 13, 2020, unless otherwise noted.

## § 200.200 Purpose.

Sections 200.201 through 200.216 prescribe instructions and other pre-award matters to be used by Federal awarding agencies in the program planning, announcement, application and award processes.

## § 200.201 Use of grant agreements (including fixed amount awards), cooperative agreements, and contracts.

- (a) **Federal award instrument.** The Federal awarding agency or pass-through entity must decide on the appropriate instrument for the Federal award (*i.e.*, grant agreement, cooperative agreement, or contract) in accordance with the Federal Grant and Cooperative Agreement Act (31 U.S.C. 6301-08).
- (b) **Fixed amount awards.** In addition to the options described in paragraph (a) of this section, Federal awarding agencies, or pass-through entities as permitted in § 200.333, may use fixed amount awards (see *Fixed amount awards* in § 200.1) to which the following conditions apply:
  - (1) The Federal award amount is negotiated using the cost principles (or other pricing information) as a guide. The Federal awarding agency or pass-through entity may use fixed amount awards if the project scope has measurable goals and objectives and if adequate cost, historical, or unit pricing data is available to establish a fixed amount award based on a reasonable estimate of actual cost. Payments are based on meeting specific requirements of the Federal award. Accountability is based on performance and results. Except in the case of termination before completion of the Federal award, there is no governmental review of the actual costs incurred by the non-Federal entity in performance of the award. Some of the ways in which the Federal award may be paid include, but are not limited to:
    - (i) In several partial payments, the amount of each agreed upon in advance, and the “milestone” or event triggering the payment also agreed upon in advance, and set forth in the Federal award;
    - (ii) On a unit price basis, for a defined unit or units, at a defined price or prices, agreed to in advance of performance of the Federal award and set forth in the Federal award; or,
    - (iii) In one payment at Federal award completion.
  - (2) A fixed amount award cannot be used in programs which require mandatory cost sharing or match.
  - (3) The non-Federal entity must certify in writing to the Federal awarding agency or pass-through entity at the end of the Federal award that the project or activity was completed or the level of effort was expended. If the required level of activity or effort was not carried out, the amount of the Federal award must be adjusted.
  - (4) Periodic reports may be established for each Federal award.
  - (5) Changes in principal investigator, project leader, project partner, or scope of effort must receive the prior written approval of the Federal awarding agency or pass-through entity.

## § 200.202 Program planning and design.

The Federal awarding agency must design a program and create an Assistance Listing before announcing the Notice of Funding Opportunity. The program must be designed with clear goals and objectives that facilitate the delivery of meaningful results consistent with the Federal authorizing legislation of the program. Program performance shall be measured based on the goals and objectives developed during program planning and design. See § 200.301 for more information on performance measurement. Performance measures may differ depending on the type of program. The program must align with the strategic goals and objectives within the Federal awarding agency's performance plan and should support the Federal awarding agency's performance measurement, management, and reporting as required by Part 6 of OMB Circular A-11 (Preparation, Submission, and Execution of the Budget). The program must also be designed to align with the Program Management Improvement Accountability Act (Pub. L. 114-264).

## § 200.203 Requirement to provide public notice of Federal financial assistance programs.

- (a) The Federal awarding agency must notify the public of Federal programs in the Federal Assistance Listings maintained by the General Services Administration (GSA).
  - (1) The Federal Assistance Listings is the single, authoritative, governmentwide comprehensive source of Federal financial assistance program information produced by the executive branch of the Federal Government.
  - (2) The information that the Federal awarding agency must submit to GSA for approval by OMB is listed in paragraph (b) of this section. GSA must prescribe the format for the submission in coordination with OMB.
  - (3) The Federal awarding agency may not award Federal financial assistance without assigning it to a program that has been included in the Federal Assistance Listings as required in this section unless there are exigent circumstances requiring otherwise, such as timing requirements imposed by statute.
- (b) For each program that awards discretionary Federal awards, non-discretionary Federal awards, loans, insurance, or any other type of Federal financial assistance, the Federal awarding agency must, to the extent practicable, create, update, and manage Assistance Listings entries based on the authorizing statute for the program and comply with additional guidance provided by GSA in consultation with OMB to ensure consistent, accurate information is available to prospective applicants. Accordingly, Federal awarding agencies must submit the following information to GSA:
  - (1) **Program Description, Purpose, Goals, and Measurement.** A brief summary of the statutory or regulatory requirements of the program and its intended outcome. Where appropriate, the Program Description, Purpose, Goals, and Measurement should align with the strategic goals and objectives within the Federal awarding agency's performance plan and should support the Federal awarding agency's performance measurement, management, and reporting as required by Part 6 of OMB Circular A-11;
  - (2) **Identification.** Identification of whether the program makes Federal awards on a discretionary basis or the Federal awards are prescribed by Federal statute, such as in the case of formula grants.
  - (3) **Projected total amount of funds available for the program.** Estimates based on previous year funding are acceptable if current appropriations are not available at the time of the submission;

- (4) **Anticipated source of available funds.** The statutory authority for funding the program and, to the extent possible, agency, sub-agency, or, if known, the specific program unit that will issue the Federal awards, and associated funding identifier (e.g., Treasury Account Symbol(s));
- (5) **General eligibility requirements.** The statutory, regulatory or other eligibility factors or considerations that determine the applicant's qualification for Federal awards under the program (e.g., type of non-Federal entity); and
- (6) **Applicability of Single Audit Requirements.** Applicability of Single Audit Requirements as required by subpart F of this part.

## § 200.204 Notices of funding opportunities.

For discretionary grants and cooperative agreements that are competed, the Federal awarding agency must announce specific funding opportunities by providing the following information in a public notice:

- (a) **Summary information in notices of funding opportunities.** The Federal awarding agency must display the following information posted on the OMB-designated governmentwide website for funding and applying for Federal financial assistance, in a location preceding the full text of the announcement:
  - (1) Federal Awarding Agency Name;
  - (2) Funding Opportunity Title;
  - (3) Announcement Type (whether the funding opportunity is the initial announcement of this funding opportunity or a modification of a previously announced opportunity);
  - (4) Funding Opportunity Number (required, if applicable). If the Federal awarding agency has assigned or will assign a number to the funding opportunity announcement, this number must be provided;
  - (5) Assistance Listings Number(s);
  - (6) Key Dates. Key dates include due dates for applications or Executive Order 12372 submissions, as well as for any letters of intent or pre-applications. For any announcement issued before a program's application materials are available, key dates also include the date on which those materials will be released; and any other additional information, as deemed applicable by the relevant Federal awarding agency.
- (b) **Availability period.** The Federal awarding agency must generally make all funding opportunities available for application for at least 60 calendar days. The Federal awarding agency may make a determination to have a less than 60 calendar day availability period but no funding opportunity should be available for less than 30 calendar days unless exigent circumstances require as determined by the Federal awarding agency head or delegate.
- (c) **Full text of funding opportunities.** The Federal awarding agency must include the following information in the full text of each funding opportunity. For specific instructions on the content required in this section, refer to appendix I to this part.
  - (1) Full programmatic description of the funding opportunity.
  - (2) Federal award information, including sufficient information to help an applicant make an informed decision about whether to submit an application. (See also § 200.414(c)(4)).
  - (3) Specific eligibility information, including any factors or priorities that affect an applicant's or its application's eligibility for selection.

- (4) Application Preparation and Submission Information, including the applicable submission dates and time.
- (5) Application Review Information including the criteria and process to be used to evaluate applications. See also §§ 200.205 and 200.206.
- (6) Federal Award Administration Information. See also § 200.211.
- (7) Applicable terms and conditions for resulting awards, including any exceptions from these standard terms.

### **§ 200.205 Federal awarding agency review of merit of proposals.**

For discretionary Federal awards, unless prohibited by Federal statute, the Federal awarding agency must design and execute a merit review process for applications, with the objective of selecting recipients most likely to be successful in delivering results based on the program objectives outlined in section § 200.202. A merit review is an objective process of evaluating Federal award applications in accordance with written standards set forth by the Federal awarding agency. This process must be described or incorporated by reference in the applicable funding opportunity (see appendix I to this part.). See also § 200.204. The Federal awarding agency must also periodically review its merit review process.

### **§ 200.206 Federal awarding agency review of risk posed by applicants.**

#### **(a) *Review of OMB-designated repositories of governmentwide data.***

- (1) Prior to making a Federal award, the Federal awarding agency is required by the Payment Integrity Information Act of 2019, 31 U.S.C. 3301 note, and 41 U.S.C. 2313 to review information available through any OMB-designated repositories of governmentwide eligibility qualification or financial integrity information as appropriate. See also suspension and debarment requirements at 2 CFR part 180 as well as individual Federal agency suspension and debarment regulations in title 2 of the Code of Federal Regulations.
- (2) In accordance 41 U.S.C. 2313, the Federal awarding agency is required to review the non-public segment of the OMB-designated integrity and performance system accessible through SAM (currently the Federal Awardee Performance and Integrity Information System (FAPIIS)) prior to making a Federal award where the Federal share is expected to exceed the simplified acquisition threshold, defined in 41 U.S.C. 134, over the period of performance. As required by Public Law 112-239, National Defense Authorization Act for Fiscal Year 2013, prior to making a Federal award, the Federal awarding agency must consider all of the information available through FAPIIS with regard to the applicant and any immediate highest level owner, predecessor (*i.e.*; a non-Federal entity that is replaced by a successor), or subsidiary, identified for that applicant in FAPIIS, if applicable. At a minimum, the information in the system for a prior Federal award recipient must demonstrate a satisfactory record of executing programs or activities under Federal grants, cooperative agreements, or procurement awards; and integrity and business ethics. The Federal awarding agency may make a Federal award to a recipient who does not fully meet these standards, if it is determined that the information is not relevant to the current Federal award under consideration or there are specific conditions that can appropriately mitigate the effects of the non-Federal entity's risk in accordance with § 200.208.

#### **(b) *Risk evaluation.***

- (1) The Federal awarding agency must have in place a framework for evaluating the risks posed by applicants before they receive Federal awards. This evaluation may incorporate results of the evaluation of the applicant's eligibility or the quality of its application. If the Federal awarding agency determines that a Federal award will be made, special conditions that correspond to the degree of risk assessed may be applied to the Federal award. Criteria to be evaluated must be described in the announcement of funding opportunity described in § 200.204.
- (2) In evaluating risks posed by applicants, the Federal awarding agency may use a risk-based approach and may consider any items such as the following:
  - (i) **Financial stability.** Financial stability;
  - (ii) **Management systems and standards.** Quality of management systems and ability to meet the management standards prescribed in this part;
  - (iii) **History of performance.** The applicant's record in managing Federal awards, if it is a prior recipient of Federal awards, including timeliness of compliance with applicable reporting requirements, conformance to the terms and conditions of previous Federal awards, and if applicable, the extent to which any previously awarded amounts will be expended prior to future awards;
  - (iv) **Audit reports and findings.** Reports and findings from audits performed under subpart F of this part or the reports and findings of any other available audits; and
  - (v) **Ability to effectively implement requirements.** The applicant's ability to effectively implement statutory, regulatory, or other requirements imposed on non-Federal entities.
- (c) **Risk-based requirements adjustment.** The Federal awarding agency may adjust requirements when a risk-evaluation indicates that it may be merited either pre-award or post-award.
- (d) **Suspension and debarment compliance.**
  - (1) The Federal awarding agency must comply with the guidelines on governmentwide suspension and debarment in 2 CFR part 180, and must require non-Federal entities to comply with these provisions. These provisions restrict Federal awards, subawards and contracts with certain parties that are debarred, suspended or otherwise excluded from or ineligible for participation in Federal programs or activities.

[85 FR 49539, Aug. 13, 2020, as amended at 86 FR 10439, Feb. 22, 2021]

## § 200.207 Standard application requirements.

- (a) **Paperwork clearances.** The Federal awarding agency may only use application information collections approved by OMB under the Paperwork Reduction Act of 1995 and OMB's implementing regulations in 5 CFR part 1320 and in alignment with OMB-approved, governmentwide data elements available from the OMB-designated standards lead. Consistent with these requirements, OMB will authorize additional information collections only on a limited basis.
- (b) **Information collection.** If applicable, the Federal awarding agency may inform applicants and recipients that they do not need to provide certain information otherwise required by the relevant information collection.

### § 200.208 Specific conditions.

- (a) Federal awarding agencies are responsible for ensuring that specific Federal award conditions are consistent with the program design reflected in § 200.202 and include clear performance expectations of recipients as required in § 200.301.
- (b) The Federal awarding agency or pass-through entity may adjust specific Federal award conditions as needed, in accordance with this section, based on an analysis of the following factors:
  - (1) Based on the criteria set forth in § 200.206;
  - (2) The applicant or recipient's history of compliance with the general or specific terms and conditions of a Federal award;
  - (3) The applicant or recipient's ability to meet expected performance goals as described in § 200.211; or
  - (4) A responsibility determination of an applicant or recipient.
- (c) Additional Federal award conditions may include items such as the following:
  - (1) Requiring payments as reimbursements rather than advance payments;
  - (2) Withholding authority to proceed to the next phase until receipt of evidence of acceptable performance within a given performance period;
  - (3) Requiring additional, more detailed financial reports;
  - (4) Requiring additional project monitoring;
  - (5) Requiring the non-Federal entity to obtain technical or management assistance; or
  - (6) Establishing additional prior approvals.
- (d) If the Federal awarding agency or pass-through entity is imposing additional requirements, they must notify the applicant or non-Federal entity as to:
  - (1) The nature of the additional requirements;
  - (2) The reason why the additional requirements are being imposed;
  - (3) The nature of the action needed to remove the additional requirement, if applicable;
  - (4) The time allowed for completing the actions if applicable; and
  - (5) The method for requesting reconsideration of the additional requirements imposed.
- (e) Any additional requirements must be promptly removed once the conditions that prompted them have been satisfied.

### § 200.209 Certifications and representations.

Unless prohibited by the U.S. Constitution, Federal statutes or regulations, each Federal awarding agency or pass-through entity is authorized to require the non-Federal entity to submit certifications and representations required by Federal statutes, or regulations on an annual basis. Submission may be required more frequently if the non-Federal entity fails to meet a requirement of a Federal award.

## § 200.210 Pre-award costs.

For requirements on costs incurred by the applicant prior to the start date of the period of performance of the Federal award, see § 200.458.

## § 200.211 Information contained in a Federal award.

A Federal award must include the following information:

- (a) **Federal award performance goals.** Performance goals, indicators, targets, and baseline data must be included in the Federal award, where applicable. The Federal awarding agency must also specify how performance will be assessed in the terms and conditions of the Federal award, including the timing and scope of expected performance. See §§ 200.202 and 200.301 for more information on Federal award performance goals.
- (b) **General Federal award information.** The Federal awarding agency must include the following general Federal award information in each Federal award:
  - (1) Recipient name (which must match the name associated with its unique entity identifier as defined at 2 CFR 25.315);
  - (2) Recipient's unique entity identifier;
  - (3) Unique Federal Award Identification Number (FAIN);
  - (4) Federal Award Date (see Federal award date in § 200.201);
  - (5) Period of Performance Start and End Date;
  - (6) Budget Period Start and End Date;
  - (7) Amount of Federal Funds Obligated by this action;
  - (8) Total Amount of Federal Funds Obligated;
  - (9) Total Approved Cost Sharing or Matching, where applicable;
  - (10) Total Amount of the Federal Award including approved Cost Sharing or Matching;
  - (11) Budget Approved by the Federal Awarding Agency;
  - (11) Federal award description, (to comply with statutory requirements (e.g., FFATA));
  - (12) Name of Federal awarding agency and contact information for awarding official,
  - (13) Assistance Listings Number and Title;
  - (14) Identification of whether the award is R&D; and
  - (15) Indirect cost rate for the Federal award (including if the de minimis rate is charged per § 200.414).
- (c) **General terms and conditions.**
  - (1) Federal awarding agencies must incorporate the following general terms and conditions either in the Federal award or by reference, as applicable:
    - (i) **Administrative requirements.** Administrative requirements implemented by the Federal awarding agency as specified in this part.

- (ii) **National policy requirements.** These include statutory, executive order, other Presidential directive, or regulatory requirements that apply by specific reference and are not program-specific. See § 200.300 Statutory and national policy requirements.
- (iii) **Recipient integrity and performance matters.** If the total Federal share of the Federal award may include more than \$500,000 over the period of performance, the Federal awarding agency must include the term and condition available in appendix XII of this part. See also § 200.113.
- (iv) **Future budget periods.** If it is anticipated that the period of performance will include multiple budget periods, the Federal awarding agency must indicate that subsequent budget periods are subject to the availability of funds, program authority, satisfactory performance, and compliance with the terms and conditions of the Federal award.
- (v) **Termination provisions.** Federal awarding agencies must make recipients aware, in a clear and unambiguous manner, of the termination provisions in § 200.340, including the applicable termination provisions in the Federal awarding agency's regulations or in each Federal award.

- (2) The Federal award must incorporate, by reference, all general terms and conditions of the award, which must be maintained on the agency's website.
- (3) If a non-Federal entity requests a copy of the full text of the general terms and conditions, the Federal awarding agency must provide it.
- (4) Wherever the general terms and conditions are publicly available, the Federal awarding agency must maintain an archive of previous versions of the general terms and conditions, with effective dates, for use by the non-Federal entity, auditors, or others.

(d) **Federal awarding agency, program, or Federal award specific terms and conditions.** The Federal awarding agency must include with each Federal award any terms and conditions necessary to communicate requirements that are in addition to the requirements outlined in the Federal awarding agency's general terms and conditions. See also § 200.208. Whenever practicable, these specific terms and conditions also should be shared on the agency's website and in notices of funding opportunities (as outlined in § 200.204) in addition to being included in a Federal award. See also § 200.207.

(e) **Federal awarding agency requirements.** Any other information required by the Federal awarding agency.

## § 200.212 Public access to Federal award information.

- (a) In accordance with statutory requirements for Federal spending transparency (e.g., FFATA), except as noted in this section, for applicable Federal awards the Federal awarding agency must announce all Federal awards publicly and publish the required information on a publicly available OMB-designated governmentwide website.
- (b) All information posted in the designated integrity and performance system accessible through SAM (currently FAPIIS) on or after April 15, 2011 will be publicly available after a waiting period of 14 calendar days, except for:
  - (1) Past performance reviews required by Federal Government contractors in accordance with the Federal Acquisition Regulation (FAR) 48 CFR part 42, subpart 42.15;
  - (2) Information that was entered prior to April 15, 2011; or
  - (3) Information that is withdrawn during the 14-calendar day waiting period by the Federal Government official.

- (c) Nothing in this section may be construed as requiring the publication of information otherwise exempt under the Freedom of Information Act (5 U.S.C 552), or controlled unclassified information pursuant to Executive Order 13556.

### **§ 200.213 Reporting a determination that a non-Federal entity is not qualified for a Federal award.**

- (a) If a Federal awarding agency does not make a Federal award to a non-Federal entity because the official determines that the non-Federal entity does not meet either or both of the minimum qualification standards as described in § 200.206(a)(2), the Federal awarding agency must report that determination to the designated integrity and performance system accessible through SAM (currently FAPIIS), only if all of the following apply:
  - (1) The only basis for the determination described in this paragraph (a) is the non-Federal entity's prior record of executing programs or activities under Federal awards or its record of integrity and business ethics, as described in § 200.206(a)(2) (i.e., the entity was determined to be qualified based on all factors other than those two standards); and
  - (2) The total Federal share of the Federal award that otherwise would be made to the non-Federal entity is expected to exceed the simplified acquisition threshold over the period of performance.
- (b) The Federal awarding agency is not required to report a determination that a non-Federal entity is not qualified for a Federal award if they make the Federal award to the non-Federal entity and include specific award terms and conditions, as described in § 200.208.
- (c) If a Federal awarding agency reports a determination that a non-Federal entity is not qualified for a Federal award, as described in paragraph (a) of this section, the Federal awarding agency also must notify the non-Federal entity that—
  - (1) The determination was made and reported to the designated integrity and performance system accessible through SAM, and include with the notification an explanation of the basis for the determination;
  - (2) The information will be kept in the system for a period of five years from the date of the determination, as required by section 872 of Public Law 110-417, as amended (41 U.S.C. 2313), then archived;
  - (3) Each Federal awarding agency that considers making a Federal award to the non-Federal entity during that five year period must consider that information in judging whether the non-Federal entity is qualified to receive the Federal award when the total Federal share of the Federal award is expected to include an amount of Federal funding in excess of the simplified acquisition threshold over the period of performance;
  - (4) The non-Federal entity may go to the awardee integrity and performance portal accessible through SAM (currently the Contractor Performance Assessment Reporting System (CPARS)) and comment on any information the system contains about the non-Federal entity itself; and
  - (5) Federal awarding agencies will consider that non-Federal entity's comments in determining whether the non-Federal entity is qualified for a future Federal award.
- (d) If a Federal awarding agency enters information into the designated integrity and performance system accessible through SAM about a determination that a non-Federal entity is not qualified for a Federal award and subsequently:

- (1) Learns that any of that information is erroneous, the Federal awarding agency must correct the information in the system within three business days; and
  - (2) Obtains an update to that information that could be helpful to other Federal awarding agencies, the Federal awarding agency is strongly encouraged to amend the information in the system to incorporate the update in a timely way.
- (e) Federal awarding agencies must not post any information that will be made publicly available in the non-public segment of designated integrity and performance system that is covered by a disclosure exemption under the Freedom of Information Act. If the recipient asserts within seven calendar days to the Federal awarding agency that posted the information that some or all of the information made publicly available is covered by a disclosure exemption under the Freedom of Information Act, the Federal awarding agency that posted the information must remove the posting within seven calendar days of receiving the assertion. Prior to reposting the releasable information, the Federal awarding agency must resolve the issue in accordance with the agency's Freedom of Information Act procedures.

### **§ 200.214 Suspension and debarment.**

Non-Federal entities are subject to the non-procurement debarment and suspension regulations implementing Executive Orders 12549 and 12689, 2 CFR part 180. The regulations in 2 CFR part 180 restrict awards, subawards, and contracts with certain parties that are debarred, suspended, or otherwise excluded from or ineligible for participation in Federal assistance programs or activities.

### **§ 200.215 Never contract with the enemy.**

Federal awarding agencies and recipients are subject to the regulations implementing Never Contract with the Enemy in 2 CFR part 183. The regulations in 2 CFR part 183 affect covered contracts, grants and cooperative agreements that are expected to exceed \$50,000 within the period of performance, are performed outside the United States and its territories, and are in support of a contingency operation in which members of the Armed Forces are actively engaged in hostilities.

### **§ 200.216 Prohibition on certain telecommunications and video surveillance services or equipment.**

- (a) Recipients and subrecipients are prohibited from obligating or expending loan or grant funds to:
- (1) Procure or obtain;
  - (2) Extend or renew a contract to procure or obtain; or
  - (3) Enter into a contract (or extend or renew a contract) to procure or obtain equipment, services, or systems that uses covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology as part of any system. As described in Public Law 115-232, section 889, covered telecommunications equipment is telecommunications equipment produced by Huawei Technologies Company or ZTE Corporation (or any subsidiary or affiliate of such entities).
    - (i) For the purpose of public safety, security of government facilities, physical security surveillance of critical infrastructure, and other national security purposes, video surveillance and telecommunications equipment produced by Hytera Communications Corporation, Hangzhou Hikvision Digital Technology Company, or Dahua Technology Company (or any subsidiary or affiliate of such entities).

- (ii) Telecommunications or video surveillance services provided by such entities or using such equipment.
- (iii) Telecommunications or video surveillance equipment or services produced or provided by an entity that the Secretary of Defense, in consultation with the Director of the National Intelligence or the Director of the Federal Bureau of Investigation, reasonably believes to be an entity owned or controlled by, or otherwise connected to, the government of a covered foreign country.
- (b) In implementing the prohibition under Public Law 115-232, section 889, subsection (f), paragraph (1), heads of executive agencies administering loan, grant, or subsidy programs shall prioritize available funding and technical support to assist affected businesses, institutions and organizations as is reasonably necessary for those affected entities to transition from covered communications equipment and services, to procure replacement equipment and services, and to ensure that communications service to users and customers is sustained.
- (c) See Public Law 115-232, section 889 for additional information.
- (d) See also § 200.471.

## Subpart D—Post Federal Award Requirements

Link to an amendment published at 89 FR 30136, Apr. 22, 2024.

**Source:** 85 FR 49543, Aug. 13, 2020, unless otherwise noted.

### § 200.300 Statutory and national policy requirements.

- (a) The Federal awarding agency must manage and administer the Federal award in a manner so as to ensure that Federal funding is expended and associated programs are implemented in full accordance with the U.S. Constitution, Federal Law, and public policy requirements: Including, but not limited to, those protecting free speech, religious liberty, public welfare, the environment, and prohibiting discrimination. The Federal awarding agency must communicate to the non-Federal entity all relevant public policy requirements, including those in general appropriations provisions, and incorporate them either directly or by reference in the terms and conditions of the Federal award.
- (b) The non-Federal entity is responsible for complying with all requirements of the Federal award. For all Federal awards, this includes the provisions of FFATA, which includes requirements on executive compensation, and also requirements implementing the Act for the non-Federal entity at 2 CFR parts 25 and 170. See also statutory requirements for whistleblower protections at 10 U.S.C. 2409, 41 U.S.C. 4712, and 10 U.S.C. 2324, 41 U.S.C. 4304 and 4310.

### § 200.301 Performance measurement.

- (a) The Federal awarding agency must measure the recipient's performance to show achievement of program goals and objectives, share lessons learned, improve program outcomes, and foster adoption of promising practices. Program goals and objectives should be derived from program planning and design. See § 200.202 for more information. Where appropriate, the Federal award may include specific program goals, indicators, targets, baseline data, data collection, or expected outcomes (such as outputs, or

services performance or public impacts of any of these) with an expected timeline for accomplishment. Where applicable, this should also include any performance measures or independent sources of data that may be used to measure progress. The Federal awarding agency will determine how performance progress is measured, which may differ by program. Performance measurement progress must be both measured and reported. See § 200.329 for more information on monitoring program performance. The Federal awarding agency may include program-specific requirements, as applicable. These requirements must be aligned, to the extent permitted by law, with the Federal awarding agency strategic goals, strategic objectives or performance goals that are relevant to the program. See also OMB Circular A-11, Preparation, Submission, and Execution of the Budget Part 6.

- (b) The Federal awarding agency should provide recipients with clear performance goals, indicators, targets, and baseline data as described in § 200.211. Performance reporting frequency and content should be established to not only allow the Federal awarding agency to understand the recipient progress but also to facilitate identification of promising practices among recipients and build the evidence upon which the Federal awarding agency's program and performance decisions are made. See § 200.328 for more information on reporting program performance.
- (c) This provision is designed to operate in tandem with evidence-related statutes (e.g.; The Foundations for Evidence-Based Policymaking Act of 2018, which emphasizes collaboration and coordination to advance data and evidence-building functions in the Federal government). The Federal awarding agency should also specify any requirements of award recipients' participation in a federally funded evaluation, and any evaluation activities required to be conducted by the Federal award.

## § 200.302 Financial management.

- (a) Each state must expend and account for the Federal award in accordance with state laws and procedures for expending and accounting for the state's own funds. In addition, the state's and the other non-Federal entity's financial management systems, including records documenting compliance with Federal statutes, regulations, and the terms and conditions of the Federal award, must be sufficient to permit the preparation of reports required by general and program-specific terms and conditions; and the tracing of funds to a level of expenditures adequate to establish that such funds have been used according to the Federal statutes, regulations, and the terms and conditions of the Federal award. See also § 200.450.
- (b) The financial management system of each non-Federal entity must provide for the following (see also §§ 200.334, 200.335, 200.336, and 200.337):
  - (1) Identification, in its accounts, of all Federal awards received and expended and the Federal programs under which they were received. Federal program and Federal award identification must include, as applicable, the Assistance Listings title and number, Federal award identification number and year, name of the Federal agency, and name of the pass-through entity, if any.
  - (2) Accurate, current, and complete disclosure of the financial results of each Federal award or program in accordance with the reporting requirements set forth in §§ 200.328 and 200.329. If a Federal awarding agency requires reporting on an accrual basis from a recipient that maintains its records on other than an accrual basis, the recipient must not be required to establish an accrual accounting system. This recipient may develop accrual data for its reports on the basis of an analysis of the documentation on hand. Similarly, a pass-through entity must not require a subrecipient to establish an accrual accounting system and must allow the subrecipient to develop accrual data for its reports on the basis of an analysis of the documentation on hand.

- (3) Records that identify adequately the source and application of funds for federally-funded activities. These records must contain information pertaining to Federal awards, authorizations, financial obligations, unobligated balances, assets, expenditures, income and interest and be supported by source documentation.
- (4) Effective control over, and accountability for, all funds, property, and other assets. The non-Federal entity must adequately safeguard all assets and assure that they are used solely for authorized purposes. See § 200.303.
- (5) Comparison of expenditures with budget amounts for each Federal award.
- (6) Written procedures to implement the requirements of § 200.305.
- (7) Written procedures for determining the allowability of costs in accordance with subpart E of this part and the terms and conditions of the Federal award.

### § 200.303 Internal controls.

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework”, issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).
- (b) Comply with the U.S. Constitution, Federal statutes, regulations, and the terms and conditions of the Federal awards.
- (c) Evaluate and monitor the non-Federal entity's compliance with statutes, regulations and the terms and conditions of Federal awards.
- (d) Take prompt action when instances of noncompliance are identified including noncompliance identified in audit findings.
- (e) Take reasonable measures to safeguard protected personally identifiable information and other information the Federal awarding agency or pass-through entity designates as sensitive or the non-Federal entity considers sensitive consistent with applicable Federal, State, local, and tribal laws regarding privacy and responsibility over confidentiality.

### § 200.304 Bonds.

The Federal awarding agency may include a provision on bonding, insurance, or both in the following circumstances:

- (a) Where the Federal Government guarantees or insures the repayment of money borrowed by the recipient, the Federal awarding agency, at its discretion, may require adequate bonding and insurance if the bonding and insurance requirements of the non-Federal entity are not deemed adequate to protect the interest of the Federal Government.
- (b) The Federal awarding agency may require adequate fidelity bond coverage where the non-Federal entity lacks sufficient coverage to protect the Federal Government's interest.

- (c) Where bonds are required in the situations described above, the bonds must be obtained from companies holding certificates of authority as acceptable sureties, as prescribed in 31 CFR part 223.

### § 200.305 Federal payment.

- (a) For states, payments are governed by Treasury-State Cash Management Improvement Act (CMIA) agreements and default procedures codified at 31 CFR part 205 and Treasury Financial Manual (TFM) 4A-2000, "Overall Disbursing Rules for All Federal Agencies".
- (b) For non-Federal entities other than states, payments methods must minimize the time elapsing between the transfer of funds from the United States Treasury or the pass-through entity and the disbursement by the non-Federal entity whether the payment is made by electronic funds transfer, or issuance or redemption of checks, warrants, or payment by other means. See also § 200.302(b)(6). Except as noted elsewhere in this part, Federal agencies must require recipients to use only OMB-approved, governmentwide information collection requests to request payment.
  - (1) The non-Federal entity must be paid in advance, provided it maintains or demonstrates the willingness to maintain both written procedures that minimize the time elapsing between the transfer of funds and disbursement by the non-Federal entity, and financial management systems that meet the standards for fund control and accountability as established in this part. Advance payments to a non-Federal entity must be limited to the minimum amounts needed and be timed to be in accordance with the actual, immediate cash requirements of the non-Federal entity in carrying out the purpose of the approved program or project. The timing and amount of advance payments must be as close as is administratively feasible to the actual disbursements by the non-Federal entity for direct program or project costs and the proportionate share of any allowable indirect costs. The non-Federal entity must make timely payment to contractors in accordance with the contract provisions.
  - (2) Whenever possible, advance payments must be consolidated to cover anticipated cash needs for all Federal awards made by the Federal awarding agency to the recipient.
    - (i) Advance payment mechanisms include, but are not limited to, Treasury check and electronic funds transfer and must comply with applicable guidance in 31 CFR part 208.
    - (ii) Non-Federal entities must be authorized to submit requests for advance payments and reimbursements at least monthly when electronic fund transfers are not used, and as often as they like when electronic transfers are used, in accordance with the provisions of the Electronic Fund Transfer Act (15 U.S.C. 1693-1693r).
  - (3) Reimbursement is the preferred method when the requirements in this paragraph (b) cannot be met, when the Federal awarding agency sets a specific condition per § 200.208, or when the non-Federal entity requests payment by reimbursement. This method may be used on any Federal award for construction, or if the major portion of the construction project is accomplished through private market financing or Federal loans, and the Federal award constitutes a minor portion of the project. When the reimbursement method is used, the Federal awarding agency or pass-through entity must make payment within 30 calendar days after receipt of the billing, unless the Federal awarding agency or pass-through entity reasonably believes the request to be improper.
  - (4) If the non-Federal entity cannot meet the criteria for advance payments and the Federal awarding agency or pass-through entity has determined that reimbursement is not feasible because the non-Federal entity lacks sufficient working capital, the Federal awarding agency or pass-through entity may provide cash on a working capital advance basis. Under this procedure, the Federal awarding

agency or pass-through entity must advance cash payments to the non-Federal entity to cover its estimated disbursement needs for an initial period generally geared to the non-Federal entity's disbursing cycle. Thereafter, the Federal awarding agency or pass-through entity must reimburse the non-Federal entity for its actual cash disbursements. Use of the working capital advance method of payment requires that the pass-through entity provide timely advance payments to any subrecipients in order to meet the subrecipient's actual cash disbursements. The working capital advance method of payment must not be used by the pass-through entity if the reason for using this method is the unwillingness or inability of the pass-through entity to provide timely advance payments to the subrecipient to meet the subrecipient's actual cash disbursements.

- (5) To the extent available, the non-Federal entity must disburse funds available from program income (including repayments to a revolving fund), rebates, refunds, contract settlements, audit recoveries, and interest earned on such funds before requesting additional cash payments.
- (6) Unless otherwise required by Federal statutes, payments for allowable costs by non-Federal entities must not be withheld at any time during the period of performance unless the conditions of § 200.208, subpart D of this part, including § 200.339, or one or more of the following applies:
  - (i) The non-Federal entity has failed to comply with the project objectives, Federal statutes, regulations, or the terms and conditions of the Federal award.
  - (ii) The non-Federal entity is delinquent in a debt to the United States as defined in OMB Circular A-129, "Policies for Federal Credit Programs and Non-Tax Receivables." Under such conditions, the Federal awarding agency or pass-through entity may, upon reasonable notice, inform the non-Federal entity that payments must not be made for financial obligations incurred after a specified date until the conditions are corrected or the indebtedness to the Federal Government is liquidated.
  - (iii) A payment withheld for failure to comply with Federal award conditions, but without suspension of the Federal award, must be released to the non-Federal entity upon subsequent compliance. When a Federal award is suspended, payment adjustments will be made in accordance with § 200.343.
  - (iv) A payment must not be made to a non-Federal entity for amounts that are withheld by the non-Federal entity from payment to contractors to assure satisfactory completion of work. A payment must be made when the non-Federal entity actually disburses the withheld funds to the contractors or to escrow accounts established to assure satisfactory completion of work.
- (7) Standards governing the use of banks and other institutions as depositories of advance payments under Federal awards are as follows.
  - (i) The Federal awarding agency and pass-through entity must not require separate depository accounts for funds provided to a non-Federal entity or establish any eligibility requirements for depositories for funds provided to the non-Federal entity. However, the non-Federal entity must be able to account for funds received, obligated, and expended.
  - (ii) Advance payments of Federal funds must be deposited and maintained in insured accounts whenever possible.
- (8) The non-Federal entity must maintain advance payments of Federal awards in interest-bearing accounts, unless the following apply:
  - (i) The non-Federal entity receives less than \$250,000 in Federal awards per year.

- (ii) The best reasonably available interest-bearing account would not be expected to earn interest in excess of \$500 per year on Federal cash balances.
  - (iii) The depository would require an average or minimum balance so high that it would not be feasible within the expected Federal and non-Federal cash resources.
  - (iv) A foreign government or banking system prohibits or precludes interest-bearing accounts.
- (9) Interest earned amounts up to \$500 per year may be retained by the non-Federal entity for administrative expense. Any additional interest earned on Federal advance payments deposited in interest-bearing accounts must be remitted annually to the Department of Health and Human Services Payment Management System (PMS) through an electronic medium using either Automated Clearing House (ACH) network or a Fedwire Funds Service payment.
- (i) For returning interest on Federal awards paid through PMS, the refund should:
    - (A) Provide an explanation stating that the refund is for interest;
    - (B) List the PMS Payee Account Number(s) (PANs);
    - (C) List the Federal award number(s) for which the interest was earned; and
    - (D) Make returns payable to: Department of Health and Human Services.
  - (ii) For returning interest on Federal awards not paid through PMS, the refund should:
    - (A) Provide an explanation stating that the refund is for interest;
    - (B) Include the name of the awarding agency;
    - (C) List the Federal award number(s) for which the interest was earned; and
    - (D) Make returns payable to: Department of Health and Human Services.
- (10) Funds, principal, and excess cash returns must be directed to the original Federal agency payment system. The non-Federal entity should review instructions from the original Federal agency payment system. Returns should include the following information:
- (i) Payee Account Number (PAN), if the payment originated from PMS, or Agency information to indicate whom to credit the funding if the payment originated from ASAP, NSF, or another Federal agency payment system.
  - (ii) PMS document number and subaccount(s), if the payment originated from PMS, or relevant account numbers if the payment originated from another Federal agency payment system.
  - (iii) The reason for the return (e.g., excess cash, funds not spent, interest, part interest part other, etc.)
- (11) When returning funds or interest to PMS you must include the following as applicable:
- (i) For ACH Returns:

Routing Number: 051036706

Account number: 303000

Bank Name and Location: Credit Gateway—ACH Receiver St. Paul, MN

(ii) For Fedwire Returns<sup>1</sup>:

Routing Number: 021030004

Account number: 75010501

Bank Name and Location: Federal Reserve Bank Treas NYC/Funds Transfer Division New York, NY

<sup>1</sup> Please note that the organization initiating payment is likely to incur a charge from their Financial Institution for this type of payment.

(iii) For International ACH Returns:

Beneficiary Account: Federal Reserve Bank of New York/ITS (FRBNY/ITS)

Bank: Citibank N.A. (New York)

Swift Code: CITIUS33

Account Number: 36838868

Bank Address: 388 Greenwich Street, New York, NY 10013 USA

Payment Details (Line 70): Agency Locator Code (ALC): 75010501

Name (abbreviated when possible) and ALC Agency POC

(iv) For recipients that do not have electronic remittance capability, please make check<sup>2</sup> payable to: "The Department of Health and Human Services."

Mail Check to Treasury approved lockbox:

HHS Program Support Center, P.O. Box 530231, Atlanta, GA 30353-0231

<sup>2</sup> Please allow 4-6 weeks for processing of a payment by check to be applied to the appropriate PMS account.

(v) Questions can be directed to PMS at 877-614-5533 or [PMSSupport@psc.hhs.gov](mailto:PMSSupport@psc.hhs.gov).

## § 200.306 Cost sharing or matching.

- (a) Under Federal research proposals, voluntary committed cost sharing is not expected. It cannot be used as a factor during the merit review of applications or proposals, but may be considered if it is both in accordance with Federal awarding agency regulations and specified in a notice of funding opportunity. Criteria for considering voluntary committed cost sharing and any other program policy factors that may be used to determine who may receive a Federal award must be explicitly described in the notice of funding opportunity. See also §§ 200.414 and 200.204 and appendix I to this part.

- (b) For all Federal awards, any shared costs or matching funds and all contributions, including cash and third-party in-kind contributions, must be accepted as part of the non-Federal entity's cost sharing or matching when such contributions meet all of the following criteria:
  - (1) Are verifiable from the non-Federal entity's records;
  - (2) Are not included as contributions for any other Federal award;
  - (3) Are necessary and reasonable for accomplishment of project or program objectives;
  - (4) Are allowable under subpart E of this part;
  - (5) Are not paid by the Federal Government under another Federal award, except where the Federal statute authorizing a program specifically provides that Federal funds made available for such program can be applied to matching or cost sharing requirements of other Federal programs;
  - (6) Are provided for in the approved budget when required by the Federal awarding agency; and
  - (7) Conform to other provisions of this part, as applicable.
- (c) Unrecovered indirect costs, including indirect costs on cost sharing or matching may be included as part of cost sharing or matching only with the prior approval of the Federal awarding agency. Unrecovered indirect cost means the difference between the amount charged to the Federal award and the amount which could have been charged to the Federal award under the non-Federal entity's approved negotiated indirect cost rate.
- (d) Values for non-Federal entity contributions of services and property must be established in accordance with the cost principles in subpart E of this part. If a Federal awarding agency authorizes the non-Federal entity to donate buildings or land for construction/facilities acquisition projects or long-term use, the value of the donated property for cost sharing or matching must be the lesser of paragraph (d)(1) or (2) of this section.
  - (1) The value of the remaining life of the property recorded in the non-Federal entity's accounting records at the time of donation.
  - (2) The current fair market value. However, when there is sufficient justification, the Federal awarding agency may approve the use of the current fair market value of the donated property, even if it exceeds the value described in paragraph (d)(1) of this section at the time of donation.
- (e) Volunteer services furnished by third-party professional and technical personnel, consultants, and other skilled and unskilled labor may be counted as cost sharing or matching if the service is an integral and necessary part of an approved project or program. Rates for third-party volunteer services must be consistent with those paid for similar work by the non-Federal entity. In those instances in which the required skills are not found in the non-Federal entity, rates must be consistent with those paid for similar work in the labor market in which the non-Federal entity competes for the kind of services involved. In either case, paid fringe benefits that are reasonable, necessary, allocable, and otherwise allowable may be included in the valuation.
- (f) When a third-party organization furnishes the services of an employee, these services must be valued at the employee's regular rate of pay plus an amount of fringe benefits that is reasonable, necessary, allocable, and otherwise allowable, and indirect costs at either the third-party organization's approved federally-negotiated indirect cost rate or, a rate in accordance with § 200.414(d) provided these services

employ the same skill(s) for which the employee is normally paid. Where donated services are treated as indirect costs, indirect cost rates will separate the value of the donated services so that reimbursement for the donated services will not be made.

- (g) Donated property from third parties may include such items as equipment, office supplies, laboratory supplies, or workshop and classroom supplies. Value assessed to donated property included in the cost sharing or matching share must not exceed the fair market value of the property at the time of the donation.
- (h) The method used for determining cost sharing or matching for third-party-donated equipment, buildings and land for which title passes to the non-Federal entity may differ according to the purpose of the Federal award, if paragraph (h)(1) or (2) of this section applies.
  - (1) If the purpose of the Federal award is to assist the non-Federal entity in the acquisition of equipment, buildings or land, the aggregate value of the donated property may be claimed as cost sharing or matching.
  - (2) If the purpose of the Federal award is to support activities that require the use of equipment, buildings or land, normally only depreciation charges for equipment and buildings may be made. However, the fair market value of equipment or other capital assets and fair rental charges for land may be allowed, provided that the Federal awarding agency has approved the charges. See also § 200.420.
- (i) The value of donated property must be determined in accordance with the usual accounting policies of the non-Federal entity, with the following qualifications:
  - (1) The value of donated land and buildings must not exceed its fair market value at the time of donation to the non-Federal entity as established by an independent appraiser (e.g., certified real property appraiser or General Services Administration representative) and certified by a responsible official of the non-Federal entity as required by the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended, (42 U.S.C. 4601-4655) (Uniform Act) except as provided in the implementing regulations at 49 CFR part 24, "Uniform Relocation Assistance And Real Property Acquisition For Federal And Federally-Assisted Programs".
  - (2) The value of donated equipment must not exceed the fair market value of equipment of the same age and condition at the time of donation.
  - (3) The value of donated space must not exceed the fair rental value of comparable space as established by an independent appraisal of comparable space and facilities in a privately-owned building in the same locality.
  - (4) The value of loaned equipment must not exceed its fair rental value.
- (j) For third-party in-kind contributions, the fair market value of goods and services must be documented and to the extent feasible supported by the same methods used internally by the non-Federal entity.
- (k) For IHEs, see also OMB memorandum M-01-06, dated January 5, 2001, Clarification of OMB A-21 Treatment of Voluntary Uncommitted Cost Sharing and Tuition Remission Costs.

### § 200.307 Program income.

- (a) **General.** Non-Federal entities are encouraged to earn income to defray program costs where appropriate.

- (b) **Cost of generating program income.** If authorized by Federal regulations or the Federal award, costs incidental to the generation of program income may be deducted from gross income to determine program income, provided these costs have not been charged to the Federal award.
- (c) **Governmental revenues.** Taxes, special assessments, levies, fines, and other such revenues raised by a non-Federal entity are not program income unless the revenues are specifically identified in the Federal award or Federal awarding agency regulations as program income.
- (d) **Property.** Proceeds from the sale of real property, equipment, or supplies are not program income; such proceeds will be handled in accordance with the requirements of the Property Standards §§ 200.311, 200.313, and 200.314, or as specifically identified in Federal statutes, regulations, or the terms and conditions of the Federal award.
- (e) **Use of program income.** If the Federal awarding agency does not specify in its regulations or the terms and conditions of the Federal award, or give prior approval for how program income is to be used, paragraph (e)(1) of this section must apply. For Federal awards made to IHEs and nonprofit research institutions, if the Federal awarding agency does not specify in its regulations or the terms and conditions of the Federal award how program income is to be used, paragraph (e)(2) of this section must apply. In specifying alternatives to paragraphs (e)(1) and (2) of this section, the Federal awarding agency may distinguish between income earned by the recipient and income earned by subrecipients and between the sources, kinds, or amounts of income. When the Federal awarding agency authorizes the approaches in paragraphs (e)(2) and (3) of this section, program income in excess of any amounts specified must also be deducted from expenditures.
  - (1) **Deduction.** Ordinarily program income must be deducted from total allowable costs to determine the net allowable costs. Program income must be used for current costs unless the Federal awarding agency authorizes otherwise. Program income that the non-Federal entity did not anticipate at the time of the Federal award must be used to reduce the Federal award and non-Federal entity contributions rather than to increase the funds committed to the project.
  - (2) **Addition.** With prior approval of the Federal awarding agency (except for IHEs and nonprofit research institutions, as described in this paragraph (e)) program income may be added to the Federal award by the Federal agency and the non-Federal entity. The program income must be used for the purposes and under the conditions of the Federal award.
  - (3) **Cost sharing or matching.** With prior approval of the Federal awarding agency, program income may be used to meet the cost sharing or matching requirement of the Federal award. The amount of the Federal award remains the same.
- (f) **Income after the period of performance.** There are no Federal requirements governing the disposition of income earned after the end of the period of performance for the Federal award, unless the Federal awarding agency regulations or the terms and conditions of the Federal award provide otherwise. The Federal awarding agency may negotiate agreements with recipients regarding appropriate uses of income earned after the period of performance as part of the grant closeout process. See also § 200.344.
- (g) **License fees and royalties.** Unless the Federal statute, regulations, or terms and conditions for the Federal award provide otherwise, the non-Federal entity is not accountable to the Federal awarding agency with respect to program income earned from license fees and royalties for copyrighted material, patents, patent applications, trademarks, and inventions made under a Federal award to which 37 CFR part 401 is applicable.

## § 200.308 Revision of budget and program plans.

- (a) The approved budget for the Federal award summarizes the financial aspects of the project or program as approved during the Federal award process. It may include either the Federal and non-Federal share (see definition for *Federal share* in § 200.1) or only the Federal share, depending upon Federal awarding agency requirements. The budget and program plans include considerations for performance and program evaluation purposes whenever required in accordance with the terms and conditions of the award.
- (b) Recipients are required to report deviations from budget or project scope or objective, and request prior approvals from Federal awarding agencies for budget and program plan revisions, in accordance with this section.
- (c) For non-construction Federal awards, recipients must request prior approvals from Federal awarding agencies for the following program or budget-related reasons:
  - (1) Change in the scope or the objective of the project or program (even if there is no associated budget revision requiring prior written approval).
  - (2) Change in a key person specified in the application or the Federal award.
  - (3) The disengagement from the project for more than three months, or a 25 percent reduction in time devoted to the project, by the approved project director or principal investigator.
  - (4) The inclusion, unless waived by the Federal awarding agency, of costs that require prior approval in accordance with subpart E of this part as applicable.
  - (5) The transfer of funds budgeted for participant support costs to other categories of expense.
  - (6) Unless described in the application and funded in the approved Federal awards, the subawarding, transferring or contracting out of any work under a Federal award, including fixed amount subawards as described in § 200.333. This provision does not apply to the acquisition of supplies, material, equipment or general support services.
  - (7) Changes in the approved cost-sharing or matching provided by the non-Federal entity.
  - (8) The need arises for additional Federal funds to complete the project.
- (d) No other prior approval requirements for specific items may be imposed unless an exception has been approved by OMB. See also §§ 200.102 and 200.407.
- (e) Except for requirements listed in paragraphs (c)(1) through (8) of this section, the Federal awarding agency is authorized, at its option, to waive other cost-related and administrative prior written approvals contained in subparts D and E of this part. Such waivers may include authorizing recipients to do any one or more of the following:
  - (1) Incur project costs 90 calendar days before the Federal awarding agency makes the Federal award. Expenses more than 90 calendar days pre-award require prior approval of the Federal awarding agency. All costs incurred before the Federal awarding agency makes the Federal award are at the recipient's risk (*i.e.*, the Federal awarding agency is not required to reimburse such costs if for any reason the recipient does not receive a Federal award or if the Federal award is less than anticipated and inadequate to cover such costs). See also § 200.458.
  - (2) Initiate a one-time extension of the period of performance by up to 12 months unless one or more of the conditions outlined in paragraphs (e)(2)(i) through (iii) of this section apply. For one-time extensions, the recipient must notify the Federal awarding agency in writing with the supporting

reasons and revised period of performance at least 10 calendar days before the end of the period of performance specified in the Federal award. This one-time extension must not be exercised merely for the purpose of using unobligated balances. Extensions require explicit prior Federal awarding agency approval when:

- (i) The terms and conditions of the Federal award prohibit the extension.
  - (ii) The extension requires additional Federal funds.
  - (iii) The extension involves any change in the approved objectives or scope of the project.
- (3) Carry forward unobligated balances to subsequent budget periods.
  - (4) For Federal awards that support research, unless the Federal awarding agency provides otherwise in the Federal award or in the Federal awarding agency's regulations, the prior approval requirements described in this paragraph (e) are automatically waived (*i.e.*, recipients need not obtain such prior approvals) unless one of the conditions included in paragraph (e)(2) of this section applies.
- (f) The Federal awarding agency may, at its option, restrict the transfer of funds among direct cost categories or programs, functions and activities for Federal awards in which the Federal share of the project exceeds the simplified acquisition threshold and the cumulative amount of such transfers exceeds or is expected to exceed 10 percent of the total budget as last approved by the Federal awarding agency. The Federal awarding agency cannot permit a transfer that would cause any Federal appropriation to be used for purposes other than those consistent with the appropriation.
  - (g) All other changes to non-construction budgets, except for the changes described in paragraph (c) of this section, do not require prior approval (see also § 200.407).
  - (h) For construction Federal awards, the recipient must request prior written approval promptly from the Federal awarding agency for budget revisions whenever paragraph (h)(1), (2), or (3) of this section applies:
    - (1) The revision results from changes in the scope or the objective of the project or program.
    - (2) The need arises for additional Federal funds to complete the project.
    - (3) A revision is desired which involves specific costs for which prior written approval requirements may be imposed consistent with applicable OMB cost principles listed in subpart E.
    - (4) No other prior approval requirements for budget revisions may be imposed unless an exception has been approved by OMB.
    - (5) When a Federal awarding agency makes a Federal award that provides support for construction and non-construction work, the Federal awarding agency may require the recipient to obtain prior approval from the Federal awarding agency before making any fund or budget transfers between the two types of work supported.
  - (i) When requesting approval for budget revisions, the recipient must use the same format for budget information that was used in the application, unless the Federal awarding agency indicates a letter of request suffices.
  - (j) Within 30 calendar days from the date of receipt of the request for budget revisions, the Federal awarding agency must review the request and notify the recipient whether the budget revisions have been approved. If the revision is still under consideration at the end of 30 calendar days, the Federal awarding agency must inform the recipient in writing of the date when the recipient may expect the decision.

## § 200.309 Modifications to Period of Performance.

If a Federal awarding agency or pass-through entity approves an extension, or if a recipient extends under § 200.308(e)(2), the Period of Performance will be amended to end at the completion of the extension. If a termination occurs, the Period of Performance will be amended to end upon the effective date of termination. If a renewal award is issued, a distinct Period of Performance will begin.

### PROPERTY STANDARDS

## § 200.310 Insurance coverage.

The non-Federal entity must, at a minimum, provide the equivalent insurance coverage for real property and equipment acquired or improved with Federal funds as provided to property owned by the non-Federal entity. Federally-owned property need not be insured unless required by the terms and conditions of the Federal award.

## § 200.311 Real property.

- (a) **Title.** Subject to the requirements and conditions set forth in this section, title to real property acquired or improved under a Federal award will vest upon acquisition in the non-Federal entity.
- (b) **Use.** Except as otherwise provided by Federal statutes or by the Federal awarding agency, real property will be used for the originally authorized purpose as long as needed for that purpose, during which time the non-Federal entity must not dispose of or encumber its title or other interests.
- (c) **Disposition.** When real property is no longer needed for the originally authorized purpose, the non-Federal entity must obtain disposition instructions from the Federal awarding agency or pass-through entity. The instructions must provide for one of the following alternatives:
  - (1) Retain title after compensating the Federal awarding agency. The amount paid to the Federal awarding agency will be computed by applying the Federal awarding agency's percentage of participation in the cost of the original purchase (and costs of any improvements) to the fair market value of the property. However, in those situations where the non-Federal entity is disposing of real property acquired or improved with a Federal award and acquiring replacement real property under the same Federal award, the net proceeds from the disposition may be used as an offset to the cost of the replacement property.
  - (2) Sell the property and compensate the Federal awarding agency. The amount due to the Federal awarding agency will be calculated by applying the Federal awarding agency's percentage of participation in the cost of the original purchase (and cost of any improvements) to the proceeds of the sale after deduction of any actual and reasonable selling and fixing-up expenses. If the Federal award has not been closed out, the net proceeds from sale may be offset against the original cost of the property. When the non-Federal entity is directed to sell property, sales procedures must be followed that provide for competition to the extent practicable and result in the highest possible return.
  - (3) Transfer title to the Federal awarding agency or to a third party designated/approved by the Federal awarding agency. The non-Federal entity is entitled to be paid an amount calculated by applying the non-Federal entity's percentage of participation in the purchase of the real property (and cost of any improvements) to the current fair market value of the property.

## § 200.312 Federally-owned and exempt property.

- (a) Title to federally-owned property remains vested in the Federal Government. The non-Federal entity must submit annually an inventory listing of federally-owned property in its custody to the Federal awarding agency. Upon completion of the Federal award or when the property is no longer needed, the non-Federal entity must report the property to the Federal awarding agency for further Federal agency utilization.
- (b) If the Federal awarding agency has no further need for the property, it must declare the property excess and report it for disposal to the appropriate Federal disposal authority, unless the Federal awarding agency has statutory authority to dispose of the property by alternative methods (e.g., the authority provided by the Federal Technology Transfer Act (15 U.S.C. 3710 (i)) to donate research equipment to educational and nonprofit organizations in accordance with Executive Order 12999, "Educational Technology: Ensuring Opportunity for All Children in the Next Century."). The Federal awarding agency must issue appropriate instructions to the non-Federal entity.
- (c) Exempt property means property acquired under a Federal award where the Federal awarding agency has chosen to vest title to the property to the non-Federal entity without further responsibility to the Federal Government, based upon the explicit terms and conditions of the Federal award. The Federal awarding agency may exercise this option when statutory authority exists. Absent statutory authority and specific terms and conditions of the Federal award, title to exempt property acquired under the Federal award remains with the Federal Government.

## § 200.313 Equipment.

See also § 200.439.

- (a) **Title.** Subject to the requirements and conditions set forth in this section, title to equipment acquired under a Federal award will vest upon acquisition in the non-Federal entity. Unless a statute specifically authorizes the Federal agency to vest title in the non-Federal entity without further responsibility to the Federal Government, and the Federal agency elects to do so, the title must be a conditional title. Title must vest in the non-Federal entity subject to the following conditions:
  - (1) Use the equipment for the authorized purposes of the project during the period of performance, or until the property is no longer needed for the purposes of the project.
  - (2) Not encumber the property without approval of the Federal awarding agency or pass-through entity.
  - (3) Use and dispose of the property in accordance with paragraphs (b), (c), and (e) of this section.
- (b) **General.** A state must use, manage and dispose of equipment acquired under a Federal award by the state in accordance with state laws and procedures. Other non-Federal entities must follow paragraphs (c) through (e) of this section.
- (c) **Use.**
  - (1) Equipment must be used by the non-Federal entity in the program or project for which it was acquired as long as needed, whether or not the project or program continues to be supported by the Federal award, and the non-Federal entity must not encumber the property without prior approval of the Federal awarding agency. The Federal awarding agency may require the submission of the applicable common form for equipment. When no longer needed for the original program or project, the equipment may be used in other activities supported by the Federal awarding agency, in the following order of priority:

- (i) Activities under a Federal award from the Federal awarding agency which funded the original program or project, then
  - (ii) Activities under Federal awards from other Federal awarding agencies. This includes consolidated equipment for information technology systems.
- (2) During the time that equipment is used on the project or program for which it was acquired, the non-Federal entity must also make equipment available for use on other projects or programs currently or previously supported by the Federal Government, provided that such use will not interfere with the work on the projects or program for which it was originally acquired. First preference for other use must be given to other programs or projects supported by Federal awarding agency that financed the equipment and second preference must be given to programs or projects under Federal awards from other Federal awarding agencies. Use for non-federally-funded programs or projects is also permissible. User fees should be considered if appropriate.
- (3) Notwithstanding the encouragement in § 200.307 to earn program income, the non-Federal entity must not use equipment acquired with the Federal award to provide services for a fee that is less than private companies charge for equivalent services unless specifically authorized by Federal statute for as long as the Federal Government retains an interest in the equipment.
- (4) When acquiring replacement equipment, the non-Federal entity may use the equipment to be replaced as a trade-in or sell the property and use the proceeds to offset the cost of the replacement property.
- (d) **Management requirements.** Procedures for managing equipment (including replacement equipment), whether acquired in whole or in part under a Federal award, until disposition takes place will, as a minimum, meet the following requirements:
  - (1) Property records must be maintained that include a description of the property, a serial number or other identification number, the source of funding for the property (including the FAIN), who holds title, the acquisition date, and cost of the property, percentage of Federal participation in the project costs for the Federal award under which the property was acquired, the location, use and condition of the property, and any ultimate disposition data including the date of disposal and sale price of the property.
  - (2) A physical inventory of the property must be taken and the results reconciled with the property records at least once every two years.
  - (3) A control system must be developed to ensure adequate safeguards to prevent loss, damage, or theft of the property. Any loss, damage, or theft must be investigated.
  - (4) Adequate maintenance procedures must be developed to keep the property in good condition.
  - (5) If the non-Federal entity is authorized or required to sell the property, proper sales procedures must be established to ensure the highest possible return.
- (e) **Disposition.** When original or replacement equipment acquired under a Federal award is no longer needed for the original project or program or for other activities currently or previously supported by a Federal awarding agency, except as otherwise provided in Federal statutes, regulations, or Federal awarding agency disposition instructions, the non-Federal entity must request disposition instructions from the Federal awarding agency if required by the terms and conditions of the Federal award. Disposition of the equipment will be made as follows, in accordance with Federal awarding agency disposition instructions:

- (1) Items of equipment with a current per unit fair market value of \$5,000 or less may be retained, sold or otherwise disposed of with no further responsibility to the Federal awarding agency.
- (2) Except as provided in § 200.312(b), or if the Federal awarding agency fails to provide requested disposition instructions within 120 days, items of equipment with a current per-unit fair market value in excess of \$5,000 may be retained by the non-Federal entity or sold. The Federal awarding agency is entitled to an amount calculated by multiplying the current market value or proceeds from sale by the Federal awarding agency's percentage of participation in the cost of the original purchase. If the equipment is sold, the Federal awarding agency may permit the non-Federal entity to deduct and retain from the Federal share \$500 or ten percent of the proceeds, whichever is less, for its selling and handling expenses.
- (3) The non-Federal entity may transfer title to the property to the Federal Government or to an eligible third party provided that, in such cases, the non-Federal entity must be entitled to compensation for its attributable percentage of the current fair market value of the property.
- (4) In cases where a non-Federal entity fails to take appropriate disposition actions, the Federal awarding agency may direct the non-Federal entity to take disposition actions.

### § 200.314 Supplies.

See also § 200.453.

- (a) Title to supplies will vest in the non-Federal entity upon acquisition. If there is a residual inventory of unused supplies exceeding \$5,000 in total aggregate value upon termination or completion of the project or program and the supplies are not needed for any other Federal award, the non-Federal entity must retain the supplies for use on other activities or sell them, but must, in either case, compensate the Federal Government for its share. The amount of compensation must be computed in the same manner as for equipment. See § 200.313 (e)(2) for the calculation methodology.
- (b) As long as the Federal Government retains an interest in the supplies, the non-Federal entity must not use supplies acquired under a Federal award to provide services to other organizations for a fee that is less than private companies charge for equivalent services, unless specifically authorized by Federal statute.

### § 200.315 Intangible property.

- (a) Title to intangible property (see definition for *Intangible property* in § 200.1) acquired under a Federal award vests upon acquisition in the non-Federal entity. The non-Federal entity must use that property for the originally-authorized purpose, and must not encumber the property without approval of the Federal awarding agency. When no longer needed for the originally authorized purpose, disposition of the intangible property must occur in accordance with the provisions in § 200.313(e).
- (b) The non-Federal entity may copyright any work that is subject to copyright and was developed, or for which ownership was acquired, under a Federal award. The Federal awarding agency reserves a royalty-free, nonexclusive and irrevocable right to reproduce, publish, or otherwise use the work for Federal purposes, and to authorize others to do so.
- (c) The non-Federal entity is subject to applicable regulations governing patents and inventions, including governmentwide regulations issued by the Department of Commerce at 37 CFR part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Awards, Contracts and Cooperative Agreements."
- (d) The Federal Government has the right to:

- (1) Obtain, reproduce, publish, or otherwise use the data produced under a Federal award; and
- (2) Authorize others to receive, reproduce, publish, or otherwise use such data for Federal purposes.

(e)

- (1) In response to a Freedom of Information Act (FOIA) request for research data relating to published research findings produced under a Federal award that were used by the Federal Government in developing an agency action that has the force and effect of law, the Federal awarding agency must request, and the non-Federal entity must provide, within a reasonable time, the research data so that they can be made available to the public through the procedures established under the FOIA. If the Federal awarding agency obtains the research data solely in response to a FOIA request, the Federal awarding agency may charge the requester a reasonable fee equaling the full incremental cost of obtaining the research data. This fee should reflect costs incurred by the Federal agency and the non-Federal entity. This fee is in addition to any fees the Federal awarding agency may assess under the FOIA (5 U.S.C. 552(a)(4)(A)).
- (2) Published research findings means when:
  - (i) Research findings are published in a peer-reviewed scientific or technical journal; or
  - (ii) A Federal agency publicly and officially cites the research findings in support of an agency action that has the force and effect of law. "Used by the Federal Government in developing an agency action that has the force and effect of law" is defined as when an agency publicly and officially cites the research findings in support of an agency action that has the force and effect of law.
- (3) Research data means the recorded factual material commonly accepted in the scientific community as necessary to validate research findings, but not any of the following: Preliminary analyses, drafts of scientific papers, plans for future research, peer reviews, or communications with colleagues. This "recorded" material excludes physical objects (e.g., laboratory samples). Research data also do not include:
  - (i) Trade secrets, commercial information, materials necessary to be held confidential by a researcher until they are published, or similar information which is protected under law; and
  - (ii) Personnel and medical information and similar information the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, such as information that could be used to identify a particular person in a research study.

### **§ 200.316 Property trust relationship.**

Real property, equipment, and intangible property, that are acquired or improved with a Federal award must be held in trust by the non-Federal entity as trustee for the beneficiaries of the project or program under which the property was acquired or improved. The Federal awarding agency may require the non-Federal entity to record liens or other appropriate notices of record to indicate that personal or real property has been acquired or improved with a Federal award and that use and disposition conditions apply to the property.

## PROCUREMENT STANDARDS

## § 200.317 Procurements by states.

When procuring property and services under a Federal award, a State must follow the same policies and procedures it uses for procurements from its non-Federal funds. The State will comply with §§ 200.321, 200.322, and 200.323 and ensure that every purchase order or other contract includes any clauses required by § 200.327. All other non-Federal entities, including subrecipients of a State, must follow the procurement standards in §§ 200.318 through 200.327.

## § 200.318 General procurement standards.

- (a) The non-Federal entity must have and use documented procurement procedures, consistent with State, local, and tribal laws and regulations and the standards of this section, for the acquisition of property or services required under a Federal award or subaward. The non-Federal entity's documented procurement procedures must conform to the procurement standards identified in §§ 200.317 through 200.327.
- (b) Non-Federal entities must maintain oversight to ensure that contractors perform in accordance with the terms, conditions, and specifications of their contracts or purchase orders.
- (c)
  - (1) The non-Federal entity must maintain written standards of conduct covering conflicts of interest and governing the actions of its employees engaged in the selection, award and administration of contracts. No employee, officer, or agent may participate in the selection, award, or administration of a contract supported by a Federal award if he or she has a real or apparent conflict of interest. Such a conflict of interest would arise when the employee, officer, or agent, any member of his or her immediate family, his or her partner, or an organization which employs or is about to employ any of the parties indicated herein, has a financial or other interest in or a tangible personal benefit from a firm considered for a contract. The officers, employees, and agents of the non-Federal entity may neither solicit nor accept gratuities, favors, or anything of monetary value from contractors or parties to subcontracts. However, non-Federal entities may set standards for situations in which the financial interest is not substantial or the gift is an unsolicited item of nominal value. The standards of conduct must provide for disciplinary actions to be applied for violations of such standards by officers, employees, or agents of the non-Federal entity.
  - (2) If the non-Federal entity has a parent, affiliate, or subsidiary organization that is not a State, local government, or Indian tribe, the non-Federal entity must also maintain written standards of conduct covering organizational conflicts of interest. Organizational conflicts of interest means that because of relationships with a parent company, affiliate, or subsidiary organization, the non-Federal entity is unable or appears to be unable to be impartial in conducting a procurement action involving a related organization.
- (d) The non-Federal entity's procedures must avoid acquisition of unnecessary or duplicative items. Consideration should be given to consolidating or breaking out procurements to obtain a more economical purchase. Where appropriate, an analysis will be made of lease versus purchase alternatives, and any other appropriate analysis to determine the most economical approach.
- (e) To foster greater economy and efficiency, and in accordance with efforts to promote cost-effective use of shared services across the Federal Government, the non-Federal entity is encouraged to enter into state and local intergovernmental agreements or inter-entity agreements where appropriate for procurement or

use of common or shared goods and services. Competition requirements will be met with documented procurement actions using strategic sourcing, shared services, and other similar procurement arrangements.

- (f) The non-Federal entity is encouraged to use Federal excess and surplus property in lieu of purchasing new equipment and property whenever such use is feasible and reduces project costs.
- (g) The non-Federal entity is encouraged to use value engineering clauses in contracts for construction projects of sufficient size to offer reasonable opportunities for cost reductions. Value engineering is a systematic and creative analysis of each contract item or task to ensure that its essential function is provided at the overall lower cost.
- (h) The non-Federal entity must award contracts only to responsible contractors possessing the ability to perform successfully under the terms and conditions of a proposed procurement. Consideration will be given to such matters as contractor integrity, compliance with public policy, record of past performance, and financial and technical resources. See also § 200.214.
- (i) The non-Federal entity must maintain records sufficient to detail the history of procurement. These records will include, but are not necessarily limited to, the following: Rationale for the method of procurement, selection of contract type, contractor selection or rejection, and the basis for the contract price.
- (j)
  - (1) The non-Federal entity may use a time-and-materials type contract only after a determination that no other contract is suitable and if the contract includes a ceiling price that the contractor exceeds at its own risk. Time-and-materials type contract means a contract whose cost to a non-Federal entity is the sum of:
    - (i) The actual cost of materials; and
    - (ii) Direct labor hours charged at fixed hourly rates that reflect wages, general and administrative expenses, and profit.
  - (2) Since this formula generates an open-ended contract price, a time-and-materials contract provides no positive profit incentive to the contractor for cost control or labor efficiency. Therefore, each contract must set a ceiling price that the contractor exceeds at its own risk. Further, the non-Federal entity awarding such a contract must assert a high degree of oversight in order to obtain reasonable assurance that the contractor is using efficient methods and effective cost controls.
- (k) The non-Federal entity alone must be responsible, in accordance with good administrative practice and sound business judgment, for the settlement of all contractual and administrative issues arising out of procurements. These issues include, but are not limited to, source evaluation, protests, disputes, and claims. These standards do not relieve the non-Federal entity of any contractual responsibilities under its contracts. The Federal awarding agency will not substitute its judgment for that of the non-Federal entity unless the matter is primarily a Federal concern. Violations of law will be referred to the local, state, or Federal authority having proper jurisdiction.

[85 FR 49543, Aug. 13, 2020, as amended at 86 FR 10440, Feb. 22, 2021]

## § 200.319 Competition.

- (a) All procurement transactions for the acquisition of property or services required under a Federal award must be conducted in a manner providing full and open competition consistent with the standards of this section and § 200.320.
- (b) In order to ensure objective contractor performance and eliminate unfair competitive advantage, contractors that develop or draft specifications, requirements, statements of work, or invitations for bids or requests for proposals must be excluded from competing for such procurements. Some of the situations considered to be restrictive of competition include but are not limited to:
  - (1) Placing unreasonable requirements on firms in order for them to qualify to do business;
  - (2) Requiring unnecessary experience and excessive bonding;
  - (3) Noncompetitive pricing practices between firms or between affiliated companies;
  - (4) Noncompetitive contracts to consultants that are on retainer contracts;
  - (5) Organizational conflicts of interest;
  - (6) Specifying only a “brand name” product instead of allowing “an equal” product to be offered and describing the performance or other relevant requirements of the procurement; and
  - (7) Any arbitrary action in the procurement process.
- (c) The non-Federal entity must conduct procurements in a manner that prohibits the use of statutorily or administratively imposed state, local, or tribal geographical preferences in the evaluation of bids or proposals, except in those cases where applicable Federal statutes expressly mandate or encourage geographic preference. Nothing in this section preempts state licensing laws. When contracting for architectural and engineering (A/E) services, geographic location may be a selection criterion provided its application leaves an appropriate number of qualified firms, given the nature and size of the project, to compete for the contract.
- (d) The non-Federal entity must have written procedures for procurement transactions. These procedures must ensure that all solicitations:
  - (1) Incorporate a clear and accurate description of the technical requirements for the material, product, or service to be procured. Such description must not, in competitive procurements, contain features which unduly restrict competition. The description may include a statement of the qualitative nature of the material, product or service to be procured and, when necessary, must set forth those minimum essential characteristics and standards to which it must conform if it is to satisfy its intended use. Detailed product specifications should be avoided if at all possible. When it is impractical or uneconomical to make a clear and accurate description of the technical requirements, a “brand name or equivalent” description may be used as a means to define the performance or other salient requirements of procurement. The specific features of the named brand which must be met by offers must be clearly stated; and
  - (2) Identify all requirements which the offerors must fulfill and all other factors to be used in evaluating bids or proposals.

- (e) The non-Federal entity must ensure that all prequalified lists of persons, firms, or products which are used in acquiring goods and services are current and include enough qualified sources to ensure maximum open and free competition. Also, the non-Federal entity must not preclude potential bidders from qualifying during the solicitation period.
- (f) Noncompetitive procurements can only be awarded in accordance with § 200.320(c).

### § 200.320 Methods of procurement to be followed.

The non-Federal entity must have and use documented procurement procedures, consistent with the standards of this section and §§ 200.317, 200.318, and 200.319 for any of the following methods of procurement used for the acquisition of property or services required under a Federal award or sub-award.

- (a) **Informal procurement methods.** When the value of the procurement for property or services under a Federal award does not exceed the *simplified acquisition threshold (SAT)*, as defined in § 200.1, or a lower threshold established by a non-Federal entity, formal procurement methods are not required. The non-Federal entity may use informal procurement methods to expedite the completion of its transactions and minimize the associated administrative burden and cost. The informal methods used for procurement of property or services at or below the SAT include:

- (1) **Micro-purchases** –

- (i) **Distribution.** The acquisition of supplies or services, the aggregate dollar amount of which does not exceed the micro-purchase threshold (See the definition of *micro-purchase* in § 200.1). To the maximum extent practicable, the non-Federal entity should distribute micro-purchases equitably among qualified suppliers.
- (ii) **Micro-purchase awards.** Micro-purchases may be awarded without soliciting competitive price or rate quotations if the non-Federal entity considers the price to be reasonable based on research, experience, purchase history or other information and documents it files accordingly. Purchase cards can be used for micro-purchases if procedures are documented and approved by the non-Federal entity.
- (iii) **Micro-purchase thresholds.** The non-Federal entity is responsible for determining and documenting an appropriate micro-purchase threshold based on internal controls, an evaluation of risk, and its documented procurement procedures. The micro-purchase threshold used by the non-Federal entity must be authorized or not prohibited under State, local, or tribal laws or regulations. Non-Federal entities may establish a threshold higher than the Federal threshold established in the Federal Acquisition Regulations (FAR) in accordance with paragraphs (a)(1)(iv) and (v) of this section.
- (iv) **Non-Federal entity increase to the micro-purchase threshold up to \$50,000.** Non-Federal entities may establish a threshold higher than the micro-purchase threshold identified in the FAR in accordance with the requirements of this section. The non-Federal entity may self-certify a threshold up to \$50,000 on an annual basis and must maintain documentation to be made available to the Federal awarding agency and auditors in accordance with § 200.334. The self-certification must include a justification, clear identification of the threshold, and supporting documentation of any of the following:
  - (A) A qualification as a low-risk auditee, in accordance with the criteria in § 200.520 for the most recent audit;

- (B) An annual internal institutional risk assessment to identify, mitigate, and manage financial risks; or,
- (C) For public institutions, a higher threshold consistent with State law.
- (v) **Non-Federal entity increase to the micro-purchase threshold over \$50,000.** Micro-purchase thresholds higher than \$50,000 must be approved by the cognizant agency for indirect costs. The non-federal entity must submit a request with the requirements included in paragraph (a)(1)(iv) of this section. The increased threshold is valid until there is a change in status in which the justification was approved.

(2) **Small purchases –**

- (i) **Small purchase procedures.** The acquisition of property or services, the aggregate dollar amount of which is higher than the micro-purchase threshold but does not exceed the simplified acquisition threshold. If small purchase procedures are used, price or rate quotations must be obtained from an adequate number of qualified sources as determined appropriate by the non-Federal entity.
  - (ii) **Simplified acquisition thresholds.** The non-Federal entity is responsible for determining an appropriate simplified acquisition threshold based on internal controls, an evaluation of risk and its documented procurement procedures which must not exceed the threshold established in the FAR. When applicable, a lower simplified acquisition threshold used by the non-Federal entity must be authorized or not prohibited under State, local, or tribal laws or regulations.
- (b) **Formal procurement methods.** When the value of the procurement for property or services under a Federal financial assistance award exceeds the SAT, or a lower threshold established by a non-Federal entity, formal procurement methods are required. Formal procurement methods require following documented procedures. Formal procurement methods also require public advertising unless a non-competitive procurement can be used in accordance with § 200.319 or paragraph (c) of this section. The following formal methods of procurement are used for procurement of property or services above the simplified acquisition threshold or a value below the simplified acquisition threshold the non-Federal entity determines to be appropriate:
- (1) **Sealed bids.** A procurement method in which bids are publicly solicited and a firm fixed-price contract (lump sum or unit price) is awarded to the responsible bidder whose bid, conforming with all the material terms and conditions of the invitation for bids, is the lowest in price. The sealed bids method is the preferred method for procuring construction, if the conditions.
    - (i) In order for sealed bidding to be feasible, the following conditions should be present:
      - (A) A complete, adequate, and realistic specification or purchase description is available;
      - (B) Two or more responsible bidders are willing and able to compete effectively for the business; and
      - (C) The procurement lends itself to a firm fixed price contract and the selection of the successful bidder can be made principally on the basis of price.
    - (ii) If sealed bids are used, the following requirements apply:
      - (A) Bids must be solicited from an adequate number of qualified sources, providing them sufficient response time prior to the date set for opening the bids, for local, and tribal governments, the invitation for bids must be publicly advertised;

- (B) The invitation for bids, which will include any specifications and pertinent attachments, must define the items or services in order for the bidder to properly respond;
  - (C) All bids will be opened at the time and place prescribed in the invitation for bids, and for local and tribal governments, the bids must be opened publicly;
  - (D) A firm fixed price contract award will be made in writing to the lowest responsive and responsible bidder. Where specified in bidding documents, factors such as discounts, transportation cost, and life cycle costs must be considered in determining which bid is lowest. Payment discounts will only be used to determine the low bid when prior experience indicates that such discounts are usually taken advantage of; and
  - (E) Any or all bids may be rejected if there is a sound documented reason.
- (2) **Proposals.** A procurement method in which either a fixed price or cost-reimbursement type contract is awarded. Proposals are generally used when conditions are not appropriate for the use of sealed bids. They are awarded in accordance with the following requirements:
- (i) Requests for proposals must be publicized and identify all evaluation factors and their relative importance. Proposals must be solicited from an adequate number of qualified offerors. Any response to publicized requests for proposals must be considered to the maximum extent practical;
  - (ii) The non-Federal entity must have a written method for conducting technical evaluations of the proposals received and making selections;
  - (iii) Contracts must be awarded to the responsible offeror whose proposal is most advantageous to the non-Federal entity, with price and other factors considered; and
  - (iv) The non-Federal entity may use competitive proposal procedures for qualifications-based procurement of architectural/engineering (A/E) professional services whereby offeror's qualifications are evaluated and the most qualified offeror is selected, subject to negotiation of fair and reasonable compensation. The method, where price is not used as a selection factor, can only be used in procurement of A/E professional services. It cannot be used to purchase other types of services through A/E firms that are a potential source to perform the proposed effort.
- (c) **Noncompetitive procurement.** There are specific circumstances in which noncompetitive procurement can be used. Noncompetitive procurement can only be awarded if one or more of the following circumstances apply:
- (1) The acquisition of property or services, the aggregate dollar amount of which does not exceed the micro-purchase threshold (see paragraph (a)(1) of this section);
  - (2) The item is available only from a single source;
  - (3) The public exigency or emergency for the requirement will not permit a delay resulting from publicizing a competitive solicitation;
  - (4) The Federal awarding agency or pass-through entity expressly authorizes a noncompetitive procurement in response to a written request from the non-Federal entity; or
  - (5) After solicitation of a number of sources, competition is determined inadequate.

## § 200.321 Contracting with small and minority businesses, women's business enterprises, and

### **labor surplus area firms.**

- (a) The non-Federal entity must take all necessary affirmative steps to assure that minority businesses, women's business enterprises, and labor surplus area firms are used when possible.
- (b) Affirmative steps must include:
  - (1) Placing qualified small and minority businesses and women's business enterprises on solicitation lists;
  - (2) Assuring that small and minority businesses, and women's business enterprises are solicited whenever they are potential sources;
  - (3) Dividing total requirements, when economically feasible, into smaller tasks or quantities to permit maximum participation by small and minority businesses, and women's business enterprises;
  - (4) Establishing delivery schedules, where the requirement permits, which encourage participation by small and minority businesses, and women's business enterprises;
  - (5) Using the services and assistance, as appropriate, of such organizations as the Small Business Administration and the Minority Business Development Agency of the Department of Commerce; and
  - (6) Requiring the prime contractor, if subcontracts are to be let, to take the affirmative steps listed in paragraphs (b)(1) through (5) of this section.

### **§ 200.322 Domestic preferences for procurements.**

- (a) As appropriate and to the extent consistent with law, the non-Federal entity should, to the greatest extent practicable under a Federal award, provide a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States (including but not limited to iron, aluminum, steel, cement, and other manufactured products). The requirements of this section must be included in all subawards including all contracts and purchase orders for work or products under this award.
- (b) For purposes of this section:
  - (1) "Produced in the United States" means, for iron and steel products, that all manufacturing processes, from the initial melting stage through the application of coatings, occurred in the United States.
  - (2) "Manufactured products" means items and construction materials composed in whole or in part of non-ferrous metals such as aluminum; plastics and polymer-based products such as polyvinyl chloride pipe; aggregates such as concrete; glass, including optical fiber; and lumber.
- (c) Federal agencies providing Federal financial assistance for infrastructure projects must implement the Buy America preferences set forth in 2 CFR part 184.

[85 FR 49543, Aug. 13, 2020, as amended at 88 FR 57790, Aug. 23, 2023]

### **§ 200.323 Procurement of recovered materials.**

A non-Federal entity that is a state agency or agency of a political subdivision of a state and its contractors must comply with section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act. The requirements of Section 6002 include procuring only items designated in guidelines of the Environmental Protection Agency (EPA) at 40 CFR part 247 that contain the highest percentage of recovered materials practicable,

consistent with maintaining a satisfactory level of competition, where the purchase price of the item exceeds \$10,000 or the value of the quantity acquired during the preceding fiscal year exceeded \$10,000; procuring solid waste management services in a manner that maximizes energy and resource recovery; and establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines.

### § 200.324 Contract cost and price.

- (a) The non-Federal entity must perform a cost or price analysis in connection with every procurement action in excess of the Simplified Acquisition Threshold including contract modifications. The method and degree of analysis is dependent on the facts surrounding the particular procurement situation, but as a starting point, the non-Federal entity must make independent estimates before receiving bids or proposals.
- (b) The non-Federal entity must negotiate profit as a separate element of the price for each contract in which there is no price competition and in all cases where cost analysis is performed. To establish a fair and reasonable profit, consideration must be given to the complexity of the work to be performed, the risk borne by the contractor, the contractor's investment, the amount of subcontracting, the quality of its record of past performance, and industry profit rates in the surrounding geographical area for similar work.
- (c) Costs or prices based on estimated costs for contracts under the Federal award are allowable only to the extent that costs incurred or cost estimates included in negotiated prices would be allowable for the non-Federal entity under subpart E of this part. The non-Federal entity may reference its own cost principles that comply with the Federal cost principles.
- (d) The cost plus a percentage of cost and percentage of construction cost methods of contracting must not be used.

### § 200.325 Federal awarding agency or pass-through entity review.

- (a) The non-Federal entity must make available, upon request of the Federal awarding agency or pass-through entity, technical specifications on proposed procurements where the Federal awarding agency or pass-through entity believes such review is needed to ensure that the item or service specified is the one being proposed for acquisition. This review generally will take place prior to the time the specification is incorporated into a solicitation document. However, if the non-Federal entity desires to have the review accomplished after a solicitation has been developed, the Federal awarding agency or pass-through entity may still review the specifications, with such review usually limited to the technical aspects of the proposed purchase.
- (b) The non-Federal entity must make available upon request, for the Federal awarding agency or pass-through entity pre-procurement review, procurement documents, such as requests for proposals or invitations for bids, or independent cost estimates, when:
  - (1) The non-Federal entity's procurement procedures or operation fails to comply with the procurement standards in this part;
  - (2) The procurement is expected to exceed the Simplified Acquisition Threshold and is to be awarded without competition or only one bid or offer is received in response to a solicitation;
  - (3) The procurement, which is expected to exceed the Simplified Acquisition Threshold, specifies a "brand name" product;

- (4) The proposed contract is more than the Simplified Acquisition Threshold and is to be awarded to other than the apparent low bidder under a sealed bid procurement; or
  - (5) A proposed contract modification changes the scope of a contract or increases the contract amount by more than the Simplified Acquisition Threshold.
- (c) The non-Federal entity is exempt from the pre-procurement review in paragraph (b) of this section if the Federal awarding agency or pass-through entity determines that its procurement systems comply with the standards of this part.
- (1) The non-Federal entity may request that its procurement system be reviewed by the Federal awarding agency or pass-through entity to determine whether its system meets these standards in order for its system to be certified. Generally, these reviews must occur where there is continuous high-dollar funding, and third-party contracts are awarded on a regular basis;
  - (2) The non-Federal entity may self-certify its procurement system. Such self-certification must not limit the Federal awarding agency's right to survey the system. Under a self-certification procedure, the Federal awarding agency may rely on written assurances from the non-Federal entity that it is complying with these standards. The non-Federal entity must cite specific policies, procedures, regulations, or standards as being in compliance with these requirements and have its system available for review.

### **§ 200.326 Bonding requirements.**

For construction or facility improvement contracts or subcontracts exceeding the Simplified Acquisition Threshold, the Federal awarding agency or pass-through entity may accept the bonding policy and requirements of the non-Federal entity provided that the Federal awarding agency or pass-through entity has made a determination that the Federal interest is adequately protected. If such a determination has not been made, the minimum requirements must be as follows:

- (a) A bid guarantee from each bidder equivalent to five percent of the bid price. The “bid guarantee” must consist of a firm commitment such as a bid bond, certified check, or other negotiable instrument accompanying a bid as assurance that the bidder will, upon acceptance of the bid, execute such contractual documents as may be required within the time specified.
- (b) A performance bond on the part of the contractor for 100 percent of the contract price. A “performance bond” is one executed in connection with a contract to secure fulfillment of all the contractor's requirements under such contract.
- (c) A payment bond on the part of the contractor for 100 percent of the contract price. A “payment bond” is one executed in connection with a contract to assure payment as required by law of all persons supplying labor and material in the execution of the work provided for in the contract.

### **§ 200.327 Contract provisions.**

The non-Federal entity's contracts must contain the applicable provisions described in appendix II to this part.

#### PERFORMANCE AND FINANCIAL MONITORING AND REPORTING

## § 200.328 Financial reporting.

Unless otherwise approved by OMB, the Federal awarding agency must solicit only the OMB-approved governmentwide data elements for collection of financial information (at time of publication the Federal Financial Report or such future, OMB-approved, governmentwide data elements available from the OMB-designated standards lead. This information must be collected with the frequency required by the terms and conditions of the Federal award, but no less frequently than annually nor more frequently than quarterly except in unusual circumstances, for example where more frequent reporting is necessary for the effective monitoring of the Federal award or could significantly affect program outcomes, and preferably in coordination with performance reporting. The Federal awarding agency must use OMB-approved common information collections, as applicable, when providing financial and performance reporting information.

## § 200.329 Monitoring and reporting program performance.

- (a) **Monitoring by the non-Federal entity.** The non-Federal entity is responsible for oversight of the operations of the Federal award supported activities. The non-Federal entity must monitor its activities under Federal awards to assure compliance with applicable Federal requirements and performance expectations are being achieved. Monitoring by the non-Federal entity must cover each program, function or activity. See also § 200.332.
- (b) **Reporting program performance.** The Federal awarding agency must use OMB-approved common information collections, as applicable, when providing financial and performance reporting information. As appropriate and in accordance with above mentioned information collections, the Federal awarding agency must require the recipient to relate financial data and accomplishments to performance goals and objectives of the Federal award. Also, in accordance with above mentioned common information collections, and when required by the terms and conditions of the Federal award, recipients must provide cost information to demonstrate cost effective practices (e.g., through unit cost data). In some instances (e.g., discretionary research awards), this will be limited to the requirement to submit technical performance reports (to be evaluated in accordance with Federal awarding agency policy). Reporting requirements must be clearly articulated such that, where appropriate, performance during the execution of the Federal award has a standard against which non-Federal entity performance can be measured.
- (c) **Non-construction performance reports.** The Federal awarding agency must use standard, governmentwide OMB-approved data elements for collection of performance information including performance progress reports, Research Performance Progress Reports.
  - (1) The non-Federal entity must submit performance reports at the interval required by the Federal awarding agency or pass-through entity to best inform improvements in program outcomes and productivity. Intervals must be no less frequent than annually nor more frequent than quarterly except in unusual circumstances, for example where more frequent reporting is necessary for the effective monitoring of the Federal award or could significantly affect program outcomes. Reports submitted annually by the non-Federal entity and/or pass-through entity must be due no later than 90 calendar days after the reporting period. Reports submitted quarterly or semiannually must be due no later than 30 calendar days after the reporting period. Alternatively, the Federal awarding agency or pass-through entity may require annual reports before the anniversary dates of multiple year Federal awards. The final performance report submitted by the non-Federal entity and/or pass-through entity must be due no later than 120 calendar days after the period of performance end date. A subrecipient must submit to the pass-through entity, no later than 90 calendar days after the

period of performance end date, all final performance reports as required by the terms and conditions of the Federal award. See also § 200.344. If a justified request is submitted by a non-Federal entity, the Federal agency may extend the due date for any performance report.

- (2) As appropriate in accordance with above mentioned performance reporting, these reports will contain, for each Federal award, brief information on the following unless other data elements are approved by OMB in the agency information collection request:
  - (i) A comparison of actual accomplishments to the objectives of the Federal award established for the period. Where the accomplishments of the Federal award can be quantified, a computation of the cost (for example, related to units of accomplishment) may be required if that information will be useful. Where performance trend data and analysis would be informative to the Federal awarding agency program, the Federal awarding agency should include this as a performance reporting requirement.
  - (ii) The reasons why established goals were not met, if appropriate.
  - (iii) Additional pertinent information including, when appropriate, analysis and explanation of cost overruns or high unit costs.
- (d) **Construction performance reports.** For the most part, onsite technical inspections and certified percentage of completion data are relied on heavily by Federal awarding agencies and pass-through entities to monitor progress under Federal awards and subawards for construction. The Federal awarding agency may require additional performance reports only when considered necessary.
- (e) **Significant developments.** Events may occur between the scheduled performance reporting dates that have significant impact upon the supported activity. In such cases, the non-Federal entity must inform the Federal awarding agency or pass-through entity as soon as the following types of conditions become known:
  - (1) Problems, delays, or adverse conditions which will materially impair the ability to meet the objective of the Federal award. This disclosure must include a statement of the action taken, or contemplated, and any assistance needed to resolve the situation.
  - (2) Favorable developments which enable meeting time schedules and objectives sooner or at less cost than anticipated or producing more or different beneficial results than originally planned.
- (f) **Site visits.** The Federal awarding agency may make site visits as warranted by program needs.
- (g) **Performance report requirement waiver.** The Federal awarding agency may waive any performance report required by this part if not needed.

### § 200.330 Reporting on real property.

The Federal awarding agency or pass-through entity must require a non-Federal entity to submit reports at least annually on the status of real property in which the Federal Government retains an interest, unless the Federal interest in the real property extends 15 years or longer. In those instances where the Federal interest attached is for a period of 15 years or more, the Federal awarding agency or pass-through entity, at its option, may require the non-Federal entity to report at various multi-year frequencies (e.g., every two years or every three years, not to exceed a five-year reporting period; or a Federal awarding agency or pass-through entity may require annual reporting for the first three years of a Federal award and thereafter require reporting every five years).

#### SUBRECIPIENT MONITORING AND MANAGEMENT

## § 200.331 Subrecipient and contractor determinations.

The non-Federal entity may concurrently receive Federal awards as a recipient, a subrecipient, and a contractor, depending on the substance of its agreements with Federal awarding agencies and pass-through entities. Therefore, a pass-through entity must make case-by-case determinations whether each agreement it makes for the disbursement of Federal program funds casts the party receiving the funds in the role of a subrecipient or a contractor. The Federal awarding agency may supply and require recipients to comply with additional guidance to support these determinations provided such guidance does not conflict with this section.

- (a) **Subrecipients.** A subaward is for the purpose of carrying out a portion of a Federal award and creates a Federal assistance relationship with the subrecipient. See definition for *Subaward* in § 200.1 of this part. Characteristics which support the classification of the non-Federal entity as a subrecipient include when the non-Federal entity:
  - (1) Determines who is eligible to receive what Federal assistance;
  - (2) Has its performance measured in relation to whether objectives of a Federal program were met;
  - (3) Has responsibility for programmatic decision-making;
  - (4) Is responsible for adherence to applicable Federal program requirements specified in the Federal award; and
  - (5) In accordance with its agreement, uses the Federal funds to carry out a program for a public purpose specified in authorizing statute, as opposed to providing goods or services for the benefit of the pass-through entity.
- (b) **Contractors.** A contract is for the purpose of obtaining goods and services for the non-Federal entity's own use and creates a procurement relationship with the contractor. See the definition of *contract* in § 200.1 of this part. Characteristics indicative of a procurement relationship between the non-Federal entity and a contractor are when the contractor:
  - (1) Provides the goods and services within normal business operations;
  - (2) Provides similar goods or services to many different purchasers;
  - (3) Normally operates in a competitive environment;
  - (4) Provides goods or services that are ancillary to the operation of the Federal program; and
  - (5) Is not subject to compliance requirements of the Federal program as a result of the agreement, though similar requirements may apply for other reasons.
- (c) **Use of judgment in making determination.** In determining whether an agreement between a pass-through entity and another non-Federal entity casts the latter as a subrecipient or a contractor, the substance of the relationship is more important than the form of the agreement. All of the characteristics listed above may not be present in all cases, and the pass-through entity must use judgment in classifying each agreement as a subaward or a procurement contract.

## § 200.332 Requirements for pass-through entities.

All pass-through entities must:

- (a) Ensure that every subaward is clearly identified to the subrecipient as a subaward and includes the following information at the time of the subaward and if any of these data elements change, include the changes in subsequent subaward modification. When some of this information is not available, the pass-through entity must provide the best information available to describe the Federal award and subaward. Required information includes:
- (1) Federal award identification.
    - (i) Subrecipient name (which must match the name associated with its unique entity identifier);
    - (ii) Subrecipient's unique entity identifier;
    - (iii) Federal Award Identification Number (FAIN);
    - (iv) Federal Award Date (see the definition of *Federal award date* in § 200.1 of this part) of award to the recipient by the Federal agency;
    - (v) Subaward Period of Performance Start and End Date;
    - (vi) Subaward Budget Period Start and End Date;
    - (vii) Amount of Federal Funds Obligated by this action by the pass-through entity to the subrecipient;
    - (viii) Total Amount of Federal Funds Obligated to the subrecipient by the pass-through entity including the current financial obligation;
    - (ix) Total Amount of the Federal Award committed to the subrecipient by the pass-through entity;
    - (x) Federal award project description, as required to be responsive to the Federal Funding Accountability and Transparency Act (FFATA);
    - (xi) Name of Federal awarding agency, pass-through entity, and contact information for awarding official of the Pass-through entity;
    - (xii) Assistance Listings number and Title; the pass-through entity must identify the dollar amount made available under each Federal award and the Assistance Listings Number at time of disbursement;
    - (xiii) Identification of whether the award is R&D; and
    - (xiv) Indirect cost rate for the Federal award (including if the de minimis rate is charged) per § 200.414.
  - (2) All requirements imposed by the pass-through entity on the subrecipient so that the Federal award is used in accordance with Federal statutes, regulations and the terms and conditions of the Federal award;
  - (3) Any additional requirements that the pass-through entity imposes on the subrecipient in order for the pass-through entity to meet its own responsibility to the Federal awarding agency including identification of any required financial and performance reports;
  - (4)
    - (i) An approved federally recognized indirect cost rate negotiated between the subrecipient and the Federal Government. If no approved rate exists, the pass-through entity must determine the appropriate rate in collaboration with the subrecipient, which is either:

- (A) The negotiated indirect cost rate between the pass-through entity and the subrecipient; which can be based on a prior negotiated rate between a different PTE and the same subrecipient. If basing the rate on a previously negotiated rate, the pass-through entity is not required to collect information justifying this rate, but may elect to do so;
  - (B) The de minimis indirect cost rate.
- (ii) The pass-through entity must not require use of a de minimis indirect cost rate if the subrecipient has a Federally approved rate. Subrecipients can elect to use the cost allocation method to account for indirect costs in accordance with § 200.405(d).
- (5) A requirement that the subrecipient permit the pass-through entity and auditors to have access to the subrecipient's records and financial statements as necessary for the pass-through entity to meet the requirements of this part; and
  - (6) Appropriate terms and conditions concerning closeout of the subaward.
- (b) Evaluate each subrecipient's risk of noncompliance with Federal statutes, regulations, and the terms and conditions of the subaward for purposes of determining the appropriate subrecipient monitoring described in paragraphs (d) and (e) of this section, which may include consideration of such factors as:
    - (1) The subrecipient's prior experience with the same or similar subawards;
    - (2) The results of previous audits including whether or not the subrecipient receives a Single Audit in accordance with Subpart F of this part, and the extent to which the same or similar subaward has been audited as a major program;
    - (3) Whether the subrecipient has new personnel or new or substantially changed systems; and
    - (4) The extent and results of Federal awarding agency monitoring (e.g., if the subrecipient also receives Federal awards directly from a Federal awarding agency).
- (c) Consider imposing specific subaward conditions upon a subrecipient if appropriate as described in § 200.208.
  - (d) Monitor the activities of the subrecipient as necessary to ensure that the subaward is used for authorized purposes, in compliance with Federal statutes, regulations, and the terms and conditions of the subaward; and that subaward performance goals are achieved. Pass-through entity monitoring of the subrecipient must include:
    - (1) Reviewing financial and performance reports required by the pass-through entity.
    - (2) Following-up and ensuring that the subrecipient takes timely and appropriate action on all deficiencies pertaining to the Federal award provided to the subrecipient from the pass-through entity detected through audits, on-site reviews, and written confirmation from the subrecipient, highlighting the status of actions planned or taken to address Single Audit findings related to the particular subaward.
    - (3) Issuing a management decision for applicable audit findings pertaining only to the Federal award provided to the subrecipient from the pass-through entity as required by § 200.521.
    - (4) The pass-through entity is responsible for resolving audit findings specifically related to the subaward and not responsible for resolving crosscutting findings. If a subrecipient has a current Single Audit report posted in the Federal Audit Clearinghouse and has not otherwise been excluded from receipt of Federal funding (e.g., has been debarred or suspended), the pass-through entity may

rely on the subrecipient's cognizant audit agency or cognizant oversight agency to perform audit follow-up and make management decisions related to cross-cutting findings in accordance with section § 200.513(a)(3)(vii). Such reliance does not eliminate the responsibility of the pass-through entity to issue subawards that conform to agency and award-specific requirements, to manage risk through ongoing subaward monitoring, and to monitor the status of the findings that are specifically related to the subaward.

- (e) Depending upon the pass-through entity's assessment of risk posed by the subrecipient (as described in paragraph (b) of this section), the following monitoring tools may be useful for the pass-through entity to ensure proper accountability and compliance with program requirements and achievement of performance goals:
  - (1) Providing subrecipients with training and technical assistance on program-related matters; and
  - (2) Performing on-site reviews of the subrecipient's program operations;
  - (3) Arranging for agreed-upon-procedures engagements as described in § 200.425.
- (f) Verify that every subrecipient is audited as required by Subpart F of this part when it is expected that the subrecipient's Federal awards expended during the respective fiscal year equaled or exceeded the threshold set forth in § 200.501.
- (g) Consider whether the results of the subrecipient's audits, on-site reviews, or other monitoring indicate conditions that necessitate adjustments to the pass-through entity's own records.
- (h) Consider taking enforcement action against noncompliant subrecipients as described in § 200.339 of this part and in program regulations.

[85 FR 49543, Aug. 13, 2020, as amended at 86 FR 10440, Feb. 22, 2021]

### **§ 200.333 Fixed amount subawards.**

With prior written approval from the Federal awarding agency, a pass-through entity may provide subawards based on fixed amounts up to the Simplified Acquisition Threshold, provided that the subawards meet the requirements for fixed amount awards in § 200.201.

#### RECORD RETENTION AND ACCESS

### **§ 200.334 Retention requirements for records.**

Financial records, supporting documents, statistical records, and all other non-Federal entity records pertinent to a Federal award must be retained for a period of three years from the date of submission of the final expenditure report or, for Federal awards that are renewed quarterly or annually, from the date of the submission of the quarterly or annual financial report, respectively, as reported to the Federal awarding agency or pass-through entity in the case of a subrecipient. Federal awarding agencies and pass-through entities must not impose any other record retention requirements upon non-Federal entities. The only exceptions are the following:

- (a) If any litigation, claim, or audit is started before the expiration of the 3-year period, the records must be retained until all litigation, claims, or audit findings involving the records have been resolved and final action taken.

- (b) When the non-Federal entity is notified in writing by the Federal awarding agency, cognizant agency for audit, oversight agency for audit, cognizant agency for indirect costs, or pass-through entity to extend the retention period.
- (c) Records for real property and equipment acquired with Federal funds must be retained for 3 years after final disposition.
- (d) When records are transferred to or maintained by the Federal awarding agency or pass-through entity, the 3-year retention requirement is not applicable to the non-Federal entity.
- (e) Records for program income transactions after the period of performance. In some cases recipients must report program income after the period of performance. Where there is such a requirement, the retention period for the records pertaining to the earning of the program income starts from the end of the non-Federal entity's fiscal year in which the program income is earned.
- (f) Indirect cost rate proposals and cost allocations plans. This paragraph applies to the following types of documents and their supporting records: Indirect cost rate computations or proposals, cost allocation plans, and any similar accounting computations of the rate at which a particular group of costs is chargeable (such as computer usage chargeback rates or composite fringe benefit rates).
  - (1) *If submitted for negotiation.* If the proposal, plan, or other computation is required to be submitted to the Federal Government (or to the pass-through entity) to form the basis for negotiation of the rate, then the 3-year retention period for its supporting records starts from the date of such submission.
  - (2) *If not submitted for negotiation.* If the proposal, plan, or other computation is not required to be submitted to the Federal Government (or to the pass-through entity) for negotiation purposes, then the 3-year retention period for the proposal, plan, or computation and its supporting records starts from the end of the fiscal year (or other accounting period) covered by the proposal, plan, or other computation.

### **§ 200.335 Requests for transfer of records.**

The Federal awarding agency must request transfer of certain records to its custody from the non-Federal entity when it determines that the records possess long-term retention value. However, in order to avoid duplicate recordkeeping, the Federal awarding agency may make arrangements for the non-Federal entity to retain any records that are continuously needed for joint use.

### **§ 200.336 Methods for collection, transmission, and storage of information.**

The Federal awarding agency and the non-Federal entity should, whenever practicable, collect, transmit, and store Federal award-related information in open and machine-readable formats rather than in closed formats or on paper in accordance with applicable legislative requirements. A machine-readable format is a format in a standard computer language (not English text) that can be read automatically by a web browser or computer system. The Federal awarding agency or pass-through entity must always provide or accept paper versions of Federal award-related information to and from the non-Federal entity upon request. If paper copies are submitted, the Federal awarding agency or pass-through entity must not require more than an original and two copies. When original records are electronic and cannot be altered, there is no need to create and retain paper copies. When original records are paper, electronic versions may be substituted through the use of duplication or other forms of electronic media provided that they are subject to periodic quality control reviews, provide reasonable safeguards against alteration, and remain readable.

### § 200.337 Access to records.

- (a) **Records of non-Federal entities.** The Federal awarding agency, Inspectors General, the Comptroller General of the United States, and the pass-through entity, or any of their authorized representatives, must have the right of access to any documents, papers, or other records of the non-Federal entity which are pertinent to the Federal award, in order to make audits, examinations, excerpts, and transcripts. The right also includes timely and reasonable access to the non-Federal entity's personnel for the purpose of interview and discussion related to such documents.
- (b) **Extraordinary and rare circumstances.** Only under extraordinary and rare circumstances would such access include review of the true name of victims of a crime. Routine monitoring cannot be considered extraordinary and rare circumstances that would necessitate access to this information. When access to the true name of victims of a crime is necessary, appropriate steps to protect this sensitive information must be taken by both the non-Federal entity and the Federal awarding agency. Any such access, other than under a court order or subpoena pursuant to a bona fide confidential investigation, must be approved by the head of the Federal awarding agency or delegate.
- (c) **Expiration of right of access.** The rights of access in this section are not limited to the required retention period but last as long as the records are retained. Federal awarding agencies and pass-through entities must not impose any other access requirements upon non-Federal entities.

### § 200.338 Restrictions on public access to records.

No Federal awarding agency may place restrictions on the non-Federal entity that limit public access to the records of the non-Federal entity pertinent to a Federal award, except for protected personally identifiable information (PII) or when the Federal awarding agency can demonstrate that such records will be kept confidential and would have been exempted from disclosure pursuant to the Freedom of Information Act (5 U.S.C. 552) or controlled unclassified information pursuant to Executive Order 13556 if the records had belonged to the Federal awarding agency. The Freedom of Information Act (5 U.S.C. 552) (FOIA) does not apply to those records that remain under a non-Federal entity's control except as required under § 200.315. Unless required by Federal, state, local, and tribal statute, non-Federal entities are not required to permit public access to their records. The non-Federal entity's records provided to a Federal agency generally will be subject to FOIA and applicable exemptions.

## REMEDIES FOR NONCOMPLIANCE

### § 200.339 Remedies for noncompliance.

If a non-Federal entity fails to comply with the U.S. Constitution, Federal statutes, regulations or the terms and conditions of a Federal award, the Federal awarding agency or pass-through entity may impose additional conditions, as described in § 200.208. If the Federal awarding agency or pass-through entity determines that noncompliance cannot be remedied by imposing additional conditions, the Federal awarding agency or pass-through entity may take one or more of the following actions, as appropriate in the circumstances:

- (a) Temporarily withhold cash payments pending correction of the deficiency by the non-Federal entity or more severe enforcement action by the Federal awarding agency or pass-through entity.
- (b) Disallow (that is, deny both use of funds and any applicable matching credit for) all or part of the cost of the activity or action not in compliance.
- (c) Wholly or partly suspend or terminate the Federal award.

- (d) Initiate suspension or debarment proceedings as authorized under 2 CFR part 180 and Federal awarding agency regulations (or in the case of a pass-through entity, recommend such a proceeding be initiated by a Federal awarding agency).
- (e) Withhold further Federal awards for the project or program.
- (f) Take other remedies that may be legally available.

## § 200.340 Termination.

- (a) The Federal award may be terminated in whole or in part as follows:
  - (1) By the Federal awarding agency or pass-through entity, if a non-Federal entity fails to comply with the terms and conditions of a Federal award;
  - (2) By the Federal awarding agency or pass-through entity, to the greatest extent authorized by law, if an award no longer effectuates the program goals or agency priorities;
  - (3) By the Federal awarding agency or pass-through entity with the consent of the non-Federal entity, in which case the two parties must agree upon the termination conditions, including the effective date and, in the case of partial termination, the portion to be terminated;
  - (4) By the non-Federal entity upon sending to the Federal awarding agency or pass-through entity written notification setting forth the reasons for such termination, the effective date, and, in the case of partial termination, the portion to be terminated. However, if the Federal awarding agency or pass-through entity determines in the case of partial termination that the reduced or modified portion of the Federal award or subaward will not accomplish the purposes for which the Federal award was made, the Federal awarding agency or pass-through entity may terminate the Federal award in its entirety; or
  - (5) By the Federal awarding agency or pass-through entity pursuant to termination provisions included in the Federal award.
- (b) A Federal awarding agency should clearly and unambiguously specify termination provisions applicable to each Federal award, in applicable regulations or in the award, consistent with this section.
- (c) When a Federal awarding agency terminates a Federal award prior to the end of the period of performance due to the non-Federal entity's material failure to comply with the Federal award terms and conditions, the Federal awarding agency must report the termination to the OMB-designated integrity and performance system accessible through SAM (currently FAPIIS).
  - (1) The information required under paragraph (c) of this section is not to be reported to designated integrity and performance system until the non-Federal entity either—
    - (i) Has exhausted its opportunities to object or challenge the decision, see § 200.342; or
    - (ii) Has not, within 30 calendar days after being notified of the termination, informed the Federal awarding agency that it intends to appeal the Federal awarding agency's decision to terminate.
  - (2) If a Federal awarding agency, after entering information into the designated integrity and performance system about a termination, subsequently:
    - (i) Learns that any of that information is erroneous, the Federal awarding agency must correct the information in the system within three business days;

- (ii) Obtains an update to that information that could be helpful to other Federal awarding agencies, the Federal awarding agency is strongly encouraged to amend the information in the system to incorporate the update in a timely way.
- (3) Federal awarding agencies, must not post any information that will be made publicly available in the non-public segment of designated integrity and performance system that is covered by a disclosure exemption under the Freedom of Information Act. If the non-Federal entity asserts within seven calendar days to the Federal awarding agency who posted the information, that some of the information made publicly available is covered by a disclosure exemption under the Freedom of Information Act, the Federal awarding agency who posted the information must remove the posting within seven calendar days of receiving the assertion. Prior to reposting the releasable information, the Federal agency must resolve the issue in accordance with the agency's Freedom of Information Act procedures.
- (d) When a Federal award is terminated or partially terminated, both the Federal awarding agency or pass-through entity and the non-Federal entity remain responsible for compliance with the requirements in §§ 200.344 and 200.345.

### § 200.341 Notification of termination requirement.

- (a) The Federal agency or pass-through entity must provide to the non-Federal entity a notice of termination.
- (b) If the Federal award is terminated for the non-Federal entity's material failure to comply with the U.S. Constitution, Federal statutes, regulations, or terms and conditions of the Federal award, the notification must state that—
  - (1) The termination decision will be reported to the OMB-designated integrity and performance system accessible through SAM (currently FAPIIS);
  - (2) The information will be available in the OMB-designated integrity and performance system for a period of five years from the date of the termination, then archived;
  - (3) Federal awarding agencies that consider making a Federal award to the non-Federal entity during that five year period must consider that information in judging whether the non-Federal entity is qualified to receive the Federal award, when the Federal share of the Federal award is expected to exceed the simplified acquisition threshold over the period of performance;
  - (4) The non-Federal entity may comment on any information the OMB-designated integrity and performance system contains about the non-Federal entity for future consideration by Federal awarding agencies. The non-Federal entity may submit comments to the awardee integrity and performance portal accessible through SAM (currently CPARS).
  - (5) Federal awarding agencies will consider non-Federal entity comments when determining whether the non-Federal entity is qualified for a future Federal award.
- (c) Upon termination of a Federal award, the Federal awarding agency must provide the information required under FFATA to the Federal website established to fulfill the requirements of FFATA, and update or notify any other relevant governmentwide systems or entities of any indications of poor performance as required by 41 U.S.C. 417b and 31 U.S.C. 3321 and implementing guidance at 2 CFR part 77 (forthcoming at time of publication). See also the requirements for Suspension and Debarment at 2 CFR part 180.

### § 200.342 Opportunities to object, hearings, and appeals.

Upon taking any remedy for non-compliance, the Federal awarding agency must provide the non-Federal entity an opportunity to object and provide information and documentation challenging the suspension or termination action, in accordance with written processes and procedures published by the Federal awarding agency. The Federal awarding agency or pass-through entity must comply with any requirements for hearings, appeals or other administrative proceedings to which the non-Federal entity is entitled under any statute or regulation applicable to the action involved.

### § 200.343 Effects of suspension and termination.

Costs to the non-Federal entity resulting from financial obligations incurred by the non-Federal entity during a suspension or after termination of a Federal award or subaward are not allowable unless the Federal awarding agency or pass-through entity expressly authorizes them in the notice of suspension or termination or subsequently. However, costs during suspension or after termination are allowable if:

- (a) The costs result from financial obligations which were properly incurred by the non-Federal entity before the effective date of suspension or termination, are not in anticipation of it; and
- (b) The costs would be allowable if the Federal award was not suspended or expired normally at the end of the period of performance in which the termination takes effect.

#### CLOSEOUT

### § 200.344 Closeout.

The Federal awarding agency or pass-through entity will close out the Federal award when it determines that all applicable administrative actions and all required work of the Federal award have been completed by the non-Federal entity. If the non-Federal entity fails to complete the requirements, the Federal awarding agency or pass-through entity will proceed to close out the Federal award with the information available. This section specifies the actions the non-Federal entity and Federal awarding agency or pass-through entity must take to complete this process at the end of the period of performance.

- (a) The recipient must submit, no later than 120 calendar days after the end date of the period of performance, all financial, performance, and other reports as required by the terms and conditions of the Federal award. A subrecipient must submit to the pass-through entity, no later than 90 calendar days (or an earlier date as agreed upon by the pass-through entity and subrecipient) after the end date of the period of performance, all financial, performance, and other reports as required by the terms and conditions of the Federal award. The Federal awarding agency or pass-through entity may approve extensions when requested and justified by the non-Federal entity, as applicable.
- (b) Unless the Federal awarding agency or pass-through entity authorizes an extension, a non-Federal entity must liquidate all financial obligations incurred under the Federal award no later than 120 calendar days after the end date of the period of performance as specified in the terms and conditions of the Federal award.
- (c) The Federal awarding agency or pass-through entity must make prompt payments to the non-Federal entity for costs meeting the requirements in Subpart E of this part under the Federal award being closed out.

- (d) The non-Federal entity must promptly refund any balances of unobligated cash that the Federal awarding agency or pass-through entity paid in advance or paid and that are not authorized to be retained by the non-Federal entity for use in other projects. See OMB Circular A-129 and see § 200.346, for requirements regarding unreturned amounts that become delinquent debts.
- (e) Consistent with the terms and conditions of the Federal award, the Federal awarding agency or pass-through entity must make a settlement for any upward or downward adjustments to the Federal share of costs after closeout reports are received.
- (f) The non-Federal entity must account for any real and personal property acquired with Federal funds or received from the Federal Government in accordance with §§ 200.310 through 200.316 and 200.330.
- (g) When a recipient or subrecipient completes all closeout requirements, the Federal awarding agency or pass-through entity must promptly complete all closeout actions for Federal awards. The Federal awarding agency must make every effort to complete closeout actions no later than one year after the end of the period of performance unless otherwise directed by authorizing statutes. Closeout actions include Federal awarding agency actions in the grants management and payment systems.
- (h) If the non-Federal entity does not submit all reports in accordance with this section and the terms and conditions of the Federal Award, the Federal awarding agency must proceed to close out with the information available within one year of the period of performance end date.
- (i) If the non-Federal entity does not submit all reports in accordance with this section within one year of the period of performance end date, the Federal awarding agency must report the non-Federal entity's material failure to comply with the terms and conditions of the award with the OMB-designated integrity and performance system (currently FAPIIS). Federal awarding agencies may also pursue other enforcement actions per § 200.339.

#### POST-CLOSEOUT ADJUSTMENTS AND CONTINUING RESPONSIBILITIES

### § 200.345 Post-closeout adjustments and continuing responsibilities.

- (a) The closeout of a Federal award does not affect any of the following:
  - (1) The right of the Federal awarding agency or pass-through entity to disallow costs and recover funds on the basis of a later audit or other review. The Federal awarding agency or pass-through entity must make any cost disallowance determination and notify the non-Federal entity within the record retention period.
  - (2) The requirement for the non-Federal entity to return any funds due as a result of later refunds, corrections, or other transactions including final indirect cost rate adjustments.
  - (3) The ability of the Federal awarding agency to make financial adjustments to a previously closed award such as resolving indirect cost payments and making final payments.
  - (4) Audit requirements in subpart F of this part.
  - (5) Property management and disposition requirements in §§ 200.310 through 200.316 of this subpart.
  - (6) Records retention as required in §§ 200.334 through 200.337 of this subpart.

- (b) After closeout of the Federal award, a relationship created under the Federal award may be modified or ended in whole or in part with the consent of the Federal awarding agency or pass-through entity and the non-Federal entity, provided the responsibilities of the non-Federal entity referred to in paragraph (a) of this section, including those for property management as applicable, are considered and provisions made for continuing responsibilities of the non-Federal entity, as appropriate.

#### COLLECTION OF AMOUNTS DUE

### § 200.346 Collection of amounts due.

- (a) Any funds paid to the non-Federal entity in excess of the amount to which the non-Federal entity is finally determined to be entitled under the terms of the Federal award constitute a debt to the Federal Government. If not paid within 90 calendar days after demand, the Federal awarding agency may reduce the debt by:
  - (1) Making an administrative offset against other requests for reimbursements;
  - (2) Withholding advance payments otherwise due to the non-Federal entity; or
  - (3) Other action permitted by Federal statute.
- (b) Except where otherwise provided by statutes or regulations, the Federal awarding agency will charge interest on an overdue debt in accordance with the Federal Claims Collection Standards (31 CFR parts 900 through 999). The date from which interest is computed is not extended by litigation or the filing of any form of appeal.

### Subpart E—Cost Principles

Link to an amendment published at [89 FR 30136](#), Apr. 22, 2024.

#### GENERAL PROVISIONS

### § 200.400 Policy guide.

The application of these cost principles is based on the fundamental premises that:

- (a) The non-Federal entity is responsible for the efficient and effective administration of the Federal award through the application of sound management practices.
- (b) The non-Federal entity assumes responsibility for administering Federal funds in a manner consistent with underlying agreements, program objectives, and the terms and conditions of the Federal award.
- (c) The non-Federal entity, in recognition of its own unique combination of staff, facilities, and experience, has the primary responsibility for employing whatever form of sound organization and management techniques may be necessary in order to assure proper and efficient administration of the Federal award.
- (d) The application of these cost principles should require no significant changes in the internal accounting policies and practices of the non-Federal entity. However, the accounting practices of the non-Federal entity must be consistent with these cost principles and support the accumulation of costs as required by the principles, and must provide for adequate documentation to support costs charged to the Federal award.

- (e) In reviewing, negotiating and approving cost allocation plans or indirect cost proposals, the cognizant agency for indirect costs should generally assure that the non-Federal entity is applying these cost accounting principles on a consistent basis during their review and negotiation of indirect cost proposals. Where wide variations exist in the treatment of a given cost item by the non-Federal entity, the reasonableness and equity of such treatments should be fully considered. See the definition of *indirect (facilities & administrative (F&A)) costs* in § 200.1 of this part.
- (f) For non-Federal entities that educate and engage students in research, the dual role of students as both trainees and employees (including pre- and post-doctoral staff) contributing to the completion of Federal awards for research must be recognized in the application of these principles.
- (g) The non-Federal entity may not earn or keep any profit resulting from Federal financial assistance, unless explicitly authorized by the terms and conditions of the Federal award. See also § 200.307.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75885, Dec. 19, 2014; 85 FR 49561, Aug. 13, 2020]

### § 200.401 Application.

- (a) **General.** These principles must be used in determining the allowable costs of work performed by the non-Federal entity under Federal awards. These principles also must be used by the non-Federal entity as a guide in the pricing of fixed-price contracts and subcontracts where costs are used in determining the appropriate price. The principles do not apply to:
  - (1) Arrangements under which Federal financing is in the form of loans, scholarships, fellowships, traineeships, or other fixed amounts based on such items as education allowance or published tuition rates and fees.
  - (2) For IHEs, capitation awards, which are awards based on case counts or number of beneficiaries according to the terms and conditions of the Federal award.
  - (3) Fixed amount awards. See also § 200.1 Definitions and 200.201.
  - (4) Federal awards to hospitals (see appendix IX to this part).
  - (5) Other awards under which the non-Federal entity is not required to account to the Federal Government for actual costs incurred.
- (b) **Federal contract.** Where a Federal contract awarded to a non-Federal entity is subject to the Cost Accounting Standards (CAS), it incorporates the applicable CAS clauses, Standards, and CAS administration requirements per the 48 CFR Chapter 99 and 48 CFR part 30 (FAR Part 30). CAS applies directly to the CAS-covered contract and the Cost Accounting Standards at 48 CFR parts 9904 or 9905 takes precedence over the cost principles in this subpart E with respect to the allocation of costs. When a contract with a non-Federal entity is subject to full CAS coverage, the allowability of certain costs under the cost principles will be affected by the allocation provisions of the Cost Accounting Standards (e.g., CAS 414—48 CFR 9904.414, Cost of Money as an Element of the Cost of Facilities Capital, and CAS 417—48 CFR 9904.417, Cost of Money as an Element of the Cost of Capital Assets Under Construction), apply rather the allowability provisions of § 200.449. In complying with those requirements, the non-Federal entity's application of cost accounting practices for estimating, accumulating, and reporting costs for other Federal awards and other cost objectives under the CAS-covered contract still must be consistent with its cost accounting practices for the CAS-covered contracts. In all cases, only one set of accounting records needs to be maintained for the allocation of costs by the non-Federal entity.

- (c) **Exemptions.** Some nonprofit organizations, because of their size and nature of operations, can be considered to be similar to for-profit entities for purpose of applicability of cost principles. Such nonprofit organizations must operate under Federal cost principles applicable to for-profit entities located at 48 CFR 31.2. A listing of these organizations is contained in appendix VIII to this part. Other organizations, as approved by the cognizant agency for indirect costs, may be added from time to time.

[78 FR 78608, Dec. 26, 2013, as amended at 85 FR 49562, Aug. 13, 2020]

## BASIC CONSIDERATIONS

### § 200.402 Composition of costs.

**Total cost.** The total cost of a Federal award is the sum of the allowable direct and allocable indirect costs less any applicable credits.

### § 200.403 Factors affecting allowability of costs.

Except where otherwise authorized by statute, costs must meet the following general criteria in order to be allowable under Federal awards:

- (a) Be necessary and reasonable for the performance of the Federal award and be allocable thereto under these principles.
- (b) Conform to any limitations or exclusions set forth in these principles or in the Federal award as to types or amount of cost items.
- (c) Be consistent with policies and procedures that apply uniformly to both federally-financed and other activities of the non-Federal entity.
- (d) Be accorded consistent treatment. A cost may not be assigned to a Federal award as a direct cost if any other cost incurred for the same purpose in like circumstances has been allocated to the Federal award as an indirect cost.
- (e) Be determined in accordance with generally accepted accounting principles (GAAP), except, for state and local governments and Indian tribes only, as otherwise provided for in this part.
- (f) Not be included as a cost or used to meet cost sharing or matching requirements of any other federally-financed program in either the current or a prior period. See also § 200.306(b).
- (g) Be adequately documented. See also §§ 200.300 through 200.309 of this part.
- (h) Cost must be incurred during the approved budget period. The Federal awarding agency is authorized, at its discretion, to waive prior written approvals to carry forward unobligated balances to subsequent budget periods pursuant to § 200.308(e)(3).

[78 FR 78608, Dec. 26, 2013, as amended at 85 FR 49562, Aug. 13, 2020]

### § 200.404 Reasonable costs.

A cost is reasonable if, in its nature and amount, it does not exceed that which would be incurred by a prudent person under the circumstances prevailing at the time the decision was made to incur the cost. The question of reasonableness is particularly important when the non-Federal entity is predominantly federally-funded. In determining reasonableness of a given cost, consideration must be given to:

- (a) Whether the cost is of a type generally recognized as ordinary and necessary for the operation of the non-Federal entity or the proper and efficient performance of the Federal award.
- (b) The restraints or requirements imposed by such factors as: sound business practices; arm's-length bargaining; Federal, state, local, tribal, and other laws and regulations; and terms and conditions of the Federal award.
- (c) Market prices for comparable goods or services for the geographic area.
- (d) Whether the individuals concerned acted with prudence in the circumstances considering their responsibilities to the non-Federal entity, its employees, where applicable its students or membership, the public at large, and the Federal Government.
- (e) Whether the non-Federal entity significantly deviates from its established practices and policies regarding the incurrence of costs, which may unjustifiably increase the Federal award's cost.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75885, Dec. 19, 2014]

### § 200.405 Allocable costs.

- (a) A cost is allocable to a particular Federal award or other cost objective if the goods or services involved are chargeable or assignable to that Federal award or cost objective in accordance with relative benefits received. This standard is met if the cost:
  - (1) Is incurred specifically for the Federal award;
  - (2) Benefits both the Federal award and other work of the non-Federal entity and can be distributed in proportions that may be approximated using reasonable methods; and
  - (3) Is necessary to the overall operation of the non-Federal entity and is assignable in part to the Federal award in accordance with the principles in this subpart.
- (b) All activities which benefit from the non-Federal entity's indirect (F&A) cost, including unallowable activities and donated services by the non-Federal entity or third parties, will receive an appropriate allocation of indirect costs.
- (c) Any cost allocable to a particular Federal award under the principles provided for in this part may not be charged to other Federal awards to overcome fund deficiencies, to avoid restrictions imposed by Federal statutes, regulations, or terms and conditions of the Federal awards, or for other reasons. However, this prohibition would not preclude the non-Federal entity from shifting costs that are allowable under two or more Federal awards in accordance with existing Federal statutes, regulations, or the terms and conditions of the Federal awards.
- (d) Direct cost allocation principles: If a cost benefits two or more projects or activities in proportions that can be determined without undue effort or cost, the cost must be allocated to the projects based on the proportional benefit. If a cost benefits two or more projects or activities in proportions that cannot be

determined because of the interrelationship of the work involved, then, notwithstanding paragraph (c) of this section, the costs may be allocated or transferred to benefitted projects on any reasonable documented basis. Where the purchase of equipment or other capital asset is specifically authorized under a Federal award, the costs are assignable to the Federal award regardless of the use that may be made of the equipment or other capital asset involved when no longer needed for the purpose for which it was originally required. See also §§ 200.310 through 200.316 and 200.439.

- (e) If the contract is subject to CAS, costs must be allocated to the contract pursuant to the Cost Accounting Standards. To the extent that CAS is applicable, the allocation of costs in accordance with CAS takes precedence over the allocation provisions in this part.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75885, Dec. 19, 2014; 85 FR 49562, Aug. 13, 2020]

### § 200.406 Applicable credits.

- (a) Applicable credits refer to those receipts or reduction-of-expenditure-type transactions that offset or reduce expense items allocable to the Federal award as direct or indirect (F&A) costs. Examples of such transactions are: purchase discounts, rebates or allowances, recoveries or indemnities on losses, insurance refunds or rebates, and adjustments of overpayments or erroneous charges. To the extent that such credits accruing to or received by the non-Federal entity relate to allowable costs, they must be credited to the Federal award either as a cost reduction or cash refund, as appropriate.
- (b) In some instances, the amounts received from the Federal Government to finance activities or service operations of the non-Federal entity should be treated as applicable credits. Specifically, the concept of netting such credit items (including any amounts used to meet cost sharing or matching requirements) must be recognized in determining the rates or amounts to be charged to the Federal award. (See §§ 200.436 and 200.468, for areas of potential application in the matter of Federal financing of activities.)

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75885, Dec. 19, 2014; 85 FR 49562, Aug. 13, 2020]

### § 200.407 Prior written approval (prior approval).

Under any given Federal award, the reasonableness and allocability of certain items of costs may be difficult to determine. In order to avoid subsequent disallowance or dispute based on unreasonableness or nonallocability, the non-Federal entity may seek the prior written approval of the cognizant agency for indirect costs or the Federal awarding agency in advance of the incurrence of special or unusual costs. Prior written approval should include the timeframe or scope of the agreement. The absence of prior written approval on any element of cost will not, in itself, affect the reasonableness or allocability of that element, unless prior approval is specifically required for allowability as described under certain circumstances in the following sections of this part:

- (a) § 200.201 Use of grant agreements (including fixed amount awards), cooperative agreements, and contracts, paragraph (b)(5);
- (b) § 200.306 Cost sharing or matching;
- (c) § 200.307 Program income;
- (d) § 200.308 Revision of budget and program plans;
- (e) § 200.311 Real property;
- (f) § 200.313 Equipment;

- (g) § 200.333 Fixed amount subawards;
- (h) § 200.413 Direct costs, paragraph (c);
- (i) § 200.430 Compensation—personal services, paragraph (h);
- (j) § 200.431 Compensation—fringe benefits;
- (k) § 200.438 Entertainment costs;
- (l) § 200.439 Equipment and other capital expenditures;
- (m) § 200.440 Exchange rates;
- (n) § 200.441 Fines, penalties, damages and other settlements;
- (o) § 200.442 Fund raising and investment management costs;
- (p) § 200.445 Goods or services for personal use;
- (q) § 200.447 Insurance and indemnification;
- (r) § 200.454 Memberships, subscriptions, and professional activity costs, paragraph (c);
- (s) § 200.455 Organization costs;
- (t) § 200.456 Participant support costs;
- (u) § 200.458 Pre-award costs;
- (v) § 200.462 Rearrangement and reconversion costs;
- (w) § 200.467 Selling and marketing costs;
- (x) § 200.470 Taxes (including Value Added Tax); and
- (y) § 200.475 Travel costs.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75885, Dec. 19, 2014; 85 FR 49562, Aug. 13, 2020]

### **§ 200.408 Limitation on allowance of costs.**

The Federal award may be subject to statutory requirements that limit the allowability of costs. When the maximum amount allowable under a limitation is less than the total amount determined in accordance with the principles in this part, the amount not recoverable under the Federal award may not be charged to the Federal award.

### **§ 200.409 Special considerations.**

In addition to the basic considerations regarding the allowability of costs highlighted in this subtitle, other subtitles in this part describe special considerations and requirements applicable to states, local governments, Indian tribes, and IHEs. In addition, certain provisions among the items of cost in this subpart are only applicable to certain types of non-Federal entities, as specified in the following sections:

- (a) Direct and Indirect (F&A) Costs (§§ 200.412-200.415) of this subpart;
- (b) Special Considerations for States, Local Governments and Indian Tribes (§§ 200.416 and 200.417) of this subpart; and

- (c) Special Considerations for Institutions of Higher Education (§§ 200.418 and 200.419) of this subpart.

[85 FR 49562, Aug. 13, 2020]

### § 200.410 Collection of unallowable costs.

Payments made for costs determined to be unallowable by either the Federal awarding agency, cognizant agency for indirect costs, or pass-through entity, either as direct or indirect costs, must be refunded (including interest) to the Federal Government in accordance with instructions from the Federal agency that determined the costs are unallowable unless Federal statute or regulation directs otherwise. See also §§ 200.300 through 200.309 in subpart D of this part.

[85 FR 49562, Aug. 13, 2020]

### § 200.411 Adjustment of previously negotiated indirect (F&A) cost rates containing unallowable costs.

- (a) Negotiated indirect (F&A) cost rates based on a proposal later found to have included costs that:
- (1) Are unallowable as specified by Federal statutes, regulations or the terms and conditions of a Federal award; or
  - (2) Are unallowable because they are not allocable to the Federal award(s), must be adjusted, or a refund must be made, in accordance with the requirements of this section. These adjustments or refunds are designed to correct the proposals used to establish the rates and do not constitute a reopening of the rate negotiation. The adjustments or refunds will be made regardless of the type of rate negotiated (predetermined, final, fixed, or provisional).
- (b) For rates covering a future fiscal year of the non-Federal entity, the unallowable costs will be removed from the indirect (F&A) cost pools and the rates appropriately adjusted.
- (c) For rates covering a past period, the Federal share of the unallowable costs will be computed for each year involved and a cash refund (including interest chargeable in accordance with applicable regulations) will be made to the Federal Government. If cash refunds are made for past periods covered by provisional or fixed rates, appropriate adjustments will be made when the rates are finalized to avoid duplicate recovery of the unallowable costs by the Federal Government.
- (d) For rates covering the current period, either a rate adjustment or a refund, as described in paragraphs (b) and (c) of this section, must be required by the cognizant agency for indirect costs. The choice of method must be at the discretion of the cognizant agency for indirect costs, based on its judgment as to which method would be most practical.
- (e) The amount or proportion of unallowable costs included in each year's rate will be assumed to be the same as the amount or proportion of unallowable costs included in the base year proposal used to establish the rate.

#### DIRECT AND INDIRECT (F&A) COSTS

## § 200.412 Classification of costs.

There is no universal rule for classifying certain costs as either direct or indirect (F&A) under every accounting system. A cost may be direct with respect to some specific service or function, but indirect with respect to the Federal award or other final cost objective. Therefore, it is essential that each item of cost incurred for the same purpose be treated consistently in like circumstances either as a direct or an indirect (F&A) cost in order to avoid possible double-charging of Federal awards. Guidelines for determining direct and indirect (F&A) costs charged to Federal awards are provided in this subpart.

## § 200.413 Direct costs.

- (a) **General.** Direct costs are those costs that can be identified specifically with a particular final cost objective, such as a Federal award, or other internally or externally funded activity, or that can be directly assigned to such activities relatively easily with a high degree of accuracy. Costs incurred for the same purpose in like circumstances must be treated consistently as either direct or indirect (F&A) costs. See also § 200.405.
- (b) **Application to Federal awards.** Identification with the Federal award rather than the nature of the goods and services involved is the determining factor in distinguishing direct from indirect (F&A) costs of Federal awards. Typical costs charged directly to a Federal award are the compensation of employees who work on that award, their related fringe benefit costs, the costs of materials and other items of expense incurred for the Federal award. If directly related to a specific award, certain costs that otherwise would be treated as indirect costs may also be considered direct costs. Examples include extraordinary utility consumption, the cost of materials supplied from stock or services rendered by specialized facilities, program evaluation costs, or other institutional service operations.
- (c) The salaries of administrative and clerical staff should normally be treated as indirect (F&A) costs. Direct charging of these costs may be appropriate only if all of the following conditions are met:
  - (1) Administrative or clerical services are integral to a project or activity;
  - (2) Individuals involved can be specifically identified with the project or activity;
  - (3) Such costs are explicitly included in the budget or have the prior written approval of the Federal awarding agency; and
  - (4) The costs are not also recovered as indirect costs.
- (d) **Minor items.** Any direct cost of minor amount may be treated as an indirect (F&A) cost for reasons of practicality where such accounting treatment for that item of cost is consistently applied to all Federal and non-Federal cost objectives.
- (e) The costs of certain activities are not allowable as charges to Federal awards. However, even though these costs are unallowable for purposes of computing charges to Federal awards, they nonetheless must be treated as direct costs for purposes of determining indirect (F&A) cost rates and be allocated their equitable share of the non-Federal entity's indirect costs if they represent activities which:
  - (1) Include the salaries of personnel,
  - (2) Occupy space, and
  - (3) Benefit from the non-Federal entity's indirect (F&A) costs.

- (f) For nonprofit organizations, the costs of activities performed by the non-Federal entity primarily as a service to members, clients, or the general public when significant and necessary to the non-Federal entity's mission must be treated as direct costs whether or not allowable, and be allocated an equitable share of indirect (F&A) costs. Some examples of these types of activities include:
- (1) Maintenance of membership rolls, subscriptions, publications, and related functions. See also § 200.454.
  - (2) Providing services and information to members, legislative or administrative bodies, or the public. See also §§ 200.454 and 200.450.
  - (3) Promotion, lobbying, and other forms of public relations. See also §§ 200.421 and 200.450.
  - (4) Conferences except those held to conduct the general administration of the non-Federal entity. See also § 200.432.
  - (5) Maintenance, protection, and investment of special funds not used in operation of the non-Federal entity. See also § 200.442.
  - (6) Administration of group benefits on behalf of members or clients, including life and hospital insurance, annuity or retirement plans, and financial aid. See also § 200.431.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75885, Dec. 19, 2014; 85 FR 49562, Aug. 13, 2020]

### § 200.414 Indirect (F&A) costs.

- (a) **Facilities and administration classification.** For major Institutions of Higher Education (IHE) and major nonprofit organizations, indirect (F&A) costs must be classified within two broad categories: "Facilities" and "Administration." "Facilities" is defined as depreciation on buildings, equipment and capital improvement, interest on debt associated with certain buildings, equipment and capital improvements, and operations and maintenance expenses. "Administration" is defined as general administration and general expenses such as the director's office, accounting, personnel and all other types of expenditures not listed specifically under one of the subcategories of "Facilities" (including cross allocations from other pools, where applicable). For nonprofit organizations, library expenses are included in the "Administration" category; for IHEs, they are included in the "Facilities" category. Major IHEs are defined as those required to use the Standard Format for Submission as noted in appendix III to this part, and Rate Determination for Institutions of Higher Education paragraph C. 11. Major nonprofit organizations are those which receive more than \$10 million dollars in direct Federal funding.
- (b) **Diversity of nonprofit organizations.** Because of the diverse characteristics and accounting practices of nonprofit organizations, it is not possible to specify the types of cost which may be classified as indirect (F&A) cost in all situations. Identification with a Federal award rather than the nature of the goods and services involved is the determining factor in distinguishing direct from indirect (F&A) costs of Federal awards. However, typical examples of indirect (F&A) cost for many nonprofit organizations may include depreciation on buildings and equipment, the costs of operating and maintaining facilities, and general administration and general expenses, such as the salaries and expenses of executive officers, personnel administration, and accounting.
- (c) **Federal Agency Acceptance of Negotiated Indirect Cost Rates.** (See also § 200.306.)

- (1) The negotiated rates must be accepted by all Federal awarding agencies. A Federal awarding agency may use a rate different from the negotiated rate for a class of Federal awards or a single Federal award only when required by Federal statute or regulation, or when approved by a Federal awarding agency head or delegate based on documented justification as described in paragraph (c)(3) of this section.
  - (2) The Federal awarding agency head or delegate must notify OMB of any approved deviations.
  - (3) The Federal awarding agency must implement, and make publicly available, the policies, procedures and general decision-making criteria that their programs will follow to seek and justify deviations from negotiated rates.
  - (4) As required under § 200.204, the Federal awarding agency must include in the notice of funding opportunity the policies relating to indirect cost rate reimbursement, matching, or cost share as approved under paragraph (e)(1) of this section. As appropriate, the Federal agency should incorporate discussion of these policies into Federal awarding agency outreach activities with non-Federal entities prior to the posting of a notice of funding opportunity.
- (d) Pass-through entities are subject to the requirements in § 200.332(a)(4).
- (e) Requirements for development and submission of indirect (F&A) cost rate proposals and cost allocation plans are contained in Appendices III-VII and Appendix IX as follows:
- (1) Appendix III to Part 200—Indirect (F&A) Costs Identification and Assignment, and Rate Determination for Institutions of Higher Education (IHEs);
  - (2) Appendix IV to Part 200—Indirect (F&A) Costs Identification and Assignment, and Rate Determination for Nonprofit Organizations;
  - (3) Appendix V to Part 200—State/Local Governmentwide Central Service Cost Allocation Plans;
  - (4) Appendix VI to Part 200—Public Assistance Cost Allocation Plans;
  - (5) Appendix VII to Part 200—States and Local Government and Indian Tribe Indirect Cost Proposals; and
  - (6) Appendix IX to Part 200—Hospital Cost Principles.
- (f) In addition to the procedures outlined in the appendices in paragraph (e) of this section, any non-Federal entity that does not have a current negotiated (including provisional) rate, except for those non-Federal entities described in appendix VII to this part, paragraph D.1.b, may elect to charge a de minimis rate of 10% of modified total direct costs (MTDC) which may be used indefinitely. No documentation is required to justify the 10% de minimis indirect cost rate. As described in § 200.403, costs must be consistently charged as either indirect or direct costs, but may not be double charged or inconsistently charged as both. If chosen, this methodology once elected must be used consistently for all Federal awards until such time as a non-Federal entity chooses to negotiate for a rate, which the non-Federal entity may apply to do at any time.
- (g) Any non-Federal entity that has a current federally-negotiated indirect cost rate may apply for a one-time extension of the rates in that agreement for a period of up to four years. This extension will be subject to the review and approval of the cognizant agency for indirect costs. If an extension is granted the non-Federal entity may not request a rate review until the extension period ends. At the end of the 4-year extension, the non-Federal entity must re-apply to negotiate a rate. Subsequent one-time extensions (up to four years) are permitted if a renegotiation is completed between each extension request.

- (h) The federally negotiated indirect rate, distribution base, and rate type for a non-Federal entity (except for the Indian tribes or tribal organizations, as defined in the Indian Self Determination, Education and Assistance Act, 25 U.S.C. 450b(1)) must be available publicly on an OMB-designated Federal website.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75886, Dec. 19, 2014; 85 FR 49563, Aug. 13, 2020]

## § 200.415 Required certifications.

Required certifications include:

- (a) To assure that expenditures are proper and in accordance with the terms and conditions of the Federal award and approved project budgets, the annual and final fiscal reports or vouchers requesting payment under the agreements must include a certification, signed by an official who is authorized to legally bind the non-Federal entity, which reads as follows: "By signing this report, I certify to the best of my knowledge and belief that the report is true, complete, and accurate, and the expenditures, disbursements and cash receipts are for the purposes and objectives set forth in the terms and conditions of the Federal award. I am aware that any false, fictitious, or fraudulent information, or the omission of any material fact, may subject me to criminal, civil or administrative penalties for fraud, false statements, false claims or otherwise. (U.S. Code Title 18, Section 1001 and Title 31, Sections 3729-3730 and 3801-3812)."
- (b) Certification of cost allocation plan or indirect (F&A) cost rate proposal. Each cost allocation plan or indirect (F&A) cost rate proposal must comply with the following:
  - (1) A proposal to establish a cost allocation plan or an indirect (F&A) cost rate, whether submitted to a Federal cognizant agency for indirect costs or maintained on file by the non-Federal entity, must be certified by the non-Federal entity using the Certificate of Cost Allocation Plan or Certificate of Indirect Costs as set forth in appendices III through VII, and IX of this part. The certificate must be signed on behalf of the non-Federal entity by an individual at a level no lower than vice president or chief financial officer of the non-Federal entity that submits the proposal.
  - (2) Unless the non-Federal entity has elected the option under § 200.414(f), the Federal Government may either disallow all indirect (F&A) costs or unilaterally establish such a plan or rate when the non-Federal entity fails to submit a certified proposal for establishing such a plan or rate in accordance with the requirements. Such a plan or rate may be based upon audited historical data or such other data that have been furnished to the cognizant agency for indirect costs and for which it can be demonstrated that all unallowable costs have been excluded. When a cost allocation plan or indirect cost rate is unilaterally established by the Federal Government because the non-Federal entity failed to submit a certified proposal, the plan or rate established will be set to ensure that potentially unallowable costs will not be reimbursed.
- (c) Certifications by nonprofit organizations as appropriate that they did not meet the definition of a major nonprofit organization as defined in § 200.414(a).
- (d) See also § 200.450 for another required certification.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75886, Dec. 19, 2014; 85 FR 49563, Aug. 13, 2020]

SPECIAL CONSIDERATIONS FOR STATES, LOCAL GOVERNMENTS AND INDIAN TRIBES

## § 200.416 Cost allocation plans and indirect cost proposals.

- (a) For states, local governments and Indian tribes, certain services, such as motor pools, computer centers, purchasing, accounting, etc., are provided to operating agencies on a centralized basis. Since Federal awards are performed within the individual operating agencies, there needs to be a process whereby these central service costs can be identified and assigned to benefitted activities on a reasonable and consistent basis. The central service cost allocation plan provides that process.
- (b) Individual operating agencies (governmental department or agency), normally charge Federal awards for indirect costs through an indirect cost rate. A separate indirect cost rate(s) proposal for each operating agency is usually necessary to claim indirect costs under Federal awards. Indirect costs include:
  - (1) The indirect costs originating in each department or agency of the governmental unit carrying out Federal awards and
  - (2) The costs of central governmental services distributed through the central service cost allocation plan and not otherwise treated as direct costs.
- (c) The requirements for development and submission of cost allocation plans (for central service costs and public assistance programs) and indirect cost rate proposals are contained in appendices V, VI and VII to this part.

[78 FR 78608, Dec. 26, 2013, as amended at 86 FR 10440, Feb. 22, 2021]

## § 200.417 Interagency service.

The cost of services provided by one agency to another within the governmental unit may include allowable direct costs of the service plus a pro-rated share of indirect costs. A standard indirect cost allowance equal to ten percent of the direct salary and wage cost of providing the service (excluding overtime, shift premiums, and fringe benefits) may be used in lieu of determining the actual indirect costs of the service. These services do not include centralized services included in central service cost allocation plans as described in Appendix V to Part 200.

[85 FR 49564, Aug. 13, 2020]

### SPECIAL CONSIDERATIONS FOR INSTITUTIONS OF HIGHER EDUCATION

## § 200.418 Costs incurred by states and local governments.

Costs incurred or paid by a state or local government on behalf of its IHEs for fringe benefit programs, such as pension costs and FICA and any other costs specifically incurred on behalf of, and in direct benefit to, the IHEs, are allowable costs of such IHEs whether or not these costs are recorded in the accounting records of the institutions, subject to the following:

- (a) The costs meet the requirements of § 200.402-411 of this subpart;
- (b) The costs are properly supported by approved cost allocation plans in accordance with applicable Federal cost accounting principles in this part; and
- (c) The costs are not otherwise borne directly or indirectly by the Federal Government.

[78 FR 78608, Dec. 26, 2013, as amended at 85 FR 49564, Aug. 13, 2020]

## § 200.419 Cost accounting standards and disclosure statement.

- (a) An IHE that receive an aggregate total \$50 million or more in Federal awards and instruments subject to this subpart (as specified in § 200.101) in its most recently completed fiscal year must comply with the Cost Accounting Standards Board's cost accounting standards located at 48 CFR 9905.501, 9905.502, 9905.505, and 9905.506. CAS-covered contracts and subcontracts awarded to the IHEs are subject to the broader range of CAS requirements at 48 CFR 9900 through 9999 and 48 CFR part 30 (FAR Part 30).
- (b) **Disclosure statement.** An IHE that receives an aggregate total \$50 million or more in Federal awards and instruments subject to this subpart (as specified in § 200.101) during its most recently completed fiscal year must disclose their cost accounting practices by filing a Disclosure Statement (DS-2), which is reproduced in Appendix III to Part 200. With the approval of the cognizant agency for indirect costs, an IHE may meet the DS-2 submission by submitting the DS-2 for each business unit that received \$50 million or more in Federal awards and instruments.
- (1) The DS-2 must be submitted to the cognizant agency for indirect costs with a copy to the IHE's cognizant agency for audit. The initial DS-2 and revisions to the DS-2 must be submitted in coordination with the IHE's indirect (F&A) rate proposal, unless an earlier submission is requested by the cognizant agency for indirect costs. IHEs with CAS-covered contracts or subcontracts meeting the dollar threshold in 48 CFR 9903.202-1(f) must submit their initial DS-2 or revisions no later than prior to the award of a CAS-covered contract or subcontract.
  - (2) An IHE must maintain an accurate DS-2 and comply with disclosed cost accounting practices. An IHE must file amendments to the DS-2 to the cognizant agency for indirect costs in advance of a disclosed practice being changed to comply with a new or modified standard, or when a practice is changed for other reasons. An IHE may proceed with implementing the change after it has notified the Federal cognizant agency for indirect costs. If the change represents a variation from 2 CFR part 200, the change may require approval by the Federal cognizant agency for indirect costs, in accordance with § 200.102(b). Amendments of a DS-2 may be submitted at any time. Resubmission of a complete, updated DS-2 is discouraged except when there are extensive changes to disclosed practices.
  - (3) **Cost and funding adjustments.** Cost adjustments must be made by the cognizant agency for indirect costs if an IHE fails to comply with the cost policies in this part or fails to consistently follow its established or disclosed cost accounting practices when estimating, accumulating or reporting the costs of Federal awards, and the aggregate cost impact on Federal awards is material. The cost adjustment must normally be made on an aggregate basis for all affected Federal awards through an adjustment of the IHE's future F&A costs rates or other means considered appropriate by the cognizant agency for indirect costs. Under the terms of CAS covered contracts, adjustments in the amount of funding provided may also be required when the estimated proposal costs were not determined in accordance with established cost accounting practices.
  - (4) **Overpayments.** Excess amounts paid in the aggregate by the Federal Government under Federal awards due to a noncompliant cost accounting practice used to estimate, accumulate, or report costs must be credited or refunded, as deemed appropriate by the cognizant agency for indirect costs. Interest applicable to the excess amounts paid in the aggregate during the period of noncompliance must also be determined and collected in accordance with applicable Federal agency regulations.

- (5) **Compliant cost accounting practice changes.** Changes from one compliant cost accounting practice to another compliant practice that are approved by the cognizant agency for indirect costs may require cost adjustments if the change has a material effect on Federal awards and the changes are deemed appropriate by the cognizant agency for indirect costs.
- (6) **Responsibilities.** The cognizant agency for indirect cost must:
  - (i) Determine cost adjustments for all Federal awards in the aggregate on behalf of the Federal Government. Actions of the cognizant agency for indirect cost in making cost adjustment determinations must be coordinated with all affected Federal awarding agencies to the extent necessary.
  - (ii) Prescribe guidelines and establish internal procedures to promptly determine on behalf of the Federal Government that a DS-2 adequately discloses the IHE's cost accounting practices and that the disclosed practices are compliant with applicable CAS and the requirements of this part.
  - (iii) Distribute to all affected Federal awarding agencies any DS-2 determination of adequacy or noncompliance.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75886, Dec. 19, 2014; 85 FR 49564, Aug. 13, 2020]

#### GENERAL PROVISIONS FOR SELECTED ITEMS OF COST

### § 200.420 Considerations for selected items of cost.

This section provides principles to be applied in establishing the allowability of certain items involved in determining cost, in addition to the requirements of Subtitle II of this subpart. These principles apply whether or not a particular item of cost is properly treated as direct cost or indirect (F&A) cost. Failure to mention a particular item of cost is not intended to imply that it is either allowable or unallowable; rather, determination as to allowability in each case should be based on the treatment provided for similar or related items of cost, and based on the principles described in §§ 200.402 through 200.411. In case of a discrepancy between the provisions of a specific Federal award and the provisions below, the Federal award governs. Criteria outlined in § 200.403 must be applied in determining allowability. See also § 200.102.

[85 FR 49564, Aug. 13, 2020]

### § 200.421 Advertising and public relations.

- (a) The term advertising costs means the costs of advertising media and corollary administrative costs. Advertising media include magazines, newspapers, radio and television, direct mail, exhibits, electronic or computer transmittals, and the like.
- (b) The only allowable advertising costs are those which are solely for:
  - (1) The recruitment of personnel required by the non-Federal entity for performance of a Federal award (See also § 200.463);
  - (2) The procurement of goods and services for the performance of a Federal award;
  - (3) The disposal of scrap or surplus materials acquired in the performance of a Federal award except when non-Federal entities are reimbursed for disposal costs at a predetermined amount; or

- (4) Program outreach and other specific purposes necessary to meet the requirements of the Federal award.
- (c) The term “public relations” includes community relations and means those activities dedicated to maintaining the image of the non-Federal entity or maintaining or promoting understanding and favorable relations with the community or public at large or any segment of the public.
- (d) The only allowable public relations costs are:
  - (1) Costs specifically required by the Federal award;
  - (2) Costs of communicating with the public and press pertaining to specific activities or accomplishments which result from performance of the Federal award (these costs are considered necessary as part of the outreach effort for the Federal award); or
  - (3) Costs of conducting general liaison with news media and government public relations officers, to the extent that such activities are limited to communication and liaison necessary to keep the public informed on matters of public concern, such as notices of funding opportunities, financial matters, etc.
- (e) Unallowable advertising and public relations costs include the following:
  - (1) All advertising and public relations costs other than as specified in paragraphs (b) and (d) of this section;
  - (2) Costs of meetings, conventions, convocations, or other events related to other activities of the entity (see also § 200.432), including:
    - (i) Costs of displays, demonstrations, and exhibits;
    - (ii) Costs of meeting rooms, hospitality suites, and other special facilities used in conjunction with shows and other special events; and
    - (iii) Salaries and wages of employees engaged in setting up and displaying exhibits, making demonstrations, and providing briefings;
  - (3) Costs of promotional items and memorabilia, including models, gifts, and souvenirs;
  - (4) Costs of advertising and public relations designed solely to promote the non-Federal entity.

*[78 FR 76808, Dec. 26, 2013, as amended at 85 FR 49564, Aug. 13, 2020]*

### **§ 200.422 Advisory councils.**

Costs incurred by advisory councils or committees are unallowable unless authorized by statute, the Federal awarding agency or as an indirect cost where allocable to Federal awards. See § 200.444, applicable to States, local governments, and Indian tribes.

*[85 FR 49564, Aug. 13, 2020]*

### **§ 200.423 Alcoholic beverages.**

Costs of alcoholic beverages are unallowable.

### § 200.424 Alumni/ae activities.

Costs incurred by IHEs for, or in support of, alumni/ae activities are unallowable.

### § 200.425 Audit services.

- (a) A reasonably proportionate share of the costs of audits required by, and performed in accordance with, the Single Audit Act Amendments of 1996 (31 U.S.C. 7501-7507), as implemented by requirements of this part, are allowable. However, the following audit costs are unallowable:
  - (1) Any costs when audits required by the Single Audit Act and subpart F of this part have not been conducted or have been conducted but not in accordance therewith; and
  - (2) Any costs of auditing a non-Federal entity that is exempted from having an audit conducted under the Single Audit Act and subpart F of this part because its expenditures under Federal awards are less than \$750,000 during the non-Federal entity's fiscal year.
- (b) The costs of a financial statement audit of a non-Federal entity that does not currently have a Federal award may be included in the indirect cost pool for a cost allocation plan or indirect cost proposal.
- (c) Pass-through entities may charge Federal awards for the cost of agreed-upon-procedures engagements to monitor subrecipients (in accordance with subpart D, §§ 200.331-333) who are exempted from the requirements of the Single Audit Act and subpart F of this part. This cost is allowable only if the agreed-upon-procedures engagements are:
  - (1) Conducted in accordance with GAGAS attestation standards;
  - (2) Paid for and arranged by the pass-through entity; and
  - (3) Limited in scope to one or more of the following types of compliance requirements: activities allowed or unallowed; allowable costs/cost principles; eligibility; and reporting.

[78 FR 78608, Dec. 26, 2013, as amended at 85 FR 49564, Aug. 13, 2020]

### § 200.426 Bad debts.

Bad debts (debts which have been determined to be uncollectable), including losses (whether actual or estimated) arising from uncollectable accounts and other claims, are unallowable. Related collection costs, and related legal costs, arising from such debts after they have been determined to be uncollectable are also unallowable. See also § 200.428.

[85 FR 49565, Aug. 13, 2020]

### § 200.427 Bonding costs.

- (a) Bonding costs arise when the Federal awarding agency requires assurance against financial loss to itself or others by reason of the act or default of the non-Federal entity. They arise also in instances where the non-Federal entity requires similar assurance, including: bonds as bid, performance, payment, advance payment, infringement, and fidelity bonds for employees and officials.
- (b) Costs of bonding required pursuant to the terms and conditions of the Federal award are allowable.

- (c) Costs of bonding required by the non-Federal entity in the general conduct of its operations are allowable as an indirect cost to the extent that such bonding is in accordance with sound business practice and the rates and premiums are reasonable under the circumstances.

### § 200.428 Collections of improper payments.

The costs incurred by a non-Federal entity to recover improper payments are allowable as either direct or indirect costs, as appropriate. Amounts collected may be used by the non-Federal entity in accordance with cash management standards set forth in § 200.305.

[85 FR 49565, Aug. 13, 2020]

### § 200.429 Commencement and convocation costs.

For IHEs, costs incurred for commencements and convocations are unallowable, except as provided for in (B)(9) Student Administration and Services, in appendix III to this part, as activity costs.

[85 FR 49565, Aug. 13, 2020]

### § 200.430 Compensation—personal services.

- (a) **General.** Compensation for personal services includes all remuneration, paid currently or accrued, for services of employees rendered during the period of performance under the Federal award, including but not necessarily limited to wages and salaries. Compensation for personal services may also include fringe benefits which are addressed in § 200.431. Costs of compensation are allowable to the extent that they satisfy the specific requirements of this part, and that the total compensation for individual employees:
  - (1) Is reasonable for the services rendered and conforms to the established written policy of the non-Federal entity consistently applied to both Federal and non-Federal activities;
  - (2) Follows an appointment made in accordance with a non-Federal entity's laws and/or rules or written policies and meets the requirements of Federal statute, where applicable; and
  - (3) Is determined and supported as provided in paragraph (i) of this section, when applicable.
- (b) **Reasonableness.** Compensation for employees engaged in work on Federal awards will be considered reasonable to the extent that it is consistent with that paid for similar work in other activities of the non-Federal entity. In cases where the kinds of employees required for Federal awards are not found in the other activities of the non-Federal entity, compensation will be considered reasonable to the extent that it is comparable to that paid for similar work in the labor market in which the non-Federal entity competes for the kind of employees involved.
- (c) **Professional activities outside the non-Federal entity.** Unless an arrangement is specifically authorized by a Federal awarding agency, a non-Federal entity must follow its written non-Federal entity-wide policies and practices concerning the permissible extent of professional services that can be provided outside the non-Federal entity for non-organizational compensation. Where such non-Federal entity-wide written policies do not exist or do not adequately define the permissible extent of consulting or other non-organizational activities undertaken for extra outside pay, the Federal Government may require that the effort of professional staff working on Federal awards be allocated between:
  - (1) Non-Federal entity activities, and

- (2) Non-organizational professional activities. If the Federal awarding agency considers the extent of non-organizational professional effort excessive or inconsistent with the conflicts-of-interest terms and conditions of the Federal award, appropriate arrangements governing compensation will be negotiated on a case-by-case basis.

(d) **Unallowable costs.**

- (1) Costs which are unallowable under other sections of these principles must not be allowable under this section solely on the basis that they constitute personnel compensation.
- (2) The allowable compensation for certain employees is subject to a ceiling in accordance with statute. For the amount of the ceiling for cost-reimbursement contracts, the covered compensation subject to the ceiling, the covered employees, and other relevant provisions, see 10 U.S.C. 2324(e)(1)(P), and 41 U.S.C. 1127 and 4304(a)(16). For other types of Federal awards, other statutory ceilings may apply.

- (e) **Special considerations.** Special considerations in determining allowability of compensation will be given to any change in a non-Federal entity's compensation policy resulting in a substantial increase in its employees' level of compensation (particularly when the change was concurrent with an increase in the ratio of Federal awards to other activities) or any change in the treatment of allowability of specific types of compensation due to changes in Federal policy.

- (f) **Incentive compensation.** Incentive compensation to employees based on cost reduction, or efficient performance, suggestion awards, safety awards, etc., is allowable to the extent that the overall compensation is determined to be reasonable and such costs are paid or accrued pursuant to an agreement entered into in good faith between the non-Federal entity and the employees before the services were rendered, or pursuant to an established plan followed by the non-Federal entity so consistently as to imply, in effect, an agreement to make such payment.

- (g) **Nonprofit organizations.** For compensation to members of nonprofit organizations, trustees, directors, associates, officers, or the immediate families thereof, determination must be made that such compensation is reasonable for the actual personal services rendered rather than a distribution of earnings in excess of costs. This may include director's and executive committee member's fees, incentive awards, allowances for off-site pay, incentive pay, location allowances, hardship pay, and cost-of-living differentials.

(h) **Institutions of Higher Education (IHEs).**

- (1) Certain conditions require special consideration and possible limitations in determining allowable personnel compensation costs under Federal awards. Among such conditions are the following:
  - (i) Allowable activities. Charges to Federal awards may include reasonable amounts for activities contributing and directly related to work under an agreement, such as delivering special lectures about specific aspects of the ongoing activity, writing reports and articles, developing and maintaining protocols (human, animals, etc.), managing substances/chemicals, managing and securing project-specific data, coordinating research subjects, participating in appropriate seminars, consulting with colleagues and graduate students, and attending meetings and conferences.

- (ii) Incidental activities. Incidental activities for which supplemental compensation is allowable under written institutional policy (at a rate not to exceed institutional base salary) need not be included in the records described in paragraph (i) of this section to directly charge payments of incidental activities, such activities must either be specifically provided for in the Federal award budget or receive prior written approval by the Federal awarding agency.
- (2) **Salary basis.** Charges for work performed on Federal awards by faculty members during the academic year are allowable at the IBS rate. Except as noted in paragraph (h)(1)(ii) of this section, in no event will charges to Federal awards, irrespective of the basis of computation, exceed the proportionate share of the IBS for that period. This principle applies to all members of faculty at an institution. IBS is defined as the annual compensation paid by an IHE for an individual's appointment, whether that individual's time is spent on research, instruction, administration, or other activities. IBS excludes any income that an individual earns outside of duties performed for the IHE. Unless there is prior approval by the Federal awarding agency, charges of a faculty member's salary to a Federal award must not exceed the proportionate share of the IBS for the period during which the faculty member worked on the award.
- (3) **Intra-Institution of Higher Education (IHE) consulting.** Intra-IHE consulting by faculty should be undertaken as an IHE responsibility requiring no compensation in addition to IBS. However, in unusual cases where consultation is across departmental lines or involves a separate or remote operation, and the work performed by the faculty member is in addition to his or her regular responsibilities, any charges for such work representing additional compensation above IBS are allowable provided that such consulting arrangements are specifically provided for in the Federal award or approved in writing by the Federal awarding agency.
- (4) Extra Service Pay normally represents overload compensation, subject to institutional compensation policies for services above and beyond IBS. Where extra service pay is a result of Intra-IHE consulting, it is subject to the same requirements of paragraph (b) above. It is allowable if all of the following conditions are met:
  - (i) The non-Federal entity establishes consistent written policies which apply uniformly to all faculty members, not just those working on Federal awards.
  - (ii) The non-Federal entity establishes a consistent written definition of work covered by IBS which is specific enough to determine conclusively when work beyond that level has occurred. This may be described in appointment letters or other documentations.
  - (iii) The supplementation amount paid is commensurate with the IBS rate of pay and the amount of additional work performed. See paragraph (h)(2) of this section.
  - (iv) The salaries, as supplemented, fall within the salary structure and pay ranges established by and documented in writing or otherwise applicable to the non-Federal entity.
  - (v) The total salaries charged to Federal awards including extra service pay are subject to the Standards of Documentation as described in paragraph (i) of this section.
- (5) **Periods outside the academic year.**
  - (i) Except as specified for teaching activity in paragraph (h)(5)(ii) of this section, charges for work performed by faculty members on Federal awards during periods not included in the base salary period will be at a rate not in excess of the IBS.

(ii) Charges for teaching activities performed by faculty members on Federal awards during periods not included in IBS period will be based on the normal written policy of the IHE governing compensation to faculty members for teaching assignments during such periods.

(6) **Part-time faculty.** Charges for work performed on Federal awards by faculty members having only part-time appointments will be determined at a rate not in excess of that regularly paid for part-time assignments.

(7) **Sabbatical leave costs.** Rules for sabbatical leave are as follow:

(i) Costs of leaves of absence by employees for performance of graduate work or sabbatical study, travel, or research are allowable provided the IHE has a uniform written policy on sabbatical leave for persons engaged in instruction and persons engaged in research. Such costs will be allocated on an equitable basis among all related activities of the IHE.

(ii) Where sabbatical leave is included in fringe benefits for which a cost is determined for assessment as a direct charge, the aggregate amount of such assessments applicable to all work of the institution during the base period must be reasonable in relation to the IHE's actual experience under its sabbatical leave policy.

(8) **Salary rates for non-faculty members.** Non-faculty full-time professional personnel may also earn "extra service pay" in accordance with the non-Federal entity's written policy and consistent with paragraph (h)(1)(i) of this section.

(i) **Standards for Documentation of Personnel Expenses**

(1) Charges to Federal awards for salaries and wages must be based on records that accurately reflect the work performed. These records must:

(i) Be supported by a system of internal control which provides reasonable assurance that the charges are accurate, allowable, and properly allocated;

(ii) Be incorporated into the official records of the non-Federal entity;

(iii) Reasonably reflect the total activity for which the employee is compensated by the non-Federal entity, not exceeding 100% of compensated activities (for IHE, this per the IHE's definition of IBS);

(iv) Encompass federally-assisted and all other activities compensated by the non-Federal entity on an integrated basis, but may include the use of subsidiary records as defined in the non-Federal entity's written policy;

(v) Comply with the established accounting policies and practices of the non-Federal entity (See paragraph (h)(1)(ii) above for treatment of incidental work for IHEs.); and

(vi) [Reserved]

(vii) Support the distribution of the employee's salary or wages among specific activities or cost objectives if the employee works on more than one Federal award; a Federal award and non-Federal award; an indirect cost activity and a direct cost activity; two or more indirect activities which are allocated using different allocation bases; or an unallowable activity and a direct or indirect cost activity.

- (viii) Budget estimates (i.e., estimates determined before the services are performed) alone do not qualify as support for charges to Federal awards, but may be used for interim accounting purposes, provided that:
  - (A) The system for establishing the estimates produces reasonable approximations of the activity actually performed;
  - (B) Significant changes in the corresponding work activity (as defined by the non-Federal entity's written policies) are identified and entered into the records in a timely manner. Short term (such as one or two months) fluctuation between workload categories need not be considered as long as the distribution of salaries and wages is reasonable over the longer term; and
  - (C) The non-Federal entity's system of internal controls includes processes to review after-the-fact interim charges made to a Federal award based on budget estimates. All necessary adjustment must be made such that the final amount charged to the Federal award is accurate, allowable, and properly allocated.
- (ix) Because practices vary as to the activity constituting a full workload (for IHEs, IBS), records may reflect categories of activities expressed as a percentage distribution of total activities.
- (x) It is recognized that teaching, research, service, and administration are often inextricably intermingled in an academic setting. When recording salaries and wages charged to Federal awards for IHEs, a precise assessment of factors that contribute to costs is therefore not always feasible, nor is it expected.
- (2) For records which meet the standards required in paragraph (i)(1) of this section, the non-Federal entity will not be required to provide additional support or documentation for the work performed, other than that referenced in paragraph (i)(3) of this section.
- (3) In accordance with Department of Labor regulations implementing the Fair Labor Standards Act (FLSA) (29 CFR part 516), charges for the salaries and wages of nonexempt employees, in addition to the supporting documentation described in this section, must also be supported by records indicating the total number of hours worked each day.
- (4) Salaries and wages of employees used in meeting cost sharing or matching requirements on Federal awards must be supported in the same manner as salaries and wages claimed for reimbursement from Federal awards.
- (5) For states, local governments and Indian tribes, substitute processes or systems for allocating salaries and wages to Federal awards may be used in place of or in addition to the records described in paragraph (1) if approved by the cognizant agency for indirect cost. Such systems may include, but are not limited to, random moment sampling, "rolling" time studies, case counts, or other quantifiable measures of work performed.
  - (i) Substitute systems which use sampling methods (primarily for Temporary Assistance for Needy Families (TANF), the Supplemental Nutrition Assistance Program (SNAP), Medicaid, and other public assistance programs) must meet acceptable statistical sampling standards including:
    - (A) The sampling universe must include all of the employees whose salaries and wages are to be allocated based on sample results except as provided in paragraph (i)(5)(iii) of this section;

- (B) The entire time period involved must be covered by the sample; and
  - (C) The results must be statistically valid and applied to the period being sampled.
- (ii) Allocating charges for the sampled employees' supervisors, clerical and support staffs, based on the results of the sampled employees, will be acceptable.
  - (iii) Less than full compliance with the statistical sampling standards noted in subsection (5)(i) may be accepted by the cognizant agency for indirect costs if it concludes that the amounts to be allocated to Federal awards will be minimal, or if it concludes that the system proposed by the non-Federal entity will result in lower costs to Federal awards than a system which complies with the standards.
- (6) Cognizant agencies for indirect costs are encouraged to approve alternative proposals based on outcomes and milestones for program performance where these are clearly documented. Where approved by the Federal cognizant agency for indirect costs, these plans are acceptable as an alternative to the requirements of paragraph (i)(1) of this section.
  - (7) For Federal awards of similar purpose activity or instances of approved blended funding, a non-Federal entity may submit performance plans that incorporate funds from multiple Federal awards and account for their combined use based on performance-oriented metrics, provided that such plans are approved in advance by all involved Federal awarding agencies. In these instances, the non-Federal entity must submit a request for waiver of the requirements based on documentation that describes the method of charging costs, relates the charging of costs to the specific activity that is applicable to all fund sources, and is based on quantifiable measures of the activity in relation to time charged.
  - (8) For a non-Federal entity where the records do not meet the standards described in this section, the Federal Government may require personnel activity reports, including prescribed certifications, or equivalent documentation that support the records as required in this section.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75886, Dec. 19, 2014; 85 FR 49565, Aug. 13, 2020]

## § 200.431 Compensation—fringe benefits.

- (a) **General.** Fringe benefits are allowances and services provided by employers to their employees as compensation in addition to regular salaries and wages. Fringe benefits include, but are not limited to, the costs of leave (vacation, family-related, sick or military), employee insurance, pensions, and unemployment benefit plans. Except as provided elsewhere in these principles, the costs of fringe benefits are allowable provided that the benefits are reasonable and are required by law, non-Federal entity-employee agreement, or an established policy of the non-Federal entity.
- (b) **Leave.** The cost of fringe benefits in the form of regular compensation paid to employees during periods of authorized absences from the job, such as for annual leave, family-related leave, sick leave, holidays, court leave, military leave, administrative leave, and other similar benefits, are allowable if all of the following criteria are met:
  - (1) They are provided under established written leave policies;
  - (2) The costs are equitably allocated to all related activities, including Federal awards; and
  - (3) The accounting basis (cash or accrual) selected for costing each type of leave is consistently followed by the non-Federal entity or specified grouping of employees.

- (i) When a non-Federal entity uses the cash basis of accounting, the cost of leave is recognized in the period that the leave is taken and paid for. Payments for unused leave when an employee retires or terminates employment are allowable in the year of payment.
  - (ii) The accrual basis may be only used for those types of leave for which a liability as defined by GAAP exists when the leave is earned. When a non-Federal entity uses the accrual basis of accounting, allowable leave costs are the lesser of the amount accrued or funded.
- (c) **Fringe benefits.** The cost of fringe benefits in the form of employer contributions or expenses for social security; employee life, health, unemployment, and worker's compensation insurance (except as indicated in § 200.447); pension plan costs (see paragraph (i) of this section); and other similar benefits are allowable, provided such benefits are granted under established written policies. Such benefits, must be allocated to Federal awards and all other activities in a manner consistent with the pattern of benefits attributable to the individuals or group(s) of employees whose salaries and wages are chargeable to such Federal awards and other activities, and charged as direct or indirect costs in accordance with the non-Federal entity's accounting practices.
- (d) **Cost objectives.** Fringe benefits may be assigned to cost objectives by identifying specific benefits to specific individual employees or by allocating on the basis of entity-wide salaries and wages of the employees receiving the benefits. When the allocation method is used, separate allocations must be made to selective groupings of employees, unless the non-Federal entity demonstrates that costs in relationship to salaries and wages do not differ significantly for different groups of employees.
- (e) **Insurance.** See also § 200.447(d)(1) and (2).
  - (1) Provisions for a reserve under a self-insurance program for unemployment compensation or workers' compensation are allowable to the extent that the provisions represent reasonable estimates of the liabilities for such compensation, and the types of coverage, extent of coverage, and rates and premiums would have been allowable had insurance been purchased to cover the risks. However, provisions for self-insured liabilities which do not become payable for more than one year after the provision is made must not exceed the present value of the liability.
  - (2) Costs of insurance on the lives of trustees, officers, or other employees holding positions of similar responsibility are allowable only to the extent that the insurance represents additional compensation. The costs of such insurance when the non-Federal entity is named as beneficiary are unallowable.
  - (3) Actual claims paid to or on behalf of employees or former employees for workers' compensation, unemployment compensation, severance pay, and similar employee benefits (e.g., post-retirement health benefits), are allowable in the year of payment provided that the non-Federal entity follows a consistent costing policy.
- (f) **Automobiles.** That portion of automobile costs furnished by the non-Federal entity that relates to personal use by employees (including transportation to and from work) is unallowable as fringe benefit or indirect (F&A) costs regardless of whether the cost is reported as taxable income to the employees.
- (g) **Pension plan costs.** Pension plan costs which are incurred in accordance with the established policies of the non-Federal entity are allowable, provided that:
  - (1) Such policies meet the test of reasonableness.
  - (2) The methods of cost allocation are not discriminatory.

- (3) Except for State and Local Governments, the cost assigned to each fiscal year should be determined in accordance with GAAP.
- (4) The costs assigned to a given fiscal year are funded for all plan participants within six months after the end of that year. However, increases to normal and past service pension costs caused by a delay in funding the actuarial liability beyond 30 calendar days after each quarter of the year to which such costs are assignable are unallowable. Non-Federal entity may elect to follow the "Cost Accounting Standard for Composition and Measurement of Pension Costs" (48 CFR 9904.412).
- (5) Pension plan termination insurance premiums paid pursuant to the Employee Retirement Income Security Act (ERISA) of 1974 (29 U.S.C. 1301-1461) are allowable. Late payment charges on such premiums are unallowable. Excise taxes on accumulated funding deficiencies and other penalties imposed under ERISA are unallowable.
- (6) Pension plan costs may be computed using a pay-as-you-go method or an acceptable actuarial cost method in accordance with established written policies of the non-Federal entity.
  - (i) For pension plans financed on a pay-as-you-go method, allowable costs will be limited to those representing actual payments to retirees or their beneficiaries.
  - (ii) Pension costs calculated using an actuarial cost-based method recognized by GAAP are allowable for a given fiscal year if they are funded for that year within six months after the end of that year. Costs funded after the six-month period (or a later period agreed to by the cognizant agency for indirect costs) are allowable in the year funded. The cognizant agency for indirect costs may agree to an extension of the six-month period if an appropriate adjustment is made to compensate for the timing of the charges to the Federal Government and related Federal reimbursement and the non-Federal entity's contribution to the pension fund. Adjustments may be made by cash refund or other equitable procedures to compensate the Federal Government for the time value of Federal reimbursements in excess of contributions to the pension fund.
  - (iii) Amounts funded by the non-Federal entity in excess of the actuarially determined amount for a fiscal year may be used as the non-Federal entity's contribution in future periods.
  - (iv) When a non-Federal entity converts to an acceptable actuarial cost method, as defined by GAAP, and funds pension costs in accordance with this method, the unfunded liability at the time of conversion is allowable if amortized over a period of years in accordance with GAAP.
  - (v) The Federal Government must receive an equitable share of any previously allowed pension costs (including earnings thereon) which revert or inure to the non-Federal entity in the form of a refund, withdrawal, or other credit.
- (h) **Post-retirement health.** Post-retirement health plans (PRHP) refers to costs of health insurance or health services not included in a pension plan covered by paragraph (g) of this section for retirees and their spouses, dependents, and survivors. PRHP costs may be computed using a pay-as-you-go method or an acceptable actuarial cost method in accordance with established written policies of the non-Federal entity.
  - (1) For PRHP financed on a pay-as-you-go method, allowable costs will be limited to those representing actual payments to retirees or their beneficiaries.

- (2) PRHP costs calculated using an actuarial cost method recognized by GAAP are allowable if they are funded for that year within six months after the end of that year. Costs funded after the six-month period (or a later period agreed to by the cognizant agency) are allowable in the year funded. The Federal cognizant agency for indirect costs may agree to an extension of the six-month period if an appropriate adjustment is made to compensate for the timing of the charges to the Federal Government and related Federal reimbursements and the non-Federal entity's contributions to the PRHP fund. Adjustments may be made by cash refund, reduction in current year's PRHP costs, or other equitable procedures to compensate the Federal Government for the time value of Federal reimbursements in excess of contributions to the PRHP fund.
- (3) Amounts funded in excess of the actuarially determined amount for a fiscal year may be used as the non-Federal entity contribution in a future period.
- (4) When a non-Federal entity converts to an acceptable actuarial cost method and funds PRHP costs in accordance with this method, the initial unfunded liability attributable to prior years is allowable if amortized over a period of years in accordance with GAAP, or, if no such GAAP period exists, over a period negotiated with the cognizant agency for indirect costs.
- (5) To be allowable in the current year, the PRHP costs must be paid either to:
  - (i) An insurer or other benefit provider as current year costs or premiums, or
  - (ii) An insurer or trustee to maintain a trust fund or reserve for the sole purpose of providing post-retirement benefits to retirees and other beneficiaries.
- (6) The Federal Government must receive an equitable share of any amounts of previously allowed post-retirement benefit costs (including earnings thereon) which revert or inure to the non-Federal entity in the form of a refund, withdrawal, or other credit.

(i) **Severance pay.**

- (1) Severance pay, also commonly referred to as dismissal wages, is a payment in addition to regular salaries and wages, by non-Federal entities to workers whose employment is being terminated. Costs of severance pay are allowable only to the extent that in each case, it is required by
  - (i) Law;
  - (ii) Employer-employee agreement;
  - (iii) Established policy that constitutes, in effect, an implied agreement on the non-Federal entity's part; or
  - (iv) Circumstances of the particular employment.
- (2) Costs of severance payments are divided into two categories as follows:
  - (i) Actual normal turnover severance payments must be allocated to all activities; or, where the non-Federal entity provides for a reserve for normal severances, such method will be acceptable if the charge to current operations is reasonable in light of payments actually made for normal severances over a representative past period, and if amounts charged are allocated to all activities of the non-Federal entity.

- (ii) Measurement of costs of abnormal or mass severance pay by means of an accrual will not achieve equity to both parties. Thus, accruals for this purpose are not allowable. However, the Federal Government recognizes its responsibility to participate, to the extent of its fair share, in any specific payment. Prior approval by the Federal awarding agency or cognizant agency for indirect cost, as appropriate, is required.
  - (3) Costs incurred in certain severance pay packages which are in an amount in excess of the normal severance pay paid by the non-Federal entity to an employee upon termination of employment and are paid to the employee contingent upon a change in management control over, or ownership of, the non-Federal entity's assets, are unallowable.
  - (4) Severance payments to foreign nationals employed by the non-Federal entity outside the United States, to the extent that the amount exceeds the customary or prevailing practices for the non-Federal entity in the United States, are unallowable, unless they are necessary for the performance of Federal programs and approved by the Federal awarding agency.
  - (5) Severance payments to foreign nationals employed by the non-Federal entity outside the United States due to the termination of the foreign national as a result of the closing of, or curtailment of activities by, the non-Federal entity in that country, are unallowable, unless they are necessary for the performance of Federal programs and approved by the Federal awarding agency.
- (j) **For IHEs only.**
- (1) Fringe benefits in the form of undergraduate and graduate tuition or remission of tuition for individual employees are allowable, provided such benefits are granted in accordance with established non-Federal entity policies, and are distributed to all non-Federal entity activities on an equitable basis. Tuition benefits for family members other than the employee are unallowable.
  - (2) Fringe benefits in the form of tuition or remission of tuition for individual employees not employed by IHEs are limited to the tax-free amount allowed per section 127 of the Internal Revenue Code as amended.
  - (3) IHEs may offer employees tuition waivers or tuition reductions, provided that the benefit does not discriminate in favor of highly compensated employees. Employees can exercise these benefits at other institutions according to institutional policy. See [§ 200.466](#), for treatment of tuition remission provided to students.
- (k) **Fringe benefit programs and other benefit costs.** For IHEs whose costs are paid by state or local governments, fringe benefit programs (such as pension costs and FICA) and any other benefits costs specifically incurred on behalf of, and in direct benefit to, the non-Federal entity, are allowable costs of such non-Federal entities whether or not these costs are recorded in the accounting records of the non-Federal entities, subject to the following:
- (1) The costs meet the requirements of Basic Considerations in [§§ 200.402 through 200.411](#);
  - (2) The costs are properly supported by approved cost allocation plans in accordance with applicable Federal cost accounting principles; and
  - (3) The costs are not otherwise borne directly or indirectly by the Federal Government.

[85 FR 49565, Aug. 13, 2020]

## § 200.432 Conferences.

A conference is defined as a meeting, retreat, seminar, symposium, workshop or event whose primary purpose is the dissemination of technical information beyond the non-Federal entity and is necessary and reasonable for successful performance under the Federal award. Allowable conference costs paid by the non-Federal entity as a sponsor or host of the conference may include rental of facilities, speakers' fees, costs of meals and refreshments, local transportation, and other items incidental to such conferences unless further restricted by the terms and conditions of the Federal award. As needed, the costs of identifying, but not providing, locally available dependent-care resources are allowable. Conference hosts/sponsors must exercise discretion and judgment in ensuring that conference costs are appropriate, necessary and managed in a manner that minimizes costs to the Federal award. The Federal awarding agency may authorize exceptions where appropriate for programs including Indian tribes, children, and the elderly. See also §§ 200.438, 200.456, and 200.475.

[85 FR 49567, Aug. 13, 2020]

## § 200.433 Contingency provisions.

- (a) Contingency is that part of a budget estimate of future costs (typically of large construction projects, IT systems, or other items as approved by the Federal awarding agency) which is associated with possible events or conditions arising from causes the precise outcome of which is indeterminable at the time of estimate, and that experience shows will likely result, in aggregate, in additional costs for the approved activity or project. Amounts for major project scope changes, unforeseen risks, or extraordinary events may not be included.
- (b) It is permissible for contingency amounts other than those excluded in paragraph (a) of this section to be explicitly included in budget estimates, to the extent they are necessary to improve the precision of those estimates. Amounts must be estimated using broadly-accepted cost estimating methodologies, specified in the budget documentation of the Federal award, and accepted by the Federal awarding agency. As such, contingency amounts are to be included in the Federal award. In order for actual costs incurred to be allowable, they must comply with the cost principles and other requirements in this part (see also §§ 200.300 and 200.403 of this part); be necessary and reasonable for proper and efficient accomplishment of project or program objectives, and be verifiable from the non-Federal entity's records.
- (c) Payments made by the Federal awarding agency to the non-Federal entity's "contingency reserve" or any similar payment made for events the occurrence of which cannot be foretold with certainty as to the time or intensity, or with an assurance of their happening, are unallowable, except as noted in §§ 200.431 and 200.447.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75886, Dec. 19, 2014; 85 FR 49567, Aug. 13, 2020]

## § 200.434 Contributions and donations.

- (a) Costs of contributions and donations, including cash, property, and services, from the non-Federal entity to other entities, are unallowable.
- (b) The value of services and property donated to the non-Federal entity may not be charged to the Federal award either as a direct or indirect (F&A) cost. The value of donated services and property may be used to meet cost sharing or matching requirements (see § 200.306). Depreciation on donated assets is permitted in accordance with § 200.436, as long as the donated property is not counted towards cost sharing or matching requirements.

- (c) Services donated or volunteered to the non-Federal entity may be furnished to a non-Federal entity by professional and technical personnel, consultants, and other skilled and unskilled labor. The value of these services may not be charged to the Federal award either as a direct or indirect cost. However, the value of donated services may be used to meet cost sharing or matching requirements in accordance with the provisions of § 200.306.
- (d) To the extent feasible, services donated to the non-Federal entity will be supported by the same methods used to support the allocability of regular personnel services.
- (e) The following provisions apply to nonprofit organizations. The value of services donated to the nonprofit organization utilized in the performance of a direct cost activity must be considered in the determination of the non-Federal entity's indirect cost rate(s) and, accordingly, must be allocated a proportionate share of applicable indirect costs when the following circumstances exist:
  - (1) The aggregate value of the services is material;
  - (2) The services are supported by a significant amount of the indirect costs incurred by the non-Federal entity;
    - (i) In those instances where there is no basis for determining the fair market value of the services rendered, the non-Federal entity and the cognizant agency for indirect costs must negotiate an appropriate allocation of indirect cost to the services.
    - (ii) Where donated services directly benefit a project supported by the Federal award, the indirect costs allocated to the services will be considered as a part of the total costs of the project. Such indirect costs may be reimbursed under the Federal award or used to meet cost sharing or matching requirements.
- (f) Fair market value of donated services must be computed as described in § 200.306.
- (g) Personal Property and Use of Space.
  - (1) Donated personal property and use of space may be furnished to a non-Federal entity. The value of the personal property and space may not be charged to the Federal award either as a direct or indirect cost.
  - (2) The value of the donations may be used to meet cost sharing or matching share requirements under the conditions described in § 200.300 of this part. The value of the donations must be determined in accordance with § 200.300. Where donations are treated as indirect costs, indirect cost rates will separate the value of the donations so that reimbursement will not be made.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75886, Dec. 19, 2014; 85 FR 49567, Aug. 13, 2020]

## § 200.435 Defense and prosecution of criminal and civil proceedings, claims, appeals and patent infringements.

### (a) *Definitions for the purposes of this section.*

- (1) **Conviction** means a judgment or conviction of a criminal offense by any court of competent jurisdiction, whether entered upon verdict or a plea, including a conviction due to a plea of nolo contendere.

(2) **Costs** include the services of in-house or private counsel, accountants, consultants, or others engaged to assist the non-Federal entity before, during, and after commencement of a judicial or administrative proceeding, that bear a direct relationship to the proceeding.

(3) **Fraud** means:

- (i) Acts of fraud or corruption or attempts to defraud the Federal Government or to corrupt its agents,
- (ii) Acts that constitute a cause for debarment or suspension (as specified in agency regulations), and
- (iii) Acts which violate the False Claims Act (31 U.S.C. 3729-3732) or the Anti-kickback Act (41 U.S.C. 1320a-7b(b)).

(4) **Penalty** does not include restitution, reimbursement, or compensatory damages.

(5) **Proceeding** includes an investigation.

(b) **Costs.**

(1) Except as otherwise described herein, costs incurred in connection with any criminal, civil or administrative proceeding (including filing of a false certification) commenced by the Federal Government, a state, local government, or foreign government, or joined by the Federal Government (including a proceeding under the False Claims Act), against the non-Federal entity, (or commenced by third parties or a current or former employee of the non-Federal entity who submits a whistleblower complaint of reprisal in accordance with 10 U.S.C. 2409 or 41 U.S.C. 4712), are not allowable if the proceeding:

- (i) Relates to a violation of, or failure to comply with, a Federal, state, local or foreign statute, regulation or the terms and conditions of the Federal award, by the non-Federal entity (including its agents and employees); and
- (ii) Results in any of the following dispositions:
  - (A) In a criminal proceeding, a conviction.
  - (B) In a civil or administrative proceeding involving an allegation of fraud or similar misconduct, a determination of non-Federal entity liability.
  - (C) In the case of any civil or administrative proceeding, the disallowance of costs or the imposition of a monetary penalty, or an order issued by the Federal awarding agency head or delegate to the non-Federal entity to take corrective action under 10 U.S.C. 2409 or 41 U.S.C. 4712.
  - (D) A final decision by an appropriate Federal official to debar or suspend the non-Federal entity, to rescind or void a Federal award, or to terminate a Federal award by reason of a violation or failure to comply with a statute, regulation, or the terms and conditions of the Federal award.
  - (E) A disposition by consent or compromise, if the action could have resulted in any of the dispositions described in paragraphs (b)(1)(ii)(A) through (D) of this section.

- (2) If more than one proceeding involves the same alleged misconduct, the costs of all such proceedings are unallowable if any results in one of the dispositions shown in paragraph (b) of this section.
- (c) If a proceeding referred to in paragraph (b) of this section is commenced by the Federal Government and is resolved by consent or compromise pursuant to an agreement by the non-Federal entity and the Federal Government, then the costs incurred may be allowed to the extent specifically provided in such agreement.
- (d) If a proceeding referred to in paragraph (b) of this section is commenced by a state, local or foreign government, the authorized Federal official may allow the costs incurred if such authorized official determines that the costs were incurred as a result of:
  - (1) A specific term or condition of the Federal award, or
  - (2) Specific written direction of an authorized official of the Federal awarding agency.
- (e) Costs incurred in connection with proceedings described in paragraph (b) of this section, which are not made unallowable by that subsection, may be allowed but only to the extent that:
  - (1) The costs are reasonable and necessary in relation to the administration of the Federal award and activities required to deal with the proceeding and the underlying cause of action;
  - (2) Payment of the reasonable, necessary, allocable and otherwise allowable costs incurred is not prohibited by any other provision(s) of the Federal award;
  - (3) The costs are not recovered from the Federal Government or a third party, either directly as a result of the proceeding or otherwise; and,
  - (4) An authorized Federal official must determine the percentage of costs allowed considering the complexity of litigation, generally accepted principles governing the award of legal fees in civil actions involving the United States, and such other factors as may be appropriate. Such percentage must not exceed 80 percent. However, if an agreement reached under paragraph (c) of this section has explicitly considered this 80 percent limitation and permitted a higher percentage, then the full amount of costs resulting from that agreement are allowable.
- (f) Costs incurred by the non-Federal entity in connection with the defense of suits brought by its employees or ex-employees under section 2 of the Major Fraud Act of 1988 (18 U.S.C. 1031), including the cost of all relief necessary to make such employee whole, where the non-Federal entity was found liable or settled, are unallowable.
- (g) Costs of prosecution of claims against the Federal Government, including appeals of final Federal agency decisions, are unallowable.
- (h) Costs of legal, accounting, and consultant services, and related costs, incurred in connection with patent infringement litigation, are unallowable unless otherwise provided for in the Federal award.
- (i) Costs which may be unallowable under this section, including directly associated costs, must be segregated and accounted for separately. During the pendency of any proceeding covered by paragraphs (b) and (f) of this section, the Federal Government must generally withhold payment of such costs. However, if in its best interests, the Federal Government may provide for conditional payment upon provision of adequate security, or other adequate assurance, and agreement to repay all unallowable costs, plus interest, if the costs are subsequently determined to be unallowable.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75886, Dec. 19, 2014]

## § 200.436 Depreciation.

- (a) Depreciation is the method for allocating the cost of fixed assets to periods benefitting from asset use. The non-Federal entity may be compensated for the use of its buildings, capital improvements, equipment, and software projects capitalized in accordance with GAAP, provided that they are used, needed in the non-Federal entity's activities, and properly allocated to Federal awards. Such compensation must be made by computing depreciation.
- (b) The allocation for depreciation must be made in accordance with Appendices III through IX.
- (c) Depreciation is computed applying the following rules. The computation of depreciation must be based on the acquisition cost of the assets involved. For an asset donated to the non-Federal entity by a third party, its fair market value at the time of the donation must be considered as the acquisition cost. Such assets may be depreciated or claimed as matching but not both. For the computation of depreciation, the acquisition cost will exclude:
  - (1) The cost of land;
  - (2) Any portion of the cost of buildings and equipment borne by or donated by the Federal Government, irrespective of where title was originally vested or where it is presently located;
  - (3) Any portion of the cost of buildings and equipment contributed by or for the non-Federal entity that are already claimed as matching or where law or agreement prohibits recovery;
  - (4) Any asset acquired solely for the performance of a non-Federal award; and
- (d) When computing depreciation charges, the following must be observed:
  - (1) The period of useful service or useful life established in each case for usable capital assets must take into consideration such factors as type of construction, nature of the equipment, technological developments in the particular area, historical data, and the renewal and replacement policies followed for the individual items or classes of assets involved.
  - (2) The depreciation method used to charge the cost of an asset (or group of assets) to accounting periods must reflect the pattern of consumption of the asset during its useful life. In the absence of clear evidence indicating that the expected consumption of the asset will be significantly greater in the early portions than in the later portions of its useful life, the straight-line method must be presumed to be the appropriate method. Depreciation methods once used may not be changed unless approved in advance by the cognizant agency. The depreciation methods used to calculate the depreciation amounts for indirect (F&A) rate purposes must be the same methods used by the non-Federal entity for its financial statements.
  - (3) The entire building, including the shell and all components, may be treated as a single asset and depreciated over a single useful life. A building may also be divided into multiple components. Each component item may then be depreciated over its estimated useful life. The building components must be grouped into three general components of a building: building shell (including construction and design costs), building services systems (e.g., elevators, HVAC, plumbing system and heating and air-conditioning system) and fixed equipment (e.g., sterilizers, casework, fume hoods, cold rooms and glassware/washers). In exceptional cases, a cognizant agency may authorize a non-Federal entity to use more than these three groupings. When a non-Federal entity elects to

depreciate its buildings by its components, the same depreciation methods must be used for indirect (F&A) purposes and financial statements purposes, as described in paragraphs (d)(1) and (2) of this section.

- (4) No depreciation may be allowed on any assets that have outlived their depreciable lives.
- (5) Where the depreciation method is introduced to replace the use allowance method, depreciation must be computed as if the asset had been depreciated over its entire life (i.e., from the date the asset was acquired and ready for use to the date of disposal or withdrawal from service). The total amount of use allowance and depreciation for an asset (including imputed depreciation applicable to periods prior to the conversion from the use allowance method as well as depreciation after the conversion) may not exceed the total acquisition cost of the asset.
- (e) Charges for depreciation must be supported by adequate property records, and physical inventories must be taken at least once every two years to ensure that the assets exist and are usable, used, and needed. Statistical sampling techniques may be used in taking these inventories. In addition, adequate depreciation records showing the amount of depreciation must be maintained.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75886, Dec. 19, 2014; 85 FR 49568, Aug. 13, 2020]

### § 200.437 Employee health and welfare costs.

- (a) Costs incurred in accordance with the non-Federal entity's documented policies for the improvement of working conditions, employer-employee relations, employee health, and employee performance are allowable.
- (b) Such costs will be equitably apportioned to all activities of the non-Federal entity. Income generated from any of these activities will be credited to the cost thereof unless such income has been irrevocably sent to employee welfare organizations.
- (c) Losses resulting from operating food services are allowable only if the non-Federal entity's objective is to operate such services on a break-even basis. Losses sustained because of operating objectives other than the above are allowable only:
  - (1) Where the non-Federal entity can demonstrate unusual circumstances; and
  - (2) With the approval of the cognizant agency for indirect costs.

### § 200.438 Entertainment costs.

Costs of entertainment, including amusement, diversion, and social activities and any associated costs are unallowable, except where specific costs that might otherwise be considered entertainment have a programmatic purpose and are authorized either in the approved budget for the Federal award or with prior written approval of the Federal awarding agency.

### § 200.439 Equipment and other capital expenditures.

- (a) See § 200.1 for the definitions of *capital expenditures*, *equipment*, *special purpose equipment*, *general purpose equipment*, *acquisition cost*, and *capital assets*.
- (b) The following rules of allowability must apply to equipment and other capital expenditures:

- (1) Capital expenditures for general purpose equipment, buildings, and land are unallowable as direct charges, except with the prior written approval of the Federal awarding agency or pass-through entity.
- (2) Capital expenditures for special purpose equipment are allowable as direct costs, provided that items with a unit cost of \$5,000 or more have the prior written approval of the Federal awarding agency or pass-through entity.
- (3) Capital expenditures for improvements to land, buildings, or equipment which materially increase their value or useful life are unallowable as a direct cost except with the prior written approval of the Federal awarding agency, or pass-through entity. See § 200.436, for rules on the allowability of depreciation on buildings, capital improvements, and equipment. See also § 200.465.
- (4) When approved as a direct charge pursuant to paragraphs (b)(1) through (3) of this section, capital expenditures will be charged in the period in which the expenditure is incurred, or as otherwise determined appropriate and negotiated with the Federal awarding agency.
- (5) The unamortized portion of any equipment written off as a result of a change in capitalization levels may be recovered by continuing to claim the otherwise allowable depreciation on the equipment, or by amortizing the amount to be written off over a period of years negotiated with the Federal cognizant agency for indirect cost.
- (6) Cost of equipment disposal. If the non-Federal entity is instructed by the Federal awarding agency to otherwise dispose of or transfer the equipment the costs of such disposal or transfer are allowable.
- (7) Equipment and other capital expenditures are unallowable as indirect costs. See § 200.436.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75886, Dec. 19, 2014; 85 FR 49568, Aug. 13, 2020]

### § 200.440 Exchange rates.

- (a) Cost increases for fluctuations in exchange rates are allowable costs subject to the availability of funding. Prior approval of exchange rate fluctuations is required only when the change results in the need for additional Federal funding, or the increased costs result in the need to significantly reduce the scope of the project. The Federal awarding agency must however ensure that adequate funds are available to cover currency fluctuations in order to avoid a violation of the Anti-Deficiency Act.
- (b) The non-Federal entity is required to make reviews of local currency gains to determine the need for additional federal funding before the expiration date of the Federal award. Subsequent adjustments for currency increases may be allowable only when the non-Federal entity provides the Federal awarding agency with adequate source documentation from a commonly used source in effect at the time the expense was made, and to the extent that sufficient Federal funds are available.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75886, Dec. 19, 2014]

### § 200.441 Fines, penalties, damages and other settlements.

Costs resulting from non-Federal entity violations of, alleged violations of, or failure to comply with, Federal, state, tribal, local or foreign laws and regulations are unallowable, except when incurred as a result of compliance with specific provisions of the Federal award, or with prior written approval of the Federal awarding agency. See also § 200.435.

[85 FR 49568, Aug. 13, 2020]

### § 200.442 Fund raising and investment management costs.

- (a) Costs of organized fund raising, including financial campaigns, endowment drives, solicitation of gifts and bequests, and similar expenses incurred to raise capital or obtain contributions are unallowable. Fund raising costs for the purposes of meeting the Federal program objectives are allowable with prior written approval from the Federal awarding agency. Proposal costs are covered in § 200.460.
- (b) Costs of investment counsel and staff and similar expenses incurred to enhance income from investments are unallowable except when associated with investments covering pension, self-insurance, or other funds which include Federal participation allowed by this part.
- (c) Costs related to the physical custody and control of monies and securities are allowable.
- (d) Both allowable and unallowable fund-raising and investment activities must be allocated as an appropriate share of indirect costs under the conditions described in § 200.413.

[85 FR 49568, Aug. 13, 2020]

### § 200.443 Gains and losses on disposition of depreciable assets.

- (a) Gains and losses on the sale, retirement, or other disposition of depreciable property must be included in the year in which they occur as credits or charges to the asset cost grouping(s) in which the property was included. The amount of the gain or loss to be included as a credit or charge to the appropriate asset cost grouping(s) is the difference between the amount realized on the property and the undepreciated basis of the property.
- (b) Gains and losses from the disposition of depreciable property must not be recognized as a separate credit or charge under the following conditions:
  - (1) The gain or loss is processed through a depreciation account and is reflected in the depreciation allowable under §§ 200.436 and 200.439.
  - (2) The property is given in exchange as part of the purchase price of a similar item and the gain or loss is taken into account in determining the depreciation cost basis of the new item.
  - (3) A loss results from the failure to maintain permissible insurance, except as otherwise provided in § 200.447.
  - (4) Compensation for the use of the property was provided through use allowances in lieu of depreciation.
  - (5) Gains and losses arising from mass or extraordinary sales, retirements, or other dispositions must be considered on a case-by-case basis.
- (c) Gains or losses of any nature arising from the sale or exchange of property other than the property covered in paragraph (a) of this section, e.g., land, must be excluded in computing Federal award costs.
- (d) When assets acquired with Federal funds, in part or wholly, are disposed of, the distribution of the proceeds must be made in accordance with §§ 200.310 through 200.316 of this part.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75886, Dec. 19, 2014; 85 FR 49568, Aug. 13, 2020]

## § 200.444 General costs of government.

- (a) For states, local governments, and Indian Tribes, the general costs of government are unallowable (except as provided in § 200.475). Unallowable costs include:
  - (1) Salaries and expenses of the Office of the Governor of a state or the chief executive of a local government or the chief executive of an Indian tribe;
  - (2) Salaries and other expenses of a state legislature, tribal council, or similar local governmental body, such as a county supervisor, city council, school board, etc., whether incurred for purposes of legislation or executive direction;
  - (3) Costs of the judicial branch of a government;
  - (4) Costs of prosecutorial activities unless treated as a direct cost to a specific program if authorized by statute or regulation (however, this does not preclude the allowability of other legal activities of the Attorney General as described in § 200.435); and
  - (5) Costs of other general types of government services normally provided to the general public, such as fire and police, unless provided for as a direct cost under a program statute or regulation.
- (b) For Indian tribes and Councils of Governments (COGs) (see definition for *Local government* in § 200.1 of this part), up to 50% of salaries and expenses directly attributable to managing and operating Federal programs by the chief executive and his or her staff can be included in the indirect cost calculation without documentation.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75886, Dec. 19, 2014; 85 FR 49568, Aug. 13, 2020]

## § 200.445 Goods or services for personal use.

- (a) Costs of goods or services for personal use of the non-Federal entity's employees are unallowable regardless of whether the cost is reported as taxable income to the employees.
- (b) Costs of housing (e.g., depreciation, maintenance, utilities, furnishings, rent), housing allowances and personal living expenses are only allowable as direct costs regardless of whether reported as taxable income to the employees. In addition, to be allowable direct costs must be approved in advance by a Federal awarding agency.

## § 200.446 Idle facilities and idle capacity.

- (a) As used in this section the following terms have the meanings set forth in this section:
  - (1) Facilities means land and buildings or any portion thereof, equipment individually or collectively, or any other tangible capital asset, wherever located, and whether owned or leased by the non-Federal entity.
  - (2) Idle facilities means completely unused facilities that are excess to the non-Federal entity's current needs.
  - (3) Idle capacity means the unused capacity of partially used facilities. It is the difference between:
    - (i) That which a facility could achieve under 100 percent operating time on a one-shift basis less operating interruptions resulting from time lost for repairs, setups, unsatisfactory materials, and other normal delays and;

- (ii) The extent to which the facility was actually used to meet demands during the accounting period. A multi-shift basis should be used if it can be shown that this amount of usage would normally be expected for the type of facility involved.
- (4) Cost of idle facilities or idle capacity means costs such as maintenance, repair, housing, rent, and other related costs, e.g., insurance, interest, and depreciation. These costs could include the costs of idle public safety emergency facilities, telecommunications, or information technology system capacity that is built to withstand major fluctuations in load, e.g., consolidated data centers.
- (b) The costs of idle facilities are unallowable except to the extent that:
  - (1) They are necessary to meet workload requirements which may fluctuate and are allocated appropriately to all benefiting programs; or
  - (2) Although not necessary to meet fluctuations in workload, they were necessary when acquired and are now idle because of changes in program requirements, efforts to achieve more economical operations, reorganization, termination, or other causes which could not have been reasonably foreseen. Under the exception stated in this subsection, costs of idle facilities are allowable for a reasonable period of time, ordinarily not to exceed one year, depending on the initiative taken to use, lease, or dispose of such facilities.
- (c) The costs of idle capacity are normal costs of doing business and are a factor in the normal fluctuations of usage or indirect cost rates from period to period. Such costs are allowable, provided that the capacity is reasonably anticipated to be necessary to carry out the purpose of the Federal award or was originally reasonable and is not subject to reduction or elimination by use on other Federal awards, subletting, renting, or sale, in accordance with sound business, economic, or security practices. Widespread idle capacity throughout an entire facility or among a group of assets having substantially the same function may be considered idle facilities.

### § 200.447 Insurance and indemnification.

- (a) Costs of insurance required or approved and maintained, pursuant to the Federal award, are allowable.
- (b) Costs of other insurance in connection with the general conduct of activities are allowable subject to the following limitations:
  - (1) Types and extent and cost of coverage are in accordance with the non-Federal entity's policy and sound business practice.
  - (2) Costs of insurance or of contributions to any reserve covering the risk of loss of, or damage to, Federal Government property are unallowable except to the extent that the Federal awarding agency has specifically required or approved such costs.
  - (3) Costs allowed for business interruption or other similar insurance must exclude coverage of management fees.
  - (4) Costs of insurance on the lives of trustees, officers, or other employees holding positions of similar responsibilities are allowable only to the extent that the insurance represents additional compensation (see § 200.431). The cost of such insurance when the non-Federal entity is identified as the beneficiary is unallowable.
  - (5) Insurance against defects. Costs of insurance with respect to any costs incurred to correct defects in the non-Federal entity's materials or workmanship are unallowable.

- (6) Medical liability (malpractice) insurance. Medical liability insurance is an allowable cost of Federal research programs only to the extent that the Federal research programs involve human subjects or training of participants in research techniques. Medical liability insurance costs must be treated as a direct cost and must be assigned to individual projects based on the manner in which the insurer allocates the risk to the population covered by the insurance.
- (c) Actual losses which could have been covered by permissible insurance (through a self-insurance program or otherwise) are unallowable, unless expressly provided for in the Federal award. However, costs incurred because of losses not covered under nominal deductible insurance coverage provided in keeping with sound management practice, and minor losses not covered by insurance, such as spoilage, breakage, and disappearance of small hand tools, which occur in the ordinary course of operations, are allowable.
- (d) Contributions to a reserve for certain self-insurance programs including workers' compensation, unemployment compensation, and severance pay are allowable subject to the following provisions:
  - (1) The type of coverage and the extent of coverage and the rates and premiums would have been allowed had insurance (including reinsurance) been purchased to cover the risks. However, provision for known or reasonably estimated self-insured liabilities, which do not become payable for more than one year after the provision is made, must not exceed the discounted present value of the liability. The rate used for discounting the liability must be determined by giving consideration to such factors as the non-Federal entity's settlement rate for those liabilities and its investment rate of return.
  - (2) Earnings or investment income on reserves must be credited to those reserves.
  - (3)
    - (i) Contributions to reserves must be based on sound actuarial principles using historical experience and reasonable assumptions. Reserve levels must be analyzed and updated at least biennially for each major risk being insured and take into account any reinsurance, coinsurance, etc. Reserve levels related to employee-related coverages will normally be limited to the value of claims:
      - (A) Submitted and adjudicated but not paid;
      - (B) Submitted but not adjudicated; and
      - (C) Incurred but not submitted.
    - (ii) Reserve levels in excess of the amounts based on the above must be identified and justified in the cost allocation plan or indirect cost rate proposal.
  - (4) Accounting records, actuarial studies, and cost allocations (or billings) must recognize any significant differences due to types of insured risk and losses generated by the various insured activities or agencies of the non-Federal entity. If individual departments or agencies of the non-Federal entity experience significantly different levels of claims for a particular risk, those differences are to be recognized by the use of separate allocations or other techniques resulting in an equitable allocation.

- (5) Whenever funds are transferred from a self-insurance reserve to other accounts (e.g., general fund or unrestricted account), refunds must be made to the Federal Government for its share of funds transferred, including earned or imputed interest from the date of transfer and debt interest, if applicable, chargeable in accordance with applicable Federal cognizant agency for indirect cost, claims collection regulations.
- (e) Insurance refunds must be credited against insurance costs in the year the refund is received.
- (f) Indemnification includes securing the non-Federal entity against liabilities to third persons and other losses not compensated by insurance or otherwise. The Federal Government is obligated to indemnify the non-Federal entity only to the extent expressly provided for in the Federal award, except as provided in paragraph (c) of this section.

[78 FR 78608, Dec. 26, 2013, as amended at 85 FR 49568, Aug. 13, 2020]

## § 200.448 Intellectual property.

### (a) *Patent costs.*

- (1) The following costs related to securing patents and copyrights are allowable:
  - (i) Costs of preparing disclosures, reports, and other documents required by the Federal award, and of searching the art to the extent necessary to make such disclosures;
  - (ii) Costs of preparing documents and any other patent costs in connection with the filing and prosecution of a United States patent application where title or royalty-free license is required by the Federal Government to be conveyed to the Federal Government; and
  - (iii) General counseling services relating to patent and copyright matters, such as advice on patent and copyright laws, regulations, clauses, and employee intellectual property agreements (See also § 200.459).
- (2) The following costs related to securing patents and copyrights are unallowable:
  - (i) Costs of preparing disclosures, reports, and other documents, and of searching the art to make disclosures not required by the Federal award;
  - (ii) Costs in connection with filing and prosecuting any foreign patent application, or any United States patent application, where the Federal award does not require conveying title or a royalty-free license to the Federal Government.

### (b) *Royalties and other costs for use of patents and copyrights.*

- (1) Royalties on a patent or copyright or amortization of the cost of acquiring by purchase a copyright, patent, or rights thereto, necessary for the proper performance of the Federal award are allowable unless:
  - (i) The Federal Government already has a license or the right to free use of the patent or copyright.
  - (ii) The patent or copyright has been adjudicated to be invalid, or has been administratively determined to be invalid.
  - (iii) The patent or copyright is considered to be unenforceable.
  - (iv) The patent or copyright is expired.

- (2) Special care should be exercised in determining reasonableness where the royalties may have been arrived at as a result of less-than-arm's-length bargaining, such as:
  - (i) Royalties paid to persons, including corporations, affiliated with the non-Federal entity.
  - (ii) Royalties paid to unaffiliated parties, including corporations, under an agreement entered into in contemplation that a Federal award would be made.
  - (iii) Royalties paid under an agreement entered into after a Federal award is made to a non-Federal entity.
- (3) In any case involving a patent or copyright formerly owned by the non-Federal entity, the amount of royalty allowed must not exceed the cost which would have been allowed had the non-Federal entity retained title thereto.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75886, Dec. 19, 2014; 85 FR 49569, Aug. 13, 2020]

### § 200.449 Interest.

- (a) **General.** Costs incurred for interest on borrowed capital, temporary use of endowment funds, or the use of the non-Federal entity's own funds, however represented, are unallowable. Financing costs (including interest) to acquire, construct, or replace capital assets are allowable, subject to the conditions in this section.
- (b) **Capital assets.**
  - (1) Capital assets is defined as noted in § 200.1 of this part. An asset cost includes (as applicable) acquisition costs, construction costs, and other costs capitalized in accordance with GAAP.
  - (2) For non-Federal entity fiscal years beginning on or after January 1, 2016, intangible assets include patents and computer software. For software development projects, only interest attributable to the portion of the project costs capitalized in accordance with GAAP is allowable.
- (c) **Conditions for all non-Federal entities.**
  - (1) The non-Federal entity uses the capital assets in support of Federal awards;
  - (2) The allowable asset costs to acquire facilities and equipment are limited to a fair market value available to the non-Federal entity from an unrelated (arm's length) third party.
  - (3) The non-Federal entity obtains the financing via an arm's-length transaction (that is, a transaction with an unrelated third party); or claims reimbursement of actual interest cost at a rate available via such a transaction.
  - (4) The non-Federal entity limits claims for Federal reimbursement of interest costs to the least expensive alternative. For example, a lease contract that transfers ownership by the end of the contract may be determined less costly than purchasing through other types of debt financing, in which case reimbursement must be limited to the amount of interest determined if leasing had been used.
  - (5) The non-Federal entity expenses or capitalizes allowable interest cost in accordance with GAAP.

- (6) Earnings generated by the investment of borrowed funds pending their disbursement for the asset costs are used to offset the current period's allowable interest cost, whether that cost is expensed or capitalized. Earnings subject to being reported to the Federal Internal Revenue Service under arbitrage requirements are excludable.
- (7) The following conditions must apply to debt arrangements over \$1 million to purchase or construct facilities, unless the non-Federal entity makes an initial equity contribution to the purchase of 25 percent or more. For this purpose, "initial equity contribution" means the amount or value of contributions made by the non-Federal entity for the acquisition of facilities prior to occupancy.
  - (i) The non-Federal entity must reduce claims for reimbursement of interest cost by an amount equal to imputed interest earnings on excess cash flow attributable to the portion of the facility used for Federal awards.
  - (ii) The non-Federal entity must impute interest on excess cash flow as follows:
    - (A) Annually, the non-Federal entity must prepare a cumulative (from the inception of the project) report of monthly cash inflows and outflows, regardless of the funding source. For this purpose, inflows consist of Federal reimbursement for depreciation, amortization of capitalized construction interest, and annual interest cost. Outflows consist of initial equity contributions, debt principal payments (less the pro-rata share attributable to the cost of land), and interest payments.
    - (B) To compute monthly cash inflows and outflows, the non-Federal entity must divide the annual amounts determined in step (i) by the number of months in the year (usually 12) that the building is in service.
    - (C) For any month in which cumulative cash inflows exceed cumulative outflows, interest must be calculated on the excess inflows for that month and be treated as a reduction to allowable interest cost. The rate of interest to be used must be the three-month Treasury bill closing rate as of the last business day of that month.
- (8) Interest attributable to a fully depreciated asset is unallowable.
- (d) Additional conditions for states, local governments and Indian tribes. For costs to be allowable, the non-Federal entity must have incurred the interest costs for buildings after October 1, 1980, or for land and equipment after September 1, 1995.
  - (1) The requirement to offset interest earned on borrowed funds against current allowable interest cost (paragraph (c)(5), above) also applies to earnings on debt service reserve funds.
  - (2) The non-Federal entity will negotiate the amount of allowable interest cost related to the acquisition of facilities with asset costs of \$1 million or more, as outlined in paragraph (c)(7) of this section. For this purpose, a non-Federal entity must consider only cash inflows and outflows attributable to that portion of the real property used for Federal awards.
- (e) Additional conditions for IHEs. For costs to be allowable, the IHE must have incurred the interest costs after July 1, 1982, in connection with acquisitions of capital assets that occurred after that date.
- (f) Additional condition for nonprofit organizations. For costs to be allowable, the nonprofit organization incurred the interest costs after September 29, 1995, in connection with acquisitions of capital assets that occurred after that date.

- (g) The interest allowability provisions of this section do not apply to a nonprofit organization subject to “full coverage” under the Cost Accounting Standards (CAS), as defined at 48 CFR 9903.201-2(a). The non-Federal entity's Federal awards are instead subject to CAS 414 (48 CFR 9904.414), “Cost of Money as an Element of the Cost of Facilities Capital”, and CAS 417 (48 CFR 9904.417), “Cost of Money as an Element of the Cost of Capital Assets Under Construction”.

[78 FR 78608, Dec. 26, 2013, as amended at 80 FR 54409, Sept. 10, 2015; 85 FR 49569, Aug. 13, 2020]

## § 200.450 Lobbying.

- (a) The cost of certain influencing activities associated with obtaining grants, contracts, or cooperative agreements, or loans is an unallowable cost. Lobbying with respect to certain grants, contracts, cooperative agreements, and loans is governed by relevant statutes, including among others, the provisions of 31 U.S.C. 1352, as well as the common rule, “New Restrictions on Lobbying” published on February 26, 1990, including definitions, and the Office of Management and Budget “Governmentwide Guidance for New Restrictions on Lobbying” and notices published on December 20, 1989, June 15, 1990, January 15, 1992, and January 19, 1996.
- (b) **Executive lobbying costs.** Costs incurred in attempting to improperly influence either directly or indirectly, an employee or officer of the executive branch of the Federal Government to give consideration or to act regarding a Federal award or a regulatory matter are unallowable. Improper influence means any influence that induces or tends to induce a Federal employee or officer to give consideration or to act regarding a Federal award or regulatory matter on any basis other than the merits of the matter.
- (c) In addition to the above, the following restrictions are applicable to nonprofit organizations and IHEs:
  - (1) Costs associated with the following activities are unallowable:
    - (i) Attempts to influence the outcomes of any Federal, state, or local election, referendum, initiative, or similar procedure, through in-kind or cash contributions, endorsements, publicity, or similar activity;
    - (ii) Establishing, administering, contributing to, or paying the expenses of a political party, campaign, political action committee, or other organization established for the purpose of influencing the outcomes of elections in the United States;
    - (iii) Any attempt to influence:
      - (A) The introduction of Federal or state legislation;
      - (B) The enactment or modification of any pending Federal or state legislation through communication with any member or employee of the Congress or state legislature (including efforts to influence state or local officials to engage in similar lobbying activity);
      - (C) The enactment or modification of any pending Federal or state legislation by preparing, distributing, or using publicity or propaganda, or by urging members of the general public, or any segment thereof, to contribute to or participate in any mass demonstration, march, rally, fund raising drive, lobbying campaign or letter writing or telephone campaign; or
      - (D) Any government official or employee in connection with a decision to sign or veto enrolled legislation;

- (iv) Legislative liaison activities, including attendance at legislative sessions or committee hearings, gathering information regarding legislation, and analyzing the effect of legislation, when such activities are carried on in support of or in knowing preparation for an effort to engage in unallowable lobbying.
- (2) The following activities are excepted from the coverage of paragraph (c)(1) of this section:
- (i) Technical and factual presentations on topics directly related to the performance of a grant, contract, or other agreement (through hearing testimony, statements, or letters to the Congress or a state legislature, or subdivision, member, or cognizant staff member thereof), in response to a documented request (including a Congressional Record notice requesting testimony or statements for the record at a regularly scheduled hearing) made by the non-Federal entity's member of congress, legislative body or a subdivision, or a cognizant staff member thereof, provided such information is readily obtainable and can be readily put in deliverable form, and further provided that costs under this section for travel, lodging or meals are unallowable unless incurred to offer testimony at a regularly scheduled Congressional hearing pursuant to a written request for such presentation made by the Chairman or Ranking Minority Member of the Committee or Subcommittee conducting such hearings;
  - (ii) Any lobbying made unallowable by paragraph (c)(1)(iii) of this section to influence state legislation in order to directly reduce the cost, or to avoid material impairment of the non-Federal entity's authority to perform the grant, contract, or other agreement; or
  - (iii) Any activity specifically authorized by statute to be undertaken with funds from the Federal award.
  - (iv) Any activity excepted from the definitions of "lobbying" or "influencing legislation" by the Internal Revenue Code provisions that require nonprofit organizations to limit their participation in direct and "grass roots" lobbying activities in order to retain their charitable deduction status and avoid punitive excise taxes, I.R.C. §§ 501(c)(3), 501(h), 4911(a), including:
    - (A) Nonpartisan analysis, study, or research reports;
    - (B) Examinations and discussions of broad social, economic, and similar problems; and
    - (C) Information provided upon request by a legislator for technical advice and assistance, as defined by I.R.C. § 4911(d)(2) and 26 CFR 56.4911-2(c)(1)-(c)(3).
  - (v) When a non-Federal entity seeks reimbursement for indirect (F&A) costs, total lobbying costs must be separately identified in the indirect (F&A) cost rate proposal, and thereafter treated as other unallowable activity costs in accordance with the procedures of § 200.413.
  - (vi) The non-Federal entity must submit as part of its annual indirect (F&A) cost rate proposal a certification that the requirements and standards of this section have been complied with. (See also § 200.415.)
  - (vii)
    - (A) Time logs, calendars, or similar records are not required to be created for purposes of complying with the record keeping requirements in § 200.302 with respect to lobbying costs during any particular calendar month when:

- (1) The employee engages in lobbying (as defined in paragraphs (c)(1) and (c)(2) of this section) 25 percent or less of the employee's compensated hours of employment during that calendar month; and
  - (2) Within the preceding five-year period, the non-Federal entity has not materially misstated allowable or unallowable costs of any nature, including legislative lobbying costs.
- (B) When conditions in paragraph (c)(2)(vii)(A)(1) and (2) of this section are met, non-Federal entities are not required to establish records to support the allowability of claimed costs in addition to records already required or maintained. Also, when conditions in paragraphs (c)(2)(vii)(A)(1) and (2) of this section are met, the absence of time logs, calendars, or similar records will not serve as a basis for disallowing costs by contesting estimates of lobbying time spent by employees during a calendar month.
- (viii) The Federal awarding agency must establish procedures for resolving in advance, in consultation with OMB, any significant questions or disagreements concerning the interpretation or application of this section. Any such advance resolutions must be binding in any subsequent settlements, audits, or investigations with respect to that grant or contract for purposes of interpretation of this part, provided, however, that this must not be construed to prevent a contractor or non-Federal entity from contesting the lawfulness of such a determination.

[78 FR 78608, Dec. 26, 2013, as amended at 85 FR 49569, Aug. 13, 2020]

### **§ 200.451 Losses on other awards or contracts.**

Any excess of costs over income under any other award or contract of any nature is unallowable. This includes, but is not limited to, the non-Federal entity's contributed portion by reason of cost-sharing agreements or any under-recoveries through negotiation of flat amounts for indirect (F&A) costs. Also, any excess of costs over authorized funding levels transferred from any award or contract to another award or contract is unallowable. All losses are not allowable indirect (F&A) costs and are required to be included in the appropriate indirect cost rate base for allocation of indirect costs.

### **§ 200.452 Maintenance and repair costs.**

Costs incurred for utilities, insurance, security, necessary maintenance, janitorial services, repair, or upkeep of buildings and equipment (including Federal property unless otherwise provided for) which neither add to the permanent value of the property nor appreciably prolong its intended life, but keep it in an efficient operating condition, are allowable. Costs incurred for improvements which add to the permanent value of the buildings and equipment or appreciably prolong their intended life must be treated as capital expenditures (see § 200.439). These costs are only allowable to the extent not paid through rental or other agreements.

[85 FR 49569, Aug. 13, 2020]

### **§ 200.453 Materials and supplies costs, including costs of computing devices.**

- (a) Costs incurred for materials, supplies, and fabricated parts necessary to carry out a Federal award are allowable.

- (b) Purchased materials and supplies must be charged at their actual prices, net of applicable credits. Withdrawals from general stores or stockrooms must be charged at their actual net cost under any recognized method of pricing inventory withdrawals, consistently applied. Incoming transportation charges are a proper part of materials and supplies costs.
- (c) Materials and supplies used for the performance of a Federal award may be charged as direct costs. In the specific case of computing devices, charging as direct costs is allowable for devices that are essential and allocable, but not solely dedicated, to the performance of a Federal award.
- (d) Where federally-donated or furnished materials are used in performing the Federal award, such materials will be used without charge.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75887, Dec. 19, 2014]

### § 200.454 Memberships, subscriptions, and professional activity costs.

- (a) Costs of the non-Federal entity's membership in business, technical, and professional organizations are allowable.
- (b) Costs of the non-Federal entity's subscriptions to business, professional, and technical periodicals are allowable.
- (c) Costs of membership in any civic or community organization are allowable with prior approval by the Federal awarding agency or pass-through entity.
- (d) Costs of membership in any country club or social or dining club or organization are unallowable.
- (e) Costs of membership in organizations whose primary purpose is lobbying are unallowable. See also § 200.450.

[78 FR 78608, Dec. 26, 2013, as amended at 85 FR 49569, Aug. 13, 2020]

### § 200.455 Organization costs.

Costs such as incorporation fees, brokers' fees, fees to promoters, organizers or management consultants, attorneys, accountants, or investment counselor, whether or not employees of the non-Federal entity in connection with establishment or reorganization of an organization, are unallowable except with prior approval of the Federal awarding agency.

### § 200.456 Participant support costs.

Participant support costs as defined in § 200.1 are allowable with the prior approval of the Federal awarding agency.

[85 FR 49569, Aug. 13, 2020]

### § 200.457 Plant and security costs.

Necessary and reasonable expenses incurred for protection and security of facilities, personnel, and work products are allowable. Such costs include, but are not limited to, wages and uniforms of personnel engaged in security activities; equipment; barriers; protective (non-military) gear, devices, and equipment; contractual security services; and consultants. Capital expenditures for plant security purposes are subject to § 200.439.

[85 FR 49569, Aug. 13, 2020]

### § 200.458 Pre-award costs.

Pre-award costs are those incurred prior to the effective date of the Federal award or subaward directly pursuant to the negotiation and in anticipation of the Federal award where such costs are necessary for efficient and timely performance of the scope of work. Such costs are allowable only to the extent that they would have been allowable if incurred after the date of the Federal award and only with the written approval of the Federal awarding agency. If charged to the award, these costs must be charged to the initial budget period of the award, unless otherwise specified by the Federal awarding agency or pass-through entity.

[85 FR 49569, Aug. 13, 2020]

### § 200.459 Professional service costs.

- (a) Costs of professional and consultant services rendered by persons who are members of a particular profession or possess a special skill, and who are not officers or employees of the non-Federal entity, are allowable, subject to paragraphs (b) and (c) of this section when reasonable in relation to the services rendered and when not contingent upon recovery of the costs from the Federal Government. In addition, legal and related services are limited under § 200.435.
- (b) In determining the allowability of costs in a particular case, no single factor or any special combination of factors is necessarily determinative. However, the following factors are relevant:
  - (1) The nature and scope of the service rendered in relation to the service required.
  - (2) The necessity of contracting for the service, considering the non-Federal entity's capability in the particular area.
  - (3) The past pattern of such costs, particularly in the years prior to Federal awards.
  - (4) The impact of Federal awards on the non-Federal entity's business (i.e., what new problems have arisen).
  - (5) Whether the proportion of Federal work to the non-Federal entity's total business is such as to influence the non-Federal entity in favor of incurring the cost, particularly where the services rendered are not of a continuing nature and have little relationship to work under Federal awards.
  - (6) Whether the service can be performed more economically by direct employment rather than contracting.
  - (7) The qualifications of the individual or concern rendering the service and the customary fees charged, especially on non-federally funded activities.
  - (8) Adequacy of the contractual agreement for the service (e.g., description of the service, estimate of time required, rate of compensation, and termination provisions).
- (c) In addition to the factors in paragraph (b) of this section, to be allowable, retainer fees must be supported by evidence of bona fide services available or rendered.

[78 FR 78608, Dec. 26, 2013, as amended at 85 FR 49569, Aug. 13, 2020]

### § 200.460 Proposal costs.

Proposal costs are the costs of preparing bids, proposals, or applications on potential Federal and non-Federal awards or projects, including the development of data necessary to support the non-Federal entity's bids or proposals. Proposal costs of the current accounting period of both successful and unsuccessful bids and proposals normally should be treated as indirect (F&A) costs and allocated currently to all activities of the non-Federal entity. No proposal costs of past accounting periods will be allocable to the current period.

### § 200.461 Publication and printing costs.

- (a) Publication costs for electronic and print media, including distribution, promotion, and general handling are allowable. If these costs are not identifiable with a particular cost objective, they should be allocated as indirect costs to all benefiting activities of the non-Federal entity.
- (b) Page charges for professional journal publications are allowable where:
  - (1) The publications report work supported by the Federal Government; and
  - (2) The charges are levied impartially on all items published by the journal, whether or not under a Federal award.
  - (3) The non-Federal entity may charge the Federal award during closeout for the costs of publication or sharing of research results if the costs are not incurred during the period of performance of the Federal award. If charged to the award, these costs must be charged to the final budget period of the award, unless otherwise specified by the Federal awarding agency.

[78 FR 78608, Dec. 26, 2013, as amended at 85 FR 49569, Aug. 13, 2020]

### § 200.462 Rearrangement and reconversion costs.

- (a) Costs incurred for ordinary and normal rearrangement and alteration of facilities are allowable as indirect costs. Special arrangements and alterations costs incurred specifically for a Federal award are allowable as a direct cost with the prior approval of the Federal awarding agency or pass-through entity.
- (b) Costs incurred in the restoration or rehabilitation of the non-Federal entity's facilities to approximately the same condition existing immediately prior to commencement of Federal awards, less costs related to normal wear and tear, are allowable.

### § 200.463 Recruiting costs.

- (a) Subject to paragraphs (b) and (c) of this section, and provided that the size of the staff recruited and maintained is in keeping with workload requirements, costs of "help wanted" advertising, operating costs of an employment office necessary to secure and maintain an adequate staff, costs of operating an aptitude and educational testing program, travel costs of employees while engaged in recruiting personnel, travel costs of applicants for interviews for prospective employment, and relocation costs incurred incident to recruitment of new employees, are allowable to the extent that such costs are incurred pursuant to the non-Federal entity's standard recruitment program. Where the non-Federal entity uses employment agencies, costs not in excess of standard commercial rates for such services are allowable.

- (b) Special emoluments, fringe benefits, and salary allowances incurred to attract professional personnel that do not meet the test of reasonableness or do not conform with the established practices of the non-Federal entity, are unallowable.
- (c) Where relocation costs incurred incident to recruitment of a new employee have been funded in whole or in part to a Federal award, and the newly hired employee resigns for reasons within the employee's control within 12 months after hire, the non-Federal entity will be required to refund or credit the Federal share of such relocation costs to the Federal Government. See also § 200.464.
- (d) Short-term, travel visa costs (as opposed to longer-term, immigration visas) are generally allowable expenses that may be proposed as a direct cost. Since short-term visas are issued for a specific period and purpose, they can be clearly identified as directly connected to work performed on a Federal award. For these costs to be directly charged to a Federal award, they must:
  - (1) Be critical and necessary for the conduct of the project;
  - (2) Be allowable under the applicable cost principles;
  - (3) Be consistent with the non-Federal entity's cost accounting practices and non-Federal entity policy; and
  - (4) Meet the definition of "direct cost" as described in the applicable cost principles.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75887, Dec. 19, 2014; 85 FR 49569, Aug. 13, 2020]

### § 200.464 Relocation costs of employees.

- (a) Relocation costs are costs incident to the permanent change of duty assignment (for an indefinite period or for a stated period of not less than 12 months) of an existing employee or upon recruitment of a new employee. Relocation costs are allowable, subject to the limitations described in paragraphs (b), (c), and (d) of this section, provided that:
  - (1) The move is for the benefit of the employer.
  - (2) Reimbursement to the employee is in accordance with an established written policy consistently followed by the employer.
  - (3) The reimbursement does not exceed the employee's actual (or reasonably estimated) expenses.
- (b) Allowable relocation costs for current employees are limited to the following:
  - (1) The costs of transportation of the employee, members of his or her immediate family and his household, and personal effects to the new location.
  - (2) The costs of finding a new home, such as advance trips by employees and spouses to locate living quarters and temporary lodging during the transition period, up to maximum period of 30 calendar days.
  - (3) Closing costs, such as brokerage, legal, and appraisal fees, incident to the disposition of the employee's former home. These costs, together with those described in (4), are limited to 8 per cent of the sales price of the employee's former home.
  - (4) The continuing costs of ownership (for up to six months) of the vacant former home after the settlement or lease date of the employee's new permanent home, such as maintenance of buildings and grounds (exclusive of fixing-up expenses), utilities, taxes, and property insurance.

- (5) Other necessary and reasonable expenses normally incident to relocation, such as the costs of canceling an unexpired lease, transportation of personal property, and purchasing insurance against loss of or damages to personal property. The cost of canceling an unexpired lease is limited to three times the monthly rental.
- (c) Allowable relocation costs for new employees are limited to those described in paragraphs (b)(1) and (2) of this section. When relocation costs incurred incident to the recruitment of new employees have been charged to a Federal award and the employee resigns for reasons within the employee's control within 12 months after hire, the non-Federal entity must refund or credit the Federal Government for its share of the cost. If dependents are not permitted at the location for any reason and the costs do not include costs of transporting household goods, the costs of travel to an overseas location must be considered travel costs in accordance with § 200.474 Travel costs, and not this relocations costs of employees (See also § 200.464).
- (d) The following costs related to relocation are unallowable:
  - (1) Fees and other costs associated with acquiring a new home.
  - (2) A loss on the sale of a former home.
  - (3) Continuing mortgage principal and interest payments on a home being sold.
  - (4) Income taxes paid by an employee related to reimbursed relocation costs.

*[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75887, Dec. 19, 2014; 85 FR 49570, Aug. 13, 2020]*

## **§ 200.465 Rental costs of real property and equipment.**

- (a) Subject to the limitations described in paragraphs (b) through (d) of this section, rental costs are allowable to the extent that the rates are reasonable in light of such factors as: rental costs of comparable property, if any; market conditions in the area; alternatives available; and the type, life expectancy, condition, and value of the property leased. Rental arrangements should be reviewed periodically to determine if circumstances have changed and other options are available.
- (b) Rental costs under “sale and lease back” arrangements are allowable only up to the amount that would be allowed had the non-Federal entity continued to own the property. This amount would include expenses such as depreciation, maintenance, taxes, and insurance.
- (c) Rental costs under “less-than-arm's-length” leases are allowable only up to the amount (as explained in paragraph (b) of this section). For this purpose, a less-than-arm's-length lease is one under which one party to the lease agreement is able to control or substantially influence the actions of the other. Such leases include, but are not limited to those between:
  - (1) Divisions of the non-Federal entity;
  - (2) The non-Federal entity under common control through common officers, directors, or members; and
  - (3) The non-Federal entity and a director, trustee, officer, or key employee of the non-Federal entity or an immediate family member, either directly or through corporations, trusts, or similar arrangements in which they hold a controlling interest. For example, the non-Federal entity may establish a separate corporation for the sole purpose of owning property and leasing it back to the non-Federal entity.
  - (4) Family members include one party with any of the following relationships to another party:

- (i) Spouse, and parents thereof;
- (ii) Children, and spouses thereof;
- (iii) Parents, and spouses thereof;
- (iv) Siblings, and spouses thereof;
- (v) Grandparents and grandchildren, and spouses thereof;
- (vi) Domestic partner and parents thereof, including domestic partners of any individual in 2 through 5 of this definition; and
- (vii) Any individual related by blood or affinity whose close association with the employee is the equivalent of a family relationship.

(5) Rental costs under leases which are required to be treated as capital leases under GAAP are allowable only up to the amount (as explained in paragraph (b) of this section) that would be allowed had the non-Federal entity purchased the property on the date the lease agreement was executed. The provisions of GAAP must be used to determine whether a lease is a capital lease. Interest costs related to capital leases are allowable to the extent they meet the criteria in § 200.449 Interest. Unallowable costs include amounts paid for profit, management fees, and taxes that would not have been incurred had the non-Federal entity purchased the property.

(6) The rental of any property owned by any individuals or entities affiliated with the non-Federal entity, to include commercial or residential real estate, for purposes such as the home office workspace is unallowable.

(d) Rental costs under leases which are required to be accounted for as a financed purchase under GASB standards or a finance lease under FASB standards under GAAP are allowable only up to the amount (as explained in paragraph (b) of this section) that would be allowed had the non-Federal entity purchased the property on the date the lease agreement was executed. Interest costs related to these leases are allowable to the extent they meet the criteria in § 200.449. Unallowable costs include amounts paid for profit, management fees, and taxes that would not have been incurred had the non-Federal entity purchased the property.

(e) Rental or lease payments are allowable under lease contracts where the non-Federal entity is required to recognize an intangible right-to-use lease asset (per GASB) or right of use operating lease asset (per FASB) for purposes of financial reporting in accordance with GAAP.

(f) The rental of any property owned by any individuals or entities affiliated with the non-Federal entity, to include commercial or residential real estate, for purposes such as the home office workspace is unallowable.

[78 FR 78608, Dec. 26, 2013, as amended at 85 FR 49569, Aug. 13, 2020]

## § 200.466 Scholarships and student aid costs.

(a) Costs of scholarships, fellowships, and other programs of student aid at IHEs are allowable only when the purpose of the Federal award is to provide training to selected participants and the charge is approved by the Federal awarding agency. However, tuition remission and other forms of compensation paid as, or in lieu of, wages to students performing necessary work are allowable provided that:

- (1) The individual is conducting activities necessary to the Federal award;

- (2) Tuition remission and other support are provided in accordance with established policy of the IHE and consistently provided in a like manner to students in return for similar activities conducted under Federal awards as well as other activities; and
  - (3) During the academic period, the student is enrolled in an advanced degree program at a non-Federal entity or affiliated institution and the activities of the student in relation to the Federal award are related to the degree program;
  - (4) The tuition or other payments are reasonable compensation for the work performed and are conditioned explicitly upon the performance of necessary work; and
  - (5) It is the IHE's practice to similarly compensate students under Federal awards as well as other activities.
- (b) Charges for tuition remission and other forms of compensation paid to students as, or in lieu of, salaries and wages must be subject to the reporting requirements in § 200.430, and must be treated as direct or indirect cost in accordance with the actual work being performed. Tuition remission may be charged on an average rate basis. See also § 200.431.

[78 FR 78608, Dec. 26, 2013, as amended at 85 FR 49569, Aug. 13, 2020]

### § 200.467 Selling and marketing costs.

Costs of selling and marketing any products or services of the non-Federal entity (unless allowed under § 200.421) are unallowable, except as direct costs, with prior approval by the Federal awarding agency when necessary for the performance of the Federal award.

[85 FR 49570, Aug. 13, 2020]

### § 200.468 Specialized service facilities.

- (a) The costs of services provided by highly complex or specialized facilities operated by the non-Federal entity, such as computing facilities, wind tunnels, and reactors are allowable, provided the charges for the services meet the conditions of either paragraph (b) or (c) of this section, and, in addition, take into account any items of income or Federal financing that qualify as applicable credits under § 200.406.
- (b) The costs of such services, when material, must be charged directly to applicable awards based on actual usage of the services on the basis of a schedule of rates or established methodology that:
  - (1) Does not discriminate between activities under Federal awards and other activities of the non-Federal entity, including usage by the non-Federal entity for internal purposes, and
  - (2) Is designed to recover only the aggregate costs of the services. The costs of each service must consist normally of both its direct costs and its allocable share of all indirect (F&A) costs. Rates must be adjusted at least biennially, and must take into consideration over/under-applied costs of the previous period(s).
- (c) Where the costs incurred for a service are not material, they may be allocated as indirect (F&A) costs.
- (d) Under some extraordinary circumstances, where it is in the best interest of the Federal Government and the non-Federal entity to establish alternative costing arrangements, such arrangements may be worked out with the Federal cognizant agency for indirect costs.

[78 FR 78608, Dec. 26, 2013, as amended at 85 FR 49569, Aug. 13, 2020]

## § 200.469 Student activity costs.

Costs incurred for intramural activities, student publications, student clubs, and other student activities, are unallowable, unless specifically provided for in the Federal award.

## § 200.470 Taxes (including Value Added Tax).

(a) For states, local governments and Indian tribes:

- (1) Taxes that a governmental unit is legally required to pay are allowable, except for self-assessed taxes that disproportionately affect Federal programs or changes in tax policies that disproportionately affect Federal programs.
- (2) Gasoline taxes, motor vehicle fees, and other taxes that are in effect user fees for benefits provided to the Federal Government are allowable.
- (3) This provision does not restrict the authority of the Federal awarding agency to identify taxes where Federal participation is inappropriate. Where the identification of the amount of unallowable taxes would require an inordinate amount of effort, the cognizant agency for indirect costs may accept a reasonable approximation thereof.

(b) For nonprofit organizations and IHEs:

- (1) In general, taxes which the non-Federal entity is required to pay and which are paid or accrued in accordance with GAAP, and payments made to local governments in lieu of taxes which are commensurate with the local government services received are allowable, except for:
  - (i) Taxes from which exemptions are available to the non-Federal entity directly or which are available to the non-Federal entity based on an exemption afforded the Federal Government and, in the latter case, when the Federal awarding agency makes available the necessary exemption certificates,
  - (ii) Special assessments on land which represent capital improvements, and
  - (iii) Federal income taxes.
- (2) Any refund of taxes, and any payment to the non-Federal entity of interest thereon, which were allowed as Federal award costs, will be credited either as a cost reduction or cash refund, as appropriate, to the Federal Government. However, any interest actually paid or credited to a non-Federal entity incident to a refund of tax, interest, and penalty will be paid or credited to the Federal Government only to the extent that such interest accrued over the period during which the non-Federal entity has been reimbursed by the Federal Government for the taxes, interest, and penalties.

(c) Value Added Tax (VAT) Foreign taxes charged for the purchase of goods or services that a non-Federal entity is legally required to pay in country is an allowable expense under Federal awards. Foreign tax refunds or applicable credits under Federal awards refer to receipts, or reduction of expenditures, which operate to offset or reduce expense items that are allocable to Federal awards as direct or indirect costs. To the extent that such credits accrued or received by the non-Federal entity relate to allowable cost, these costs must be credited to the Federal awarding agency either as costs or cash refunds. If the costs are credited back to the Federal award, the non-Federal entity may reduce the Federal share of costs by

the amount of the foreign tax reimbursement, or where Federal award has not expired, use the foreign government tax refund for approved activities under the Federal award with prior approval of the Federal awarding agency.

### § 200.471 Telecommunication costs and video surveillance costs.

- (a) Costs incurred for telecommunications and video surveillance services or equipment such as phones, internet, video surveillance, cloud servers are allowable except for the following circumstances:
- (b) Obligating or expending covered telecommunications and video surveillance services or equipment or services as described in § 200.216 to:
  - (1) Procure or obtain, extend or renew a contract to procure or obtain;
  - (2) Enter into a contract (or extend or renew a contract) to procure; or
  - (3) Obtain the equipment, services, or systems.

[85 FR 49570, Aug. 13, 2020]

### § 200.472 Termination costs.

Termination of a Federal award generally gives rise to the incurrence of costs, or the need for special treatment of costs, which would not have arisen had the Federal award not been terminated. Cost principles covering these items are set forth in this section. They are to be used in conjunction with the other provisions of this part in termination situations.

- (a) The cost of items reasonably usable on the non-Federal entity's other work must not be allowable unless the non-Federal entity submits evidence that it would not retain such items at cost without sustaining a loss. In deciding whether such items are reasonably usable on other work of the non-Federal entity, the Federal awarding agency should consider the non-Federal entity's plans and orders for current and scheduled activity. Contemporaneous purchases of common items by the non-Federal entity must be regarded as evidence that such items are reasonably usable on the non-Federal entity's other work. Any acceptance of common items as allocable to the terminated portion of the Federal award must be limited to the extent that the quantities of such items on hand, in transit, and on order are in excess of the reasonable quantitative requirements of other work.
- (b) If in a particular case, despite all reasonable efforts by the non-Federal entity, certain costs cannot be discontinued immediately after the effective date of termination, such costs are generally allowable within the limitations set forth in this part, except that any such costs continuing after termination due to the negligent or willful failure of the non-Federal entity to discontinue such costs must be unallowable.
- (c) Loss of useful value of special tooling, machinery, and equipment is generally allowable if:
  - (1) Such special tooling, special machinery, or equipment is not reasonably capable of use in the other work of the non-Federal entity,
  - (2) The interest of the Federal Government is protected by transfer of title or by other means deemed appropriate by the Federal awarding agency (see also § 200.313 (d)), and

- (3) The loss of useful value for any one terminated Federal award is limited to that portion of the acquisition cost which bears the same ratio to the total acquisition cost as the terminated portion of the Federal award bears to the entire terminated Federal award and other Federal awards for which the special tooling, machinery, or equipment was acquired.
- (d) Rental costs under unexpired leases are generally allowable where clearly shown to have been reasonably necessary for the performance of the terminated Federal award less the residual value of such leases, if:
  - (1) The amount of such rental claimed does not exceed the reasonable use value of the property leased for the period of the Federal award and such further period as may be reasonable, and
  - (2) The non-Federal entity makes all reasonable efforts to terminate, assign, settle, or otherwise reduce the cost of such lease. There also may be included the cost of alterations of such leased property, provided such alterations were necessary for the performance of the Federal award, and of reasonable restoration required by the provisions of the lease.
- (e) Settlement expenses including the following are generally allowable:
  - (1) Accounting, legal, clerical, and similar costs reasonably necessary for:
    - (i) The preparation and presentation to the Federal awarding agency of settlement claims and supporting data with respect to the terminated portion of the Federal award, unless the termination is for cause (see subpart D, including §§ 200.339-200.343); and
    - (ii) The termination and settlement of subawards.
  - (2) Reasonable costs for the storage, transportation, protection, and disposition of property provided by the Federal Government or acquired or produced for the Federal award.
- (f) Claims under subawards, including the allocable portion of claims which are common to the Federal award and to other work of the non-Federal entity, are generally allowable. An appropriate share of the non-Federal entity's indirect costs may be allocated to the amount of settlements with contractors and/or subrecipients, provided that the amount allocated is otherwise consistent with the basic guidelines contained in § 200.414. The indirect costs so allocated must exclude the same and similar costs claimed directly or indirectly as settlement expenses.

[78 FR 78608, Dec. 26, 2013. Redesignated and amended at 85 FR 49570, Aug. 13, 2020]

### **§ 200.473 Training and education costs.**

The cost of training and education provided for employee development is allowable.

[78 FR 78608, Dec. 26, 2013. Redesignated at 85 FR 49570, Aug. 13, 2020]

### **§ 200.474 Transportation costs.**

Costs incurred for freight, express, cartage, postage, and other transportation services relating either to goods purchased, in process, or delivered, are allowable. When such costs can readily be identified with the items involved, they may be charged directly as transportation costs or added to the cost of such items. Where identification with the materials received cannot readily be made, inbound transportation cost may be charged to the appropriate indirect (F&A) cost accounts if the non-Federal entity follows a consistent, equitable procedure in this respect. Outbound freight, if reimbursable under the terms and conditions of the Federal award, should be treated as a direct cost.

[78 FR 78608, Dec. 26, 2013. Redesignated at 85 FR 49570, Aug. 13, 2020]

## § 200.475 Travel costs.

- (a) **General.** Travel costs are the expenses for transportation, lodging, subsistence, and related items incurred by employees who are in travel status on official business of the non-Federal entity. Such costs may be charged on an actual cost basis, on a per diem or mileage basis in lieu of actual costs incurred, or on a combination of the two, provided the method used is applied to an entire trip and not to selected days of the trip, and results in charges consistent with those normally allowed in like circumstances in the non-Federal entity's non-federally-funded activities and in accordance with non-Federal entity's written travel reimbursement policies. Notwithstanding the provisions of § 200.444, travel costs of officials covered by that section are allowable with the prior written approval of the Federal awarding agency or pass-through entity when they are specifically related to the Federal award.
- (b) **Lodging and subsistence.** Costs incurred by employees and officers for travel, including costs of lodging, other subsistence, and incidental expenses, must be considered reasonable and otherwise allowable only to the extent such costs do not exceed charges normally allowed by the non-Federal entity in its regular operations as the result of the non-Federal entity's written travel policy. In addition, if these costs are charged directly to the Federal award documentation must justify that:
  - (1) Participation of the individual is necessary to the Federal award; and
  - (2) The costs are reasonable and consistent with non-Federal entity's established travel policy.
- (c)
  - (1) Temporary dependent care costs (as dependent is defined in 26 U.S.C. 152) above and beyond regular dependent care that directly results from travel to conferences is allowable provided that:
    - (i) The costs are a direct result of the individual's travel for the Federal award;
    - (ii) The costs are consistent with the non-Federal entity's documented travel policy for all entity travel; and
    - (iii) Are only temporary during the travel period.
  - (2) Travel costs for dependents are unallowable, except for travel of duration of six months or more with prior approval of the Federal awarding agency. See also § 200.432.
- (d) In the absence of an acceptable, written non-Federal entity policy regarding travel costs, the rates and amounts established under 5 U.S.C. 5701-11, ("Travel and Subsistence Expenses; Mileage Allowances"), or by the Administrator of General Services, or by the President (or his or her designee) pursuant to any provisions of such subchapter must apply to travel under Federal awards (48 CFR 31.205-46(a)).
- (e) **Commercial air travel.**
  - (1) Airfare costs in excess of the basic least expensive unrestricted accommodations class offered by commercial airlines are unallowable except when such accommodations would:
    - (i) Require circuitous routing;
    - (ii) Require travel during unreasonable hours;
    - (iii) Excessively prolong travel;
    - (iv) Result in additional costs that would offset the transportation savings; or

- (v) Offer accommodations not reasonably adequate for the traveler's medical needs. The non-Federal entity must justify and document these conditions on a case-by-case basis in order for the use of first-class or business-class airfare to be allowable in such cases.
- (2) Unless a pattern of avoidance is detected, the Federal Government will generally not question a non-Federal entity's determinations that customary standard airfare or other discount airfare is unavailable for specific trips if the non-Federal entity can demonstrate that such airfare was not available in the specific case.
- (f) **Air travel by other than commercial carrier.** Costs of travel by non-Federal entity-owned, -leased, or -chartered aircraft include the cost of lease, charter, operation (including personnel costs), maintenance, depreciation, insurance, and other related costs. The portion of such costs that exceeds the cost of airfare as provided for in paragraph (d) of this section, is unallowable.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75887, Dec. 19, 2014. Redesignated and amended at 85 FR 49570, Aug. 13, 2020]

### § 200.476 Trustees.

Travel and subsistence costs of trustees (or directors) at IHEs and nonprofit organizations are allowable. See also § 200.475.

[85 FR 49571, Aug. 13, 2020]

## Subpart F—Audit Requirements

Link to an amendment published at 89 FR 30136, Apr. 22, 2024.

### GENERAL

### § 200.500 Purpose.

This part sets forth standards for obtaining consistency and uniformity among Federal agencies for the audit of non-Federal entities expending Federal awards.

### AUDITS

### § 200.501 Audit requirements.

- (a) **Audit required.** A non-Federal entity that expends \$750,000 or more during the non-Federal entity's fiscal year in Federal awards must have a single or program-specific audit conducted for that year in accordance with the provisions of this part.
- (b) **Single audit.** A non-Federal entity that expends \$750,000 or more during the non-Federal entity's fiscal year in Federal awards must have a single audit conducted in accordance with § 200.514 except when it elects to have a program-specific audit conducted in accordance with paragraph (c) of this section.
- (c) **Program-specific audit election.** When an auditee expends Federal awards under only one Federal program (excluding R&D) and the Federal program's statutes, regulations, or the terms and conditions of the Federal award do not require a financial statement audit of the auditee, the auditee may elect to have a

program-specific audit conducted in accordance with § 200.507. A program-specific audit may not be elected for R&D unless all of the Federal awards expended were received from the same Federal agency, or the same Federal agency and the same pass-through entity, and that Federal agency, or pass-through entity in the case of a subrecipient, approves in advance a program-specific audit.

- (d) **Exemption when Federal awards expended are less than \$750,000.** A non-Federal entity that expends less than \$750,000 during the non-Federal entity's fiscal year in Federal awards is exempt from Federal audit requirements for that year, except as noted in § 200.503, but records must be available for review or audit by appropriate officials of the Federal agency, pass-through entity, and Government Accountability Office (GAO).
- (e) **Federally Funded Research and Development Centers (FFRDC).** Management of an auditee that owns or operates a FFRDC may elect to treat the FFRDC as a separate entity for purposes of this part.
- (f) **Subrecipients and contractors.** An auditee may simultaneously be a recipient, a subrecipient, and a contractor. Federal awards expended as a recipient or a subrecipient are subject to audit under this part. The payments received for goods or services provided as a contractor are not Federal awards. Section § 200.331 sets forth the considerations in determining whether payments constitute a Federal award or a payment for goods or services provided as a contractor.
- (g) **Compliance responsibility for contractors.** In most cases, the auditee's compliance responsibility for contractors is only to ensure that the procurement, receipt, and payment for goods and services comply with Federal statutes, regulations, and the terms and conditions of Federal awards. Federal award compliance requirements normally do not pass through to contractors. However, the auditee is responsible for ensuring compliance for procurement transactions which are structured such that the contractor is responsible for program compliance or the contractor's records must be reviewed to determine program compliance. Also, when these procurement transactions relate to a major program, the scope of the audit must include determining whether these transactions are in compliance with Federal statutes, regulations, and the terms and conditions of Federal awards.
- (h) **For-profit subrecipient.** Since this part does not apply to for-profit subrecipients, the pass-through entity is responsible for establishing requirements, as necessary, to ensure compliance by for-profit subrecipients. The agreement with the for-profit subrecipient must describe applicable compliance requirements and the for-profit subrecipient's compliance responsibility. Methods to ensure compliance for Federal awards made to for-profit subrecipients may include pre-award audits, monitoring during the agreement, and post-award audits. See also § 200.332.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75887, Dec. 19, 2014; 85 FR 49571, Aug. 13, 2020]

## § 200.502 Basis for determining Federal awards expended.

- (a) **Determining Federal awards expended.** The determination of when a Federal award is expended must be based on when the activity related to the Federal award occurs. Generally, the activity pertains to events that require the non-Federal entity to comply with Federal statutes, regulations, and the terms and conditions of Federal awards, such as: expenditure/expense transactions associated with awards including grants, cost-reimbursement contracts under the FAR, compacts with Indian Tribes, cooperative agreements, and direct appropriations; the disbursement of funds to subrecipients; the use of loan proceeds under loan and loan guarantee programs; the receipt of property; the receipt of surplus property; the receipt or use of program income; the distribution or use of food commodities; the disbursement of amounts entitling the non-Federal entity to an interest subsidy; and the period when insurance is in force.

- (b) **Loan and loan guarantees (loans).** Since the Federal Government is at risk for loans until the debt is repaid, the following guidelines must be used to calculate the value of Federal awards expended under loan programs, except as noted in paragraphs (c) and (d) of this section:
  - (1) Value of new loans made or received during the audit period; plus
  - (2) Beginning of the audit period balance of loans from previous years for which the Federal Government imposes continuing compliance requirements; plus
  - (3) Any interest subsidy, cash, or administrative cost allowance received.
- (c) **Loan and loan guarantees (loans) at IHEs.** When loans are made to students of an IHE but the IHE does not make the loans, then only the value of loans made during the audit period must be considered Federal awards expended in that audit period. The balance of loans for previous audit periods is not included as Federal awards expended because the lender accounts for the prior balances.
- (d) **Prior loan and loan guarantees (loans).** Loans, the proceeds of which were received and expended in prior years, are not considered Federal awards expended under this part when the Federal statutes, regulations, and the terms and conditions of Federal awards pertaining to such loans impose no continuing compliance requirements other than to repay the loans.
- (e) **Endowment funds.** The cumulative balance of Federal awards for endowment funds that are federally restricted are considered Federal awards expended in each audit period in which the funds are still restricted.
- (f) **Free rent.** Free rent received by itself is not considered a Federal award expended under this part. However, free rent received as part of a Federal award to carry out a Federal program must be included in determining Federal awards expended and subject to audit under this part.
- (g) **Valuing non-cash assistance.** Federal non-cash assistance, such as free rent, food commodities, donated property, or donated surplus property, must be valued at fair market value at the time of receipt or the assessed value provided by the Federal agency.
- (h) **Medicare.** Medicare payments to a non-Federal entity for providing patient care services to Medicare-eligible individuals are not considered Federal awards expended under this part.
- (i) **Medicaid.** Medicaid payments to a subrecipient for providing patient care services to Medicaid-eligible individuals are not considered Federal awards expended under this part unless a state requires the funds to be treated as Federal awards expended because reimbursement is on a cost-reimbursement basis.
- (j) **Certain loans provided by the National Credit Union Administration.** For purposes of this part, loans made from the National Credit Union Share Insurance Fund and the Central Liquidity Facility that are funded by contributions from insured non-Federal entities are not considered Federal awards expended.

[78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75887, Dec. 19, 2014]

### § 200.503 Relation to other audit requirements.

- (a) An audit conducted in accordance with this part must be in lieu of any financial audit of Federal awards which a non-Federal entity is required to undergo under any other Federal statute or regulation. To the extent that such audit provides a Federal agency with the information it requires to carry out its responsibilities under Federal statute or regulation, a Federal agency must rely upon and use that information.

- (b) Notwithstanding subsection (a), a Federal agency, Inspector General, or GAO may conduct or arrange for additional audits which are necessary to carry out its responsibilities under Federal statute or regulation. The provisions of this part do not authorize any non-Federal entity to constrain, in any manner, such Federal agency from carrying out or arranging for such additional audits, except that the Federal agency must plan such audits to not be duplicative of other audits of Federal awards. Prior to commencing such an audit, the Federal agency or pass-through entity must review the FAC for recent audits submitted by the non-Federal entity, and to the extent such audits meet a Federal agency or pass-through entity's needs, the Federal agency or pass-through entity must rely upon and use such audits. Any additional audits must be planned and performed in such a way as to build upon work performed, including the audit documentation, sampling, and testing already performed, by other auditors.
- (c) The provisions of this part do not limit the authority of Federal agencies to conduct, or arrange for the conduct of, audits and evaluations of Federal awards, nor limit the authority of any Federal agency Inspector General or other Federal official. For example, requirements that may be applicable under the FAR or CAS and the terms and conditions of a cost-reimbursement contract may include additional applicable audits to be conducted or arranged for by Federal agencies.
- (d) **Federal agency to pay for additional audits.** A Federal agency that conducts or arranges for additional audits must, consistent with other applicable Federal statutes and regulations, arrange for funding the full cost of such additional audits.
- (e) **Request for a program to be audited as a major program.** A Federal awarding agency may request that an auditee have a particular Federal program audited as a major program in lieu of the Federal awarding agency conducting or arranging for the additional audits. To allow for planning, such requests should be made at least 180 calendar days prior to the end of the fiscal year to be audited. The auditee, after consultation with its auditor, should promptly respond to such a request by informing the Federal awarding agency whether the program would otherwise be audited as a major program using the risk-based audit approach described in § 200.518 and, if not, the estimated incremental cost. The Federal awarding agency must then promptly confirm to the auditee whether it wants the program audited as a major program. If the program is to be audited as a major program based upon this Federal awarding agency request, and the Federal awarding agency agrees to pay the full incremental costs, then the auditee must have the program audited as a major program. A pass-through entity may use the provisions of this paragraph for a subrecipient.

[78 FR 78608, Dec. 26, 2013, as amended at 85 FR 49570, Aug. 13, 2020]

## § 200.504 Frequency of audits.

Except for the provisions for biennial audits provided in paragraphs (a) and (b) of this section, audits required by this part must be performed annually. Any biennial audit must cover both years within the biennial period.

- (a) A state, local government, or Indian tribe that is required by constitution or statute, in effect on January 1, 1987, to undergo its audits less frequently than annually, is permitted to undergo its audits pursuant to this part biennially. This requirement must still be in effect for the biennial period.
- (b) Any nonprofit organization that had biennial audits for all biennial periods ending between July 1, 1992, and January 1, 1995, is permitted to undergo its audits pursuant to this part biennially.

## § 200.505 Sanctions.

In cases of continued inability or unwillingness to have an audit conducted in accordance with this part, Federal agencies and pass-through entities must take appropriate action as provided in § 200.339.

[85 FR 49571, Aug. 13, 2020]

## § 200.506 Audit costs.

See § 200.425.

[85 FR 49571, Aug. 13, 2020]

## § 200.507 Program-specific audits.

- (a) **Program-specific audit guide available.** In some cases, a program-specific audit guide will be available to provide specific guidance to the auditor with respect to internal controls, compliance requirements, suggested audit procedures, and audit reporting requirements. A listing of current program-specific audit guides can be found in the compliance supplement, Part 8, Appendix VI, Program-Specific Audit Guides, which includes a website where a copy of the guide can be obtained. When a current program-specific audit guide is available, the auditor must follow GAGAS and the guide when performing a program-specific audit.
- (b) **Program-specific audit guide not available.**
  - (1) When a current program-specific audit guide is not available, the auditee and auditor must have basically the same responsibilities for the Federal program as they would have for an audit of a major program in a single audit.
